INTERNATIONAL LAW

Ninth Edition

International Law is the definitive and authoritative text on the subject. It has long been established as a leading authority in the field, offering an unbeatable combination of clarity of expression and academic rigour, ensuring understanding and analysis in an engaging and authoritative style. Explaining the leading rules, practice and case-law, this treatise retains and develops the detailed referencing which encourages and assists the reader in further study. This new edition has been fully updated to reflect recent developments. In particular, it has expanded the treatment of space law and of international economic law, and introduced new sections on cyber operations and cyber warfare, as well as reflecting the COVID-19 crisis. This work motivates and challenges students and professionals while remaining accessible and engaging. Both clarifying fundamental principles and facilitating additional research, *International Law* is invaluable for students and for those occupied in private practice, governmental service and international organisations.

Malcolm N. Shaw, QC, is a practising barrister at Essex Court Chambers and Senior Fellow at the Lauterpacht Centre for International Law at Cambridge University. He is Emeritus Sir Robert Jennings Professor of International Law at Leicester University. One of the world's leading international lawyers, he is an Associé of the Institut de Droit International, former Trustee of the British Institute of International and Comparative Law and a founding

member of the Curatorium of the Xiamen Academy of International Law,
China.

Praise for the 9th edition

‘The nine lives of Malcolm Shaw’s classic study, *International Law*, demonstrate in this ninth edition that it remains the indispensable single volume work in its ever expanding field.’

Stephen M. Schwebel, Former Judge of the
International Court of Justice

‘At a time of rapid change, a new edition of Malcolm Shaw’s invaluable book deserves the widest welcome.’

Christopher Greenwood, Master of Magdalene College,
Cambridge, and former British Judge at the
International Court of Justice

Praise from the 8th edition

‘Malcolm Shaw’s *International Law* continues to offer a uniquely comprehensive, rigorous and systematic account of the entire sphere of international law. Shaw has a masterful talent to carefully sift through the complex legally relevant data and to provide the reader with an accurate and accessible analysis of the state of the art without sacrificing sensitivity to multidimensionality and attention to relevant

details. Shaw's book was my introduction to international law, and over the years continued to serve as the introduction for generations of my students. The eighth edition continues this important tradition and offers yet another major contribution to international law.'

Eyal Benvenisti, University of Cambridge

'Throughout my academic career, I have used this book for teaching and researching in international law and have gladly recommended it to my students who like it and find it accessible. It is an excellent source of reference in international law. The language is lucid, the coverage is comprehensive and the organisation of the material is reader-friendly. As an academic interested in international economic law, I was glad to see that the new edition now covers this area of law too, which is a rapidly evolving and fast-changing area of international law. All in all, the new edition is very much a welcome addition to the literature in international law and should serve as the definitive and authoritative text on the subject for practitioners, academics, students, diplomats and others interested in both international law and international relations.'

Surya P. Subedi, University of Leeds

Index

Preface to the Ninth Edition

The chapters in this book have been re-examined, updated and, where necessary, rewritten in order to try and cope with the ever-increasing volume of new materials on international law. I have, in particular, been able to increase the coverage of outer space and international economic law, and to introduce sections on cyber activities, cyber warfare and the COVID-19 pandemic crisis. I have also been able to add somewhat to the chapters on international law and municipal law and on recognition in the light of important case-law. However, to compensate, some trimming has been necessary in other parts to free up the necessary space.

I would especially like to thank the Cambridge University Press team of Caitlin Lisle, Marianne Nield and Amy Mower for their help and encouragement in the production of this edition and to Finola O’Sullivan who has monitored this work through many editions now. She is a friend as well as a guide. I am also grateful to Sophie Rosinke for the thorough and excellent copy-editing of the text and preparation of the tables and to Judy Oliver for so carefully preparing the index. Particular appreciation is owed to Tim Clark for his meticulous research assistance, accomplished with speed and organisation. A lasting debt remains, however, to Sir Elihu Lauterpacht QC, a towering figure in international law, whose encouragement and assistance in the initial development of this book were indispensable. His continuing interest and friendship were always deeply appreciated and are now much missed. I would also like to thank my many colleagues from

around the world for their advice and support, while reassuring them that all responsibility for the end product rests squarely with me.

As ever, the deepest thanks are due to my wife Judith and my children, Talia, Ilan and Daniella and now my grandchildren, Mika, Eden, Zevi and Zak. I am particularly grateful to Ilan for once again producing an imaginative, intriguing and quite remarkable cover painting.

The date of this work is July 2020, but I have been able to insert some additional material during the production process. As this work entered the proofing stage, my beloved wife Judith passed away after a long and brave struggle against a cruel illness. She was the heart and foundation of my life. May she rest in peace.

Table of Cases

767 Third Avenue Associates v. Permanent Mission of the Republic of Zaire to the United Nations 988 F.2d 295 (1993); 99 ILR 194 652, 654

The Nature and Development of International Law

In the long march of mankind from the cave to the computer a central role has always been played by the idea of law – the idea that order is necessary and chaos inimical to a just and stable existence. Every society, whether it be large or small, powerful or weak, has created for itself a framework of principles within which to develop. What can be done, what cannot be done, permissible acts, forbidden acts, have all been spelt out within the consciousness of that community. Progress, with its inexplicable leaps and bounds, has always been based upon the group as men and women combine to pursue commonly accepted goals, whether these be hunting animals, growing food or simply making money.

Law is that element which binds the members of the community together in their adherence to recognised values and standards. It is both permissive in allowing individuals to establish their own legal relations with rights and duties, as in the creation of contracts, and coercive, as it punishes those who infringe its regulations. Law consists of a series of rules regulating behaviour, and reflecting, to some extent, the ideas and preoccupations of the society within which it functions.

And so it is with what is termed international law, with the important difference that the principal subjects of international law are nation-states, not individual citizens. There are many contrasts between the law within a country (municipal law) and the law that operates outside and between states, international organisations and, in certain cases, individuals.

International law itself is divided into conflict of laws (or private international law as it is sometimes called) and public international law (usually just termed international law).¹ The former deals with those cases, *within* particular legal systems, in which foreign elements obtrude, raising questions as to the application of foreign law or the role of foreign courts.² For example, if two Englishmen make a contract in France to sell goods situated in Paris, an English court would apply French law as regards the validity of that contract. By contrast, public international law is not simply an adjunct of a legal order, but a separate system altogether,³ and it is this field that will be considered in this book.

Public international law covers relations between states in all their myriad forms, from war to satellites and from trade to human rights and now on to cyber issues, and regulates the operations of the many international and regional institutions. It may be universal or general, in which case the stipulated rules bind all the states (or practically all depending upon the nature of the rule), or regional, whereby a group of states linked geographically or ideologically may recognise special rules applying only to them, for example, the practice of diplomatic asylum that has developed to its greatest extent in Latin America.⁴ The rules of international law must be distinguished from what is called international comity, or practices such as

saluting the flags of foreign warships at sea, which are implemented solely through courtesy and are not regarded as legally binding.⁵ Similarly, the mistake of confusing international law with international morality must be avoided. While they may meet at certain points, the former discipline is a legal one as regards both its content and its form, while the concept of international morality is a branch of ethics. This does not mean, however, that international law can be divorced from its values.

In this chapter and the next, the characteristics of the international legal system and the historical and theoretical background necessary to a proper appreciation of the part to be played by the law in international law will be examined.

Law and Politics in the World Community

It is the legal quality of international law that is the first question to be posed. Each side to an international dispute will doubtless claim legal justification for its actions and within the international system there is no independent institution able to determine the issue and give a final decision.

Virtually everybody who starts reading about international law does so having learned or absorbed something about the principal characteristics of ordinary or domestic law. Such identifying marks would include the existence of a recognised body to legislate or create laws, a hierarchy of courts with compulsory jurisdiction to settle disputes over such laws and an accepted system of enforcing those laws. Without a legislature, judiciary and executive, it would seem that one cannot talk about a legal order.⁶ And

international law does not fit this model. International law has no legislature. The General Assembly of the United Nations comprising delegates from all the member states exists, but its resolutions are not legally binding save for certain of the organs of the United Nations for certain purposes.⁷ There is no system of courts. The International Court of Justice does exist at The Hague, but it can only decide cases when both sides agree⁸ and it cannot ensure that its decisions are complied with (although the Security Council of the United Nations is responsible for enforcement). Above all there is no executive or governing entity. The UN Security Council, which was intended to have such a role in a sense, has at times been effectively constrained by the veto power of the five permanent members (the United States, the Soviet Union – now the Russian Federation – China, France and the United Kingdom).⁹ Thus, if there is no identifiable institution either to establish rules, or to clarify them or see that those who break them are punished, how can what is called international law be law?

It will, of course, be realised that the basis for this line of argument is the comparison of domestic law with international law, and the assumption of an analogy between the national system and the international order. And this is at the heart of all discussions about the nature of international law.

At the turn of the nineteenth century, the English philosopher John Austin elaborated a theory of law based upon the notion of a sovereign issuing a command backed by a sanction or punishment. Since international law did not fit within that definition, it was relegated to the category of ‘positive morality’.¹⁰ This concept has been criticised for oversimplifying and even confusing the true nature of law within a society and for overemphasising the

role of the sanction within the system by linking it to every rule.¹¹ This is not the place for a comprehensive summary of Austin's theory, but the idea of coercion as an integral part of any legal order is a vital one that needs to be examined in the context of international law.

The Role of Force

There is no unified system of sanctions¹² in international law in the sense that there is in municipal law, but there are circumstances in which the use of force is regarded as justified and legal. Within the United Nations system, sanctions may be imposed by the Security Council upon the determination of a threat to the peace, breach of the peace or act of aggression.¹³ Such sanctions may be economic, for example those proclaimed in 1966 against Rhodesia,¹⁴ or military as in the Korean War in 1950,¹⁵ or indeed both, as in 1990 against Iraq.¹⁶

Coercive action within the framework of the United Nations is rare because it requires coordination among the five permanent members of the Security Council and this obviously needs an issue not regarded by any of the great powers as a threat to their vital interests.

Korea was an exception and joint action could only be undertaken because of the fortuitous absence of the Soviet Union from the Council as a protest at the seating of the Nationalist Chinese representatives.¹⁷

Apart from such institutional sanctions, one may note the bundle of rights to take violent action known as self-help.¹⁸ This procedure to resort to force to

defend certain rights is characteristic of primitive systems of law with blood-feuds, but in the domestic legal order such procedures and methods are now within the exclusive control of the established authority. States may use force in self-defence, if the object of aggression, and may take action in response to the illegal acts of other states. In such cases the states themselves decide whether to take action and, if so, the extent of their measures, and there is no supreme body to rule on their legality or otherwise, in the absence of an examination by the International Court of Justice, acceptable to both parties, although international law does lay down relevant rules.¹⁹

Accordingly, those writers who put the element of force to the forefront of their theories face many difficulties in describing the nature, or rather the legal nature, of international law, with its lack of a coherent, recognised and comprehensive framework of sanctions. To see the sanctions of international law in the states' rights of self-defence and reprisals²⁰ is to misunderstand the role of sanctions within a system because they are at the disposal of the states, not the system itself. Neither must it be forgotten that the current trend in international law is to restrict the use of force as far as possible, thus leading to the absurd result that the more force is controlled in international society, the less legal international law becomes.

Since one cannot discover the nature of international law by reference to a definition of law predicated upon sanctions, the character of the international legal order has to be examined in order to seek to discover whether in fact states feel obliged to obey the rules of international law and, if so, why. If, indeed, the answer to the first question is negative, that states do not feel the

necessity to act in accordance with such rules, then there does not exist any system of international law worthy of the name.

The International System²¹

The key to the search lies within the unique attributes of the international system in the sense of the network of relationships existing primarily, if not exclusively, between states recognising certain common principles and ways of doing things.²² While the legal structure within all but the most primitive societies is hierarchical and authority is vertical, the international system is horizontal, consisting of over 190 independent states, all equal in legal theory (in that they all possess the characteristics of sovereignty) and recognising no one in authority over them. The law is above individuals in domestic systems, but international law only exists as between the states. Individuals only have the choice as to whether to obey the law or not. They do not create the law. That is done by specific institutions. In international law, on the other hand, it is the states themselves that create the law and obey or disobey it.²³ This, of course, has profound repercussions as regards the sources of law as well as the means for enforcing accepted legal rules.

International law, as will be shown in succeeding chapters, is primarily formulated by international agreements, which create rules binding upon the signatories, and customary rules, which are basically state practices recognised by the community at large as laying down patterns of conduct that have to be complied with.

However, it may be argued that since states themselves sign treaties and engage in action that they may or may not regard as legally obligatory, international law would appear to consist of a series of rules from which

states may pick and choose. Contrary to popular belief, states do observe international law, and violations are comparatively rare. However, such violations (like armed attacks and racial oppression) are well publicised and strike at the heart of the system, the creation and preservation of international peace and justice. But just as incidents of murder, robbery and rape do occur within national legal orders without destroying the system as such, so analogously assaults upon international legal rules point up the weaknesses of the system without denigrating their validity or their necessity. Thus, despite the occasional gross violation, the vast majority of the provisions of international law are followed.²⁴

In the daily routine of international life, large numbers of agreements and customs are complied with. However, the need is felt in the hectic interplay of world affairs for some kind of regulatory framework or rules network within which the game can be played, and international law fulfils that requirement. States feel this necessity because it imports an element of stability and predictability into the situation.

Where countries are involved in a disagreement or a dispute, it is handy to have recourse to the rules of international law even if there are conflicting interpretations, since at least there is a common frame of reference and one state will be aware of how the other state will develop its argument. They will both be talking a common language and this factor of communication is vital since misunderstandings occur so easily and often with tragic consequences. Where the antagonists dispute the understanding of a particular rule and adopt opposing stands as regards its implementation, they are at least on the same wavelength and communicate by means of the same phrases. That is

something. It is not everything, for it is a mistake as well as inaccurate to claim for international law more than it can possibly deliver. It can constitute a mutually understandable vocabulary book and suggest possible solutions which follow from a study of its principles. What it cannot do is solve every problem no matter how dangerous or complex merely by being there.

International law has not yet been developed, if it ever will, to that particular stage and one should not exaggerate its capabilities while pointing to its positive features. It is, however, a way for states to conduct their business together in a relatively congenial context.

But what is to stop a state from simply ignoring international law when proceeding upon its chosen policy? Can a legal rule against aggression, for example, of itself prevail over political temptations? There is no international police force to prevent such an action, but there are a series of other considerations closely bound up with the character of international law which might well cause a potential aggressor to forbear.

There is the element of reciprocity at work and a powerful weapon it can be. States quite often do not pursue one particular course of action which might bring them short-term gains, because it could disrupt the mesh of reciprocal tolerance which could very well bring long-term disadvantages. For example, states everywhere protect the immunity of foreign diplomats for not to do so would place their own officials abroad at risk.²⁵ This constitutes an inducement to states to act reasonably and moderate demands in the expectation that this will similarly encourage other states to act reasonably and so avoid confrontations. Because the rules can ultimately be changed by states altering their patterns of behaviour and causing one custom to

supersede another, or by mutual agreement, a certain definite reference to political life is retained. But the point must be made that a state, after weighing up all possible alternatives, might very well feel that the only method to protect its vital interests would involve a violation of international law and that responsibility would just have to be taken. Where survival is involved international law may take second place.

Another significant factor is the advantages, or ‘rewards’, that may occur in certain situations from an observance of international law. It may encourage friendly or neutral states to side with one country involved in a conflict rather than its opponent, and even take a more active role than might otherwise have been the case. In many ways, it is an appeal to public opinion for support and all states employ this tactic.

In many ways, it reflects the esteem in which law is held. The Soviet Union made considerable use of legal arguments in its effort to establish its non-liability to contribute towards the peacekeeping operations of the United Nations,²⁶ and the Americans, too, justified their activities with regard to Cuba²⁷ and Vietnam²⁸ by reference to international law. In some cases, it may work and bring considerable support in its wake, in many cases it will not; but in any event the very fact that all states do it is a constructive sign.

A further element worth mentioning in this context is the constant formulation of international business in characteristically legal terms. Points of view and disputes, in particular, are framed legally with references to precedent, international agreements and even the opinions of juristic authors. Claims are pursued with regard to the rules of international law and not in

terms of, for example, morality or ethics.²⁹ This has brought into being a class of officials throughout governmental departments, in addition to those working in international institutions, versed in international law and carrying on the everyday functions of government in a law-oriented way. Many writers have, in fact, emphasised the role of officials in the actual functioning of law and the influence they have upon the legal process. To this one may add more generally the role of those actively working in the field academically and professionally.³⁰

Having come to the conclusion that states do observe international law and will usually only violate it on an issue regarded as vital to their interests, the question arises as to the basis of this sense of obligation.³¹ The nineteenth century, with its business-oriented philosophy, stressed the importance of the contract, as the legal basis of an agreement freely entered into by both (or all) sides, and this influenced the theory of consent in international law.³² States were independent, and free agents, and accordingly they could only be bound with their own consent. There was no authority in existence able theoretically or practically to impose rules upon the various nation-states. This approach found its extreme expression in the theory of auto-limitation, or self-limitation, which declared that states could only be obliged to comply with international legal rules if they had first agreed to be so obliged.³³

Nevertheless, this theory is most unsatisfactory as an account of why international law is regarded as binding or even as an explanation of the international legal system.³⁴ To give one example, there are over 100 states that have come into existence since the end of the Second World War and by no stretch of the imagination can it be said that such states have consented to

all the rules of international law formed prior to their establishment. It could be argued that by ‘accepting independence’, states consent to all existing rules, but to take this view relegates consent to the role of a mere fiction.³⁵

This theory also fails as an adequate explanation of the international legal system, because it does not take into account the tremendous growth in international institutions and the network of rules and regulations that have emerged from them within the last generation.

To accept consent as the basis for obligation in international law³⁶ begs the question as to what happens when consent is withdrawn. The state’s reversal of its agreement to a rule does not render that rule optional or remove from it its aura of legality. It merely places that state in breach of its obligations under international law if that state proceeds to act upon its decision. Indeed, the principle that agreements are binding (*pacta sunt servanda*) upon which all treaty law must be based cannot itself be based upon consent.³⁷

One current approach to this problem is to refer to the doctrine of consensus.³⁸ This reflects the influence of the majority in creating new norms of international law and the acceptance by other states of such new rules. It attempts to put into focus the change of emphasis that is beginning to take place from exclusive concentration upon the nation-state to a consideration of the developing forms of international cooperation where such concepts as consent and sanction are inadequate to explain what is happening.

Of course, one cannot ignore the role of consent in international law. To recognise its limitations is not to neglect its significance. Much of

international law is constituted by states expressly agreeing to specific normative standards, most obviously by entering into treaties. This cannot be minimised. Nevertheless, it is preferable to consider consent as important not only with regard to specific rules specifically accepted (which is not the sum total of international law, of course), but in the light of the approach of states generally to the totality of rules, understandings, patterns of behaviour and structures underpinning and constituting the international system.³⁹ In a broad sense, states accept or consent to the general system of international law, for in reality without that no such system could possibly operate. It is this approach which may be characterised as consensus or the essential framework within which the demand for individual state consent is transmuted into community acceptance.

It is important to note that while states from time to time object to particular rules of international law and seek to change them, no state has sought to maintain that it is free to object to the system as a whole. Each individual state, of course, has the right to seek to influence by word or deed the development of specific rules of international law, but the creation of new customary rules is not dependent upon the express consent of each particular state.

The Function of Politics

It is clear that there can never be a complete separation between law and policy. No matter what theory of law or political philosophy is professed, the inextricable bonds linking law and politics must be recognised.

Within developed societies a distinction is made between the formulation of policy and the method of its enforcement. In the United Kingdom, Parliament legislates while the courts adjudicate and a similar division is maintained in the United States between the Congress and the courts system. The purpose of such divisions, of course, is to prevent a concentration of too much power within one branch of government. Nevertheless, it is the political branch which makes laws and in the first place creates the legal system. Even within the hierarchy of courts, the judges have leeway in interpreting the law and in the last resort make decisions from among a number of alternatives.⁴⁰ This position, however, should not be exaggerated because a number of factors operate to conceal and lessen the impact of politics upon the legal process. Foremost among these is the psychological element of tradition and the development of the so-called 'law-habit'.⁴¹ A particular legal atmosphere has been created, which is buttressed by the political system and recognises the independent existence of law institutions and methods of operation characterised as 'just' or 'legal'. In most countries overt interference with the juridical process would be regarded as an attack upon basic principles and hotly contested. The use of legal language and accepted procedures together with the pride of the legal profession reinforce the system and emphasise the degree of distance maintained between the legislative–executive organs and the judicial structure.⁴²

However, when one looks at the international legal scene the situation changes. The arbiters of the world order are, in the last resort, the states and they both make the rules (ignoring for the moment the secondary, if growing, field of international organisations) and interpret and enforce them.

While it is possible to discern an ‘international legal habit’ among governmental and international officials, the machinery necessary to enshrine this does not exist.

Politics is much closer to the heart of the system than is perceived within national legal orders, and power much more in evidence.⁴³ The interplay of law and politics in world affairs is much more complex and difficult to unravel, and signals a return to the earlier discussion as to why states comply with international rules. Power politics stresses competition, conflict and supremacy and adopts as its core the struggle for survival and influence.⁴⁴ International law aims for harmony and the regulation of disputes. It attempts to create a framework, no matter how rudimentary, which can act as a kind of shock-absorber clarifying and moderating claims and endeavouring to balance interests. In addition, it sets out a series of principles declaring how states should behave. Just as any domestic community must have a background of ideas and hopes to aim at, even if few can be or are ever attained, so the international community, too, must bear in mind its ultimate values.

However, these ultimate values are in a formal sense kept at arm’s length from the legal process. As the International Court noted in the *South West Africa* case:⁴⁵ ‘It is a court of law, and can take account of moral principles only in so far as these are given a sufficient expression in legal form. Law exists, it is said, to serve a social need; but precisely for that reason it can do so only through and within the limits of its own discipline. Otherwise, it is not a legal service that would be rendered.’⁴⁶

International law cannot be a source of instant solutions to problems of conflict and confrontation because of its own inherent weaknesses in structure and content. To fail to recognise this encourages a utopian approach which, when faced with reality, will fail.⁴⁷ On the other hand, the cynical attitude with its obsession with brute power is equally inaccurate, if more depressing.

It is the medium road, recognising the strength and weakness of international law and pointing out what it can achieve and what it cannot, which offers the best hope. Man seeks order, welfare and justice not only within the state in which he lives, but also within the international system in which he lives.

Historical Development⁴⁸

The foundations of international law (or the law of nations) as it is understood today lie firmly in the development of Western culture and political organisation.

The growth of European notions of sovereignty and the independent nation-state required an acceptable method whereby inter-state relations could be conducted in accordance with commonly accepted standards of behaviour, and international law filled the gap. But although the law of nations took root and flowered with the sophistication of Renaissance Europe, the seeds of this particular hybrid plant are of far older lineage. They reach far back into history.

Early Origins

While the modern international system can be traced back some 400 years, certain of the basic concepts of international law can be discerned in political relationships thousands of years ago.⁴⁹ Around 2100 BC, for instance, a solemn treaty was signed between the rulers of Lagash and Umma, the city-states situated in the area known to historians as Mesopotamia. It was inscribed on a stone block and concerned the establishment of a defined boundary to be respected by both sides under pain of alienating a number of Sumerian gods.⁵⁰ The next major instance known of an important, binding, international treaty is that concluded over 1,000 years later between Rameses II of Egypt and the king of the Hittites for the establishment of eternal peace

and brotherhood.⁵¹ Other points covered in that agreement signed, it would seem, at Kadesh, north of Damascus, included respect for each other's territorial integrity, the termination of a state of aggression and the setting up of a form of defensive alliance.

Since that date many agreements between the rival Middle Eastern powers were concluded, usually aimed at embodying in a ritual form a state of subservience between the parties or attempting to create a political alliance to contain the influence of an over-powerful empire.⁵²

The role of ancient Israel must also be noted. A universal ethical stance coupled with rules relating to warfare were handed down to other peoples and religions and the demand for justice and a fair system of law founded upon strict morality permeated the thought and conduct of subsequent generations.⁵³ For example, the Prophet Isaiah declared that sworn agreements, even where made with the enemy, must be performed.⁵⁴ Peace and social justice were the keys to man's existence, not power.

After much neglect, there is now more consideration of the cultures and standards that evolved, before the birth of Christ, in the Far East, in the Indian⁵⁵ and Chinese⁵⁶ civilisations. Many of the Hindu rules displayed a growing sense of morality and generosity and the Chinese Empire devoted much thought to harmonious relations between its constituent parts. Regulations controlling violence and the behaviour of varying factions with regard to innocent civilians were introduced and ethical values instilled in the education of the ruling classes. In times of Chinese dominance, a regional

tributary-states system operated which fragmented somewhat in times of weakness, but this remained culturally alive for many centuries.

However, the predominant approach of ancient civilisations was geographically and culturally restricted. There was no conception of an international community of states co-existing within a defined framework. The scope for any 'international law' of states was extremely limited and all that one can point to is the existence of certain ideals, such as the sanctity of treaties, which have continued to this day as important elements in society. But the notion of a universal community with its ideal of world order was not in evidence.

The era of classical Greece, from about the sixth century BC and onwards for a couple of hundred years, has, one must note, been of overwhelming significance for European thought. Its critical and rational turn of mind, its constant questioning and analysis of man and nature and its love of argument and debate were spread throughout Europe and the Mediterranean world by the Roman Empire which adopted Hellenic culture wholesale, and penetrated Western consciousness with the Renaissance. However, Greek awareness was limited to their own competitive city-states and colonies. Those of different origin were barbarians not deemed worthy of association.

The value of Greece in a study of international law lies partly in the philosophical, scientific and political analyses bequeathed to mankind and partly in the fascinating state of interrelationship built up within the Hellenistic world.⁵⁷ Numerous treaties linked the city-states together in a network of commercial and political associations. Rights were often granted

to the citizens of the states in one another's territories and rules regarding the sanctity and protection of diplomatic envoys developed. Certain practices were essential before the declaration of war, and the horrors of war were somewhat ameliorated by the exercise, for example, of religious customs regarding sanctuaries. But no overall moral approach similar to those emerging from Jewish and Hindu thought, particularly, evolved. No sense of a world community can be traced to Greek ideology in spite of the growth of Greek colonies throughout the Mediterranean area. This was left to the able administrators of the Roman Empire.⁵⁸

The Romans had a profound respect for organisation and the law.⁵⁹ The law knitted together their empire and constituted a vital source of reference for every inhabitant of the far-flung domain. The early Roman law (the *jus civile*) applied only to Roman citizens. It was formalistic and hard and reflected the status of a small, unsophisticated society rooted in the soil.

It was totally unable to provide a relevant background for an expanding, developing nation. This need was served by the creation and progressive augmentation of the *jus gentium*. This provided simplified rules to govern the relations between foreigners, and between foreigners and citizens. The instrument through which this particular system evolved was the official known as the Praetor Peregrinus, whose function it was to oversee all legal relationships, including bureaucratic and commercial matters, within the empire.

The progressive rules of the *jus gentium* gradually overrode the narrow *jus civile* until the latter system ceased to exist. Thus, the *jus gentium* became the

common law of the Roman Empire and was deemed to be of universal application.

It is this all-embracing factor which so strongly distinguishes the Roman from the Greek experience, although, of course, there was no question of the acceptance of other nations on a basis of equality and the *jus gentium* remained a 'national law' for the Roman Empire.

One of the most influential of Greek concepts taken up by the Romans was the idea of Natural Law.⁶⁰ This was formulated by the Stoic philosophers of the third century BC and their theory was that it constituted a body of rules of universal relevance. Such rules were rational and logical, and because the ideas and precepts of the 'law of nature' were rooted in human intelligence, it followed that such rules could not be restricted to any nation or any group, but were of worldwide relevance. This element of universality is basic to modern doctrines of international law and the Stoic elevation of human powers of logical deduction to the supreme pinnacle of 'discovering' the law foreshadows the rational philosophies of the West. In addition to being a fundamental concept in legal theory, Natural Law is vital to an understanding of international law, as well as being an indispensable precursor to contemporary concern with human rights.

Certain Roman philosophers incorporated those Greek ideas of Natural Law into their own legal theories, often as a kind of ultimate justification of the *jus gentium*, which was deemed to enshrine rational principles common to all civilised nations.

However, the law of nature was held to have an existence over and above that of the *jus gentium*. This led to much confusion over the exact relationship between the two ideas and different Roman lawyers came to different conclusions as to their identity and characteristics. The important factors though that need to be noted are the theories of the universality of law and the rational origins of legal rules that were founded, theoretically at least, not on superior force, but on superior reason.

The classical rules of Roman law were collated in the *Corpus Juris Civilis*, a compilation of legal material by a series of Byzantine philosophers completed in AD 534.⁶¹ Such a collection was to be invaluable when the darkness of the early Middle Ages, following the Roman collapse, began gradually to evaporate. For here was a body of developed laws ready made and awaiting transference to an awakening Europe.

At this stage reference must be made to the growth of Islam.⁶² Its approach to international relations and law was predicated upon a state of hostility towards the non-Moslem world and the concept of unity, Dar al-Islam, as between Moslem countries. Generally speaking, humane rules of warfare were developed and the ‘peoples of the book’ (Jews and Christians) were treated better than non-believers, although in an inferior position to Moslems. Once the period of conquest was over and power was consolidated, norms governing conduct with non-Moslem states began to develop. The law dealing with diplomats was founded upon notions of hospitality and safety (*aman*), while rules governing international agreements grew out of the concept of respecting promises made.⁶³

The Middle Ages and the Renaissance

The Middle Ages were characterised by the authority of the organised Church and the comprehensive structure of power that it commanded.⁶⁴ All Europe was of one religion, and the ecclesiastical law applied to all, notwithstanding tribal or regional affiliations. For much of the period, there were struggles between the religious authorities and the rulers of the Holy Roman Empire.

These conflicts were eventually resolved in favour of the Papacy, but the victory over secularism proved of relatively short duration. Religion and a common legacy derived from the Roman Empire were strongly unifying influences, while political and regional rivalries were not. But before a recognised system of international law could be created, social changes were essential.

Of particular importance during this era were the authority of the Holy Roman Empire and the supranational character of canon law.⁶⁵ Nevertheless, commercial and maritime law developed apace. English law established the *Law Merchant*, a code of rules covering foreign traders, and this was declared to be of universal application.⁶⁶

Throughout Europe, mercantile courts were set up to settle disputes between tradesmen at the various fairs, and while it is not possible to state that a Continental *Law Merchant* came into being, a network of common regulations and practices weaved its way across the commercial fabric of Europe and constituted an embryonic international trade law.⁶⁷

Similarly, maritime customs began to be accepted throughout the Continent. Founded upon the Rhodian Sea Law, a Byzantine work, many of whose rules were enshrined in the Rolls of Oleron in the twelfth century, and other maritime textbooks, a series of commonly applied customs relating to the sea permeated the naval powers of the Atlantic and Mediterranean coasts.⁶⁸

Such commercial and maritime codes, while at this stage merely expressions of national legal systems, were among the forerunners of international law because they were created and nurtured against a backcloth of cross-national contacts and reflected the need for rules that would cover international situations.

Such rules, growing out of the early Middle Ages, constituted the seeds of international law, but, before they could flourish, European thought had first to be developed by that intellectual explosion known as the Renaissance.

This complex of ideas changed the face of European society and ushered in the modern era of scientific, humanistic and individualistic thought.⁶⁹

The collapse of the Byzantine Empire centred on Constantinople before the Turkish armies in 1453 drove many Greek scholars to seek sanctuary in Italy and enliven Western Europe's cultural life. The introduction of printing during the fifteenth century provided the means to disseminate knowledge, and the undermining of feudalism in the wake of economic growth and the rise of the merchant classes provided the background to the new inquiring attitudes taking shape.

Europe's developing self-confidence manifested itself in a sustained drive overseas for wealth and luxury items. By the end of the fifteenth century, the Arabs had been ousted from the Iberian Peninsula and the Americas reached.

The rise of the nation-states of England, France and Spain in particular characterised the process of the creation of territorially consolidated independent units, in theory and doctrine, as well as in fact. This led to a higher degree of interaction between sovereign entities and thus the need to regulate such activities in a generally acceptable fashion. The pursuit of political power and supremacy became overt and recognised, as Machiavelli's *The Prince* (1513) demonstrated.

The city-states of Italy struggled for supremacy and the Papacy too became a secular power. From these hectic struggles emerged many of the staples of modern international life: diplomacy, statesmanship, the theory of the balance of power and the idea of a community of states.⁷⁰

Notions such as these are immediately appreciable and one can identify with the various manoeuvres for political supremacy. Alliances, betrayals, manipulations of state institutions and the drive for power are not unknown to us. We recognise the roots of our society.

It was the evolution of the concept of an international community of separate, sovereign, if competing, states, that marks the beginning of what is understood by international law. The Renaissance bequeathed the prerequisites of independent, critical thought and a humanistic, secular approach to life as well as the political framework for the future. But it is the

latter factor which is vital to the subsequent growth of international law. The Reformation and the European religious wars that followed emphasised this, as did the growing power of the nations. In many ways these wars marked the decline of a continental system founded on religion and the birth of a continental system founded on the supremacy of the state.

Throughout these countries the necessity was felt for a new conception of human as well as state relationships. This search was precipitated, as has been intimated, by the decline of the Church and the rise of what might be termed 'free-thinking'. The theory of international law was naturally deeply involved in this reappraisal of political life and it was tremendously influenced by the rediscovery of Greco-Roman ideas. The Renaissance stimulated a rebirth of Hellenic studies and ideas of Natural Law, in particular, became popular.

Thus, a distinct value-system to underpin international relations was brought into being and the law of nations was heralded as part of the universal law of nature.

With the rise of the modern state and the emancipation of international relations, the doctrine of sovereignty emerged. This concept, first analysed systematically in 1576 in the *Six Livres de la République* by Jean Bodin, was intended to deal with the structure of authority within the modern state. Bodin, who based his study upon his perception of the politics of Europe rather than on a theoretical discussion of absolute principles, emphasised the necessity for a sovereign power within the state that would make the laws.

While such a sovereign could not be bound by the laws he himself instituted, he was subject to the laws of God and of nature.⁷¹

The idea of the sovereign as supreme legislator was in the course of time transmuted into the principle which gave the state supreme power vis-à-vis other states. The state was regarded as being above the law. Such notions as these formed the intellectual basis of the line of thought known as positivism, which will be discussed later.⁷²

The early theorists of international law were deeply involved with the ideas of Natural Law and used them as the basis of their philosophies. Included within that complex of Natural Law principles from which they constructed their theories was the significant merging of Christian and Natural Law ideas that occurred in the philosophy of St Thomas Aquinas.⁷³ He maintained that Natural Law formed part of the law of God, and was the participation by rational creatures in the Eternal Law. It complemented that part of the Eternal Law which had been divinely revealed. Reason, declared Aquinas, was the essence of man and thus must be involved in the ordering of life according to the divine will. Natural Law was the fount of moral behaviour as well as of social and political institutions, and it led to a theory of conditional acceptance of authority with unjust laws being unacceptable. Aquinas' views of the late thirteenth century can be regarded as basic to an understanding of present Catholic attitudes, but should not be confused with the later interpretation of Natural Law which stressed the concepts of natural rights.

It is with such an intellectual background that Renaissance scholars approached the question of the basis and justification of a system of

international law. Maine, a British historical lawyer, wrote that the birth of modern international law was the grandest function of the law of nature and, while that is arguable, the point must be taken.⁷⁴ International law began to emerge as a separate topic to be studied within itself, although derived from the principles of Natural Law.

The Founders of Modern International Law

The essence of the new approach to international law can be traced back to the Spanish philosophers of that country's Golden Age.⁷⁵ The leading figure of this school was Francisco Vitoria, Professor of Theology at the University of Salamanca (1480–1546). His lectures were preserved by his students and published posthumously. He demonstrated a remarkably progressive attitude for his time towards the Spanish conquest of the South American Indians and, contrary to the views prevalent until then, maintained that the Indian peoples should be regarded as nations with their own legitimate interests. War against them could only be justified on the grounds of a just cause. International law was founded on the universal law of nature and this meant that non-Europeans must be included within its ambit. However, Vitoria by no means advocated the recognition of the Indian nations as equal to the Christian states of Europe. For him, opposing the work of the missionaries in the territories was a just reason for war, and he adopted a rather extensive view as to the rights of the Spaniards in South America. Vitoria was no liberal and indeed acted on behalf of the Spanish Inquisition, but his lectures did mark a step forward in the right direction.⁷⁶

Suárez (1548–1617) was a Jesuit and Professor of Theology who was deeply immersed in medieval culture. He noted that the obligatory character of international law was based upon Natural Law, while its substance derived from the Natural Law rule of carrying out agreements entered into.⁷⁷

From a totally different background, but equally, if not more, influential was Alberico Gentili (1552–1608). He was born in Northern Italy and fled to England to avoid persecution, having converted to Protestantism. In 1598, his *De Jure Belli* was published.⁷⁸ It is a comprehensive discussion of the law of war and contains a valuable section on the law of treaties. Gentili, who became a professor at Oxford, has been called the originator of the secular school of thought in international law and he minimised the hitherto significant theological theses.

It is, however, Hugo Grotius, a Dutch scholar, who towers over this period and has been celebrated, if a little exaggeratedly, as the father of international law. He was born in 1583 and was the supreme Renaissance man. A scholar of tremendous learning, he mastered history, theology, mathematics and the law.⁷⁹ His primary work was the *De Jure Belli ac Pacis*, written during 1623 and 1624. It is an extensive work and includes rather more devotion to the exposition of private law notions than would seem appropriate today. He refers both to Vitoria and to Gentili, the latter being of special influence with regard to many matters, particularly organisation of material.

Grotius finally excised theology from international law and emphasised the irrelevance in such a study of any conception of a divine law. He remarked that the law of nature would be valid even if there were no God: a statement

which, although suitably clothed in religious protestation, was extremely daring. The law of nature now reverted to being founded exclusively on reason. Justice was part of man's social make-up and thus not only useful, but essential. Grotius conceived of a comprehensive system of international law and his work rapidly became a university textbook. However, in many spheres he followed well-trodden paths. He retained the theological distinction between a just and an unjust war, a notion that was soon to disappear from treatises on international law, but which in some way underpins modern approaches to aggression, self-defence and liberation.

One of his most enduring opinions consists in his proclamation of the freedom of the seas. The Dutch scholar opposed the 'closed seas' concept of the Portuguese that was later elucidated by the English writer John Selden⁸⁰ and emphasised instead the principle that the nations could not appropriate to themselves the high seas. They belonged to all. It must, of course, be mentioned, parenthetically, that this theory happened to accord rather nicely with prevailing Dutch ideas as to free trade and the needs of an expanding commercial empire.

However, this merely points up what must not be disregarded, namely that concepts of law as of politics and other disciplines are firmly rooted in the world of reality, and reflect contemporary preoccupations. No theory develops in a vacuum, but is conceived and brought to fruition in a definite cultural and social environment. To ignore this is to distort the theory itself.

Positivism and Naturalism

Following Grotius, but by no means divorced from the thought of previous scholars, a split can be detected and two different schools identified. On the one hand there was the ‘naturalist’ school, exemplified by Samuel Pufendorf (1632–94),⁸¹ who attempted to identify international law completely with the law of nature; and on the other hand there were the exponents of ‘positivism’, who distinguished between international law and Natural Law and emphasised practical problems and current state practices. Pufendorf regarded Natural Law as a moralistic system, and misunderstood the direction of modern international law by denying the validity of the rules about custom. He also refused to acknowledge treaties as in any way relevant to a discussion of the basis of international law. Other ‘naturalists’ echoed those sentiments in minimising or ignoring the actual practices of states in favour of a theoretical construction of absolute values that seemed slowly to drift away from the complexities of political reality.

One of the principal initiators of the positivist school was Richard Zouche (1590–1660), who lived at the same time as Pufendorf, but in England.⁸² While completely dismissing Natural Law, he paid scant regard to the traditional doctrines. His concern was with specific situations and his book contains many examples from the recent past. He elevated the law of peace above a systematic consideration of the law of war and eschewed theoretical expositions.

In similar style, Bynkershoek (1673–1743) stressed the importance of modern practice and virtually ignored Natural Law. He made great contributions to the developing theories of the rights and duties of neutrals in

war, and after careful studies of the relevant facts decided in favour of the freedom of the seas.⁸³

The positivist approach, like much of modern thought, was derived from the empirical method adopted by the Renaissance. It was concerned not with an edifice of theory structured upon deductions from absolute principles, but rather with viewing events as they occurred and discussing actual problems that had arisen. Empiricism as formulated by Locke and Hume⁸⁴ denied the existence of innate principles and postulated that ideas were derived from experience. The scientific method of experiment and verification of hypotheses emphasised this approach.

From this philosophical attitude, it was a short step to reinterpreting international law not in terms of concepts derived from reason, but rather in terms of what actually happened between the competing states. What states actually do was the key, not what states ought to do given basic rules of the law of nature. Agreements and customs recognised by the states were the essence of the law of nations.

Positivism developed as the modern nation-state system emerged, after the Peace of Westphalia in 1648, from the religious wars.⁸⁵ It coincided, too, with theories of sovereignty such as those propounded by Bodin and Hobbes,⁸⁶ which underlined the supreme power of the sovereign and led to notions of the sovereignty of states.

Elements of both positivism and naturalism appear in the works of Vattel (1714–67), a Swiss lawyer. His *Droit des Gens* was based on Natural Law

principles, yet was practically oriented. He introduced the doctrine of the equality of states into international law, declaring that a small republic was no less a sovereign than the most powerful kingdom, just as a dwarf was as much a man as a giant. By distinguishing between laws of conscience and laws of action and stating that only the latter were of practical concern, he minimised the importance of Natural Law.⁸⁷

Ironically, at the same time that positivist thought appeared to demolish the philosophical basis of the law of nature and relegate that theory to history, it re-emerged in a modern guise replete with significance for the future. Natural Law gave way to the concept of natural rights.⁸⁸

It was an individualistic assertion of political supremacy. The idea of the social contract, that an agreement between individuals pre-dated and justified civil society, emphasised the central role of the individual, and whether such a theory was interpreted pessimistically to demand an absolute sovereign as Hobbes declared, or optimistically to mean a conditional acceptance of authority as Locke maintained, it could not fail to be a revolutionary doctrine. The rights of man constitute the heart of the American⁸⁹ and French Revolutions and the essence of modern democratic society.

Yet, on the other hand, the doctrine of Natural Law has been employed to preserve the absoluteness of sovereignty and the sanctity of private possessions. The theory has a reactionary aspect because it could be argued that what was, ought to be, since it evolved from the social contract or was divinely ordained, depending upon how secular one construed the law of nature to be.

The Nineteenth Century

The eighteenth century was a ferment of intellectual ideas and rationalist philosophies that contributed to the evolution of the doctrine of international law. The nineteenth century by contrast was a practical, expansionist and positivist era. The Congress of Vienna, which marked the conclusion of the Napoleonic wars, enshrined the new international order which was to be based upon the European balance of power. International law became Eurocentric, the preserve of the civilised, Christian states, into which overseas and foreign nations could enter only with the consent of and on the conditions laid down by the Western powers. Paradoxically, whilst international law became geographically internationalised through the expansion of the European empires, it became less universalist in conception and more, theoretically as well as practically, a reflection of European values.⁹⁰ This theme, the relationship between universalism and particularism, appears time and again in international law. This century also saw the coming to independence of Latin America and the forging of a distinctive approach to certain elements of international law by the states of that region, especially with regard to, for example, diplomatic asylum and the treatment of foreign enterprises and nationals.⁹¹

There are many other features that mark the nineteenth century. Democracy and nationalism, both spurred on by the wars of the French Revolution and empire, spread throughout the Continent and changed the essence of international relations.⁹² No longer the exclusive concern of aristocratic élites, foreign policy characterised both the positive and the negative faces of nationalism. Self-determination emerged to threaten the multinational

empires of Central and Eastern Europe, while nationalism reached its peak in the unifications of Germany and Italy and began to exhibit features such as expansionism and doctrines of racial superiority. Democracy brought to the individual political influence and a say in government. It also brought home the realities of responsibility, for wars became the concern of all.

Conscription was introduced throughout the Continent and large national armies replaced the small professional forces.⁹³ The Industrial Revolution mechanised Europe, created the economic dichotomy of capital and labour and propelled Western influence throughout the world. All these factors created an enormous increase in the number and variety of both public and private international institutions, and international law grew rapidly to accommodate them.⁹⁴ The development of trade and communications necessitated greater international cooperation as a matter of practical need. In 1815, the Final Act of the Congress of Vienna established the principle of freedom of navigation with regard to international waterways and set up a Central Commission of the Rhine to regulate its use. In 1856, a commission for the Danube was created and a number of other European rivers also became the subject of international agreements and arrangements. In 1865, the International Telegraphic Union was established and in 1874 the Universal Postal Union.⁹⁵

European conferences proliferated and contributed greatly to the development of rules governing the waging of war. The International Committee of the Red Cross, founded in 1863, helped promote the series of Geneva Conventions beginning in 1864 dealing with the 'humanisation' of conflict, and the Hague Conferences of 1899 and 1907 established the Permanent Court of Arbitration and dealt with the treatment of prisoners and the control

of warfare.⁹⁶ Numerous other conferences, conventions and congresses emphasised the expansion of the rules of international law and the close network of international relations. In addition, the academic study of international law within higher education developed with the appointment of professors of the subject and the appearance of specialist textbooks emphasising the practice of states.

Positivist theories dominate this century. The proliferation of the powers of states and the increasing sophistication of municipal legislation gave force to the idea that laws were basically commands issuing from a sovereign person or body. Any question of ethics or morality was irrelevant to a discussion of the validity of man-made laws. The approach was transferred onto the international scene and immediately came face to face with the reality of a lack of supreme authority.

Since law was ultimately dependent upon the will of the sovereign in national systems, it seemed to follow that international law depended upon the will of the sovereign states.

This implied a confusion of the supreme legislator within a state with the state itself and thus positivism had to accept the metaphysical identity of the state. The state had a life and will of its own and so was able to dominate international law. This stress on the abstract nature of the state did not appear in all positivist theories and was a late development.⁹⁷

It was the German thinker Hegel who first analysed and proposed the doctrine of the will of the state. The individual was subordinate to the state,

because the latter enshrined the ‘wills’ of all citizens and had evolved into a higher will, and on the external scene the state was sovereign and supreme.⁹⁸ Such philosophies led to disturbing results in the twentieth century and provoked a re-awakening of the law of nature, dormant throughout the nineteenth century.

The growth of international agreements, customs and regulations induced positivist theorists to tackle this problem of international law and the state; and as a result two schools of thought emerged.

The monists claimed that there was one fundamental principle which underpinned both national and international law. This was variously posited as ‘right’ or social solidarity or the rule that agreements must be carried out (*pacta sunt servanda*). The dualists, more numerous and in a more truly positivist frame of mind, emphasised the element of consent.

For Triepel, another German theorist, international law and domestic (or municipal) law existed on separate planes, the former governing international relations, the latter relations between individuals and between the individual and the state. International law was based upon agreements between states (and such agreements included, according to Triepel, both treaties and customs) and because it was dictated by the ‘common will’ of the states it could not be unilaterally altered.⁹⁹

This led to a paradox. Could this common will bind individual states and, if so, why? It would appear to lead to the conclusion that the will of the sovereign state could give birth to a rule over which it had no control. The

state will was not, therefore, supreme, but inferior to a collection of states' wills. Triepel did not discuss these points, but left them open as depending upon legal matters. Thus did positivist theories weaken their own positivist outlook by regarding the essence of law as beyond juridical description. The nineteenth century also saw the publication of numerous works on international law, which emphasised state practice and the importance of the behaviour of countries to the development of rules of international law.¹⁰⁰

The Twentieth Century and Beyond

The First World War marked the close of a dynamic and optimistic century. European empires ruled the world and European ideologies reigned supreme, but the 1914–18 Great War undermined the foundations of European civilisation. Self-confidence faded, if slowly, the edifice weakened and the universally accepted assumptions of progress were increasingly doubted. Self-questioning was the order of the day and law as well as art reflected this.

The most important legacy of the 1919 Peace Treaty from the point of view of international relations was the creation of the League of Nations.¹⁰¹ The old anarchic system had failed and it was felt that new institutions to preserve and secure peace were necessary. The League consisted of an Assembly and an Executive Council, but was crippled from the start by the absence of the United States and the Soviet Union for most of its life and remained a basically European organisation.

While it did have certain minor successes with regard to the maintenance of international order, it failed when confronted with determined aggressors.

Japan invaded China in 1931 and two years later withdrew from the League. Italy attacked Ethiopia, and Germany embarked unhindered upon a series of internal and external aggressions. The Soviet Union, in a final gesture, was expelled from the organisation in 1939 following its invasion of Finland.

Nevertheless, much useful groundwork was achieved by the League in its short existence and this helped to consolidate the United Nations later on.¹⁰²

The Permanent Court of International Justice was set up in 1921 at The Hague and was succeeded in 1946 by the International Court of Justice.¹⁰³

The International Labour Organization was established soon after the end of the First World War and still exists today, and many other international institutions were inaugurated or increased their work during this period.

Other ideas of international law that first appeared between the wars included the system of mandates, by which colonies of the defeated powers were administered by the Allies for the benefit of their inhabitants rather than being annexed outright, and the attempt was made to provide a form of minority protection guaranteed by the League. This latter creation was not a great success, but it paved the way for later concern to secure human rights.¹⁰⁴

After the trauma of the Second World War the League was succeeded in 1946 by the United Nations Organization, which tried to remedy many of the defects of its predecessor. It established its site at New York, reflecting the realities of the shift of power away from Europe, and determined to become a truly universal institution. The advent of decolonisation fulfilled this

expectation and the UN General Assembly currently has 193 member states.¹⁰⁵

Many of the trends which first came to prominence in the nineteenth century have continued to this day. The vast increase in the number of international agreements and customs, the strengthening of the system of arbitration and the development of international organisations have established the essence of international law as it exists today.

Communist Approaches to International Law

Classic Marxist theory described law and politics as the means whereby the ruling classes maintained their domination of society. The essence of economic life was the ownership of the means of production, and all power flowed from this control. Capital and labour were the opposing theses and their mutual antagonism would eventually lead to a revolution out of which a new, non-exploitive form of society would emerge.¹⁰⁶ National states were dominated by the capitalist class and would have to disappear in the re-organising process. Indeed, the theory was that law and the state would wither away once a new basis for society had been established¹⁰⁷ and, because classical international law was founded upon the state, it followed that it too would go.

However, the reality of power and the existence of the Soviet Union surrounded by capitalist nations led to a modification in this approach. The international system of states could not be changed overnight into a socialist

order, so a period of transition was inevitable. Nevertheless, basic changes were seen as having been wrought.

Professor Tunkin, for example, emphasised that the Russian October Revolution produced a new series of international legal ideas. These, it is noted, can be divided into three basic, interconnected groups: (1) principles of socialist internationalism in relations between socialist states; (2) principles of equality and self-determination of nations and peoples, primarily aimed against colonialism; and (3) principles of peaceful co-existence aimed at relations between states with different social systems.¹⁰⁸

We shall briefly look at these concepts in this section, but first a historical overview is necessary.

During the immediate post-revolution period, it was postulated that a transitional phase had commenced. During this time, international law as a method of exploitation would be criticised by the socialist state, but it would still be recognised as a valid system. The two Soviet theorists Korovin and Pashukanis were the dominant influences in this phase. The transitional period demanded compromises in that, until the universal victory of the revolution, some forms of economic and technical cooperation would be required since they were fundamental for the existence of the international social order.¹⁰⁹ Pashukanis expressed the view that international law was an inter-class law within which two antagonistic class systems would seek accommodation until the victory of the socialist system. Socialism and the Soviet Union could still use the legal institutions developed by and reflective of the capitalist system.¹¹⁰ However, with the rise of Stalinism and the

‘socialism in one country’ call, the position hardened. Pashukanis altered his line and recanted. International law was not a form of temporary compromise between capitalist states and the Soviet Union, but rather a means of conducting the class war. The Soviet Union was bound only by those rules of international law which accorded with its purposes.¹¹¹

The new approach in the late 1930s was reflected politically in Russia’s successful attempt to join the League of Nations and its policy of wooing the Western powers, and legally by the ideas of Vyshinsky. He adopted a more legalistic view of international law and emphasised the Soviet acceptance of such principles as national self-determination, state sovereignty and the equality of states, but not others. The role of international law did not constitute a single international legal system binding all states. The Soviet Union would act in pursuance of Leninist–Stalinist foreign policy ideals and would not be bound by the rules to which it had not given express consent.¹¹²

The years that followed the Second World War saw a tightening up of Soviet doctrine as the Cold War gathered pace, but with the death of Stalin and the succession of Khrushchev a thaw set in. In theoretical terms the law of the transitional stage was replaced by the international law of peaceful co-existence. War was no longer regarded as inevitable between capitalist and socialist countries and a period of mutual tolerance and cooperation was inaugurated.¹¹³

Tunkin recognised that there was a single system of international law of universal scope rather than different branches covering socialist and capitalist countries, and that international law was founded upon agreements between

states which are binding upon them. He defined contemporary general international law as:

the aggregate of norms which are created by agreement between states of different social systems, reflect the concordant wills of states and have a generally democratic character, regulate relations between them in the process of struggle and co-operation in the direction of ensuring peace and peaceful co-existence and freedom and independence of peoples, and are secured when necessary by coercion effectuated by states individually or collectively.¹¹⁴

It is interesting to note the basic elements here, such as the stress on state sovereignty, the recognition of different social systems and the aim of peaceful co-existence. The role of sanctions in law is emphasised and reflects much of the positivist influence upon Soviet thought. Such preoccupations were also reflected in the definition of international law contained in the leading Soviet textbook by Professor Kozhevnikov and others, where it was stated that:

international law can be defined as the aggregate of rules governing relations between states in the process of their conflict and co-operation, designed to safeguard their peaceful

co-existence, expressing the will of the ruling classes of these states and defended in case of need by coercion applied by states individually or collectively.¹¹⁵

Originally, treaties alone were regarded as proper sources of international law, but custom became accepted as a kind of tacit or implied agreement, with great stress laid upon *opinio juris* or the legally binding element of custom. While state practice need not be general to create a custom, its recognition as a legal form must be.¹¹⁶

Peaceful co-existence itself rested upon certain basic concepts, for example non-intervention in the internal affairs of other states and the sovereignty of states. Any idea of a world authority was condemned as a violation of the latter principle. The doctrine of peaceful co-existence was also held to include such ideas as good neighbourliness, international cooperation and the observance in good faith of international obligations.

The concept was regarded as based on specific trends of laws of societal development and as a specific form of class struggle between socialism and capitalism, one in which armed conflict is precluded.¹¹⁷ It was an attempt, in essence, to reiterate the basic concepts of international law in a way that was taken to reflect an ideological trend. But it must be emphasised that the principles themselves have long been accepted by the international community.

While Tunkin at first attacked the development of regional systems of international law, he later came round to accepting a socialist law which reflected the special relationship between communist countries. The Soviet interventions in eastern Europe, particularly in Czechoslovakia in 1968, played a large part in augmenting such views.¹¹⁸ In the Soviet view relations between socialist (communist) states represented a new, higher type of international relations and a socialist international law. Common socio-economic factors and a political community created an objective basis for lasting friendly relations, whereas, by contrast, international capitalism involved the exploitation of the weak by the strong. The principles of socialist or proletarian internationalism constituted a unified system of international legal principles between countries of the socialist bloc arising by way of custom and treaty. Although the basic principles of respect for state sovereignty, non-interference in internal affairs and equality of states and peoples existed in general international law, the same principles in socialist international law were made more positive by the lack of economic rivalry and exploitation and by increased cooperation. Accordingly, these principles incorporated not only material obligations not to violate one another's rights, but also the duty to assist one another in enjoying and defending such rights against capitalist threats.¹¹⁹

The Soviet emphasis on territorial integrity and sovereignty, while designed in practice to protect the socialist states in a predominantly capitalist environment, proved of great attraction to the developing nations of the 'Third World', anxious too to establish their own national identities and counteract Western financial and cultural influences.

With the decline of the Cold War and the onset of *perestroika* (restructuring) in the Soviet Union, a process of re-evaluation in the field of international legal theory took place.¹²⁰ The concept of peaceful co-existence was modified and the notion of class warfare eliminated from the Soviet political lexicon. Global interdependence and the necessity for international cooperation were emphasised, as it was accepted that the tension between capitalism and socialism no longer constituted the major conflict in the contemporary world and that beneath the former dogmas lay many common interests.¹²¹ The essence of new Soviet thinking was stated to lie in the priority of universal human values and the resolution of global problems, which is directly linked to the growing importance of international law in the world community. It was also pointed out that international law had to be universal and not artificially divided into capitalist, socialist and Developing Countries' 'international law' systems.¹²²

Soviet writers and political leaders accepted that activities such as the interventions in Czechoslovakia in 1968 and Afghanistan in 1979 were contrary to international law, while the attempt to create a state based on the rule of law was seen as requiring the strengthening of the international legal system and the rule of law in international relations. In particular, a renewed emphasis upon the role of the United Nations became evident in Soviet policy.¹²³

The dissolution of the Soviet Union in 1991 marked the end of the Cold War and the re-emergence of a system of international relations based upon multiple sources of power untrammelled by ideological determinacy. From that point,¹²⁴ Russia as the continuation of the former Soviet Union (albeit in

different political and territorial terms) entered into the Western political system and defined its actions in terms of its own national interests free from principled hostility. The return to statehood of the Baltic states and the independence of the other former republics of the Soviet Union, coupled with the collapse of Yugoslavia, has constituted a political upheaval of major significance. The Cold War had imposed a dualistic superstructure upon international relations that had had implications for virtually all serious international political disputes and had fettered the operations of the United Nations in particular. Although the Soviet regime had been changing its approach quite significantly, the formal demise both of the communist system and of the state itself altered the nature of the international system and this has inevitably had consequences for international law.¹²⁵ The mitigation of inexorable superpower confrontation (but not its disappearance) has led to an increase in instability in Europe and emphasised paradoxically both the revitalisation and the limitations of the United Nations.

While relatively little has previously been known of Chinese attitudes, a few points can be made. Western concepts are regarded primarily as aimed at preserving the dominance of the bourgeois class on the international scene. Soviet views were partially accepted, but since the late 1950s and the growing estrangement between the two major communist powers, the Chinese concluded that the Russians were interested chiefly in maintaining the status quo and Soviet–American superpower supremacy. The Soviet concept of peaceful co-existence as the mainstay of contemporary international law was treated with some suspicion, although reworked.¹²⁶

The Chinese conception of law was, for historical and cultural reasons, very different from that developed in the West. ‘Law’ never attained the important place in Chinese society that it did in European civilisation.¹²⁷ A sophisticated bureaucracy laboured to attain harmony and equilibrium, and a system of legal rights to protect the individual in the Western sense did not really develop. It was believed that society would be best served by example and established morality, rather than by rules and sanctions. This Confucian philosophy was, however, swept aside after the successful communist revolution, to be replaced by strict Marxism–Leninism, with its emphasis on class warfare.¹²⁸

The Chinese seem to have recognised several systems of international law, for example, Western, socialist and revisionist (Soviet Union), and to have implied that only with the ultimate spread of socialism would a universal system be possible.¹²⁹ International agreements are regarded as the primary source of international law and China has entered into many treaties and conventions and carried them out as well as other nations.¹³⁰ One exception, of course, is China’s disavowal of the so-called ‘unequal treaties’ whereby Chinese territory was annexed by other powers, in particular the Tsarist Empire, in the nineteenth century.¹³¹

On the whole, international law has been treated as part of international politics and subject to considerations of power and expediency, as well as ideology. Where international rules conform with Chinese policies and interests, then they will be observed. Where they do not, they will be ignored.

Now that the isolationist phase of its history is over, relations with other nations established and its entry into the United Nations secured, China has adopted a much more active role in international relations, an approach more in keeping with its rapidly growing economic power. China has now become fully engaged in world politics and this has led to a legalisation of its view of international law, as indeed occurred with the Soviet Union.

However, this does not mean that either Russia or China have adopted the predominantly Western approaches to international law. Both states have maintained their focus upon state sovereignty, sovereign equality and non-intervention in internal affairs as bulwarks of the international system. This was manifested most recently in the Declaration on the Promotion of International Law issued by these states on 25 June 2016 in Beijing, which also underlined the continuing relevance of the Five Principles of Co-existence of 1954,¹³² and consent-based settlement of disputes.¹³³ Such an approach, while not incorrect in law as such, minimises the contemporary emphasis upon globalisation, international human rights and democratic governance.

The ‘Developing Countries’

In the evolution of international affairs since the Second World War, one of the most decisive events has been the disintegration of the colonial empires and the birth of scores of new states in the so-called ‘Developing Countries’ or ‘Third World’. This has thrust onto the scene states which carry with them a legacy of bitterness over their past status as well as a host of problems relating to their social, economic and political development.¹³⁴ In such

circumstances it was only natural that the structure and doctrines of international law would come under attack. The nineteenth-century development of the law of nations founded upon Eurocentrism and imbued with the values of Christian, urbanised and expanding Europe¹³⁵ did not, understandably enough, reflect the needs and interests of the newly independent states of the mid- and late twentieth century. It was felt that such rules had encouraged and then reflected their subjugation, and that changes were required.¹³⁶

It is basically those ideas of international law that came to fruition in the nineteenth century that have been so clearly rejected, that is, those principles that enshrined the power and domination of the West.¹³⁷ The underlying concepts of international law have not been discarded. On the contrary. The new nations have eagerly embraced the ideas of the sovereignty and equality of states and the principles of non-aggression and non-intervention, in their search for security within the bounds of a commonly accepted legal framework.

While this new internationalisation of international law that has occurred in the last sixty years has destroyed its European-based homogeneity, it has emphasised its universalist scope.¹³⁸ The composition of, for example, both the International Court of Justice and the UN Security Council mirrors such developments. Article 9 of the ICJ Statute points out that the main forms of civilisation and the principal legal systems of the world must be represented within the Court, and there is an arrangement that of the ten non-permanent seats in the Security Council five should go to Afro-Asian states and two to Latin American states (the others going to Europe and other states). The

composition of the International Law Commission has also recently been increased and structured upon geographic lines.¹³⁹

The influence of the new states has been felt most of all within the General Assembly, where they constitute a majority of the 193 member states.¹⁴⁰ The content and scope of the various resolutions and declarations emanating from the Assembly are proof of their impact and contain a record of their fears, hopes and concerns.

The Declaration on the Granting of Independence to Colonial Countries and Peoples of 1960, for example, enshrined the right of colonies to obtain their sovereignty with the least possible delay and called for the recognition of the principle of self-determination. This principle, which is discussed elsewhere in this book,¹⁴¹ is regarded by most authorities as a settled rule of international law, although with undetermined borders. Nevertheless, it symbolises the rise of the post-colonial states and the effect they are having upon the development of international law.

Their concern for the recognition of the sovereignty of states is complemented by their support of the United Nations and its Charter and supplemented by their desire for ‘economic self-determination’ or the right of permanent sovereignty over natural resources.¹⁴² This expansion of international law into the field of economics was a major development of the twentieth century and is evidenced in myriad ways, for example, by the creation of the General Agreement on Tariffs and Trade, the UN Conference on Trade and Development, and the establishment of the International Monetary Fund and World Bank.

The interests of the new states of the Developing Countries are often in conflict with those of the industrialised nations, witness disputes over nationalisations. But it has to be emphasised that, contrary to many fears expressed in the early years of the decolonisation saga, international law has not been discarded nor altered beyond recognition. Its framework has been retained as the new states, too, wish to obtain the benefits of rules such as those governing diplomatic relations and the controlled use of force, while campaigning against rules which run counter to their perceived interests.

While the new countries share a common history of foreign dominance and underdevelopment, compounded by an awakening of national identity, it has to be recognised that they are not a homogeneous group. Widely differing cultural, social and economic attitudes and stages of development characterise them, and the rubric of the 'Third World' masks diverse political affiliations. On many issues the interests of the new states conflict with one another and this is reflected in the different positions adopted. The states possessing oil and other valuable natural resources are separated from those with few or none and the states bordering on oceans are to be distinguished from landlocked states. The list of diversity is endless and variety governs the make-up of the southern hemisphere to a far greater degree than in the north.

It is possible that in legal terms tangible differences in approach may emerge in the future as the passions of decolonisation die down and the Western supremacy over international law is further eroded. This trend will also permit a greater understanding of, and greater recourse to, historical traditions and conceptions that pre-date colonisation and an increasing awareness of their validity for the future development of international law.¹⁴³

In the medium term, however, it has to be recognised that with the end of the Cold War and the rapid development of Soviet (then Russian)–American cooperation (which may prove to be temporary only), the axis of dispute began to turn from East–West to North–South. This is beginning to manifest itself in a variety of issues ranging from economic law to the law of the sea and human rights, while the impact of modern technology has hardly yet been appreciated.¹⁴⁴ Together with such factors, the development of globalisation has put additional stress upon the traditional tension between universalism and particularism.¹⁴⁵ Globalisation in the sense of interdependence of a high order of individuals, groups and corporations, both public and private, across national boundaries, might be seen as the universalisation of Western civilisation and thus the triumph of one special particularism. On the other hand, particularism (in the guise of cultural relativism) has sometimes been used as a justification for human rights abuses free from international supervision or criticism. In addition, recent years have seen something of a reaction against globalisation for leaving behind many individuals and societies and the consequential rise in communal tension (not least the exit of the United Kingdom from the European Union in January 2020).

International Law Today

The Expanding Legal Scope of International Concern

International law since the middle of the last century has been developing in many directions, as the complexities of life in the modern era have multiplied. For, as already emphasised, law reflects the conditions and cultural traditions of the society within which it operates. The community evolves a certain specific set of values – social, economic and political – and this stamps its mark on the legal framework which orders life in that environment. Similarly, international law is a product of its environment. It has developed in accordance with the prevailing notions of international relations and to survive it must be in harmony with the realities of the age.

Nevertheless, there is a continuing tension between those rules already established and the constantly evolving forces that seek changes within the system. One of the major problems of international law is to determine when and how to incorporate new standards of behaviour and new realities of life into the already existing framework, so that, on the one hand, the law remains relevant and, on the other, the system itself is not too vigorously disrupted.

Changes that occur within the international community can be momentous and reverberate throughout the system. For example, the advent of nuclear arms created a status quo in Europe and a balance of terror throughout the world. It currently constitutes a factor of unease as further states seek to acquire nuclear technology. Another example is the technological capacity to mine the oceans and the consequent questions as to the nature and beneficiaries of exploitation.¹ The rise of international terrorism has posed new challenges to the system as states and international organisations struggle to deal with this phenomenon while retaining respect for the sovereignty of states and for human rights.² The phenomena of non-state actors and of cyber warfare are yet further examples of new developments impacting significantly upon the evolution of the law.³ More recently, the COVID-19 pandemic which started at the end of 2019 has shaken the world.⁴ There are many instances of how modern developments demand a constant reappraisal of the structure of international law and its rules.

The scope of international law today is immense. From the regulation of space expeditions to the question of the division of the ocean floor, and from the protection of human rights to the management of the international financial system and cyber activities, its involvement has spread out from the primary concern with the preservation of peace, to embrace all the interests of contemporary international life.

But the *raison d'être* of international law and the determining factor in its composition remains the needs and characteristics of the international political system. Where more than one entity exists within a system, there has to be some conception as to how to deal with other such entities, whether it

be on the basis of co-existence or hostility. International law as it has developed since the seventeenth century has adopted the same approach and has in general (though with notable exceptions) eschewed the idea of permanent hostility and enmity. Because the state, while internally supreme, wishes to maintain its sovereignty externally and needs to cultivate other states in an increasingly interdependent world, it must acknowledge the rights of others. This acceptance of rights possessed by all states, something unavoidable in a world where none can stand alone, leads inevitably to a system to regulate and define such rights and, of course, obligations.

And so one arrives at some form of international legal order, no matter how unsophisticated and how occasionally positively disorderly.⁵ The current system developed in the context of European civilisation as it progressed, but this has changed. The rise of the United States and the Soviet Union mirrored the decline of Europe, while the process of decolonisation also had a considerable impact. More recently, the collapse of the Soviet Empire and the Soviet Union, the rise of India and China as major powers and the phenomenon of globalisation (and the reactions to it) are also impacting deeply upon the system. Faced with radical changes in the structure of power, international law needs to come to terms with new ideas and challenges.

The original Eurocentric character of international law has been gravely weakened in the last sixty years or so and the opinions, hopes and needs of other cultures and civilisations are now playing an increasing role in the evolution of world juridical thought.⁶

International law reflects first and foremost the basic state-oriented character of world politics and this essentially is because the state became over time the primary repository of the organised hopes of peoples, whether for protection or for more expansive aims. Units of formal independence benefiting from equal sovereignty in law and equal possession of the basic attributes of statehood⁷ have succeeded in creating a system enshrining such values. Examples that could be noted here include non-intervention in internal affairs, territorial integrity, non-use of force and equality of voting in the UN General Assembly. However, in addition to this, many factors cut across state borders and create a tension in world politics, such as inadequate economic relationships, international concern for human rights, health issues such as the recent coronavirus pandemic and the rise in new technological forces.⁸ State policies and balances of power, both international and regional, are a necessary framework within which international law operates, as indeed are domestic political conditions and tensions. Law mirrors the concern of forces within states and between states.

It is also important to realise that states need law in order to seek and attain certain goals, whether these be economic well-being, survival and security or ideological advancement. The system therefore has to be certain enough for such goals to be ascertainable, and flexible enough to permit change when this becomes necessary due to the confluence of forces demanding it.⁹

International law, however, has not just expanded horizontally to embrace the new states which have been established since the end of the Second World War; it has extended itself to include individuals, groups and international organisations, both private and public, within its scope. It has also moved into

new fields covering such issues as international trade, problems of environmental protection, human rights and outer space exploration.

The growth of positivism in the nineteenth century had the effect of focusing the concerns of international law upon sovereign states. They alone were the ‘subjects’ of international law and were to be contrasted with the status of non-independent states and individuals as ‘objects’ of international law. They alone created the law and restrictions upon their independence could not be presumed.¹⁰ But the gradual sophistication of positivist doctrine, combined with the advent of new approaches to the whole system of international relations, has broken down this exclusive emphasis and extended the roles played by non-state entities, such as individuals, groups, multinational firms and international institutions.¹¹ It was, of course, long recognised that individuals were entitled to the benefits of international law, but it is only recently that they have been able to act directly rather than rely upon their national states.

The Nuremberg and Tokyo Tribunals set up by the victorious Allies after the close of the Second World War were a vital part of this process. Many of those accused were found guilty of crimes against humanity and against peace and were punished accordingly. It was a recognition of individual responsibility under international law without the usual interposition of the state and has been reinforced with the establishment of the Yugoslav and Rwanda War Crimes Tribunals in the mid-1990s and the International Criminal Court in 1998.¹² Similarly, the 1948 Genocide Convention provided for the punishment of offenders after conviction by national courts or by an international criminal tribunal.¹³ The developing concern with human rights

is another aspect of this move towards increasing the role of the individual in international law. The Universal Declaration of Human Rights adopted by the United Nations in 1948 lists a series of political and social rights, although it is only a guideline and not legally binding as such. The European Convention for the Protection of Human Rights and Fundamental Freedoms signed in 1950 and the International Covenants on Human Rights of 1966 are of a different nature and binding upon the signatories. In an effort to function satisfactorily, various bodies of a supervisory and implementational nature were established. Within the European Union, individuals and corporations have certain rights of direct appeal to the European Court of Justice against decisions of the various Union institutions. In addition, individuals may appear before certain international tribunals. Nevertheless, the whole subject has been highly controversial, with some writers (for example, Soviet theorists prior to *perestroika*) denying that individuals may have rights as distinct from duties under international law, but it is indicative of the trend away from the exclusivity of the state.¹⁴

Together with the evolution of individual human rights, the rise of international organisations marks perhaps the key distinguishing feature of modern international law. In fact, international law cannot in the contemporary era be understood without reference to the growth in number and influence of such intergovernmental institutions, and of these the most important by far is the United Nations.¹⁵ This organisation comprises the vast majority of states (there are currently 193 member states) and that alone constitutes a political factor of high importance in the process of diplomatic relations and negotiations and indeed facilitates international cooperation and norm creation. Further, of course, the existence of the Security Council as an

executive organ with powers to adopt resolutions in certain circumstances that are binding upon all member states is unique in the history of international relations.

International organisations have now been accepted as possessing rights and duties of their own and a distinctive legal personality. The International Court of Justice in 1949 delivered an Advisory Opinion¹⁶ in which it stated that the United Nations was a subject of international law and could enforce its rights by bringing international claims, in this case against Israel following the assassination of Count Bernadotte, a United Nations official. Such a ruling can be applied to embrace other international institutions, like the International Labour Organization and the Food and Agriculture Organization, which each have a judicial character of their own. Thus, while states remain the primary subjects of international law, they are now joined by other non-state entities, whose importance is likely to grow even further in the future.

The growth of regional organisations should also be noted at this stage. Many of these were created for reasons of military security, for example NATO and the opposing Warsaw Pact organisations, others as an expression of regional and cultural identity, such as the Organisation of African Unity (now the African Union) and the Organization of American States. In a class of its own is the European Union, which has gone far down the road of economic coordination and standardisation and has a range of common institutions serviced by a growing bureaucracy stationed primarily at Brussels.

Such regional organisations have added to the developing sophistication of international law by the insertion of ‘regional–international law sub-systems’ within the universal framework and the consequent evolution of rules that bind only member states.¹⁷

The range of topics covered by international law has expanded hand in hand with the upsurge in difficulties faced and the proliferation in the number of participants within the system. It is no longer exclusively concerned with issues relating to the territory or jurisdiction of states narrowly understood, but is beginning to take into account the specialised problems of contemporary society. Many of these have already been referred to, such as the vital field of human rights, the growth of an international economic law covering financial and development matters, concern with environmental despoliation, the space exploration effort and the exploitation of the resources of the oceans and deep seabed. One can mention also provisions relating to the bureaucracy of international institutions (international administrative law), international labour standards, health regulations and communications controls. Many of these trends may be seen as falling within, or rather reflecting, the phenomenon of globalisation, a term which encompasses the inexorable movement to greater interdependence founded upon economic, communications and cultural bases and operating quite independently of national regulation.¹⁸ This in turn stimulates disputes of an almost ideological nature concerning, for example, the relationship between free trade and environmental protection.¹⁹ To this may be added the pressures of democracy and human rights, both operating to some extent as countervailing influences to the classical emphasis upon the territorial sovereignty and jurisdiction of states.

Modern Theories and Interpretations

At this point some modern theories as to the nature and role of international law will be briefly noted.

Positive Law and Natural Law

Throughout the history of thought there has been a complex relationship between idealism and realism, between the way things ought to be and the way things are, and the debate as to whether legal philosophy should incorporate ethical standards or confine itself to an analysis of the law as it stands is a vital one that continues today.²⁰

The positivist school, which developed so rapidly in the pragmatic, optimistic world of the nineteenth century, declared that law as it exists should be analysed empirically, shorn of all ethical elements. Moral aspirations were all well and good, but had no part in legal science. Man-made law must be examined as such and the metaphysical speculations of Natural Law rejected because what counted were the practical realities, not general principles which were imprecise and vague, not to say ambiguous.²¹

This kind of approach to law in society reached its climax with Kelsen's 'Pure Theory of Law'. Kelsen defined law solely in terms of itself and eschewed any element of justice, which was rather to be considered within the discipline of political science. Politics, sociology and history were all excised from the pure theory which sought to construct a logical unified structure based on a formal appraisal.²²

Law was to be regarded as a normative science, that is, consisting of rules which lay down patterns of behaviour. Such rules, or norms, depend for their legal validity on a prior norm and this process continues until one reaches what is termed the basic norm of the whole system. This basic norm is the foundation of the legal edifice, because rules which can be related back to it therefore become *legal* rules. To give a simple example, a court order empowering an official to enforce a fine is valid if the court had that power which depends upon an Act of Parliament establishing the court. A rule becomes a legal rule if it is in accordance with a previous (and higher) legal rule and so on. Layer builds upon layer and the foundation of it all is the basic norm.²³

The weakness of Kelsen's 'pure' system lies primarily in the concept of the basic norm for it relies for its existence upon non-legal issues. In fact, it is a political concept, and in the United Kingdom it would probably be the principle of the supremacy of Parliament.²⁴

This logical, structured system of validity founded upon an extra-legal concept encounters difficulties when related to international law. For Kelsen international law is a primitive legal order because of its lack of strong legislative, judicial and enforcement organs and its consequent resemblance to a pre-state society. It is accordingly characterised by the use of self-help.²⁵ The principles of international law are valid if they can be traced back to the basic norm of the system, which is hierarchical in the same sense as a national legal system. For Kelsen, the basic norm is the rule that identifies custom as the source of law, or stipulates that 'the states ought to behave as they customarily behaved'.²⁶ One of the prime rules of this category is *pacta*

sunt servanda declaring that agreements must be carried out in good faith and upon that rule is founded the second stage within the international legal order. This second stage consists of the network of norms created by international treaties and conventions and leads on to the third stage which includes those rules established by organs which have been set up by international treaties, for instance, decisions of the International Court of Justice.²⁷

The problem with Kelsen's formulation of the basic norm of international law is that it appears to be tautological: it merely repeats that states which obey rules ought to obey those rules.²⁸ It seems to leave no room for the progressive development of international law by new practices accepted as law for that involves states behaving differently from the way they have been behaving. Above all, it fails to answer the question as to why custom is binding.

Nevertheless, it is a model of great logical consistency which helps explain, particularly with regard to national legal systems, the proliferation of rules and the importance of validity which gives, as it were, a mystical seal of approval to the whole structured process. It helps illustrate how rule leads to rule as stage succeeds stage in a progression of norms forming a legal order.

Another important element in Kelsen's interpretation of law is his extreme 'monist' stance. International law and municipal law are not two separate systems, but one interlocking structure, and the former is supreme. Municipal law finds its ultimate justification in the rules of international law by a process of delegation within one universal normative system.²⁹

Kelsen's pure theory seemed to mark the end of that particular road, and positivism was analysed in more sociological terms by Hart in his book *The Concept of Law* in 1961.

Hart comprehends law as a system of rules, based upon the interaction of primary and secondary rules. The former, basically, specify standards of behaviour, while the latter provide the means for identifying and developing them and thus specify the constitutional procedures for change. Primitive societies would possess only the primary rules and so would be characterised by uncertainty, inefficiency and stagnation, but with increasing sophistication the secondary rules would develop and identify authority and enable the rules to be adapted to changing circumstances in a regular and accepted manner.³⁰

The international legal order is a prime example of a simple form of social structure which consists only of the primary rules, because of its lack of a centralised legislature, network of recognised courts with compulsory jurisdiction and organised means of enforcement. Accordingly, it has no need of, or rather has not yet evolved, a basic norm, or in Hart's terminology a rule of recognition, by reference to which the validity of all the rules may be tested. Following this train of thought, Hart concludes that the rules of international law do not as yet constitute a 'system', but are merely a 'set of rules'. Of course, future developments may see one particular principle, such as *pacta sunt servanda*, elevated to the state of a validating norm, but in the present situation this has not yet occurred.³¹

This approach can be criticised for its over-concentration upon rules to the exclusion of other important elements in a legal system such as principles and

policies,³² and, more especially as regards international law, for failing to recognise the sophistication or vitality of the system. In particular, the distinction between a system and a set of rules in the context of international law is a complex issue and one which is difficult to delineate.

The strength of the positivist movement waned in the last century as the old certainties disintegrated and social unrest grew. Law, as always, began to reflect the dominant pressures of the age, and new theories as to the role of law in society developed. Writers started examining the effects of sociological phenomena upon the legal order and the nature of the legal process itself, with analyses of judicial behaviour and the means whereby rules were applied in actual practice. This was typified by Roscoe Pound's view of the law as a form of social engineering, balancing the various interests within the society in the most efficacious way.³³ Law was regarded as a method of social control and conceptual approaches were rejected in favour of functional analyses. What actually happened within the legal system, what claims were being brought and how they were satisfied: these were the watchwords of the sociological school.³⁴

It was in one sense a move away from the ivory tower and into the courtroom. Empirical investigations proliferated, particularly in the United States, and the sciences of psychology and anthropology as well as sociology became allied to jurisprudence. Such concern with the wider social context led to the theories of Realism, which treated law as an institution functioning within a particular community with a series of jobs to do. A study of legal norms within a closed logical system in the Kelsenite vein was regarded as unable to reveal very much of the actual operation of law in society. For this

an understanding of the behaviour of courts and the various legal officials was required. Historical and ethical factors were relegated to a minor role within the realist–sociological tradition, with its concentration upon field studies and ‘technical’ dissections. Legal rules were no longer to be accepted as the heart of the legal system.³⁵

Before one looks at contemporary developments of this approach and how they have affected interpretations of international law, the revival of Natural Law has first to be considered.

In the search for meaning in life and an ethical basis to law, Natural Law has adopted a variety of different approaches. One of them has been a refurbishment of the principles enumerated by Aquinas and adopted by the Catholic Church, emphasising the dignity of man and the supremacy of reason together with an affirmation of the immorality (though not necessarily the invalidity) of law contrary to right reason and the eternal law of God.³⁶ A more formalistic and logic-oriented trend has been exemplified by writers such as Stammler, who tried to erect a logical structure of law with an inbuilt concept of ‘Natural Law with a changing content’. This involved contrasting the *concept* of law, which was intended to be an abstract, formal definition universally applicable, with the *idea* of law, which embodies the purposes and direction of the system. This latter precept varied, of necessity, in different social and cultural contexts.³⁷

As distinct from this formal idealist school, there has arisen a sociologically inspired approach to the theme of Natural Law represented by Gény and Duguit. This particular trend rejected the emphasis upon form, and

concentrated instead upon the definition of Natural Law in terms of universal factors, physical, psychological, social and historical, which dominate the framework of society within which the law operated.³⁸

The discussion of Natural Law increased and gained in importance following the Nazi experience. It stimulated a German philosopher, Radbruch, to formulate a theory whereby unjust laws had to be opposed by virtue of a higher, Natural Law.³⁹

As far as international law is concerned, the revival of Natural Law came at a time of increasing concern with international justice and the formation of international institutions. Many of the ideas and principles of international law today are rooted in the notion of Natural Law and the relevance of ethical standards to the legal order, such as the principles of non-aggression and human rights.⁴⁰

New Approaches⁴¹

Traditionally, international law has been understood in a historical manner and studied chronologically. This approach was especially marked in the nineteenth century as international relations multiplied and international conferences and agreements came with increasing profusion. Between the world wars, the opening of government archives released a wealth of material and further stimulated a study of diplomatic history, while the creation of such international institutions as the League of Nations and the Permanent Court of International Justice encouraged an appreciation of institutional processes.

However, after the Second World War a growing trend appeared intent upon the analysis of power politics and the comprehension of international relations in terms of the capacity to influence and dominate. The approach was a little more sophisticated than might appear at first glance, for it involved a consideration of social and economic as well as political data that had a bearing upon a state's ability to withstand as well as direct pressures.⁴² Nevertheless, it was a pessimistic interpretation because of its centring upon power and its uses as the motive force of inter-state activity.

The next 'wave of advance', as it has been called, witnessed the successes of the behaviouralist movement. This particular train of thought introduced elements of psychology, anthropology and sociology into the study of international relations and paralleled similar developments within the realist school. It reflected the altering emphasis from analyses in terms of idealistic

or cynical (‘realistic’) conceptions of the world political order, to a mechanistic discussion of the system as it operates today, by means of field studies and other tools of the social sciences. Indeed, it is more a method of approach to law and society than a theory in the traditional sense.⁴³

One can trace the roots of this school of thought to the changing conceptions of the role of government in society. The nineteenth-century ethic of individualism and the restriction of state intervention to the very minimum has changed radically. The emphasis is now more upon the responsibility of the government towards its citizens, and the phenomenal growth in welfare legislation illustrates this. Rules and regulations controlling wide fields of human activity, something that would have been unheard of in the mid-nineteenth century, have proliferated throughout the nations of the developed world and theory has had to try and keep up with such re-orientations.

Since the law now plays a much deeper role in society with the increase in governmental intervention, impetus has been given to legal theories that reflect this growing involvement. Law, particularly in the United States, is seen as a tool to effect changes in society and realist doctrine underlines this. It emphasises that it is community values and policy decisions that determine the nature of the law and accordingly the role of the judge is that much more important. He is no longer an interpreter of a body of formal legal rules, but should be seen more as an active element in making decisions of public policy.

This means that to understand the operation of law, one has to consider the character of the particular society, its needs and values. Law thus becomes a

dynamic process and has to be studied in the context of society and not merely as a collection of legal rules capable of being comprehended on their own. The social sciences have led the way in this reinterpretation of society and their influence has been very marked on the behavioural method of looking at the law, not only in terms of general outlook, but also in providing the necessary tools to dissect society and discover the way it operates and the direction in which it is heading. The interdisciplinary nature of the studies in question was emphasised, utilising all the social sciences, including politics, economics and philosophy.⁴⁴ In particular, the use of the scientific method, such as obtaining data and quantitative analysis, has been very much in evidence.

Behaviouralism has divided the field of international relations into basically two studies, the first being a consideration of foreign policy techniques and the reasons whereby one particular course of action is preferred to another, and the second constituting the international systems analysis approach.⁴⁵ This emphasises the interaction of the various players on the international stage and the effects of such mutual pressures upon both the system and the participants. More than that, it examines the various international orders that have existed throughout history in an attempt to show how the dynamics of each particular system have created their own rules and how they can be used as an explanation of both political activity and the nature of international law. In other words, the nature of the international system can be examined by the use of particular variables in order to explain and to predict the role of international law.

For example, the period between 1848 and 1914 can be treated as the era of the 'balance of power' system. This system depended upon a number of factors, such as a minimum number of participants (accepted as five), who would engage in a series of temporary alliances in an attempt to bolster the weak and restrict the strong, for example the coalitions Britain entered into to overawe France. It was basic to this system that no nation wished totally to destroy any other state, but merely to humble and weaken, and this contributed to the stability of the order.⁴⁶

This system nurtured its own concepts of international law, especially that of sovereignty which was basic to the idea of free-floating alliances and the ability of states to leave the side of the strong to strengthen the weak. The balance of power collapsed with the First World War and, after a period of confusion, a discernible, loose 'bipolar' system emerged in the years following the Second World War.

This was predicated upon the polarisation of capitalism and communism and the consequent rigid alliances that were created. It included the existence of a 'Third World' of basically non-aligned states, the objects of rivalry and of competition, while not in themselves powerful enough to upset the bipolar system. This kind of order facilitated 'frontier' conflicts where the two powers collided, such as in Korea, Berlin and Vietnam, as well as modified the nature of sovereignty within the two alliances, thus allowing such organisations as NATO and the European Community (subsequently European Union) on the one hand, and the Warsaw Pact and COMECON on the other, to develop. The other side of this coin has been the freedom felt by the superpowers to control wavering states within their respective spheres of

influence, for example, the Soviet actions in Poland, Hungary and Czechoslovakia and those of the United States, particularly within Latin America.⁴⁷

Behaviouralism has been enriched by the use of such techniques as games theory.⁴⁸ This is a mathematical method of studying decision-making in conflict situations where the parties react rationally in the struggle for benefits. It can be contrasted with the fight situation, where the essence is the actual defeat of the opponent, and with the debate situation, which is an effort to convince the participants of the rightness of one's cause. Other factors which are taken into account include communications, integration, environment and capabilities. Thus, the range and complexity of this approach far exceeds that of prior theories.

All this highlights the switch in emphasis that has taken place in the consideration of law in the world community. The traditional view was generally that international law constituted a series of rules restricting the actions of independent states and forming exceptions to state sovereignty. The new theories tend to look at the situation differently, more from the perspective of the international order expanding its horizons than the nation-state agreeing to accept certain defined limitations upon its behaviour.

The rise of quantitative research has facilitated the collation and ordering of vast quantities of data. It is primarily a methodological approach utilising political, economic and social data and statistics, and converting facts and information into a form suitable for scientific investigation. Such methods with their behavioural and quantitative aspects are beginning to impinge upon

the field of international law. They enable a greater depth of knowledge and comprehension to be achieved and a wider appreciation of all the various processes at work.⁴⁹

The behavioural approach to international relations has been translated into international law theory by a number of writers, in particular Professor McDougal, with some important modifications. This 'policy-orientated' movement regards law as a comprehensive process of decision-making rather than as a defined set of rules and obligations. It is an active all-embracing approach, seeing international law as a dynamic system operating within a particular type of world order.⁵⁰ It therefore minimises the role played by rules, for such a traditional conception of international law 'quite obviously offers but the faintest glimpse of the structures, procedures and types of decision that take place in the contemporary world community'.⁵¹ It has been emphasised that the law is a constantly evolving process of decision-making and the way that it evolves will depend on the knowledge and insight of the decision-maker.⁵² In other words, it is the social process of constant human interaction that is seen as critical and, in this process, claims are continually being made in an attempt to maximise values at the disposal of the participants. Eight value-institution categories have been developed to analyse this process: power, wealth, enlightenment, skill, well-being, affection, respect and rectitude. This list may be further developed. It is not exhaustive. Law is to be regarded as a product of such social processes.⁵³ International law is the whole process of authoritative decision-making involving crucially the concepts of authority and control. The former is defined in terms of the structure of expectation concerning the identity and

competence of the decision-maker, whilst the latter refers to the actual effectiveness of a decision, whether or not authorised.⁵⁴

McDougal's work and that of his followers emphasises the long list of values, interests and considerations that have to be taken into account within the international system by the persons actually faced with making the decisions. This stress upon the so-called 'authoritative decision-maker', whether he or she be in the United States Department of State, in the British Foreign Office or 'anyone whose choice about an event can have some international significance'⁵⁵ as the person who in effect has to choose between different options respecting international legal principles, emphasises the practical world of power and authority.

Such a decision-maker is subject to a whole series of pressures and influences, such as the values of the community in which that person operates, and the interests of the particular nation-state served. He or she will also have to consider the basic values of the world order, for instance human dignity. This approach involves a complex dissection of a wide-ranging series of factors and firmly fixes international law within the ambit of the social sciences, both with respect to the procedures adopted and the tools of analysis. International law is seen in the following terms, as

a comprehensive process of authoritative decision in which rules are continuously made and remade; that the function of the rules of international law is to communicate the perspectives (demands, identifications and

expectations) of the peoples of the world about this comprehensive process of decision; and that the national application of these rules in particular instances requires their interpretation, like that of any other communication, in terms of who is using them, with respect to whom, for what purposes (major and minor), and in what context.⁵⁶

Legal rules articulate and seek to achieve certain goals and this value factor must not be ignored. The values emphasised by this school are basically those of human dignity, familiar from the concepts of Western democratic society.⁵⁷ Indeed, Reisman has emphasised the Natural Law origins of this approach as well as the need to clarify a jurisprudence for those persons whose activities have led to innovations in such fields of international law as human rights and the protection of the environment.⁵⁸

The policy-oriented movement has been greatly criticised by traditional international lawyers for unduly minimising the legal content of the subject and for ignoring the fact that nations generally accept international law as it is and obey its dictates.⁵⁹ States rarely indulge in a vast behavioural analysis, studiously considering every relevant element in a particular case and having regard to fundamental objectives like human dignity and welfare. Indeed, so to do may weaken international law, it has been argued.⁶⁰ In addition, the insertion of such value-concepts as 'human dignity' raises difficulties of subjectivity that ill fit within a supposedly objective analytical structure.

Koskenniemi, for example, has drawn attention to the predilection of the policy-oriented approach to support the dominant power.⁶¹

Other writers, such as Professor Falk, accept the basic comprehensive approach of the McDougal school, but point to its inconsistencies and over-fulsome cataloguing of innumerable interests. They tend to adopt a global outlook based upon a deep concern for human welfare and morality, but with an emphasis upon the importance of legal rules and structure.⁶²

Professor Franck, however, has sought to refocus the essential question of the existence and operation of the system of international law in terms of inquiring into why states obey international law despite the undeveloped condition of the international legal system's structures, processes and enforcement mechanisms.⁶³ The answer is seen to lie in the concept of legitimacy. States will obey the rules because they see such rules and their institutional framework as possessing a high degree of legitimacy.

Legitimacy itself is defined as 'a property of a rule or rule-making institution which itself exerts a pull towards compliance on those addressed normatively because those addressed believe that the rule or institution has come into being and operates in accordance with generally accepted principles of right process'.⁶⁴ Legitimacy may be empirically demonstrated, but compliance may be measured not only by observing states acting in accordance with the principle in question, but also by observing the degree to which a violator actually exhibits deference to that principle even while violating it.

Legitimacy will depend upon four specific properties, it is suggested: determinacy (or readily ascertainable normative content or 'transparency');

symbolic validation (or authority approval); coherence (or consistency or general application); and adherence (or falling within an organised hierarchy of rules). In other words, it is proposed that there exist objectively verifiable criteria which help us to ascertain why international rules are obeyed and thus why the system works. This approach is supplemented by the view that legitimacy and justice as morality are two aspects of the concept of fairness, which is seen by Franck as the most important question for international law.⁶⁵ Franck, however, has also drawn attention to the ‘emerging right to individuality’⁶⁶ within the context of a ‘global identity crisis’⁶⁷ in which the growth of supranational institutions and the collapse of a range of states combine to undermine traditional certainties of world order. He notes that persons are increasingly likely to identify themselves as autonomous individuals and that this is both reflected and manifested in the rise and expansion of international human rights law and in the construction of multi-layered and freely selected affinities.⁶⁸ While such personal rights are increasingly protected in both national and international law, the question as to the appropriate balancing of individual, group and state rights is posed in more urgent form.

However, legitimacy may also be understood in a broader way in referring to the relationship with the international political system as a whole and as forming the link between power and the legal system. It imbues the normative order with authority and acceptability, although not as such legality. Legitimacy links law and politics in its widest sense and will depend upon the context out of which it emerges. One writer has concluded that legitimacy ‘is a matter of history and thus is subject to change as new events emerge from the future and new understandings reinterpret the past’.⁶⁹

Legitimacy is important in that it constitutes a standard for the testing in the wider political environment of the relevance and acceptability of legal norms and practices. A rule seen as legitimate will benefit from a double dose of approval. A rule, institution or practice seen as illegal and illegitimate will be doubly disapproved of. A rule, or entity, which is legal but not legitimate will, it is suggested, not be able to sustain its position over the long term. A practice seen as illegal but legitimate is likely to form the nucleus of a new rule.

The recurring themes of the relationship between sovereign states and international society and the search for a convincing explanation for the binding quality of international law in a state-dominated world appear also in very recent approaches to international law theory which fall within the general critical legal studies framework.⁷⁰ Such approaches have drawn attention to the many inconsistencies and incoherences that persist within the international legal system. The search for an all-embracing general theory of international law has been abandoned in mainstream thought as being founded upon unverifiable propositions, whether religiously or sociologically based, and attention has switched to the analysis of particular areas of international law and in particular procedures for the settlement of disputes. The critical legal studies movement notes that the traditional approach to international law has in essence involved the transposition of 'liberal' principles of domestic systems onto the international scene, but that this has led to further problems.⁷¹ Specifically, liberalism tries constantly to balance individual freedom and social order and, it is argued, inevitably ends up siding with either one or other of those propositions.⁷² Additionally, there are only two possibilities with regard to justice itself: it is either simply

subjective or it is imposed. In either case, liberalism is compromised as a system.

The critical legal studies approach (sometimes termed the ‘New Approaches to International Law’ or NAIL) notes the close relationship that exists between law and society, but emphasises that conceptual analysis is also crucial since such concepts are not in themselves independent entities, but reflect particular power relationships. The point is made that the nexus between state power and international legal concepts needs to be taken into consideration as well as the way in which such concepts in themselves reflect political factors. As Koskenniemi writes, ‘a post-realist theory . . . aims to answer questions regarding the relationship of law and society and the legitimacy of constraint in a world of sovereigns as aspects of one single problem: the problem of power in concepts’.⁷³ The problem posed by the growth in the world community and the need to consider the range of different cultures and traditions within that community leads, it is suggested, to the decline of universality as such and the need to focus upon the specific contexts of particular problems.

In a more recent work, Koskenniemi has drawn attention not only to the continuing tension between the universalist and particularist impulses in international law,⁷⁴ but also to the related distinction between formalism and dynamism, or the contrast between rule-oriented and policy-oriented approaches. It is his view in essence that the latter approach might too easily be utilised to support a dominant political position.⁷⁵ It is the typical lawyer’s answer in any event to declare that all depends upon the particular circumstances of the case and this approach is generalised in order to deal

with the question of which of several relevant international rules is to predominate. It is in fact a way of noting that superior operating principles are difficult to find or justify and thus concluding that the search for universal concepts or principles is of little value. In effect, it is proposed that no coherent international system as such actually exists and that one should rather concentrate upon ad hoc legal concepts as reflecting power considerations and within the confines of the specific contexts in which the particular questions or issues have arisen. Like the policy-oriented approach, the critical legal studies view is to accept that international law is more than a set of rules, but it then proceeds to emphasise the indeterminacy as such of law rather than seeing law as a collection of competing norms between which choices must be made.⁷⁶ One particular area of study in recent years has been that concerned with the position of women within international law, both in terms of the structure of the system and the, for example, relative absence of females from the institutions and processes of international law and in terms of substantive law, which has until recently paid little attention to the needs and concerns of women.⁷⁷

The Fragmentation of International Law?⁷⁸

The tremendous expansion of both the rules and the institutions of international law, with the rise of more and more specialist areas, such as trade law, environmental law and human rights law, has led to arguments that international law as a holistic system is in the process of fragmentation. This has led to the fear that the centre will not be able to hold and that international law might dissolve into a series of discrete localised or limited systems with little or no interrelationship. In many ways, it is the explosion of

what is termed ‘globalisation’, with the consequential spread of practices and mechanisms across the world,⁷⁹ that has precipitated this problem of fragmentation, being defined in one view as the ‘emergence of specialised and relatively autonomous spheres of social action and structure’.⁸⁰ This has led to a debate as to the relationship between self-contained regimes in international law and the system as a whole,⁸¹ with the fear being expressed that the rise of specialised rules and mechanisms that have no clear authority relationship might lead to conflicts between local systems and, at the least, inconsistency in the interpretation and development of international law.⁸² While to some extent the former is a real danger,⁸³ there is still a powerful centralising dynamic in international law and indeed a strong presumption against normative conflict:⁸⁴ for example, the principle that special law (*lex specialis*) derogates from general law (*lex generalis*), so that the more detailed and specific rule will have priority.⁸⁵ It is also true that international law, as a decentralised system, has long had to face the problem of relating together a variety of rules derived from general treaties, specific treaties and customary law, while it is indeed the case that even with the increase in specialist areas of international law, there is an increasing tendency to relate hitherto discrete spheres.⁸⁶ Further, while decisions of international courts and tribunals may not always be compatible, there is a hierarchy of authority with the International Court of Justice at the summit.⁸⁷ The International Law Commission’s Report on Fragmentation reached two principal conclusions: first, that ‘the emergence of special treaty-regimes (which should not be called “self-contained”) has not seriously undermined legal security, predictability or the equality of legal subjects’; and, secondly, that ‘increasing attention will have to be given to the collision of norms and regimes and the rules, methods and techniques for dealing with such collisions’.⁸⁸

Conclusion

The range of theories and approaches to international law and not least the emphasis upon the close relationship between international law and international relations⁸⁹ testifies both to the importance of the subject and the inherent difficulties it faces.⁹⁰ International law is clearly much more than a simple set of rules. It is a culture in the broadest sense in that it constitutes a method of communicating claims, counter-claims, expectations and anticipations as well as providing a framework for assessing and prioritising such demands.

International law functions in a particular, concrete world system, involving a range of actors from states to international organisations, companies and individuals, and as such needs to be responsive to the needs and aspirations of such participants. The international system is composed increasingly of cooperative and competing elements participating in cross-boundary activities, but the essential normative and structural nature of international law remains.⁹¹ Law is not the only way in which issues transcending borders are negotiated and settled or indeed fought over. It is one of a number of methods for dealing with an existing complex and shifting system, but it is a way of some prestige and influence for it is of its very nature in the form of mutually accepted obligations.⁹² Law and politics cannot be divorced. They are not identical, but they do interact on several levels. They are engaged in a crucial symbiotic relationship. It does neither discipline a service to minimise the significance of the other.

Note that Philip Bobbitt has described five

developments challenging the nation-state system, and thus in essence characterising the globalisation challenge, as follows: the recognition of human rights as norms requiring adherence within all states regardless of internal laws; the widespread deployment of weapons of mass destruction rendering the defence of state borders ineffectual for the protection of the society within; the proliferation of global and transnational threats transcending state boundaries such as those that damage the environment or threaten states through migration, population expansion, disease or famine; the growth of a world economic regime that ignores borders in the movement of capital investment to a degree that effectively curtails states in the management of their economic affairs; and the creation of a global communications network that penetrates borders electronically and threatens national languages, customs and cultures; *The Shield of Achilles*, London, 2002, p. xxii.

⁸⁴ International Law Commission Report on Fragmentation, p. 25.

⁸⁵ See further below, Chapter 3, p. 105.

⁸⁶ See e.g. with regard to human rights law and humanitarian law (or the laws of war), A. E. Cassimatis, ‘International Humanitarian Law, International Human Rights Law, and Fragmentation of International Law’, *56 ICLQ*, 2007, p. 623. See further below, Chapter 20, p. 1044 and as to the discussion of fragmentation and interrelationship of international legal rules as regards the protection of the atmosphere, see S. Murase, ‘The Guiding Principles of Interrelationship’, Fourth Report on the Protection of the Atmosphere, International Law Commission, A/CN.4/705, pp. 5 ff. (2017); and Shaw, ‘International Law’, p. 239.

⁸⁷ See further below, Chapter 18, p. 979.

⁸⁸ At pp. 248–9. Note also P.-M. Dupuy, ‘L’Unité de l’Ordre Juridique Internationale’, *297 HR*, 2002, p. 9; and P.-M. Dupuy, ‘2000–2020: Twenty Years Later, Where are We in Terms of the Unity of International Law?’, *9 Cambridge International Law Journal*, 2020, p. 6, underlining the unity of international law on the basis of accepted procedures for the creation of the primary norms of international law (the formal unity) and the substantive rules of the system including peremptory norms (the material unity) and their conjunctive and competitive relationship. See Chapter 3 below on the sources of international law.

⁸⁹ See e.g. A.-M. Slaughter, A. S. Tulumello and S. Wood, ‘International Law and International Relations Theory: A New Generation of Interdisciplinary Scholarship’, *92 AJIL*, 1998, p. 367; and Slaughter, *A New World Order*. See also Bobbitt, *Shield*, who posits the dying of the nation-state and its replacement by the market-state, with consequential changes with regard to both international law and its institutions, e.g. pp. 353 ff., 667 ff.

⁹⁰ Note relatively recent arguments based on a revived power realism approach, particularly made in the US, that international law is simply a part of a complex of factors which are relevant, and implicitly subservient, to diplomacy and the pursuit of national interests: see e.g. J. L. Goldsmith and E. A. Posner, *The Limits of International Law*, Oxford, 2005; and M. J. Glennon, *Limits of Law, Prerogatives of Power: Interventionism after Kosovo*, New York, 2001; but cf. Franck, *Power of Legitimacy*; A. Van Aaken, ‘To Do Away with International Law? Some Limits to the “Limits of International Law”’, *17*

EJIL, 2006, p. 289; and G. Simpson, *Great Powers and Outlaw States: Unequal Sovereigns in the International Legal Order*, Cambridge, 2004.

⁹¹ See also A. Roberts, *Is International Law International?*, Oxford, 2017; and J. Crawford, 'The Current Political Discourse Concerning International Law', **81** *Modern Law Review*, 2018, p. 1.

⁹² Higgins has noted that 'international law has to be identified by reference to what the actors (most often states), often without benefit of pronouncement by the International Court of Justice, believe normative in their relations with each other', *Problems and Process*, p. 18.

3

Sources

The ascertainment of the sources of international law lies at the heart of the system.¹ The discovery of the law on any given point in domestic legal orders is not usually too difficult a process. In the English legal system, for example, one looks to see whether the matter is covered by an Act of Parliament (or possibly a statutory instrument) and, if it is, the law reports are consulted as to how it has been interpreted by the courts. If the particular point is not specifically referred to in a statute, court cases will be examined to elicit the required information. In other words, there is a definite method of discovering what the law is. In addition to verifying the contents of the rules, this method also demonstrates how the law is created, namely, by parliamentary legislation or judicial case-law. This gives a degree of certainty to the legal process because one is able to tell when a proposition has become law and the necessary mechanism to resolve any disputes about the law is evident. It reflects the hierarchical character of a national legal order with its gradations of authority imparting to the law a large measure of stability and predictability.

The contrast is very striking when one considers the situation in international law. The lack of a legislature, executive and structure of courts within international law has been noted and the effects of this will become clearer as one proceeds. There is no single body able to create laws internationally

binding upon everyone, nor a proper system of courts with comprehensive and compulsory jurisdiction to interpret and extend the law. One is therefore faced with the problem of discovering where the law is to be found and how one can tell whether a particular proposition amounts to a legal rule. This perplexity is reinforced because of the anarchic nature of world affairs and the clash of competing sovereignties. Nevertheless, international law does exist and is ascertainable. There are 'sources' available from which the rules may be extracted and analysed.

By 'sources' one means those provisions operating within the legal system on a technical level, and such ultimate sources as reason or morality are excluded, as are more functional sources such as libraries and journals. What is intended is a survey of the process whereby rules of international law emerge.²

Article 38(1) of the ICJ Statute is widely recognised as the most authoritative and complete statement as to the sources of international law.³ It provides that:

the Court, whose function is to decide in accordance with international law such disputes as are submitted to it, shall apply: (a) international conventions, whether general or particular, establishing rules expressly recognised by the contesting states; (b) international custom, as evidence of a general practice accepted as law; (c) the general

principles of law recognised by civilised nations; (d) subject to the provisions of Article 59, judicial decisions and the teachings of the most highly qualified publicists of the various nations, as subsidiary means for the determination of rules of law.

Although this formulation is technically limited to the sources of international law which the International Court must apply, in fact since the function of the Court is to decide disputes submitted to it ‘in accordance with international law’ and since all member states of the United Nations are *ipso facto* parties to the Statute by virtue of article 93 of the UN Charter (states that are non-members of the United Nations can specifically become parties to the Statute of the Court: Switzerland was the most obvious example of this until it joined the United Nations in 2002), there is no serious contention that the provision expresses the universal perception as to the enumeration of sources of international law.

Some writers have sought to categorise the distinctions in this provision, so that international conventions, custom and the general principles of law are described as the three exclusive law-creating processes, while judicial decisions and academic writings are regarded as law-determining agencies, dealing with the verification of alleged rules.⁴ But in reality it is not always possible to make hard and fast divisions. The different functions overlap to a great extent so that in many cases treaties (or conventions) merely reiterate accepted rules of customary law, and judgments of the International Court of

Justice may actually create law in the same way that municipal judges formulate new law in the process of interpreting existing law.⁵

A distinction has sometimes been made between formal and material sources.⁶ The former, it is claimed, confer upon the rules an obligatory character, while the latter comprise the actual content of the rules. Thus, the formal sources appear to embody the constitutional mechanism for identifying law, while the material sources incorporate the essence or subject-matter of the regulations. This division has been criticised particularly in view of the peculiar constitutional set-up of international law, and it tends to distract attention from some of the more important problems by its attempt to establish a clear separation of substantive and procedural elements, something difficult to maintain in international law.

Custom⁷

Introduction

In any primitive society certain rules of behaviour emerge and prescribe what is permitted and what is not. Such rules develop almost subconsciously within the group and are maintained by the members of the group by social pressures and with the aid of various other more tangible implements. They are not, at least in the early stages, written down or codified, and survive ultimately because of what can be called an aura of historical legitimacy.⁸ As the community develops it will modernise its code of behaviour by the creation of legal machinery, such as courts and legislature. Custom, for this is how the original process can be described, remains and may also continue to evolve.⁹ It is regarded as an authentic expression of the needs and values of the community at any given time.

Custom within contemporary legal systems, particularly in the developed world, is relatively cumbersome and unimportant and often of only nostalgic value.¹⁰ In international law, on the other hand, it is a dynamic source of law in the light of the nature of the international system and its lack of centralised government organs.

The existence of customary rules can be deduced from the practice and behaviour of states and this is where the problems begin. How can one tell when a particular line of action adopted by a state reflects a legal rule or is merely prompted by, for example, courtesy? Indeed, how can one discover

what precisely a state is doing or why, since there is no living 'state', but rather thousands of officials in scores of departments exercising governmental functions? Other issues concern the speed of creation of new rules and the effect of protests.

There are disagreements as to the value of a customary system in international law. Some writers deny that custom can be significant today as a source of law, noting that it is too clumsy and slow-moving to accommodate the evolution of international law any more,¹¹ while others declare that it is a dynamic process of law creation and more important than treaties since it is of universal application.¹² Another view recognises that custom is of value since it is activated by spontaneous behaviour and thus mirrors the contemporary concerns of society. However, since international law now has to contend with a massive increase in the pace and variety of state activities as well as having to come to terms with many different cultural and political traditions, the role of custom is perceived to be much diminished.¹³

There are elements of truth in each of these approaches. Amid a wide variety of conflicting behaviour, it is not easy to isolate the emergence of a new rule of customary law and there are immense problems involved in collating all the necessary information. It is not always the best instrument available for the regulation of complex issues that arise in world affairs, but in particular situations it may meet the contingencies of modern life. As will be seen, it is possible to point to something called 'instant' customary law in certain circumstances that can prescribe valid rules without having to undergo a long period of gestation, and custom can and often does dovetail neatly within the

complicated mechanisms now operating for the identification and progressive development of the principles of international law.

More than that, custom does mirror the characteristics of the decentralised international system. It is democratic in that all states may share in the formulation of new rules, though the precept that some are more equal than others in this process is not without its grain of truth. If the international community is unhappy with a particular law it can be changed relatively quickly without the necessity of convening and successfully completing a world conference. It reflects the consensus approach to decision-making with the ability of the majority to create new law binding upon all, while the very participation of states encourages their compliance with customary rules. Its imprecision means flexibility as well as ambiguity. Indeed, the creation of the concept of the exclusive economic zone in the law of the sea may be cited as an example of this process. This is discussed further in Chapter 10. The essence of custom according to article 38 is that it should constitute ‘evidence of a general practice accepted as law’. Thus, it is possible to detect two basic elements in the make-up of a custom. These are the material facts, that is, the actual behaviour of states, and the psychological or subjective belief that such behaviour is ‘law’. As the International Court noted in the *Libya/Malta Continental Shelf* case, the substance of customary law must be ‘looked for primarily in the actual practice and *opinio juris* of states’.¹⁴

It is understandable why the first requirement is mentioned, since customary law is founded upon the performance of state activities and the convergence of practices, in other words, what states actually do. It is the psychological factor (*opinio juris*) that needs some explanation. If one left the definition of

custom as state practice, then the problem of how to separate international law from principles of morality or social usage would necessarily arise. This is because states do not restrict their behaviour to what is legally required. They may pursue a line of conduct purely through a feeling of goodwill and in the hope of reciprocal benefits. States do not have to allow tourists in or launch satellites. There is no law imposing upon them the strict duty to distribute economic aid to developing nations. The bare fact that such things are done does not mean that they have to be done.

The issue therefore is how to distinguish behaviour undertaken because of a law from that undertaken because of a whole series of other reasons ranging from goodwill to pique, and from ideological support to political bribery. And if customary law is restricted to the overt acts of states, one cannot solve this problem.

Accordingly, the second element in the definition of custom has been elaborated. This is the psychological factor, the belief by a state that behaved in a certain way that it was under a legal obligation or had a legal right to act that way. It is known in legal terminology as *opinio juris sive necessitatis* and was first formulated by the French writer François Gény as an attempt to differentiate legal custom from mere social usage.¹⁵

However, the relative importance of the two factors, the overt action and the subjective conviction, is disputed by various writers.¹⁶ Positivists, with their emphasis upon state sovereignty, stress the paramount importance of the psychological element. States are only bound by what they have consented to, so therefore the material element is minimised to the greater value of *opinio*

juris. If states believe that a course of action is legal and perform it, even if only once, then it is to be inferred that they have tacitly consented to the rule involved. Following on from this line of analysis, various positivist thinkers have tended to minimise many of the requirements of the overt manifestation, for example, with regard to repetition and duration.¹⁷ Other writers have taken precisely the opposite line and maintain that *opinio juris* is impossible to prove and therefore of no tremendous consequence. Kelsen, for one, has written that it is the courts that have the discretion to decide whether any set of usages is such as to create a custom and that the subjective perception of the particular state or states is not called upon to give the final verdict as to its legality or otherwise.¹⁸

The Material Fact

The actual practice engaged in by states constitutes the initial factor to be brought into account. There are a number of points to be considered concerning the nature of a particular practice by states, including its duration, consistency, repetition and generality. As far as the duration is concerned, most countries specify a recognised timescale for the acceptance of a practice as a customary rule within their municipal systems. This can vary from ‘time immemorial’ in the English common law dating back to 1189, to figures from thirty or forty years on the Continent.

In international law, however, there is no rigid time element and it will depend upon the circumstances of the case and the nature of the usage in question. In certain fields, such as air and space law, the rules have developed quickly; in others, the process is much slower. Duration is thus not the most

important of the components of state practice.¹⁹ The essence of custom is to be sought elsewhere.

The basic rule as regards continuity and repetition was laid down in the *Asylum* case decided by the International Court of Justice (ICJ) in 1950.²⁰ The Court declared that a customary rule must be ‘in accordance with a constant and uniform usage practised by the States in question’.²¹

The case concerned Haya de la Torre, a Peruvian, who was sought by his government after an unsuccessful revolt. He was granted asylum by Colombia in its embassy in Lima, but Peru refused to issue a safe conduct to permit Torre to leave the country. Colombia brought the matter before the ICJ and requested a decision recognising that it (Colombia) was competent to define Torre’s offence, as to whether it was criminal as Peru maintained, or political, in which case asylum and a safe conduct could be allowed.

The Court, in characterising the nature of a customary rule, held that it had to constitute the expression of a right appertaining to one state (Colombia) and a duty incumbent upon another (Peru). However, the Court felt that in the *Asylum* litigation, state practices had been so uncertain and contradictory as not to amount to a ‘constant and uniform usage’ regarding the unilateral qualification of the offence in question.²² The issue involved here dealt with a regional custom pertaining only to Latin America and it may be argued that the same approach need not necessarily be followed where a general custom is alleged and that in the latter instance a lower standard of proof would be upheld.²³

The ICJ emphasised its view that some degree of uniformity among state practices was essential before a custom could come into existence in the *Anglo-Norwegian Fisheries* case.²⁴ The United Kingdom, in its arguments against the Norwegian method of measuring the breadth of the territorial sea, referred to an alleged rule of custom whereby a straight line may be drawn across bays of less than ten miles from one projection to the other, which could then be regarded as the baseline for the measurement of the territorial sea. The Court dismissed this by pointing out that the actual practice of states did not justify the creation of any such custom. In other words, there had been insufficient uniformity of behaviour.

In the *North Sea Continental Shelf* cases,²⁵ which involved a dispute between Germany on the one hand and Holland and Denmark on the other over the delimitation of the continental shelf, the ICJ remarked that state practice, ‘including that of states whose interests are specially affected’, had to be ‘both extensive and virtually uniform in the sense of the provision invoked’. This was held to be indispensable to the formation of a new rule of customary international law.²⁶ However, the Court emphasised in *Nicaragua v. United States*²⁷ that it was not necessary that the practice in question had to be ‘in absolutely rigorous conformity’ with the purported customary rule. The Court continued:

In order to deduce the existence of customary rules, the Court deems it sufficient that the conduct of states should, in general, be consistent with such rules, and that instances of state conduct inconsistent with a given rule

should generally have been treated as breaches of that rule, not as indications of the recognition of a new rule.²⁸

The threshold that needs to be attained before a legally binding custom can be created will depend both upon the nature of the alleged rule and the opposition it arouses. This partly relates to the problem of ambiguity where it is not possible to point to the alleged custom with any degree of clarity, as in the *Asylum* case, where a variety of conflicting and contradictory evidence had been brought forward.

On the other hand, an unsubstantiated claim by a state cannot be accepted because it would amount to unilateral law-making and compromise a reasonably impartial system of international law. If a proposition meets with a great deal of opposition, then it would be an undesirable fiction to ignore this and talk of an established rule. Another relevant factor is the strength of the prior rule which is purportedly overthrown.²⁹ For example, the customary law relating to a state's sovereignty over its airspace developed very quickly in the years immediately before and during the First World War. Similarly, the principle of non-sovereignty over the space route followed by artificial satellites came into being soon after the launching of the first sputniks. Bin Cheng has argued that in such circumstances repetition is not at all necessary provided the *opinio juris* could be clearly established. Thus, 'instant' customary law is possible.³⁰

This contention that single acts may create custom has been criticised, particularly in view of the difficulties of proving customary rules any other

way but through a series of usages.³¹ Nevertheless, the conclusion must be that it is the international context which plays the vital part in the creation of custom. In a society constantly faced with new situations because of the dynamics of progress, there is a clear need for a reasonably speedy method of responding to such changes by a system of prompt rule-formation. In new areas of law, customs can be quickly established by state practices by virtue of the newness of the situations involved, the lack of contrary rules to be surmounted and the overwhelming necessity to preserve a sense of regulation in international relations.

One particular analogy that has been used to illustrate the general nature of customary law was considered by de Visscher. He likened the growth of custom to the gradual formation of a road across vacant land. After an initial uncertainty as to direction, the majority of users begin to follow the same line which becomes a single path. Not long elapses before that path is transformed into a road accepted as the only regular way, even though it is not possible to state at which precise moment this latter change occurs. And so it is with the formation of a custom. De Visscher develops this idea by reflecting that just as some make heavier footprints than others due to their greater weight, the more influential states of the world mark the way with more vigour and tend to become the guarantors and defenders of the way forward.³²

The reasons why a particular state acts in a certain way are varied, but are closely allied to how it perceives its interests. This in turn depends upon the power and role of the state and its international standing. Accordingly, custom should to some extent mirror the perceptions of the majority of states, since it is based upon usages which are practised by nations as they express

their power and their hopes and fears. But it is inescapable that some states are more influential and powerful than others and that their activities should be regarded as of greater significance. This is reflected in international law so that custom may be created by a few states, provided those states are intimately connected with the issue at hand, whether because of their wealth and power or because of their special relationship with the subject-matter of the practice, as for example maritime nations and sea law. Law cannot be divorced from politics or power and this is one instance of that proposition.³³

The influence of the United Kingdom, for example, on the development of the law of the sea and prize law in the nineteenth century, when it was at the height of its power, was predominant. A number of propositions later accepted as part of international customary law appeared this way. Among many instances of this, one can point to navigation procedures. Similarly, the impact of the Soviet Union (now Russia) and the United States on space law has been paramount.³⁴

One can conclude by stating that for a custom to be accepted and recognised it must have the concurrence of the major powers in that particular field. A regulation regarding the breadth of the territorial sea is unlikely to be treated as law if the great maritime nations do not agree to or acquiesce in it, no matter how many landlocked states demand it. Other countries may propose ideas and institute pressure, but without the concurrence of those most interested, it cannot amount to a rule of customary law. This follows from the nature of the international system where all may participate, but the views of those with greater power carry greater weight.

Accordingly, the duration and generality of a practice may take second place to the relative importance of the states precipitating the formation of a new customary rule in any given field. Universality is not required, but some correlation with power is. Some degree of continuity must be maintained, but this again depends upon the context of operation and the nature of the usage.

Those elements reflect the external manifestations of a practice and establish that it is in existence and exhibited as such. That does not mean that it is law and this factor will be considered in the next subsection. But it does mean that all states who take the trouble can discover its existence. This factor of conspicuousness emphasises both the importance of the context within which the usage operates and the more significant elements of the overt act which affirms the existence of a custom.

The question is raised at this stage of how significant a failure to act is. Failures to act are in themselves just as much evidence of a state's attitudes as are actions. They similarly reflect the way in which a nation approaches its environment. A failure to act can arise from either a legal obligation not to act, or an incapacity or unwillingness in the particular circumstances to act. Indeed, it has been maintained that the continued habit of not taking actions in certain situations may lead to the formation of a legal rule.³⁵

The danger of saying that a failure to act over a long period creates a negative custom, that is a rule actually not to do it, can be shown by remarking on the absurdity of the proposition that a continual failure to act until the late 1950s is evidence of a legal rule not to send artificial satellites or rockets into space. On the other hand, where a particular rule of behaviour is established, it can

be argued that abstention from protest by states may amount to agreement with that rule.

In the particular circumstances of the *Lotus* case,³⁶ the Permanent Court of International Justice, the predecessor of the ICJ, laid down a high standard by declaring that abstention could only give rise to the recognition of a custom if it was based on a conscious duty to abstain. In other words, states had actually to be aware that they were not acting a particular way because they were under a definite obligation not to act that way. The decision has been criticised and would appear to cover categories of non-acts based on legal obligations, but not to refer to instances where, by simply not acting as against a particular rule in existence, states are tacitly accepting the legality and relevance of that rule. However, acquiescence must be based upon full knowledge of the rule invoked. Where a failure to take a course of action is in some way connected or influenced or accompanied by a lack of knowledge of all the relevant circumstances, then it cannot be interpreted as acquiescence.

What is State Practice?

It is how states behave in practice that forms the basis of customary law, but evidence of what a state does can be obtained from numerous sources.

Obvious examples include administrative acts, legislation, decisions of domestic courts³⁷ and activities on the international stage, for example treaty-making.³⁸ A state is not a living entity, but consists of governmental departments and thousands of officials, and state activity is spread throughout a whole range of national organs. There are the state's legal officers, legislative institutions, courts, diplomatic agents and political leaders. Each of

these engages in activity which relates to the international field and therefore one has to examine all such material sources and more in order to discover evidence of what states do.³⁹

The obvious way to find out how countries are behaving is to read the newspapers, consult historical records, listen to what governmental authorities are saying and peruse the many official publications. There are also memoirs of various past leaders, official manuals on legal questions, diplomatic interchanges and the opinions of national legal advisers. All these methods are valuable in seeking to determine actual state practice.

In addition, one may note resolutions in the General Assembly, comments made by governments on drafts produced by the International Law Commission, decisions of the international judicial institutions, decisions of national courts, treaties and the general practice of international organisations.⁴⁰

International organisations in fact may be instrumental in the creation of customary law. For example, the Advisory Opinion of the International Court of Justice declaring that the United Nations possessed international personality was partly based on the actual behaviour of the United Nations.⁴¹ The International Law Commission has pointed out that ‘records of the cumulative practice of international organisations may be regarded as evidence of customary international law with reference to states’ relations to the organisations’.⁴² The International Court has also noted that evidence of the existence of rules and principles may be found in resolutions adopted by the UN General Assembly and the UN Security Council.⁴³

States' municipal laws may in certain circumstances form the basis of customary rules. In the *Scotia* case decided by the US Supreme Court in 1871,⁴⁴ a British ship had sunk an American vessel on the high seas. The Court held that British navigational procedures established by an Act of Parliament formed the basis of the relevant international custom since other states had legislated in virtually identical terms. Accordingly, the American vessel, in not displaying the correct lights, was at fault. The view has also been expressed that mere claims as distinct from actual physical acts cannot constitute state practice. This is based on the precept that 'until it [a state] takes enforcement action, the claim has little value as a prediction of what the state will actually do'.⁴⁵ But as has been demonstrated, this is decidedly a minority view.⁴⁶ Claims and conventions of states in various contexts have been adduced as evidence of state practice and it is logical that this should be so,⁴⁷ though the weight to be attached to such claims, may, of course, vary according to the circumstances. This approach is clearly the correct one since the process of claims and counter-claims is one recognised method by which states communicate to one another their perceptions of the status of international rules and norms. In this sense they operate in the same way as physical acts. Whether *in abstracto* or with regard to a particular situation, they constitute the raw material out of which may be fashioned rules of international law.⁴⁸ It is suggested that the formulation that 'state practice covers any act or statements by a state from which views about customary law may be inferred',⁴⁹ is substantially correct. However, it should be noted that not all elements of practice are equal in their weight and the value to be given to state conduct will depend upon its nature and provenance.

*Opinio Juris*⁵⁰

Once the existence of a specified usage has been established, it becomes necessary to consider how the state views its own behaviour. The *opinio juris*, or belief that a state activity is legally obligatory, is the factor which turns the usage into a custom and renders it part of the rules of international law. To put it slightly differently, states will behave a certain way because they are convinced it is binding upon them to do so, or, as ILC Conclusion 9(1) puts it, ‘the practice in question must be undertaken with a sense of legal right or obligation’.⁵¹

The Permanent Court of International Justice expressed this point of view when it dealt with the *Lotus* case.⁵² The issue at hand concerned a collision on the high seas (where international law applies) between the *Lotus*, a French ship, and the *Boz-Kourt*, a Turkish ship. Several people aboard the latter ship were drowned and Turkey alleged negligence by the French officer of the watch. When the *Lotus* reached Istanbul, the French officer was arrested on a charge of manslaughter and the case turned on whether Turkey had jurisdiction to try him. Among the various arguments adduced, the French maintained that there existed a rule of customary law to the effect that the flag state of the accused (France) had exclusive jurisdiction in such cases and that accordingly the national state of the victim (Turkey) was barred from trying him. To justify this, France referred to the absence of previous criminal prosecutions by such states in similar situations and from this deduced tacit consent in the practice which therefore became a legal custom.

The Court rejected this and declared that even if such a practice of abstention from instituting criminal proceedings could be proved in fact, it would not amount to a custom. It held that ‘only if such abstention were based on their

[the states] being conscious of a duty to abstain would it be possible to speak of an international custom'.⁵³ Thus, the essential ingredient of obligation was lacking and the practice remained a practice, nothing more.

A similar approach occurred in the *North Sea Continental Shelf* cases.⁵⁴ In the general process of delimiting the continental shelf of the North Sea in pursuance of oil and gas exploration, lines were drawn dividing the whole area into national spheres. However, West Germany could not agree with either Holland or Denmark over the respective boundary lines and the matter came before the International Court of Justice.

Article 6 of the Geneva Convention on the Continental Shelf 1958 provided that where agreement could not be reached, and unless special circumstances justified a different approach, the boundary line was to be determined in accordance with the principle of equidistance from the nearest points of the baselines from which the breadth of the territorial sea of each state is measured. This would mean a series of lines drawn at the point where Germany met Holland on the one side and Denmark on the other and projected outwards into the North Sea. However, because Germany's coastline is concave, such equidistant lines would converge and enclose a relatively small triangle of the North Sea. The Federal Republic had signed but not ratified the 1958 Geneva Convention and was therefore not bound by its terms. The question thus was whether a case could be made out that the 'equidistance–special circumstances principle' had been absorbed into customary law and was accordingly binding upon Germany.

The Court concluded in the negative and held that the provision in the Geneva Convention did not reflect an already existing custom. It was emphasised that when the International Law Commission had considered this point in the draft treaty which formed the basis of discussion at Geneva, the principle of equidistance had been proposed with considerable hesitation, somewhat on an experimental basis and not at all as an emerging rule of customary international law.⁵⁵ The issue then turned on whether practice subsequent to the Convention had created a customary rule. The Court answered in the negative and declared that although time was not of itself a decisive factor (only three years had elapsed before the proceedings were brought):

an indispensable requirement would be that within the period in question, short though it might be, state practice, including that of states whose interests are specially affected, should have been both extensive and virtually uniform in the sense of the provision invoked, and should moreover have occurred in such a way as to show a general recognition that a rule of law or legal obligation is involved.⁵⁶

This approach was maintained by the Court in *Nicaragua v. United States*⁵⁷ and express reference was made to the *North Sea Continental Shelf* cases. The Court noted that:

for a new customary rule to be formed, not only must the acts concerned ‘amount to a settled practice’, but they must be accompanied by the *opinio juris sive necessitatis*. Either the States taking such action or other States in a position to react to it, must have behaved so that their conduct is ‘evidence of a belief that this practice is rendered obligatory by the existence of a rule of law requiring it. The need for such a belief, i.e. the existence of a subjective element, is implicit in the very notion of the *opinio juris sive necessitatis*.’⁵⁸

This was reaffirmed by the Court in *Germany v. Italy* (Greece Application to Intervene), where it was further noted that:

Opinio juris in this context is reflected in particular in the assertion by States claiming immunity that international law accords them a right to such immunity from the jurisdiction of other States; in the acknowledgment, by States granting immunity, that international law imposes upon them an obligation to do so; and, conversely, in the assertion by States in other cases of a right to exercise jurisdiction over foreign States. While it may be true that States sometimes decide to accord an immunity more extensive than that required by international

law, for present purposes, the point is that the grant of immunity in such a case is not accompanied by the requisite *opinio juris* and therefore sheds no light upon the issue currently under consideration by the Court.⁵⁹

It is thus clear that the Court has adopted and maintained a high threshold with regard to the overt proving of the subjective constituent of customary law formation. Confluence of practice in itself is not enough. This was reflected in the *Diallo* case, where the International Court held that the fact that various international agreements have established special legal regimes for investment protection or that such provisions are commonly included in contracts between states and foreign investors ‘was insufficient to show that there has been a change in the customary rules of diplomatic protection: it could equally show the contrary’.⁶⁰

The great problem connected with the *opinio juris* is that if it calls for behaviour in accordance with law, how can new customary rules be created, since that obviously requires action different from or contrary to what until then is regarded as law? If a country claims a three-mile territorial sea in the belief that this is legal, how can the rule be changed in customary law to allow claims of, for example, twelve miles, since that cannot also be in accordance with prevailing law?⁶¹ Obviously if one takes a restricted view of the psychological aspects, then logically the law will become stultified and this demonstrably has not happened.

Thus, one has to treat the matter in terms of a process whereby states behave in a certain way in the belief that such behaviour is law or is becoming law. It will then depend upon how other states react as to whether this process of legislation is accepted or rejected. It follows that rigid definitions as to legality have to be modified to see whether the legitimating stamp of state activity can be provided or not. If a state proclaims a twelve-mile limit to its territorial sea in the belief that although the three-mile limit has been accepted law, the circumstances are so altering that a twelve-mile limit might now be treated as becoming law, it is vindicated if other states follow suit and a new rule of customary law is established. If other states reject the proposition, then the projected rule withers away and the original rule stands, reinforced by state practice and common acceptance. As the Court itself noted in *Nicaragua v. United States*,⁶² '[r]eliance by a State on a novel right or an unprecedented exception to the principle might, if shared in principle by other States, tend towards a modification of customary international law'. The difficulty in this kind of approach is that it is sometimes hard to pinpoint exactly when one rule supersedes another, but that is a complication inherent in the nature of custom. Change is rarely smooth, but rather spasmodic.

This means taking a more flexible view of the *opinio juris* and tying it more firmly with the overt manifestations of a custom into the context of national and international behaviour. This should be done to accommodate the idea of an action which, while contrary to law, contains the germ of a new law and relates to the difficulty of actually proving that a state, in behaving a certain way, does so in the belief that it is in accordance with the law. An extreme expression of this approach is to infer or deduce the *opinio juris* from the

material acts. Judge Tanaka, in his Dissenting Opinion in the *North Sea Continental Shelf* cases, remarked that there was:

no other way than to ascertain the existence of *opinio juris* from the fact of the external existence of a certain custom and its necessity felt in the international community, rather than to seek evidence as to the subjective motives for each example of State practice.⁶³

However, states must be made aware that when one state takes a course of action, it does so because it regards it as within the confines of international law, and not as, for example, purely a political or moral gesture. There has to be an aspect of legality about the behaviour and the acting state will have to confirm that this is so, so that the international community can easily distinguish legal from non-legal practices. This is essential to the development and presentation of a legal framework among the states. As the Commentary to ILC Conclusion 9 notes: ‘It is thus crucial to establish, in each case, that states have acted in a certain way because they felt or believed themselves legally compelled or entitled to do so by reason of a rule of customary international law.’⁶⁴

Faced with the difficulty in practice of proving the existence of the *opinio juris*,⁶⁵ increasing reference has been made to conduct within international organisations. This is so particularly with regard to the United Nations. The International Court of Justice has in a number of cases utilised General Assembly resolutions as confirming the existence of the *opinio juris*,

focusing on the content of the resolution or resolutions in question and the conditions of their adoption.⁶⁶ The key, however, is the attitude taken by the states concerned, whether as parties to a particular treaty or as participants in the adoption of a UN resolution.⁶⁷ The Court has also referred to major codification conventions for the same purpose,⁶⁸ and to the work of the International Law Commission.⁶⁹

Protest, Acquiescence and Change in Customary Law⁷⁰

Customary law is thus established by virtue of a pattern of claim, absence of protest by states particularly interested in the matter at hand and acquiescence by other states.⁷¹ Together with related notions such as recognition, admissions and estoppel, such conduct or abstinence from conduct forms part of a complex framework within which legal principles are created and deemed applicable to states.⁷²

The Chamber of the International Court in the *Gulf of Maine Maritime Boundary* case defined acquiescence as ‘equivalent to tacit recognition manifested by unilateral conduct which the other party may interpret as consent’ and as founded upon the principles of good faith and equity.⁷³ Generally, where states are seen to acquiesce⁷⁴ in the behaviour of other states without protesting against them, the assumption must be that such behaviour is accepted as legitimate.⁷⁵

Some writers have maintained that acquiescence can amount to consent to a customary rule and that the absence of protest implies agreement. In other words, where a state or states take action which they declare to be legal, the silence of other states can be used as an expression of *opinio juris* or concurrence in the new legal rule. This means that actual protests are called for to break the legitimising process.⁷⁶ As ILC Conclusion 10(3) on the Identification of Customary International Law put it: ‘Failure to react over time to a practice may serve as evidence of acceptance as law (*opinio juris*),

provided that States were in a position to react and the circumstances called for some reaction.’⁷⁷

In the *Lotus* case, the Court held that ‘only if such abstention were based on their [the states] being conscious of having a duty to abstain would it be possible to speak of an international custom’.⁷⁸ Thus, one cannot infer a rule prohibiting certain action merely because states do not indulge in that activity. But the question of not reacting when a state behaves a certain way is a slightly different one. It would seem that where a new rule is created in new fields of international law, for example space law, acquiescence by other states is to be regarded as reinforcing the rule whether it stems from actual agreement or lack of interest, depending always upon the particular circumstances of the case. Acquiescence in a new rule which deviates from an established custom is more problematic.

The decision in the *Anglo-Norwegian Fisheries* case⁷⁹ may appear to suggest that where a state acts contrary to an established customary rule and other states acquiesce in this, then that state is to be treated as not bound by the original rule. The Court noted that ‘in any event the . . . rule would appear to be inapplicable as against Norway inasmuch as she had always opposed any attempt to apply it to the Norwegian coast’.⁸⁰ In other words, a state opposing the existence of a custom from its inception would not be bound by it. This is known as the persistent objector rule.⁸¹ However, the problem of one or more states seeking to dissent from recognised customs by adverse behaviour coupled with the acquiescence or non-reaction of other states remains unsettled.

States fail to protest for very many reasons. A state might not wish to give offence gratuitously or it might wish to reinforce political ties or other diplomatic and political considerations may be relevant. It could be that to protest over every single act with which a state does not agree would be an excessive requirement. It is, therefore, unrealistic to expect every state to react to every single act of every other state. If one accepted that a failure to protest validated a derogation from an established custom in every case, then scores of special relationships would emerge between different states depending upon acquiescence and protest. In many cases a protest might be purely formal or part of diplomatic manoeuvring designed to exert pressure in a totally different field and thus not intended to alter legal relationships.

Where a new rule which contradicts a prior rule is maintained by a large number of states, the protests of a few states would not overrule it, and the abstention from reaction by other countries would merely reinforce it. Constant protest on the part of a particular state when reinforced by the acquiescence of other states might create a recognised exception to the rule, but it will depend to a great extent on the facts of the situation and the views of the international community. Behaviour contrary to a custom contains within itself the seeds of a new rule and if it is endorsed by other nations, the previous law will disappear and be replaced, or alternatively there could be a period of time during which the two customs co-exist until one of them is generally accepted,⁸² as was the position for many years with regard to the limits of the territorial sea.⁸³ It follows from the above, therefore, that customary rules are binding upon all states except for such states as have dissented from the start of that custom.⁸⁴ This raises the question of new states and custom, for the logic of the traditional approach would be for such

states to be bound by all existing customs as at the date of independence. The opposite view, based upon the consent theory of law, would permit such states to choose which customs to adhere to at that stage, irrespective of the attitude of other states.⁸⁵ However, since such an approach could prove highly disruptive, the proviso is often made that by entering into relations without reservation with other states, new states signify their acceptance of the totality of international law.⁸⁶

Regional and Local Custom⁸⁷

It is possible for rules to develop which will bind only a set group of states, such as those in Latin America,⁸⁸ or indeed just two states.⁸⁹ Such an approach may be seen as part of the need for ‘respect for regional legal traditions’.⁹⁰

In the *Asylum* case,⁹¹ the International Court of Justice discussed the Colombian claim of a regional or local custom peculiar to the Latin American states, which would validate its position over the granting of asylum. The Court declared that the ‘party which relies on a custom of this kind must prove that this custom is established in such a manner that it has become binding on the other party’.⁹² It found that such a custom could not be proved because of uncertain and contradictory evidence.

In such cases, the standard of proof required, especially as regards the obligation accepted by the party against whom the local custom is maintained, is higher than in cases where an ordinary or general custom is alleged.

In the *Right of Passage over Indian Territory* case,⁹³ Portugal claimed that there existed a right of passage over Indian territory as between the Portuguese enclaves, and this was upheld by the International Court of Justice over India’s objections that no local custom could be established between only two states. The Court declared that it was satisfied that there had in the past existed a constant and uniform practice allowing free passage

and that the ‘practice was accepted as law by the parties and has given rise to a right and a correlative obligation’.⁹⁴ More generally, the Court stated: ‘Where therefore the Court finds a practice clearly established between two States which was accepted by the Parties as governing the relations between them, the Court must attribute decisive effect to that practice for the purpose of determining their specific rights and obligations. Such a particular practice must prevail over any general rules.’⁹⁵

Such local customs therefore depend upon a particular activity by one state being accepted by the other state (or states) as an expression of a legal obligation or right. While in the case of a general customary rule the process of consensus is at work so that a majority or a substantial minority of interested states can be sufficient to create a new custom, a local custom needs the positive acceptance of both (or all) parties to the rule.⁹⁶ This is because local customs are an exception to the general nature of customary law, which involves a fairly flexible approach to law-making by all states, and instead constitutes a reminder of the former theory of consent whereby states are bound only by what they assent to. Exceptions may prove the rule, but they need greater proof than the rule to establish themselves.

Treaties⁹⁷

In contrast with the process of creating law through custom, treaties (or international conventions) are a more modern and more deliberate method.⁹⁸ Article 38 refers to ‘international conventions, whether general or particular, establishing rules expressly recognised by the contracting states’. Treaties will be considered in more detail in Chapter 15, but in this survey of the sources of international law reference must be made to the role of international conventions.

Treaties are known by a variety of differing names, ranging from Conventions, International Agreements, Pacts, General Acts and Charters, through to Statutes, Declarations and Covenants.⁹⁹ All these terms refer to a similar transaction, the creation of written agreements whereby the states participating bind themselves legally to act in a particular way or to set up particular relations between themselves. A series of conditions and arrangements are laid out which the parties oblige themselves to carry out.¹⁰⁰

The obligatory nature of treaties is founded upon the customary international law principle that agreements are binding (*pacta sunt servanda*). Treaties may be divided into ‘law-making’ treaties, which are intended to have universal or general relevance, and ‘treaty-contracts’, which apply only as between two or a small number of states. Such a distinction is intended to reflect the general or local applicability of a particular treaty and the range of obligations imposed. It cannot be regarded as hard and fast and there are many grey areas of overlap and uncertainty.¹⁰¹

Treaties are express agreements and are a form of substitute legislation undertaken by states. They bear a close resemblance to contracts in a superficial sense in that the parties create binding obligations for themselves, but they have a nature of their own which reflects the character of the international system. The number of treaties entered into has expanded over the last century; witness the growing number of volumes of the United Nations Treaty Series or the United Kingdom Treaty Series. They fulfil a vital role in international relations.

As governmental controls increase and the technological and communications revolutions affect international life, the number of issues which require some form of inter-state regulation multiplies.

For many writers, treaties constitute the most important sources of international law as they require the express consent of the contracting parties. Treaties are thus seen as superior to custom, which is regarded in any event as a form of tacit agreement.¹⁰² As examples of important treaties one may mention the Charter of the United Nations, the Geneva Conventions on the treatment of prisoners and the protection of civilians and the Vienna Convention on Diplomatic Relations. All kinds of agreements exist, ranging from the regulation of outer space exploration to the control of drugs and the creation of international financial and development institutions. It would be impossible to telephone abroad or post a letter overseas or take an aeroplane to other countries without the various international agreements that have laid down the necessary, recognised conditions of operation.

It follows from the essence of an international treaty that, like a contract, it sets down a series of propositions which are then regarded as binding upon the parties. How then is it possible to treat conventions as sources of international law, over and above the obligations imposed upon the contracting parties? It is in this context that one can understand the term ‘law-making treaties’. They are intended to have an effect *generally*, not restrictively, and they are to be contrasted with those treaties which merely regulate limited issues between a few states. Law-making treaties are those agreements whereby states elaborate their perception of international law upon any given topic or establish new rules which are to guide them for the future in their international conduct. Such law-making treaties, of necessity, require the participation of a large number of states to emphasise this effect, and may produce rules that will bind all.¹⁰³ They constitute normative treaties, agreements that prescribe rules of conduct to be followed. Examples of such treaties may include the Antarctic Treaty 1959 and the Genocide Convention 1948. There are also many agreements which declare the existing law or codify existing customary rules, such as the Vienna Convention on Diplomatic Relations of 1961.

Parties that do not sign and ratify the particular treaty in question are not bound by its terms. This is a general rule and was illustrated in the *North Sea Continental Shelf* cases,¹⁰⁴ where West Germany had not ratified the relevant Convention and was therefore under no obligation to heed its terms.

However, where treaties reflect customary law, then non-parties are bound – not because it is a treaty provision, but because it reaffirms a rule or rules of customary international law. Similarly, non-parties may come to accept that provisions in a particular treaty can generate customary law, depending

always upon the nature of the agreement, the number of participants and other relevant factors.

The possibility that a provision in a treaty may constitute the basis of a rule which, when coupled with the *opinio juris*, can lead to the creation of a binding custom governing all states, not just those party to the original treaty, was considered by the International Court of Justice in the *North Sea Continental Shelf* cases¹⁰⁵ and regarded as one of the recognised methods of formulating new rules of customary international law. The Court, however, declared that the particular provision had to be ‘of a fundamentally norm-creating character’,¹⁰⁶ that is, capable of forming the basis of a general rule of law. What exactly this amounts to will probably vary according to the time and place, but it does confirm that treaty provisions may lead to custom providing other states, parties and non-parties to the treaty fulfil the necessary conditions of compatible behaviour and *opinio juris*. It has been argued that this possibility may be extended so that generalisable treaty provisions may of themselves, without the requirement to demonstrate the *opinio juris* and with little passage of time, generate *ipso facto* customary rules.¹⁰⁷ This, while recognising the importance of treaties, particularly in the human rights field, containing potential norm-creating provisions, is clearly going too far. The danger would be of a small number of states legislating for all, unless dissenting states actually entered into contrary treaties.¹⁰⁸ This would constitute too radical a departure for the current process of law-formation within the international community.

It is now established that even where a treaty rule comes into being covering the same ground as a customary rule, the latter will not be simply absorbed

within the former, but will maintain its separate existence. The Court in *Nicaragua v. United States*¹⁰⁹ did not accept the argument of the United States that the norms of customary international law concerned with self-defence had been ‘subsumed’ and ‘supervened’ by article 51 of the UN Charter. It was emphasised that ‘even if a treaty norm and a customary norm relevant to the present dispute were to have exactly the same content, this would not be a reason for the Court to hold that the incorporation of the customary norm into treaty law must deprive the customary norm of its applicability as distinct from the treaty norm’.¹¹⁰ The Court concluded that ‘it will therefore be clear that customary international law continues to exist and to apply separately from international treaty law, even where the two categories of law have an identical content’.¹¹¹ The effect of this in the instant case was that the Court was able to examine the rule as established under customary law, whereas due to an American reservation, it was unable to analyse the treaty-based obligation.

Of course, two rules with the same content may be subject to different principles with regard to their interpretation and application; thus, the approach of the Court as well as being theoretically correct is of practical value also. In many cases, such dual source of existence of a rule may well suggest that the two versions are not in fact identical, as in the case of self-defence under customary law and article 51 of the Charter, but it will always depend upon the particular circumstances.¹¹²

Certain treaties attempt to establish a ‘regime’ which will, of necessity, also extend to non-parties.¹¹³ The UN Charter, for example, in its creation of a definitive framework for the preservation of international peace and security,

declares in article 2(6) that ‘the organisation shall ensure that states which are not members of the United Nations act in accordance with these Principles [listed in article 2] so far as may be necessary for the maintenance of international peace and security’. One can also point to the 1947 General Agreement on Tariffs and Trade (GATT) which set up a common code of conduct in international trade and has had an important effect on non-party states as well, being now transmuted into the World Trade Organization.

On the same theme, treaties may be constitutive in that they create international institutions and act as constitutions for them, outlining their proposed powers and duties.

‘Treaty-contracts’ on the other hand are not law-making instruments in themselves since they are between only small numbers of states and on a limited topic, but may provide evidence of customary rules. For example, a series of bilateral treaties containing a similar rule may be evidence of the existence of that rule in customary law, although this proposition needs to be approached with some caution in view of the fact that bilateral treaties by their very nature often reflect discrete circumstances.¹¹⁴

General Principles of Law¹¹⁵

In any system of law, a situation may very well arise where the court in considering a case before it realises that there is no law covering exactly that point, neither parliamentary statute nor judicial precedent. In such instances the judge will proceed to deduce a rule that will be relevant, by analogy from already existing rules or directly from the general principles that guide the legal system, whether they be referred to as emanating from justice, equity or considerations of public policy. Such a situation is perhaps even more likely to arise in international law because of the relative underdevelopment of the system in relation to the needs with which it is faced.

There are fewer decided cases in international law than in a municipal system and no method of legislating to provide rules to govern new situations.¹¹⁶ It is for such a reason that the provision of ‘the general principles of law recognised by civilised nations’¹¹⁷ was inserted into article 38 as a source of law, to close the gap that might be uncovered in international law and solve this problem which is known legally as *non liquet*.¹¹⁸ The question of gaps in the system is an important one. It is important to appreciate that while there may not always be an immediate and obvious rule applicable to every international situation, ‘every international situation is capable of being determined *as a matter of law*’.¹¹⁹

There are various opinions as to what the general principles of law concept is intended to refer. Some writers regard it as an affirmation of Natural Law concepts, which are deemed to underlie the system of international law and

constitute the method for testing the validity of the positive (i.e. man-made) rules.¹²⁰ Other writers, particularly positivists, treat it as a sub-heading under treaty and customary law and incapable of adding anything new to international law unless it reflects the consent of states. Soviet writers like Tunkin subscribed to this approach and regarded the ‘general principles of law’ as reiterating the fundamental precepts of international law, for example, the law of peaceful co-existence, which have already been set out in treaty and custom law.¹²¹

Between these two approaches, most writers are prepared to accept that the general principles do constitute a separate source of law, but of fairly limited scope, and this is reflected in the decisions of the Permanent Court of International Justice and the International Court of Justice. It is not clear, however, in all cases, whether what is involved is a general principle of law appearing in municipal systems or a general principle of international law or indeed, as it has been expressed, such principles of municipal law as are applicable to the relations between states.¹²²

While the reservoir from which one can draw contains the legal operations of 190 or so states, it does not follow that judges have to be experts in every legal system. There are certain common themes that run through the many different orders. Anglo-American common law has influenced a number of states throughout the world, as have the French and Germanic systems. There are many common elements in the law in Latin America, and most Afro-Asian states have borrowed heavily from the European experience in their efforts to modernise the structure administering the state and westernise economic and other enterprises.¹²³

Reference will now be made to some of the leading cases in this field to illustrate how this problem has been addressed.

In the *Chorzów Factory* case in 1928,¹²⁴ which followed the seizure of a nitrate factory in Upper Silesia by Poland, the Permanent Court of International Justice declared that ‘it is a general conception of law that every violation of an engagement involves an obligation to make reparation’. The Court also regarded it as:

a principle of international law that the reparation of a wrong may consist in an indemnity corresponding to the damage which the nationals of the injured state have suffered as a result of the act which is contrary to international law.

The most fertile fields, however, for the implementation of municipal law analogies have been those of procedure, evidence and the machinery of the judicial process. In the *German Settlers in Poland* case,¹²⁵ the Court, approaching the matter from the negative point of view,¹²⁶ declared that ‘private rights acquired under existing law do not cease on a change of sovereignty . . . It can hardly be maintained that, although the law survived, private rights acquired under it perished. Such a contention is based on no principle and would be contrary to an almost universal opinion and practice.’¹²⁷ The International Court of Justice in the *Corfu Channel* case,¹²⁸ when referring to circumstantial evidence, pointed out that ‘this indirect evidence is admitted in all systems of law and its use is recognised by

international decisions'. International judicial reference has also been made to the concept of *res judicata*, that is that the decision in the circumstances is final, binding and without appeal.¹²⁹

In the *United Nations Administrative Tribunal* case,¹³⁰ the Court dealt with the problem of the dismissal of members of the United Nations Secretariat staff and whether the General Assembly had the right to refuse to give effect to awards to them made by the relevant Tribunal. In giving its negative reply, the Court emphasised that:

according to a well-established and generally recognised principle of law, a judgment rendered by such a judicial body is *res judicata* and has binding force between the parties to the dispute.¹³¹

The question of *res judicata* was discussed in some detail in *Application of the Genocide Convention (Bosnia and Herzegovina v. Serbia and Montenegro)*,¹³² where the issue focused on the meaning of the 1996 decision of the Court rejecting preliminary objections to jurisdiction.¹³³ The Court emphasised that the principle

signifies that the decisions of the Court are not only binding on the parties, but are final, in the sense that they cannot be reopened by the parties as regards the issues that have been determined, save by procedures, of an

exceptional nature, specially laid down for that purpose. That principle signifies that the decisions of the Court are not only binding on the parties, but are final, in the sense that they cannot be reopened by the parties as regards the issues that have been determined, save by procedures, of an exceptional nature, specially laid down for that purpose.¹³⁴

The Court noted that two purposes, one general and one specific, underpinned the principle of *res judicata*, internationally as well as nationally. The first referred to the stability of legal relations that requires that litigation come to an end. The second was that it is in the interest of each party that an issue which has already been adjudicated in favour of that party not be argued again. It was emphasised that depriving a litigant of the benefit of a judgment it had already obtained must in general be seen as a breach of the principles governing the legal settlement of disputes. The Court noted that the principle applied equally to preliminary objections judgments and merits judgments and that, since jurisdiction had been established by virtue of the 1996 judgment, it was not open to a party to assert in current proceedings that, at the date the earlier judgment was given, the Court had no power to give it, because one of the parties could now be seen to have been unable to come before it. This would be to call in question the force as *res judicata* of the operative clause of the judgment.¹³⁵

Further, the Court in the preliminary objections phase of the *Right of Passage over Indian Territory* case¹³⁶ stated that:

it is a rule of law generally accepted, as well as one acted upon in the past by the Court, that, once the Court has been validly seized of a dispute, unilateral action by the respondent state in terminating its Declaration [i.e. accepting the jurisdiction of the Court], in whole or in part, cannot divest the Court of jurisdiction.

The Court has also considered the principle of estoppel which provides that a party that has acquiesced in a particular situation cannot then proceed to challenge it. In the *Temple of Preah Vihear* case,¹³⁷ the International Court of Justice applied the doctrine, but in the *Serbian Loans* case¹³⁸ in 1929, in which French bondholders were demanding payment in gold francs as against paper money upon a series of Serbian loans, the Court declared the principle inapplicable.

As the International Court noted in the *ELSI* case,¹³⁹ there were limitations upon the process of inferring an estoppel in all circumstances, since ‘although it cannot be excluded that an estoppel could in certain circumstances arise from a silence when something ought to have been said, there are obvious difficulties in constructing an estoppel from a mere failure to mention a matter at a particular point in somewhat desultory diplomatic exchanges’.¹⁴⁰ The meaning of estoppel was confirmed in the preliminary objections judgment in *Cameroon v. Nigeria*,¹⁴¹ where the Court emphasised: ‘An estoppel would only arise if by its acts or declarations Cameroon had consistently made it fully clear that it had agreed to settle the boundary

dispute submitted to the Court by bilateral avenues alone. It would further be necessary that, by relying on such an attitude, Nigeria had changed position to its own detriment or had suffered some prejudice.’ In *Mauritius v. United Kingdom*, the Tribunal noted that ‘evidence of opportunities foregone in reliance upon a representation constitutes one of the clearest forms of detrimental reliance, although a benefit conveyed on the representing State will also suffice’.¹⁴²

Another example of a general principle was provided by the Arbitral Tribunal in *AMCO v. Indonesia*,¹⁴³ where it was stated that ‘the full compensation of prejudice, by awarding to the injured party the *damnum emergens* and *lucrum cessans* is a principle common to the main systems of municipal law, and therefore, a general principle of law which may be considered as a source of international law’. Another principle would be that of respect for acquired rights,¹⁴⁴ a further one that a party advancing a point of fact in support of its claim must establish that fact,¹⁴⁵ while yet another argued general principle is that of proportionality, which notes that in areas ranging from recourse to self-defence and the actual use of force in the conduct of hostilities to maritime delimitation, counter-measures in WTO (World Trade Organization) and investment law and in human rights, the application of a particular rule may be constrained by relevant factors.¹⁴⁶ One crucial general principle of international law is that of *pacta sunt servanda*, or the idea that international agreements are binding. The law of treaties rests inexorably upon this principle since the whole concept of binding international agreements can only rest upon the presupposition that such instruments are commonly accepted as possessing that quality.¹⁴⁷

Perhaps the most important general principle, underpinning many international legal rules, is that of good faith.¹⁴⁸ This principle is enshrined in the UN Charter, which provides in article 2(2) that ‘all Members, in order to ensure to all of them the rights and benefits resulting from membership, shall fulfil in good faith the obligations assumed by them in accordance with the present Charter’, and the elaboration of this provision in the Declaration on Principles of International Law Concerning Friendly Relations and Co-operation among States adopted by the General Assembly in resolution 2625 (XXV), 1970, referred to the obligations upon states to fulfil in good faith their obligations resulting from international law generally, including treaties. It therefore constitutes an indispensable part of the rules of international law generally.¹⁴⁹

The International Court declared in the *Nuclear Tests* cases¹⁵⁰ that:

One of the basic principles governing the creation and performance of legal obligations, whatever their source, is the principle of good faith. Trust and confidence are inherent in international co-operation, in particular in an age when this co-operation in many fields is becoming increasingly essential. Just as the very rule of *pacta sunt servanda* in the law of treaties is based on good faith, so also is the binding character of an international obligation assumed by unilateral obligation.

Nevertheless, the Court has made the point that good faith as a concept is ‘not in itself a source of obligation where none would otherwise exist’.¹⁵¹ The principle of good faith, therefore, is a background principle informing and shaping the observance of existing rules of international law and in addition constraining the manner in which those rules may legitimately be exercised.¹⁵² As the International Court has noted, the principle of good faith relates ‘only to the fulfilment of existing obligations’.¹⁵³ A further principle to be noted is that of *ex injuria jus non oritur*, which posits that facts flowing from wrongful conduct cannot determine the law.¹⁵⁴

Thus, it follows that it is the Court which has the discretion as to which principles of law to apply in the circumstances of the particular case under consideration, and it will do this upon the basis of the inability of customary and treaty law to provide the required solution. In this context, one must consider the *Barcelona Traction* case¹⁵⁵ between Belgium and Spain. The International Court of Justice relied heavily upon the municipal law concept of the limited liability company and emphasised that if the Court were to decide the case in disregard of the relevant institutions of municipal law it would, without justification, invite serious legal difficulties. It would lose touch with reality, for there are no corresponding institutions of international law to which the Court could resort.¹⁵⁶

However, international law did not refer to the municipal law of a particular state, but rather to the rules generally accepted by municipal legal systems which, in this case, recognise the idea of the limited company.¹⁵⁷

Equity and International Law¹⁵⁸

Apart from the recourse to the procedures and institutions of municipal legal systems to reinforce international law, it is also possible to see in a number of cases references to equity¹⁵⁹ as a set of principles constituting the values of the system. The most famous decision on these lines was that of Judge Hudson in the *Diversion of Water from the River Meuse* case¹⁶⁰ in 1937 regarding a dispute between Holland and Belgium. Hudson pointed out that what are regarded as principles of equity have long been treated as part of international law and applied by the courts. ‘Under article 38 of the Statute’, he declared, ‘if not independently of that article, the Court has some freedom to consider principles of equity as part of the international law which it must apply.’ However, one must be very cautious in interpreting this, although on the broadest level it is possible to see equity (on an analogy with domestic law) as constituting a creative charge in legal development, producing the dynamic changes in the system rendered inflexible by the strict application of rules.¹⁶¹

The concept of equity¹⁶² has been referred to in several cases. In the *Rann of Kutch* arbitration between India and Pakistan in 1968,¹⁶³ the Tribunal agreed that equity formed part of international law and that accordingly the parties could rely on such principles in the presentation of their cases.¹⁶⁴ The International Court of Justice in the *North Sea Continental Shelf* cases directed a final delimitation between the parties – West Germany, Holland and Denmark – ‘in accordance with equitable principles’¹⁶⁵ and discussed the relevance to equity in its consideration of the *Barcelona Traction* case.¹⁶⁶

Judge Tanaka, however, has argued for a wider interpretation in his Dissenting Opinion in the Second Phase of the *South West Africa* case¹⁶⁷ and has treated the broad concept as a source of human rights ideas.¹⁶⁸

However, what is really in question here is the use of equitable principles in the context of a rule requiring such an approach. The relevant courts are not applying principles of abstract justice to the cases,¹⁶⁹ but rather deriving equitable principles and solutions from the applicable law.¹⁷⁰ The Court declared in the *Libya/Malta Continental Shelf* case¹⁷¹ that ‘the justice of which equity is an emanation, is not an abstract justice but justice according to the rule of law; which is to say that its application should display consistency and a degree of predictability; even though it also looks beyond it to principles of more general application’.

Equity has been used by the courts as a way of mitigating certain inequities, not as a method of refashioning nature to the detriment of legal rules.¹⁷² Its existence, therefore, as a separate and distinct source of law is at best highly controversial. As the International Court noted in the *Tunisia/Libya Continental Shelf* case,¹⁷³

it is bound to apply equitable principles as part of international law, and to balance up the various considerations which it regards as relevant in order to produce an equitable result. While it is clear that no rigid rules exist as to the exact weight to be attached to each element in the case, this is very far from being an

exercise of discretion or conciliation; nor is it an operation of distributive justice.¹⁷⁴

The use of equitable principles, however, has been particularly marked in the 1982 Law of the Sea Convention. Article 59, for example, provides that conflicts between coastal and other states regarding the exclusive economic zone are to be resolved ‘on the basis of equity’, while by article 74 delimitation of the zone between states with opposite or adjacent coasts is to be effected by agreement on the basis of international law in order to achieve an equitable solution. A similar provision applies by article 83 to the delimitation of the continental shelf.¹⁷⁵ These provisions possess flexibility, which is important, but are also somewhat uncertain. Precisely how any particular dispute may be resolved, and the way in which that is likely to happen and the principles to be used, are far from clear and an element of unpredictability may have been introduced.¹⁷⁶ The Convention on the Law of the Non-Navigational Uses of International Watercourses 1997¹⁷⁷ also lays great emphasis upon the concept of equity. Article 5, for example, provides that watercourse states shall utilise an international watercourse in an equitable and reasonable manner both in their own territories and in participating generally in the use, development and protection of such a watercourse.

Equity may also be used in certain situations in the delimitation of non-maritime boundaries. Where there is no evidence as to where a boundary line lies, an international tribunal may resort to equity. In the case of *Burkina Faso/Mali*,¹⁷⁸ for example, the Court noted with regard to the pool of Soum that ‘it must recognise that Soum is a frontier pool; and that in the absence of

any precise indication in the texts of the position of the frontier line, the line should divide the pool of Soum in an equitable manner'. This would be done by dividing the pool equally. Although equity did not always mean equality, where there are no special circumstances the latter is generally the best expression of the former.¹⁷⁹ The Court also emphasised that 'to resort to the concept of equity in order to modify an established frontier would be quite unjustified'.¹⁸⁰ A further example is provided by the *Diallo* case, where the International Court declared: 'Quantification of compensation for non-material injury necessarily rests on equitable considerations.'¹⁸¹

Although generalised principles or concepts that may be termed community value-judgements inform and pervade the political and therefore the legal orders in the broadest sense, they do not themselves constitute as such binding legal norms. This can only happen if they have been accepted as legal norms by the international community through the mechanisms and techniques of international law creation. Nevertheless, 'elementary principles of humanity' may lie at the base of such norms and help justify their existence in the broadest sense, and may indeed perform a valuable role in endowing such norms with an additional force within the system. The International Court has, for example, emphasised in the *Legality of the Threat or Use of Nuclear Weapons* Advisory Opinion¹⁸² that at the heart of the rules and principles concerning international humanitarian law lies the 'overriding consideration of humanity'.

Judicial Decisions¹⁸³

Although these are, in the words of article 38, to be utilised as a subsidiary means for the determination of rules of law rather than as an actual source of law, judicial decisions can be of immense importance. While by virtue of article 59 of the ICJ Statute the decisions of the Court have no binding force except as between the parties and in respect of the case under consideration, the Court has striven to follow its previous judgments and insert a measure of certainty within the process. As the Court stated in *Cameroon v. Nigeria* (Preliminary Objections), '[t]he real question is whether, in this case, there is cause not to follow the reasoning and conclusions of earlier cases'¹⁸⁴ and in *Application of the Genocide Convention (Croatia v. Serbia)* (Preliminary Objections), the Court declared that 'it will not depart from its settled jurisprudence unless it finds very particular reasons to do so'.¹⁸⁵

Accordingly, while the doctrine of precedent as it is known in the common law, whereby the rulings of certain courts must be followed by other courts, does not exist in international law, one still finds that states in disputes and textbook writers quote judgments of the Permanent Court and the International Court of Justice as authoritative decisions.

The International Court of Justice itself will closely examine its previous decisions and will carefully distinguish those cases which it feels should not be applied to the problem being studied.¹⁸⁶ But just as English judges, for example, create law in the process of interpreting it, so the judges of the International Court of Justice sometimes do a little more than merely

‘determine’ it. One of the most outstanding instances of this occurred in the *Anglo-Norwegian Fisheries* case,¹⁸⁷ with its statement of the criteria for the recognition of baselines from which to measure the territorial sea, which was later enshrined in the 1958 Geneva Convention on the Territorial Sea and Contiguous Zone.

Other examples include the *Reparation for Injuries* case,¹⁸⁸ which recognised the legal personality of international institutions in certain cases, the *Reservations to the Genocide Convention* case,¹⁸⁹ which dealt with reservations to treaties, the *Nottebohm* case,¹⁹⁰ which considered the role and characteristics of nationality, and the range of cases concerning maritime delimitation.¹⁹¹

Of course, it does not follow that a decision of the Court will be invariably accepted in later discussions and formulations of the law. One example of this is part of the decision in the *Lotus* case,¹⁹² which was criticised and later abandoned in the Geneva Conventions on the Law of the Sea. But this is comparatively unusual and the practice of the Court is to examine its own relevant case-law with considerable attention and to depart from it rarely.¹⁹³ At the very least, it will constitute the starting point of analysis, so that, for example, the Court noted in *Cameroon v. Nigeria* (Preliminary Objections) that ‘the real question is whether, in this case, there is cause not to follow the reasoning and conclusion of earlier cases’.¹⁹⁴

In addition to the Permanent Court and the International Court of Justice, the phrase ‘judicial decisions’ also encompasses international arbitral awards and the rulings of national courts. There have been many international arbitral

tribunals, such as the Permanent Court of Arbitration created by the Hague Conferences of 1899 and 1907 and the various mixed-claims tribunals, including the Iran–US Claims Tribunal, and, although they differ from the international courts in some ways, many of their decisions have been extremely significant in the development of international law. This can be seen in the existence and number of the Reports of International Arbitral Awards published since 1948 by the United Nations.

One leading example is the *Alabama Claims* arbitration,¹⁹⁵ which marked the opening of a new era in the peaceful settlement of international disputes, in which increasing use was made of judicial and arbitration methods in resolving conflicts. This case involved a vessel built on Merseyside to the specifications of the Confederate States, which succeeded in capturing some seventy Federal ships during the American Civil War. The United States sought compensation after the war for the depredations of the *Alabama* and other ships and this was accepted by the Tribunal. Britain had infringed the rules of neutrality and was accordingly obliged to pay damages to the United States. Another illustration of the impact of arbitral awards is the *Island of Palmas* case,¹⁹⁶ which has proved of immense significance to the subject of territorial sovereignty and will be discussed in Chapter 9. In addition, the growing significance of the case-law of the International Criminal Tribunal for the Former Yugoslavia and the International Criminal Tribunal for Rwanda needs to be noted.¹⁹⁷ As a consequence, it is not rare for international courts of one type or another to cite one another's decisions, sometimes as support¹⁹⁸ and sometimes to disagree.¹⁹⁹

As has already been seen, the decisions of municipal courts²⁰⁰ may provide evidence of the existence of a customary rule. They may also constitute evidence of the actual practice of states which, while not a description of the law as it has been held to apply, nevertheless affords examples of how states actually behave, in other words the essence of the material act which is so necessary in establishing a rule of customary law.²⁰¹ British and American writers, in particular, tend to refer fairly extensively to decisions of national courts.

One may, finally, also point to decisions by the highest courts of federal states, like Switzerland and the United States, in their resolution of conflicts between the component units of such countries, as relevant to the development of international law rules in such fields as boundary disputes. A boundary disagreement between two US states which is settled by the Supreme Court is in many ways analogous to the International Court of Justice considering a frontier dispute between two independent states, and as such provides valuable material for international law.²⁰²

Writers²⁰³

Article 38 includes as a subsidiary means for the determination of rules of law, 'the teachings of the most highly qualified publicists of the various nations'.

Historically, of course, the influence of academic writers on the development of international law has been marked. In the heyday of Natural Law it was analyses and juristic opinions that were crucial, while the role of state

practice and court decisions was of less value. Writers such as Gentili, Grotius, Pufendorf, Bynkershoek and Vattel were the supreme authorities of the sixteenth to eighteenth centuries and determined the scope, form and content of international law.²⁰⁴

With the rise of positivism and the consequent emphasis upon state sovereignty, treaties and custom assumed the dominant position in the exposition of the rules of the international system, and the importance of legalistic writings began to decline. Thus, one finds that textbooks are used as a method of discovering what the law is on any particular point rather than as the fount or source of actual rules. There are still some writers who have had a formative impact upon the evolution of particular laws, for example Gidel on the law of the sea,²⁰⁵ and others whose general works on international law tend to be referred to virtually as classics, for example Oppenheim and Rousseau, but the general influence of textbook writers has somewhat declined.

Nevertheless, books are important as a way of arranging and putting into focus the structure and form of international law and of elucidating the nature, history and practice of the rules of law. Academic writings also have a useful role to play in stimulating thought about the values and aims of international law as well as pointing out the defects that exist within the system, and making suggestions as to the future.

Because of the lack of supreme authorities and institutions in the international legal order, the responsibility is all the greater upon the publicists of the

various nations to inject an element of coherence and order into the subject as well as to question the direction and purposes of the rules.

States in their presentation of claims, national law officials in their opinions to their governments, the various international judicial and arbitral bodies in considering their decisions, and the judges of municipal courts when the need arises, all consult and quote the writings of the leading juristic authorities.

Of course, the claim can be made, and often is, that textbook writers merely reflect and reinforce national prejudices,²⁰⁶ but it is an allegation which has been exaggerated. It should not lead us to dismiss the value of writers, but rather to assess correctly the writer within his particular environment.

Other Possible Sources of International Law

In the discussion of the various sources of law prescribed by the ICJ Statute, it might have been noted that there is a distinction between, on the one hand, actual sources of rules, that is those devices capable of instituting new rules such as law-making treaties, customary law and many decisions of the International Court of Justice since they cannot be confined to the category of merely determining or elucidating the law, and on the other hand those practices and devices which afford evidence of the existence of rules, such as juristic writings, many treaty-contracts and some judicial decisions both at the international and municipal levels. In fact, each source is capable, to some extent, of both developing new law and identifying existing law. This results partly from the disorganised state of international law and partly from the terms of article 38 itself.

A similar confusion between law-making, law-determining and law-evidencing can be discerned in the discussion of the various other methods of developing law that have emerged since the conclusion of the Second World War. Foremost among the issues that have arisen and one that reflects the growth in the importance of the Developing Countries ('Third World') states and the gradual de-Europeanisation of the world order is the question of the standing of the resolutions and declarations of the UN General Assembly.²⁰⁷

Unlike the UN Security Council, which has the competence to adopt resolutions under articles 24 and 25 of the UN Charter binding on all member states of the organisation,²⁰⁸ resolutions of the Assembly are generally not legally binding and are merely recommendatory, putting forward opinions on various issues with varying degrees of majority support.²⁰⁹ This is the classic position and reflects the intention that the Assembly was to be basically a parliamentary advisory body with the binding decisions being taken by the Security Council.

Nowadays, the situation is somewhat more complex. The Assembly has produced a great number of highly important resolutions and declarations and it was inevitable that these should have some impact upon the direction adopted by modern international law. The way states vote in the General Assembly and the explanations given upon such occasions constitute evidence of state practice and state understanding as to the law. Where a particular country has consistently voted in favour of, for example, the abolition of apartheid, it could not afterwards deny the existence of a usage condemning racial discrimination and it may even be that that usage is for that state converted into a binding custom.

The Court in *Nicaragua v. United States* tentatively expressed the view that the *opinio juris* requirement could be derived from the circumstances surrounding the adoption and application of a General Assembly resolution. It noted that the relevant

opinio juris may, though with all due caution, be deduced from, *inter alia*, the attitude of the Parties [i.e. the US and Nicaragua] and the attitude of States towards certain General Assembly resolutions, and particularly resolution 2625 (XXV) entitled ‘Declaration on Principles of International Law concerning Friendly Relations and Co-operation among States in accordance with the Charter of the United Nations’.²¹⁰

The effect of consent to resolutions such as this one ‘may be understood as acceptance of the validity of the rule or set of rules declared by the resolution by themselves’.²¹¹ This comment, however, may well have referred solely to the situation where the resolution in question defines or elucidates an existing treaty (i.e. Charter) commitment.

Where the vast majority of states consistently vote for resolutions and declarations on a topic, that amounts to a state practice and a binding rule may very well emerge provided that the requisite *opinio juris* can be proved. For example, the 1960 Declaration on the Granting of Independence to Colonial Countries and Peoples, which was adopted with no opposition and

only nine abstentions and followed a series of resolutions in general and specific terms attacking colonialism and calling for the self-determination of the remaining colonies, marked the transmutation of the concept of self-determination from a political and moral principle to a legal right and consequent obligation, particularly taken in conjunction with the 1970 Declaration on Principles of International Law.²¹²

Declarations such as that on the Legal Principles Governing Activities of States in the Exploration and Use of Outer Space (1963) can also be regarded as examples of state practices which are leading to, or have led to, a binding rule of customary law. As well as constituting state practice, it may be possible to use such resolutions as evidence of the existence of or evolution towards an *opinio juris* without which a custom cannot arise. Apart from that, resolutions can be understood as authoritative interpretations by the Assembly of the various principles of the UN Charter depending on the circumstances.²¹³

Accordingly, such resolutions are able to speed up the process of the legalisation of a state practice and thus enable a speedier adaptation of customary law to the conditions of modern life. The presence of representatives of virtually all of the states of the world in the General Assembly enormously enhances the value of that organ in general political terms and in terms of the generation of state practice that may or may not lead to binding custom. As the International Court noted, for example, in *Nicaragua v. United States*,²¹⁴ ‘the wording of certain General Assembly declarations adopted by states demonstrates their recognition of the principle of the prohibition of force as definitely a matter of customary international

law'. The Court put the issue the following way in the *Legality of the Threat or Use of Nuclear Weapons* Advisory Opinion:²¹⁵

The Court notes that General Assembly resolutions, even if they are not binding, may sometimes have normative value. They can, in certain circumstances, provide evidence important for establishing the existence of a rule or the emergence of an *opinio juris*. To establish whether this is true of a General Assembly resolution, it is necessary to look at its content and the conditions of its adoption; it is also necessary to see whether an *opinio juris* exists as to its normative character. Or a series of resolutions may show the gradual evolution of the *opinio juris* required for the establishment of a new rule.

The Court in this case examined a series of General Assembly resolutions concerning the legality of nuclear weapons and noted that several of them had been adopted with substantial numbers of negative votes and abstentions. It was also pointed out that the focus of such resolutions had not always been constant. The Court therefore concluded that these resolutions fell short of establishing the existence of an *opinio juris* on the illegality of nuclear weapons.²¹⁶

Nevertheless, one must be alive to the dangers in ascribing legal value to everything that emanates from the Assembly. Resolutions are often the results of political compromises and arrangements and, comprehended in that sense, never intended to constitute binding norms. Great care must be taken in moving from a plethora of practice to the identification of legal norms.

As far as the practice of other international organisations is concerned,²¹⁷ the same approach, but necessarily tempered with a little more caution, may be adopted. Resolutions may evidence an existing custom or constitute usage that may lead to the creation of a custom and the *opinio juris* requirement may similarly emerge from the surrounding circumstances, although care must be exercised here.²¹⁸

It is sometimes argued more generally that particular non-binding instruments or documents or non-binding provisions in treaties form a special category that may be termed ‘soft law’. This terminology is meant to indicate that the instrument or provision in question is not of itself ‘law’, but its importance within the general framework of international legal development is such that particular attention requires to be paid to it.²¹⁹ ‘Soft law’ is not as such law. That needs to be emphasised, but a document, for example, does not need to constitute a binding treaty before it can exercise an influence in international politics. The Helsinki Final Act of 1975 is a prime example of this. This was not a binding agreement, but its influence in Central and Eastern Europe in emphasising the role and importance of international human rights proved incalculable.²²⁰ Certain areas of international law have generated more ‘soft law’, in the sense of the production of important but non-binding instruments, than others. Here one may cite particularly international economic law²²¹ and

international environmental law.²²² The use of such documents, whether termed, for example, recommendations, guidelines, codes of practice or standards, is significant in signalling the evolution and establishment of guidelines, which may ultimately be converted into legally binding rules. This may be accomplished either by formalisation into a binding treaty or by acceptance as a customary rule, provided that the necessary conditions have been fulfilled. The propositions of 'soft law' are important and influential, but do not in themselves constitute legal norms. In many cases, it may be advantageous for states to reach agreements with one another or through international organisations which are not intended to be binding and thus subject to formal legal implementation, but which reflect a political intention to act in a certain way. Such agreements may be more flexible, easier to conclude and easier to adhere to for domestic reasons.

A study by the US State Department concerning non-binding international agreements between states²²³ noted that

it has long been recognised in international practice that governments may agree on joint statements of policy or intention that do not establish legal obligations. In recent decades, this has become a common means of announcing the results of diplomatic exchanges, stating common positions on policy issues, recording their intended course of action on matters of mutual concern, or making political commitments to one another. These

documents are sometimes referred to as non-binding agreements, gentlemen's agreements, joint statements or declarations.

What is determinative as to status in such situations is not the title given to the document in question, but the intention of the parties as inferred from all the relevant circumstances as to whether they intended to create binding legal relationships between themselves on the matter in question.

The International Law Commission

The International Law Commission was established by the General Assembly in 1947 with the declared object of promoting the progressive development of international law and its codification.²²⁴ It consists of thirty-four members from Africa, Asia, America and Europe, who remain in office for five years each and who are appointed from lists submitted by national governments. The Commission is aided in its deliberations by consultations with various outside bodies including the Asian–African Legal Consultative Committee, the European Commission on Legal Cooperation and the Inter-American Council of Jurists.²²⁵

Many of the most important international conventions have grown out of the Commission's work. Having decided upon a topic, the International Law Commission will prepare a draft. This is submitted to the various states for their comments and is usually followed by an international conference convened by the United Nations. Eventually a treaty will emerge. This procedure was followed in such international conventions as those on the

Law of the Sea in 1958, Diplomatic Relations in 1961, Consular Relations in 1963, Special Missions in 1969 and the Law of Treaties in 1969. Of course, this smooth operation does not invariably occur: witness the many conferences at Caracas in 1974, and Geneva and New York from 1975 to 1982, necessary to produce a new Convention on the Law of the Sea.

Apart from preparing such drafts, the International Law Commission also issues reports and studies, and has formulated such documents as the Draft Declaration on Rights and Duties of States of 1949 and the Principles of International Law recognised in the Charter of the Nuremberg Tribunal and in the Judgment of the Tribunal of 1950. The Commission produced a set of draft articles on the problems of jurisdictional immunities in 1991, a draft statute for an international criminal court in 1994 and a set of draft articles on state responsibility in 2001. The drafts of the ILC are often referred to in the judgments of the International Court of Justice. Indeed, in his speech to the UN General Assembly in 1997, President Schwebel noted in referring to the decision in the *Gabčíkovo–Nagymaros Project* case²²⁶ that the judgment:

is notable, moreover, because of the breadth and depth of the importance given in it to the work product of the International Law Commission. The Court's Judgment not only draws on treaties concluded pursuant to the Commission's proceedings: those on the law of treaties, of State succession in respect of treaties, and the law of international watercourses. It gives great weight to some of

the Commission's Draft Articles on State Responsibility, as did both Hungary and Slovakia. This is not wholly exceptional; it rather illustrates the fact that just as the judgments and opinions of the Court have influenced the work of the International Law Commission, so the work of the Commission may influence that of the Court.²²⁷

Thus, one can see that the International Law Commission is involved in at least two of the major sources of law. Its drafts may form the bases of international treaties which bind those states which have signed and ratified them and which may continue to form part of general international law, and its work is part of the whole range of state practice which can lead to new rules of customary law. Further, a view taken by the Commission as to whether a proposition is or is not a rule of customary international law is likely to prove influential. Its drafts, indeed, may constitute evidence of custom, contribute to the corpus of usages which may create new law and evidence the *opinio juris*.²²⁸ In addition, it is not to be overlooked that the International Law Commission is a body composed of eminently qualified publicists, including many governmental legal advisers, whose reports and studies may be used as a method of determining what the law actually is, in much the same way as books.

Other Bodies

Although the International Law Commission is by far the most important of the organs for the study and development of the law, there do exist certain other bodies which are involved in the same mission. The United Nations Commission on International Trade Law (UNCITRAL) and the United Nations Conference on Trade and Development (UNCTAD), for example, are actively increasing the range of international law in the fields of economic, financial and development activities, while temporary organs such as the Committee on the Principles of International Law have been engaged in producing various declarations and statements. Nor can one overlook the tremendous work of the many specialised agencies like the International Labour Organization and the United Nations Educational, Scientific and Cultural Organization (UNESCO), which are constantly developing international law in their respective spheres.

There are also some independent bodies which are actively involved in the field. The International Law Association and the Institut de Droit International are the best known of such organisations which study and stimulate the law of the world community, while the various Harvard Research drafts produced before the Second World War are still of value today.

Unilateral Acts

In certain situations, the unilateral acts of states, including statements made by relevant state officials, may give rise to international legal obligations.²²⁹ Such acts might include recognition and protests, which are intended to have legal consequences. Unilateral acts, while not sources of international law as

understood in article 38(1) of the ICJ Statute, may constitute sources of obligation.²³⁰ For this to happen, the intention to be bound of the state making the declaration in question is crucial, as will be the element of publicity or notoriety.²³¹ Such intention may be ascertained by way of interpretation of the act, and the principle of good faith plays a crucial role. The International Court has stressed that where states make statements by which their freedom of action is limited, a restrictive interpretation is required.²³² Recognition will be important here in so far as third states are concerned, in order for such an act or statement to be opposable to them. Beyond this, such unilateral statements may be used as evidence of a particular view taken by the state in question.²³³

Hierarchy of Sources and *Jus Cogens*²³⁴

The question of the hierarchy of sources is more complex than appears at first sight. Although there does exist a presumption against normative conflict,²³⁵ international law is not as clear as domestic law in listing the order of constitutional authority²³⁶ and the situation is complicated by the proliferation of international courts and tribunals existing in a non-hierarchical fashion,²³⁷ as well as the significant expansion of international law, both substantively and procedurally. Judicial decisions and writings clearly have a subordinate function within the hierarchy in view of their description as subsidiary means of law determination in article 38(1) of the ICJ Statute, while the role of general principles of law as a way of complementing custom and treaty law places that category fairly firmly in third place.²³⁸ The question of priority as between custom and treaty law is more complex.²³⁹ As a general rule, that which is later in time will have priority (*lex posterior derogate priori*). Treaties are usually formulated to replace or codify existing custom,²⁴⁰ while treaties in turn may themselves fall out of use and be replaced by new customary rules. However, where the same rule appears in both a treaty and a custom, there is no presumption that the latter is subsumed by the former. The two may co-exist.²⁴¹ There is in addition a principle to the effect that a special rule prevails over a general rule (*lex specialis derogat legi generali*), so that, for example, treaty rules between states as *lex specialis* would have priority as against general rules of treaty or customary law between the same states,²⁴² although not if the general rule in question was one of *jus cogens*.²⁴³

The position is complicated by the existence of norms or obligations deemed to be of a different or higher status than others, whether derived from custom or treaty. These may be obligations *erga omnes* or rules of *jus cogens* (peremptory norms).²⁴⁴ While there may be significant overlap between these two in terms of the content of rules to which they relate, there is a difference in nature. The former concept concerns the scope of application of the relevant rule, that is the extent to which states as a generality may be subject to the rule in question and may be seen as having a legal interest in the matter.²⁴⁵ It has, therefore, primarily a procedural focus. Rules of *jus cogens*, on the other hand, are substantive rules recognised to be of a higher status as such. The International Court stated in the *Barcelona Traction* case²⁴⁶ that there existed an essential distinction between the obligations of a state towards the international community as a whole and those arising vis-à-vis another state in the field of diplomatic protection. By their very nature the former concerned all states and ‘all states can be held to have a legal interest in their protection; they are obligations *erga omnes*’. Examples of such obligations included the outlawing of aggression and of genocide and the protection from slavery and racial discrimination.²⁴⁷ To this one may add the prohibition of torture.²⁴⁸ Further, the International Court in the *East Timor* case stressed that the right of peoples to self-determination ‘has an *erga omnes* character’,²⁴⁹ while reiterating in *Application of the Genocide Convention (Bosnia and Herzegovina v. Serbia and Montenegro)* that ‘the rights and obligations enshrined in the Convention are rights and obligations *erga omnes*’.²⁵⁰

This easing of the traditional rules concerning *locus standi* in certain circumstances with regard to the pursuing of a legal remedy against the

alleged offender state may be linked to the separate question of superior principles in international law. Article 53 of the Vienna Convention on the Law of Treaties, 1969, provides that a treaty will be void ‘if, at the time of its conclusion, it conflicts with a peremptory norm of general international law’. Further, by article 64, if a new peremptory norm of general international law emerges, any existing treaty which is in conflict with that norm becomes void and terminates. This rule (*jus cogens*) will also apply in the context of customary rules so that no derogation would be permitted to such norms by way of local or special custom.

Such a peremptory norm is defined by the Convention as one ‘accepted and recognised by the international community of states as a whole as a norm from which no derogation is permitted and which can be modified only by a subsequent norm of general international law having the same character’.²⁵¹ The concept of *jus cogens* is based upon an acceptance of fundamental and superior values within the system and in some respects is akin to the notion of public order or public policy in domestic legal orders.²⁵² It also reflects the influence of Natural Law thinking. Rules of *jus cogens* are not new rules of international law as such. It is a question rather of a particular and superior quality that is recognised as adhering in existing rules of international law. Various examples of rules of *jus cogens* have been provided, particularly during the discussions on the topic in the International Law Commission, such as an unlawful use of force, genocide, slave trading and piracy.²⁵³ The International Court has stated that in its opinion the prohibition of torture had become a peremptory norm.²⁵⁴ However, no clear agreement has been manifested regarding other areas,²⁵⁵ and even the examples given are by no means uncontroverted. Nevertheless, the rise of individual responsibility

directly for international crimes marks a further step in the development of *jus cogens* rules. Of particular importance, however, is the identification of the mechanism by which rules of *jus cogens* may be created, since once created no derogation is permitted.

A two-stage approach is here involved in the light of article 53: first, the establishment of the proposition as a rule of general international law; and, secondly, the acceptance of that rule as a peremptory norm by the international law community of states as a whole.²⁵⁶ It will be seen therefore that a stringent process is involved, and rightly so, for the establishment of a higher level of binding rules has serious implications for the international law community. The situation to be avoided is that of foisting peremptory norms upon a political or ideological minority, for that in the long run would devalue the concept. The appropriate test would thus require virtually universal acceptance of the proposition as a legal rule by states and recognition of it as a rule of *jus cogens* by an overwhelming majority of states, crossing ideological and political divides.²⁵⁷ It is also clear that only rules based on custom or treaties may form the foundation of *jus cogens* norms.²⁵⁸ This is particularly so in view of the hostile attitude of many states to general principles as an independent source of international law and the universality requirement of *jus cogens* formation. As article 53 of the Vienna Convention notes, a treaty that is contrary to an existing rule of *jus cogens* is void *ab initio*,²⁵⁹ whereas by virtue of article 64 an existing treaty that conflicts with an emergent rule of *jus cogens* terminates from the date of the emergence of the rule. It is not void *ab initio*, nor by article 71 is any right, obligation or legal situation created by the treaty prior to its termination affected, provided that its maintenance is not in itself contrary to the new

peremptory norm.²⁶⁰ A reservation to a treaty that reflects a rule of *jus cogens* does not affect the binding nature of that norm, while a reservation cannot exclude or modify the legal effect of a treaty in a manner contrary to a norm of *jus cogens*.²⁶¹ In so far as customary law is concerned, a new rule cannot be created which conflicts with a norm of *jus cogens*, and a rule of custom which is not one of *jus cogens* ceases to exist if and to the extent that it conflicts with a new norm of *jus cogens*.²⁶²

There are also consequences with regard to state responsibility. Rules of *jus cogens* give rise to obligations owed to the international community as a whole and any state is entitled to invoke the responsibility of another state for a breach of a rule of *jus cogens* in accordance with the rules on the responsibility of states for internationally unlawful acts.²⁶³ No circumstance precluding wrongfulness under the rules of state responsibility may be invoked with regard to any act of a state that is contrary to a norm of *jus cogens*, while no state shall recognise as lawful a situation created by a serious breach by a state of an obligation arising under a rule of *jus cogens* nor assist in maintaining that situation. A breach is deemed serious if it involves a gross or systematic failure by the state responsible to fulfil that obligation²⁶⁴ and ‘it has been suggested that state conduct violating a rule of *jus cogens* may not attract a claim of state immunity’.²⁶⁵ The relationship between the rules of *jus cogens* and article 103 of the United Nations Charter, which states that obligations under the Charter have precedence as against obligations under other international agreements, was discussed by Judge Lauterpacht in his Separate Opinion in *Application of the Genocide Convention (Bosnia and Herzegovina v. Serbia and Montenegro)*.²⁶⁶ He noted in particular that ‘the relief which article 103 of the Charter may give

the Security Council in case of conflict between one of its decisions and an operative treaty obligation cannot – as a matter of simple hierarchy of norms – extend to a conflict between a Security Council resolution and *jus cogens*’.

It is also to be emphasised that the establishment of a rule of *jus cogens* does not as such grant jurisdiction to the International Court (or any other court, of course). The status of a rule, whether or not a rule *erga omnes*, is a separate question from that of consent to the exercise of jurisdiction.²⁶⁷

²⁹ See D’Amato, *Concept of Custom*, pp. 60–1; and Akehurst, ‘Custom as a Source’, p. 19. See also Judge Alvarez, *Anglo-Norwegian Fisheries*, ICJ Reports, 1951, pp. 116, 152; 18 ILR, pp. 86, 105; and Judge Loder, *Lotus*, PCIJ, Series A, No. 10, 1927, pp. 18, 34.

³⁰ Cheng, ‘United Nations Resolutions’. See also M. P. Scharf, ‘Accelerated Formation of Customary International Law’, 20 *ILSA Journal of International and Comparative Law*, 2014, p. 305.

³¹ See e.g. Daillier *et al.*, *Droit International Public*, pp. 325–6.

³² De Visscher, *Theory and Reality*, p. 149. See also Lauterpacht, *Development of International Law*, p. 368; P. Cobbett, *Leading Cases on International Law*, 4th ed., London, 1922, p. 5; and Akehurst, ‘Custom as a Source’, pp. 22–3.

³³ See e.g. *North Sea Continental Shelf*, ICJ Reports, 1969, pp. 3, 42–3. Note also ILC Conclusion 8(1), Identification of Customary International Law, A/73/10, p. 135, stating: ‘The relevant practice must be general, meaning that it must be sufficiently widespread and representative, as well as consistent.’ See *Benkharbouche v. Secretary of State for Foreign and Commonwealth Affairs* [2017] UKSC 62, para. 31, where the UK Supreme Court referred to ‘a widespread, representative and consistent practice’, citing ILC Conclusions 8 and 9.

³⁴ See e.g. Cheng, ‘United Nations Resolutions’; C. Christol, *The Modern International Law of Outer Space*, New York, 1982; and C. Christol, *Space Law: Past, Present and Future*, The Hague, 1991. See also K. J. Heller, ‘Specially-Affected States and the Formation of Custom’, **112 AJIL**, 2018, p. 191 and further below, [Chapter 9](#).

³⁵ See e.g. Tunkin, *Theory*, pp. 116–17. But cf. D’Amato, *Concept of Custom*, pp. 61–3, 88–9.

³⁶ PCIJ, Series A, No. 10, 1927, p. 18; 4 AD, p. 153.

³⁷ See the *Germany v. Italy* (Greece Application to Intervene), ICJ Reports, 2011, pp. 99, 123, noting: ‘State practice of particular significance is to be found in the judgments of national courts . . .’.

³⁸ See e.g. Pellet and Müller, ‘Article 38’, p. 939; and *Congo v. Belgium*, ICJ Reports, 2002, pp. 3, 23–4; 128 ILR, pp. 60, 78–80. See also Thirlway, *Sources*, p. 71; and M. Wood and O. Sender, ‘State Practice’, in *Max Planck Encyclopedia of Public International Law*, 2017. ILC Conclusion 6, Identification of Customary International Law, A/73/10, p. 133, noted that:

1. Practice may take a wide range of forms. It includes both physical and verbal acts. It may, under certain circumstances, include inaction. 2. Forms of State practice include, but are not limited to: diplomatic acts and correspondence; conduct in connection with resolutions adopted by an international organization or at an intergovernmental conference; conduct in connection with treaties; executive conduct, including operational conduct ‘on the ground’; legislative and administrative acts; and decisions of national courts. 3. There is no predetermined hierarchy among the various forms of practice.

Note that it is proposed to strike out the references to ‘conduct in connection with resolutions adopted by an international organization or at an intergovernmental

conference’: see Special Rapporteur’s Fourth Report, A/CN.4/695, Annex (2016).

³⁹ See e.g. *Yearbook of the ILC*, 1950, vol. **II**, pp. 368–72, and *Interhandel*, ICJ Reports, 1959, p. 27. Note also Brierly’s comment that not all contentions put forward on behalf of a state represent that state’s settled or impartial opinion: *The Law of Nations*, 6th ed., Oxford, 1963, p. 60. See also Akehurst, ‘Custom as a Source’, p. 2.

⁴⁰ The US has produced an extensive series of publications covering its practice in international law. See the *Digests of International Law* produced by Wharton (1887), Moore (1906) and Whiteman (1963–70). From 1973 to 1980, an annual *Digest of US Practice in International Law* has been produced, while three composite volumes covering the years 1981–88 have appeared. The series resumed with effect from the year 2000. See also H. A. Smith, *Great Britain and the Law of Nations*, London, 2 vols., 1932–35; A. D. McNair, *International Law Opinions*, Cambridge, 3 vols., 1956; C. Parry, *British Digest of International Law*, London, 1965; and E. Lauterpacht, *British Practice in International Law*, London, 1963–67. Several yearbooks now produce sections devoted to national practice, e.g. *British Yearbook of International Law* and *Annuaire Français de Droit International*.

⁴¹ *Reparation for Injuries*, ICJ Reports, 1949, p. 174; 16 AD, p. 318. See also *Reservations to the Genocide Convention*, ICJ Reports, 1951, pp. 15, 25; 18 ILR, p. 364.

⁴² *Yearbook of the ILC*, 1950, vol. **II**, pp. 368–72. See also Akehurst, ‘Custom as a Source’, p. 12; and J. Odermatt, ‘The Development of Customary International Law by International Organisations’, **66 ICLQ**, 2017, p. 491. See also ILC Conclusion 4(2), Identification of Customary International Law, A/73/10, p.130, stating: ‘In certain cases, the practice of international organizations also contributes to the formation, or expression, of rules of customary international law.’

⁴³ See the Court’s Advisory Opinion in *Construction of a Wall*, ICJ Reports, 2004, pp. 136, 171; 129 ILR, pp. 37, 89–90.

⁴⁴ 14 Wallace 170 (1871). See also *Nottebohm*, ICJ Reports, 1955, pp. 4, 22; 22 ILR, p. 349; and *Paquete Habana*, 175 US 677 (1900).

⁴⁵ D’Amato, *Concept of Custom*, pp. 88, 50–1. See also Judge Read (dissenting), *Anglo-Norwegian Fisheries*, ICJ Reports, 1951, pp. 116, 191; 18 ILR, pp. 86, 132.

⁴⁶ Akehurst, 'Custom as a Source', pp. 2–3. See also Thirlway, *International Customary Law*, p. 58.

⁴⁷ E.g. *Asylum*, ICJ Reports, 1950, pp. 266, 277; 17 ILR, p. 280; *Rights of Nationals of the USA in Morocco*, ICJ Reports, 1952, pp. 176, 200, 209; 19 ILR, p. 255; and *North Sea Continental Shelf*, ICJ Reports, 1969, pp. 3, 32–3, 47, 53. See also *Fisheries Jurisdiction (UK v. Iceland)*, ICJ Reports, 1974, pp. 3, 47, 56–8, 81–8, 119–20, 135, 161; 55 ILR, p. 238.

⁴⁸ But see Thirlway, *International Customary Law*, pp. 58–9.

⁴⁹ Akehurst, 'Custom as a Source', p. 10. This would also include omissions and silence by states: *ibid.*

⁵⁰ *Ibid.*, pp. 31–42; and D'Amato, *Concept of Custom*, pp. 66–72. See also Pellet and Müller, 'Article 38', p. 909; Thirlway, *Sources*, p. 84; Mendelson, 'Formation', p. 245; Bos, *Methodology*, pp. 236 ff.; P. Haggenmacher, 'Des Deux Éléments du Droit Coutumier dans la Pratique de la Cour Internationale', *91 Revue Générale de Droit International Public*, 1985, p. 5; O. Elias, 'The Nature of the Subjective Element in Customary International Law', *44 ICLQ*, 1995, p. 501; I. M. Lobo de Souza, 'The Role of State Consent in the Customary Process', *44 ICLQ*, 1995, p. 521; and B. Cheng, 'Opinio Juris: A Key Concept in International Law that is Much Misunderstood', in *International Law in the Post-Cold War World* (ed. S. Yee and W. Tieya), London, 2001, p. 56.

⁵¹ A/73/10, p. 138.

⁵² PCIJ, Series A, No. 10, 1927, p. 18; 4 AD, p. 153.

⁵³ PCIJ, Series A, No. 10, 1927, p. 28; 4 AD, p. 159.

⁵⁴ ICJ Reports, 1969, p. 3.

⁵⁵ ICJ Reports, 1969, pp. 32–41.

⁵⁶ *Ibid.*, p. 43. See also e.g. *Asylum*, ICJ Reports, 1950, pp. 266, 277; 17 ILR, p. 280; *Right of Passage over Indian Territory*, ICJ Reports, 1960, pp. 6, 42–3; 31 ILR, pp. 23, 55; and

Legal Consequences of the Separation of the Chagos Archipelago from Mauritius in 1965, Advisory Opinion, ICJ Reports, 2019, para. 149.

⁵⁷ ICJ Reports, 1986, p. 14; 76 ILR, p. 349.

⁵⁸ ICJ Reports, 1986, pp. 108–9; 76 ILR, pp. 442–3, citing ICJ Reports, 1969, p. 44.

⁵⁹ ICJ Reports, 2011, pp. 99, 122.

⁶⁰ *Guinea v. Congo* (Preliminary Objections), ICJ Reports, 2007, pp. 582, 615. See generally S. Talmon, ‘Determining Customary International Law: The ICJ’s Methodology between Induction, Deduction and Assertion’, 26 *EJIL*, 2015, p. 417.

⁶¹ See Akehurst, ‘Custom as a Source’, pp. 32–4 for attempts made to deny or minimise the need for *opinio juris*.

⁶² ICJ Reports, 1986, pp. 14, 109; 76 ILR, pp. 349, 443.

⁶³ ICJ Reports, 1969, pp. 3, 176. Lauterpacht wrote that one should regard all uniform conduct of governments as evidencing the *opinio juris*, except where the conduct in question was not accompanied by such intention: *Development of International Law*, p. 580; but cf. Cheng, ‘Custom: The Future’, p. 36; and Cheng, ‘United Nations Resolutions’, pp. 530–2.

⁶⁴ A/73/10, p. 138. Note D’Amato’s view that to become a custom, a practice has to be preceded or accompanied by the ‘articulation’ of a rule, which will put states on notice that an action etc. will have legal implications: *Concept of Custom*, p. 75. Cf. Akehurst, ‘Custom as a Source’, pp. 35–6, who also puts forward his view that ‘the practice of states needs to be accompanied by *statements* that something is already law before it can become law’: such statements need not be beliefs as to the truths of the given situation, *ibid.*, p. 37 (emphasis in the original). Akehurst also draws a distinction between permissive rules, which do not require express statements as to *opinio juris*, and duty-imposing rules, which do: *ibid.*, pp. 37–8.

⁶⁵ Forms of evidence of acceptance as law may include: public statements made on behalf of states; official publications; government legal opinions; diplomatic correspondence; decisions of national courts; treaty provisions; and conduct in connection with resolutions

adopted by an international organisation or at an intergovernmental conference: see ILC Conclusion 10(2), Identification of Customary International Law, A/73/10, p. 140.

⁶⁶ See e.g. *Legality of the Threat or Use of Nuclear Weapons*, ICJ Reports, 1996, pp. 226, 254–5; 110 ILR, p. 163. See also *Western Sahara*, ICJ Reports, 1975, pp. 31–3; *East Timor*, ICJ Reports, 1995, pp. 90, 102; 105 ILR, p. 226; *Nicaragua v. US*, ICJ Reports, 1986, pp. 14, 100, 101, 106; 76 ILR, p. 349; and *Construction of a Wall*, ICJ Reports, 2004, pp. 136, 171–2; 129 ILR, pp. 37, 89–90.

⁶⁷ See *Nicaragua v. US*, ICJ Reports, 1986, pp. 14, 99–100.

⁶⁸ See e.g. *North Sea Continental Shelf*, ICJ Reports, 1969, pp. 3, 28–32 with regard to the 1958 Continental Shelf Convention and e.g. among many cases, *Cameroon v. Nigeria*, ICJ Reports, 2002, pp. 303, 429–30 with regard to the Vienna Convention on the Law of Treaties, 1969.

⁶⁹ See e.g. *Gabčíkovo–Nagymaros Project*, ICJ Reports, 1997, pp. 7, 38–42, 46; 116 ILR, pp. 1, 47–51, 55.

⁷⁰ See H. Lauterpacht, ‘Sovereignty Over Submarine Areas’, 27 *BYIL*, 1950, p. 376; I. MacGibbon, ‘Some Observations on the Part of Protest in International Law’, 29 *BYIL*, 1953, p. 293; and I. MacGibbon, ‘Customary International Law and Acquiescence’, 33 *BYIL*, 1957, p. 115; Wolfke, *Custom*, pp. 157–65; and I. Sinclair, ‘Estoppel and Acquiescence’, in *Fifty Years of the International Court of Justice* (ed. A. V. Lowe and M. Fitzmaurice), Cambridge, 1996, p. 104. See also more generally N. Antunes, *Estoppel, Acquiescence and Recognition in Territorial and Boundary Dispute Settlement*, Durham, 2000.

⁷¹ See, for a good example, the Decision of the International Court in *El Salvador/Honduras*, ICJ Reports, 1992, pp. 351, 601; 97 ILR, pp. 266, 517, with regard to the joint sovereignty over the historic waters of the Gulf of Fonseca beyond the territorial sea of the three coastal states.

⁷² See e.g. Sinclair, ‘Estoppel and Acquiescence’, p. 104; and below, [Chapter 9](#), pp. 437 ff.

⁷³ ICJ Reports, 1984, pp. 246, 305; 71 ILR, p. 74.

⁷⁴ Note that the Court has stated that ‘the idea of acquiescence . . . presupposes freedom of will’, *Burkina Faso/Mali*, ICJ Reports, 1986, pp. 554, 597; 80 ILR, p. 459.

⁷⁵ See e.g. *Luxembourg v. Cie. Luxembourgeoise de Télédiffusion and Compagnie Luxembourgeoise Assurance ‘Le Foyer’* 91 ILR, pp. 281, 286.

⁷⁶ See e.g. MacGibbon, ‘Customary International Law’, p. 131; and H. S. McDougal *et al.*, *Studies in World Public Order*, New Haven, 1960, pp. 763–72.

⁷⁷ A/73/10, p. 140.

⁷⁸ PCIJ, Series A, No. 10, 1927, p. 28; 4 ILR, p. 159.

⁷⁹ ICJ Reports, 1951, p. 116; 18 ILR, p. 86.

⁸⁰ ICJ Reports, 1951, p. 131; 18 ILR, p. 93. See also *North Sea Continental Shelf*, ICJ Reports, 1969, pp. 3, 26–7; and *Asylum*, ICJ Reports, 1950, pp. 266, 277–8; 17 ILR, pp. 280, 285. See also P. Dumberry, ‘Incoherent and Ineffective: The Concept of the Persistent Objector Revisited’, 55 *ICLQ*, 2010, p. 779; and C. Quince, *The Persistent Objector and Customary International Law*, Colorado, 2010.

⁸¹ ILC Conclusion 15, Identification of Customary International Law, states that, leaving aside questions concerning rules of *jus cogens*: ‘1. Where a State has objected to a rule of customary international law while that rule was in the process of formation, the rule is not opposable to the State concerned for so long as it maintains its objection. 2. The objection must be clearly expressed, made known to other States, and maintained persistently.’ A/73/10, p. 152. See also e.g. J. A. Green, *The Persistent Objector in International Law*, Oxford, 2016; and Thirlway, *Sources*, p. 99.

⁸² See also protests generally: Akehurst, ‘Custom as a Source’, pp. 38–42.

⁸³ See below, [Chapter 10](#), p. 486.

⁸⁴ See e.g. *North Sea Continental Shelf*, ICJ Reports, 1969, pp. 3, 38, 130; and *The Third US Restatement of Foreign Relations Law*, St Paul, 1987, vol. I, pp. 25–6. See also T. Stein, ‘The Approach of the Different Drummer: The Principle of the Persistent Objector in

International Law’, 26 *Harvard International Law Journal*, 1985, p. 457; and J. Charney, ‘The Persistent Objector Rule and the Development of Customary International Law’, 56 *BYIL*, 1985, p. 1.

⁸⁵ See e.g. Tunkin, *Theory*, p. 129.

⁸⁶ *Ibid.*

⁸⁷ See Akehurst, ‘Custom as a Source’, pp. 29–31; Thirlway, ‘Supplement’, p. 105; Thirlway, *Sources*, p. 103; D’Amato, *Concept of Custom*, chapter 8; G. Cohen-Jonathan, ‘La Coutume Locale’, *AFDI*, 1961, p. 133; and Wolfke, *Custom*, pp. 88–90. Local custom is sometimes referred to as regional, special or particular custom.

⁸⁸ See e.g. H. Gros Espiell, ‘La Doctrine du Droit International en Amérique Latine avant la Première Conférence Panaméricaine’, 3 *Journal of the History of International Law*, 2001, p. 1.

⁸⁹ Note the claim by Honduras in *El Salvador/Honduras*, ICJ Reports, 1992, pp. 351, 597; 97 ILR, pp. 266, 513, that a ‘trilateral local custom of the nature of a convention’ could establish a condominium arrangement and the claim by Costa Rica in *Navigational Rights (Costa Rica v. Nicaragua)*, ICJ Reports, 2009, pp. 213, 232–3 as to rules of international law that apply in the absence of treaty provisions to navigation on ‘international rivers’, a proposition on which the International Court did not consider that it had to take a position.

⁹⁰ See *Eritrea–Yemen (Phase Two: Maritime Delimitation)* 119 ILR, pp. 417, 448.

⁹¹ ICJ Reports, 1950, p. 266; 17 ILR, p. 280.

⁹² ICJ Reports, 1950, p. 276; 17 ILR, p. 284.

⁹³ ICJ Reports, 1960, p. 6; 31 ILR, p. 23.

⁹⁴ ICJ Reports, 1960, p. 40; 31 ILR, p. 53. See Wolfke, *Custom*, p. 90.

⁹⁵ ICJ Reports, 1960, p. 44.

⁹⁶ See Cohen-Jonathan, ‘La Coutume Locale’.

⁹⁷ See generally A. D. McNair, *The Law of Treaties*, Oxford, 1961; Thirlway, *Sources*, chapter II; Pellet and Müller, 'Article 38', p. 888; A. Aust, *Modern Treaty Law and Practice*, 3rd ed., Cambridge, 2013; and R. Kolb, *The Law of Treaties*, Cheltenham, 2016. See further below, [Chapter 15](#).

⁹⁸ *Oppenheim's International Law* emphasises that 'not only is custom the original source of international law, but treaties are a source the validity and modalities of which themselves derive from custom', p. 31.

⁹⁹ See e.g. UKMIL, 70 *BYIL*, 1999, p. 404.

¹⁰⁰ See the Vienna Convention on the Law of Treaties, 1969. Article 2(1)(a) defines a treaty for the purposes of the Convention as 'an international agreement concluded between states in written form and governed by international law, whether embodied in a single instrument or in two or more related instruments and whatever its particular designation'. See further below, p. 790, with regard to non-binding international agreements.

¹⁰¹ See Virally, 'Sources', p. 126; Sørensen, *Les Sources*, pp. 58 ff.; and Tunkin, *Theory*, pp. 93–5.

¹⁰² Tunkin, *Theory*, pp. 91–113. See also R. Müllerson, 'Sources of International Law: New Tendencies in Soviet Thinking', 83 *AJIL*, 1989, pp. 494, 501–9.

¹⁰³ But this may depend upon the attitude of other states. This does not constitute a form of international legislation: see e.g. *Oppenheim's International Law*, p. 32; *Reparation for Injuries*, ICJ Reports, 1949, p. 185; 16 AD, p. 318; and *Legal Consequences for States of the Continued Presence of South Africa in Namibia*, ICJ Reports, 1971, p. 56; 49 ILR, p. 2. See also R. Baxter, 'Treaties and Custom', 129 *HR*, 1970, p. 27; O. Schachter, 'Entangled Treaty and Custom', in *International Law at a Time of Perplexity* (ed. Y. Dinstein), Dordrecht, 1989, p. 717; and Y. Dinstein, 'The Interaction Between Customary International Law and Treaties', 322 *HR*, 2006, p. 247.

¹⁰⁴ ICJ Reports, 1969, pp. 3, 25.

¹⁰⁵ ICJ Reports, 1969, pp. 3, 41–2. The Court stressed that this method of creating new customs was not to be lightly regarded as having been attained, *ibid.*

106 But see the minority opinions, ICJ Reports, 1969, pp. 56, 156–8, 163, 169, 172–80, 197–200, 221–32, 241–7; 41 ILR, p. 85. See also *Gulf of Maine*, ICJ Reports, 1984, pp. 246, 295; 71 ILR, pp. 74, 122; and *Libya/Malta Continental Shelf*, ICJ Reports, 1985, pp. 13, 29–34; 81 ILR, pp. 239, 261–6.

107 See D’Amato, *Concept of Custom*, p. 104; and A. D’Amato, ‘The Concept of Human Rights in International Law’, **82** *Columbia Law Review*, 1982, pp. 1110, 1129–47. See also Akehurst, ‘Custom as a Source’, pp. 42–52.

108 D’Amato, ‘Concept of Human Rights’, p. 1146.

109 ICJ Reports, 1986, p. 14; 76 ILR, p. 349.

110 ICJ Reports, 1986, pp. 94–5; 76 ILR, pp. 428–9. See also W. Czaplinski, ‘Sources of International Law in the Nicaragua Case’, **38** *ICLQ*, 1989, p. 151.

111 ICJ Reports, 1986, p. 96; 76 ILR, p. 430.

112 See further below, [Chapter 19](#), p. 993.

113 See further below, [Chapter 15](#), p. 811.

114 See further below, p. 591, with regard to extradition treaties and below, p. 728, with regard to bilateral investment treaties.

115 See e.g. B. Cheng, *General Principles of Law as Applied by International Courts and Tribunals*, London, 1953; A. D. McNair, ‘The General Principles of Law Recognised by Civilised Nations’, **33** *BYIL*, 1957, p. 1; H. Lauterpacht, *Private Law Sources and Analogies of International Law*, London, 1927; G. Herczegh, *General Principles of Law and the International Legal Order*, Budapest, 1969; O. Schachter, *International Law in Theory and Practice*, Dordrecht, 1991, pp. 50–5; C. T. Kotuby Jr and L. A. Sobota, *General Principles of Law and International Due Process*, Oxford, 2017; O. Corten, *L’Utilisation du ‘Raisonnable’ par le Juge International*, Brussels, 1997; B. Vitanyi, ‘Les Positions Doctrinales Concernant le Sens de la Notion de “Principes Généraux de Droit Reconus par les Nations Civilisées”’, **86** *Revue Générale de Droit International Public*, 1982, p. 48; H. Waldock, ‘General Course on Public International Law’, **106** *HR*, 1962, p.

54; Pellet and Müller, 'Article 38', p. 922; Thirlway, 'Supplement', p. 108; M. Sørensen, 'Principes de Droit International', **101 HR**, 1960, p. 16; and V. Degan, 'General Principles of Law', **3 Finnish YIL**, 1992, p. 1. See also G. Gaja, 'General Principles of Law', *Max Planck Encyclopedia of Public International Law*; and Thirlway, *Sources*, chapter IV. The International Law Commission began studying the question of general principles of law in 2018 and the first report was published in 2019, A/CN.4/732; see M. Vázquez-Bermúdez and A. Crosato, 'General Principles of Law: The First Debate within the International Law Commission and the Sixth Committee', **19 Chinese Journal of International Law**, 2020, p. 157.

116 Note that the International Court has regarded the terms 'principles' and 'rules' as essentially the same within international law: *Gulf of Maine*, ICJ Reports, 1984, pp. 246, 288–90. Introducing the adjective 'general', however, shifts the meaning to a broader concept, see e.g. Judge Cançado Trindade's Separate Opinion in *Pulp Mills*, ICJ Reports, 2010, pp. 14, 135 ff. and the Separate Opinions of Judges Donoghue and Dugard in *Certain Activities/Construction of a Road between Costa Rica and Nicaragua*, ICJ Reports, 2015, pp. 665, 782, 846–9.

117 The additional clause relating to recognition by 'civilised nations' is regarded today as redundant: see e.g. Pellet and Müller, 'Article 38', p. 927.

118 See e.g. J. Stone, *Of Law and Nations*, London, 1974, chapter 3; H. Lauterpacht, 'Some Observations on the Prohibition of Non Liqueur and the Completeness of the Legal Order', *Symbolae Verzijl*, 1958, p. 196; Pellet, 'Article 38', pp. 851, 882; H. Thirlway, 'The Law and Procedure of the International Court of Justice (Part Two)', *BYIL*, 1988, p. 76; Thirlway, 'Supplement', p. 44; and P. Weil, 'The Court Cannot Conclude Definitively . . . ? *Non Liqueur* Revisited', **36 Columbia Journal of Transnational Law**, 1997, p. 109. See also *North Sea Continental Shelf*, ICJ Reports, 1969, p. 46; and *Nicaragua v. US*, ICJ Reports, 1986, p. 135; 76 ILR, p. 349.

119 *Oppenheim's International Law*, p. 13, emphasis in the original. See, however, the conclusion of the International Court that it was unable to state whether there was a rule of international law prohibiting or permitting the threat or use of nuclear weapons by a state in self-defence where its very survival was at stake: *Legality of the Threat or Use of Nuclear Weapons*, ICJ Reports, 1996, pp. 226, 244; 110 ILR, pp. 163, 194. Cf. the Dissenting Opinion of Judge Higgins, *ibid.*; 110 ILR, pp. 532 ff. See also *Eritrea–Yemen* (First Phase), 114 ILR, pp. 1, 119, 121–2.

¹²⁰ See e.g. Lauterpacht, *Private Law Sources*. See also Waldock, ‘General Course’, p. 54; C. W. Jenks, *The Common Law of Mankind*, London, 1958, p. 169; and Judge Tanaka (dissenting), *South West Africa* (Second Phase), ICJ Reports, 1966, pp. 6, 294–9; 37 ILR, pp. 243, 455–9.

¹²¹ Tunkin, *Theory*, chapter 7.

¹²² *Oppenheim’s International Law*, pp. 36–7.

¹²³ See generally R. David and J. Brierley, *Major Legal Systems in the World Today*, 2nd ed., London, 1978; and A. Hertogen, ‘The Persuasiveness of Domestic Law Analogies in International Law’, 29 *EJIL*, 2018, p. 1127. Note that the Tribunal in *AMCO v. Indonesia* stated that while a practice or legal provisions common to a number of nations would be an important source of international law, the French concepts of administrative unilateral acts or administrative contracts were not such practices or legal provisions: 89 ILR, pp. 366, 461.

¹²⁴ PCIJ, Series A, No. 17, 1928, p. 29; 4 AD, p. 258. See also the Chile–US Commission decision with regard to the deaths of Letelier and Moffitt: 31 ILM, 1982, pp. 1, 9; 88 ILR, p. 727.

¹²⁵ PCIJ, Series B, No. 6, p. 36.

¹²⁶ See also *South West Africa*, ICJ Reports, 1966, pp. 3, 47; 37 ILR, pp. 243, 280–1, for a statement that the notion of *actio popularis* was not part of international law as such nor able to be regarded as imported by the concept of general principles of law.

¹²⁷ See also *Certain German Interests in Polish Upper Silesia*, PCIJ, Series A, No. 7, 1926, p. 42; and *Free Zones of Upper Savoy and the District of Gex*, PCIJ, Series A/B, No. 46, 1932, p. 167.

Spain)* 24 ILR, p. 119; and *Legality of the Threat or Use of Nuclear Weapons*, ICJ Reports, 1996, pp. 264 ff.; 110 ILR, pp. 163, 214–15. Note also Principles 19 and 27 of the Rio Declaration on Environment and Development, 1992, 31 ILM, 1992, p. 876.

¹⁵³ *Cameroon v. Nigeria*, ICJ Reports, 1998, pp. 275, 304.

¹⁵⁴ See e.g. *Gabčíkovo–Nagymaros Project*, ICJ Reports, 1997, pp. 7, 76; 116 ILR, p. 1; and *Brcko Inter-Entity Boundary* 36 ILM, 1997, pp. 396, 422.

¹⁵⁵ ICJ Reports, 1970, p. 3; 46 ILR, p. 178.

¹⁵⁶ ICJ Reports, 1970, p. 37; 46 ILR, p. 211. See also generally the *Abu Dhabi* arbitration, 1 ICLQ, 1952, p. 247; 18 ILR, p. 44, and *Texaco v. Libya* 53 ILR, p. 389.

¹⁵⁷ See also the *Abyei* Final Award of 22 July 2009, Permanent Court of Arbitration, at paras. 401 ff., 416 ff., discussing the general principle of review of judicial decisions. Note also the general principle that the compatibility of an act with international law can be determined only by reference to the law in force at the time when the act occurred: see *Germany v. Italy (Greece Application to Intervene)*, ICJ Reports, 2011, pp. 99, 124. Judge Simma in his Separate Opinion in *Oil Platforms (Iran v. US)* (Merits), ICJ Reports, 2003, pp. 161, 324, 354 ff., analysed comparative domestic law in order to determine whether a general principle of joint and several responsibility existed. See also article 13 of the International Law Commission Articles on Responsibility of States for Internationally

Wrongful Acts; J. Crawford, *State Responsibility*, Cambridge, 2013, pp. 241 ff.; and see further below, p. 689.

¹⁵⁸ See M. Akehurst, 'Equity and General Principles of Law', 25 *ICLQ*, 1976, p. 801; B. Cheng, 'Justice and Equity in International Law', 8 *Current Legal Problems*, 1955, p. 185; V. Degan, *L'Équité et le Droit International*, Paris, 1970; C. de Visscher, *De l'Équité dans le Règlement Arbitral ou Judiciaire des Litiges de Droit International Public*, Paris, 1972; E. Lauterpacht, 'Equity, Evasion, Equivocation and Evolution in International Law', *Proceedings of the American Branch of the ILA*, 1977–78, p. 33; E. Lauterpacht, *Aspects of the Administration of International Justice*, Cambridge, 1991, pp. 117–52; R. Y. Jennings, 'Equity and Equitable Principles', *Annuaire Suisse de Droit International*, 1986, p. 38; *Oppenheim's International Law*, p. 43; R. Higgins, *Problems and Process*, Oxford, 1994, chapter 13; M. Miyoshi, *Considerations of Equity in the Settlement of Territorial and Boundary Disputes*, The Hague, 1993; S. Rosenne, 'Equitable Principles and the Compulsory Jurisdiction of International Tribunals', in *Festschrift für Rudolf Bindschedler*, Berne, 1980, p. 410; S. Rosenne, 'The Position of the International Court of Justice on the Foundations of the Principle of Equity in International Law', in *Forty Years International Court of Justice: Jurisdiction, Equality and Equity* (ed. A. Bloed and P. Van Dijk), Dordrecht, 1988, p. 108; O. Pirotte, 'La Notion d'Équité dans la Jurisprudence Récente de la CIJ', 77 *Revue Générale de Droit International Public*, 1973, p. 131; S. Chattopadhyay, 'Equity in International Law: Its Growth and Development', 5 *Georgia Journal of International and Comparative Law*, 1975, p. 381; R. Lapidoth, 'Equity in International Law', 22 *Israel Law Review*, 1987, p. 161; Schachter, *International Law*, p. 49; A. V. Lowe, 'The Role of Equity in International Law', 12 *Australian YIL*, 1992, p. 54; P. Weil, 'L'Équité dans la Jurisprudence de la Cour Internationale de Justice', in Lowe and Fitzmaurice, *Fifty Years of the International Court of Justice*, p. 121; Pellet and Müller, 'Article 38', p. 874; Thirlway, 'Law and Procedure (Part One)', p. 49; and Thirlway, 'Supplement', p. 26. Note especially Judge Weeramantry's study of equity in *Jan Mayen Maritime Delimitation (Denmark v. Norway)*, ICJ Reports, 1993, pp. 38, 211; 99 ILR, pp. 395, 579. See also F. Francioni, 'Equity', in *Max Planck Encyclopedia of Public International Law*; and Thirlway, *Sources*, chapter IV(2).

¹⁵⁹ Equity generally may be understood in the contexts of adapting law to particular areas or choosing between several different interpretations of the law (equity *infra legem*), filling gaps in the law (equity *praeter legem*) and as a reason for not applying unjust laws (equity *contra legem*): see Akehurst, 'Equity'; and Judge Weeramantry in *Jan Mayen Maritime Delimitation (Denmark v. Norway)*, ICJ Reports, 1993, pp. 38, 226–34; 99 ILR, pp. 395,

594–602. See also below, [Chapter 16](#), for the extensive use of equity in the context of state succession.

¹⁶⁰ PCIJ, Series A/B, No. 70, 1937, pp. 73, 77; 8 AD, pp. 444, 450.

¹⁶¹ See e.g. Judge Weeramantry in *Jan Mayen Maritime Delimitation (Denmark v. Norway)*, ICJ Reports, 1993, pp. 38, 217; 99 ILR, pp. 395, 585. Cf. Judge Schwebel's Separate Opinion, ICJ Reports, 1993, p. 118; 99 ILR, p. 486.

¹⁶² Note that the International Court in *Tunisia/Libya Continental Shelf*, ICJ Reports, 1982, pp. 18, 60; 67 ILR, pp. 4, 53, declared that 'equity as a legal concept is a direct emanation of the idea of justice'. However, see G. Abi-Saab's reference to the International Court's 'flight into equity' in 'The ICJ as a World Court', in Lowe and Fitzmaurice, *Fifty Years of the International Court of Justice*, pp. 3, 11.

¹⁶³ 50 ILR, p. 2.

¹⁶⁴ *Ibid.*, p. 18. In deciding the course of the boundary in two deep inlets, the Tribunal had recourse to the concept of equity: *ibid.*, p. 520.

¹⁶⁵ ICJ Reports, 1969, pp. 3, 53. Equity was used in the case in order to exclude the use of the equidistance method in the particular circumstances: *ibid.*, pp. 48–50; 41 ILR, pp. 78–80.

¹⁶⁶ ICJ Reports, 1970, p. 3; 46 ILR, p. 178. See also *Burkina Faso/Mali*, ICJ Reports, 1986, pp. 554, 631–3; 80 ILR, pp. 459, 532–5.

¹⁶⁷ ICJ Reports, 1966, pp. 6, 294–9; 37 ILR, pp. 243, 455–9. See also *Corfu Channel*, ICJ Reports, 1949, pp. 4, 22; 16 AD, p. 155.

¹⁶⁸ See also *AMCO v. Indonesia* 89 ILR, pp. 366, 522–3.

¹⁶⁹ The ICJ may under article 38(2) of its Statute decide a case *ex aequo et bono* if the parties agree, but it has never done so: see e.g. Pellet and Müller, 'Article 38', p. 882.

¹⁷⁰ See *North Sea Continental Shelf*, ICJ Reports, 1969, pp. 3, 47; and *Fisheries Jurisdiction (UK v. Iceland)*, ICJ Reports, 1974, pp. 3, 33; 55 ILR, pp. 238, 268. The Court

reaffirmed in *Libya/Malta Continental Shelf*, ICJ Reports, 1985, pp. 13, 40; 81 ILR, pp. 238, 272, ‘the principle that there can be no question of distributive justice’.

¹⁷¹ ICJ Reports, 1985, pp. 13, 39; 81 ILR, pp. 238, 271.

¹⁷² See *North Sea Continental Shelf*, ICJ Reports, 1969, pp. 3, 49–50; and *Anglo-French Continental Shelf*, Cmnd 7438, 1978, pp. 116–17; 54 ILR, pp. 6, 123–4. See also *Tunisia/Libya Continental Shelf*, ICJ Reports, 1982, pp. 18, 60; 67 ILR, pp. 4, 53; and *Gulf of Maine*, ICJ Reports, 1984, pp. 246, 313–14, 325–30; 71 ILR, pp. 74, 140–1, 152–7.

¹⁷³ ICJ Reports, 1982, pp. 18, 60; 67 ILR, pp. 4, 53.

¹⁷⁴ See generally R. Y. Jennings, ‘The Principles Governing Marine Boundaries’, in *Festschrift für Karl Doebling*, Berlin, 1989, p. 408; and M. Bedjaoui, ‘“L’enigme” des “principes équitables” dans le Droit des Delimitations Maritimes’, *Revista Español de Derecho Internacional*, 1990, p. 376.

¹⁷⁵ See also article 140 providing for the equitable sharing of financial and other benefits derived from activities in the deep sea-bed area.

¹⁷⁶ However, see *Cameroon v. Nigeria*, ICJ Reports, 2002, pp. 303, 443, where the Court declared that its jurisprudence showed that in maritime delimitation disputes, ‘equity is not a method of delimitation, but solely an aim that should be borne in mind in effecting the delimitation’. See further below, [Chapter 10](#), pp. 509 ff.

¹⁷⁷ Based on the Draft Articles of the International Law Commission: see the Report of the International Law Commission on the Work of its Forty-Sixth Session, A/49/10, 1994, pp. 197, 218 ff.

¹⁷⁸ ICJ Reports, 1986, pp. 554, 633; 80 ILR, pp. 459, 535.

¹⁷⁹ *Ibid.*

¹⁸⁰ *Ibid.* See also *El Salvador/Honduras*, ICJ Reports, 1992, pp. 351, 514–15; and *Brcko* 36 ILM, 1997, pp. 396, 427 ff. However, note that in the latter case, the Arbitral Tribunal was expressly authorised to apply ‘relevant legal and equitable principles’: see article V of Annex 2 of the Dayton Accords, 1995, *ibid.*, p. 400. Gaja, 'Interpreting Articles Adopted by the International Law Commission', **85** *BYIL*, 2014, p. 10.

²²⁶ ICJ Reports, 1997, p. 7; 116 *ILR*, p. 1.

²²⁷ See www.icj-cij.org/files/press-releases/9/3009.pdf. See also the reference to the work of the Commission in *Germany v. Italy* (Greece Application to Intervene), ICJ Reports, 2011, pp. 99, 123.

²²⁸ See Commentary to the ILC Conclusion 10, Identification of Customary International Law, A/73/10, p. 142, noting that the output of the International Law Commission 'merits special consideration'.

²²⁹ See Virally, 'Sources', pp. 154–6; W. Fiedler, 'Unilateral Acts in International Law', in *Encyclopedia of Public International Law* (ed. R. Bernhardt), Amsterdam, 2000, vol. **IV**, p. 1018; G. Venturini, 'La Portée et les Effets Juridiques des Attitudes et des Actes Unilatéraux des États', **112** *HR*, 1964, p. 363; J. Charpentier, 'Engagements Unilatéraux et

Engagements Conventionnels’, in *Theory of International Law at the Threshold of the 21st Century*, p. 367; A. P. Rubin, ‘The International Legal Effects of Unilateral Declarations’, 71 *AJIL*, 1977, p. 1; K. Zemanek, ‘Unilateral Legal Acts Revisited’, in Wellens, *International Law*, p. 209; E. Suy, *Les Actes Unilatéraux en Droit International Public*, Paris, 1962; Thirlway, *Sources*, p. 51; and J. Garner, ‘The International Binding Force of Unilateral Oral Declarations’, 27 *AJIL*, 1933, p. 493. The International Law Commission studied the question of the Unilateral Acts of States as from 1996, see A/51/10, pp. 230, 328–9, and in 2006 produced Guiding Principles applicable to unilateral declarations of states capable of creating legal obligations, A/61/10, pp. 369 ff.

²³⁰ See e.g. the Report of the International Law Commission, A/57/10, 2002, p. 215 and Guiding Principle 1, A/61/10, p. 370.

²³¹ *Nuclear Tests*, ICJ Reports, 1974, pp. 253, 267; 57 ILR, pp. 398, 412. The Court underlined that: ‘Just as the very rule of *pacta sunt servanda* in the law of treaties is based on good faith, so also is the binding character of an international obligation assumed by unilateral obligation’, *ibid.* See also the *Request for an Examination of the Situation in Accordance with Paragraph 63 of the Court’s Judgment of 20 December 1974 in the Nuclear Tests (New Zealand v. France) Case*, ICJ Reports, 1995, pp. 288, 305; 106 ILR, pp. 1, 27; *Nova Scotia/Newfoundland (First Phase)*, 2001, para. 3.14; 128 ILR, pp. 425, 449; and *Eritrea–Ethiopia*, 2002, para. 4.70; 130 ILR, pp. 1, 69. Such a commitment may arise in oral pleadings before the Court itself: see *Cameroon v. Nigeria*, ICJ Reports, 2002, p. 452. Guiding Principle 4 establishes that such a declaration may bind the state internationally only if made by an authority vested with the power to do so, while Principle 6 states that such declarations may be addressed to the international community as a whole or to one or several states or to other entities and Principle 7 requires that such declaration be stated in clear and specific terms, A/61/10, pp. 372, 376.

²³² *Nuclear Tests*, ICJ Reports, 1974, pp. 253, 267; 57 ILR, pp. 398, 412. See also *Nicaragua v. US*, ICJ Reports, 1986, pp. 14, 132; 76 ILR, pp. 349, 466; *Burkina Faso/Mali*, ICJ Reports, 1986, pp. 554, 573–4; 80 ILR, pp. 459, 477–8; and *Bolivia v. Chile*, ICJ Reports, 2018, pp. 507, 554 ff. The Court in *North Sea Continental Shelf* declared that the unilateral assumption of the obligations of a convention by a state not party to it was ‘not lightly to be presumed’, ICJ Reports, 1969, pp. 3, 25. The Court in *Malaysia v. Singapore*, ICJ Reports, 2008, pp. 22, 88, noted that a denial could not be interpreted as a binding undertaking where not made in response to a claim by the other party or in the context of a dispute between them.

²³³ See e.g. the references to a press release issued by the Ministry of Foreign Affairs of Norway and the wording of a communication of the text of an agreement to Parliament by the Norwegian Government in *Jan Mayen Maritime Delimitation (Denmark v. Norway)*, ICJ Reports, 1993, pp. 38, 51; 99 ILR, pp. 395, 419. See also Judge Ajibola's Separate Opinion in *Libya/Chad Territorial Dispute*, ICJ Reports, 1994, pp. 6, 58; 100 ILR, pp. 1, 56. Note also the Attorney General's Legal Opinion on Joint Instrument and Unilateral Declaration concerning the Withdrawal Agreement of 12 March 2019, noting that '[a] unilateral declaration by one party to a bilateral agreement constitutes an authentic interpretation of the treaty *if* it is accepted by the other party. While it is not an agreed document, it too has legal status as an interpretative document . . . [and will] form part of the context of the treaty in accordance with the principle set out in Article 31 of the Vienna Convention [on the Law of Treaties]', www.gov.uk/ago, and the judgment of the Colombian Constitutional Court of October 2017, stating that a unilateral act by a state representative could have legal consequences such as the creation of obligations or the loss of rights for that state. For this, there had to be attribution of the act to a state representative; consent to be bound not invalidated by coercion, error, fraud or corruption; independence of the act from any pre-existing obligation under international law; specificity of the act's object; and observance of the rules of *jus cogens*, **113 AJIL**, 2019, p. 122.

²³⁴ See D. Shelton, 'Normative Hierarchy in International Law', **100 AJIL**, 2006, p. 291; M. Koskenniemi, 'Hierarchy in International Law: A Sketch', **8 EJIL**, 1997, p. 566; B. Simma and D. Pulkowski, 'Of Planets and the Universe: Self-contained Regimes in International Law', **17 EJIL**, 2006, p. 483; P. International Law and Municipal Law

The role of the state in the modern world is a complex one. According to legal theory, each state is sovereign and equal.¹ In reality, with the phenomenal growth in communications and consciousness, and with the constant pressure and fluidity of global rivalries, not even the most powerful of states can be entirely sovereign and independent. Interdependence and the close-knit character of contemporary international commercial and political society ensures that virtually any action of a state could well have profound repercussions upon the system as a whole and the decisions under consideration by other states. This has led to an increasing interpenetration of international law and domestic law across a number of fields, such as human rights, environmental and international investment law, where at the least the same topic is subject to regulation at both the domestic and the international levels (and indeed the regional level in the case of the European Union and others). With the rise and extension of international law, questions begin to arise paralleling the role played by the state within the international system and concerned with the relationship between the internal legal order of a particular country and the rules and principles governing the international community as a whole. Municipal law governs the domestic aspects of government and deals with issues between individuals, and between

individuals and the administrative apparatus, while international law focuses primarily upon the relations between states. That is now, however, an overly simplistic assertion. There are many instances where problems can emerge and lead to difficulties between the two systems. In a case before a municipal court a rule of international law may be brought forward as a defence to a charge, as for example in *R v. Jones*, where the defence of seeking to prevent a greater crime (essentially of international law) was claimed with regard to the alleged offence of criminal damage (in English law),² or where a vessel is being prosecuted for being in what, in domestic law, is regarded as territorial waters, but in international law would be treated as part of the high seas. Further, there are cases where the same situation comes before both national and international courts, which may refer to each other's decisions in a complex process of interaction. For example, the failure of the United States to allow imprisoned foreign nationals access to consular assistance in violation of the Vienna Convention on Consular Relations 1963 was the subject of case-law before the International Court of Justice,³ the Inter-American Court of Human Rights⁴ and US courts,⁵ while there is a growing tendency for domestic courts to be used to address violations of international law.⁶

The Theories⁷

Positivism stresses the overwhelming importance of the state and tends to regard international law as founded upon the consent of states. It is actual practice, illustrated by custom and by treaty, that formulates the role of international law, and not formalistic structures, theoretical deductions or moral stipulations. Accordingly, when positivists such as Triepel⁸ and Strupp⁹ consider the relationship of international law to municipal law, they do so upon the basis of the supremacy of the state, and the existence of wide differences between the two functioning orders. This theory, known as *dualism*, stresses that the rules of the systems of international law and municipal law exist separately and cannot purport to have an effect on, or overrule, the other.

This is because of the fundamentally different nature of inter-state and intra-state relations and the different legal structure employed on the one hand by the state and on the other hand as between states. Where municipal legislation permits the exercise of international law rules, this is on sufferance as it were and is an example of the supreme authority of the state within its own domestic jurisdiction, rather than of any influence maintained by international law within the internal sphere.¹⁰

Those writers who disagree with this theory and who adopt the *monist* approach tend to fall into two distinct categories: those who, like Lauterpacht, uphold a strong ethical position with a deep concern for human rights, and others, like Kelsen, who maintain a monist position on formalistic logical

grounds. The monists are united in accepting a unitary view of law as a whole and are opposed to the strict division posited by the positivists.

The 'naturalist' strand represented in England by Lauterpacht's works sees the primary function of all law as concerned with the well-being of individuals, and advocates the supremacy of international law as the best method available of attaining this. It is an approach characterised by deep suspicion of an international system based upon the sovereignty and absolute independence of states, and illuminated by faith in the capacity of the rules of international law to imbue the international order with a sense of moral purpose and justice founded upon respect for human rights and the welfare of individuals.¹¹

The method by which Kelsen elucidates his theory of monism is markedly different and utilises the philosophy of Kant as its basis. Law is regarded as constituting an order which lays down patterns of behaviour that ought to be followed, coupled with provision for sanctions which are employed once an illegal act or course of conduct has occurred or been embarked upon. Since the same definition appertains within both the internal sphere and the international sphere, a logical unity is forged, and because states owe their legal relationship to one another to the rules of international law, such as the one positing equality, since states cannot be equal before the law without a rule to that effect, it follows that international law is superior to or more basic than municipal law.¹²

Reference has already been made to Kelsen's hierarchical system whereby the legality of a particular rule is affirmed once it conforms to an anterior

rule. This process of referring back to previous or higher rules ends with the so-called basic norm of the legal order. However, this basic norm is basic only in a relative sense, since the legal character of states, such as their jurisdiction, sovereignty and equality, is fixed by international law. Thus, Kelsen emphasises the unity of the entire legal order upon the basis of the predominance of international law by declaring that it is the basic norm of the international legal order which is the ultimate reason of validity of the national legal orders too.¹³

A third approach, being somewhat a modification of the dualist position and formulated by Fitzmaurice and Rousseau among others, attempts to establish a recognised theoretical framework tied to reality. This approach begins by denying that any common field of operation exists as between international law and municipal law by which one system is superior or inferior to the other. Each order is supreme in its own sphere, much as French law and English law are in France and England. And just as one cannot talk in terms of the supremacy of French law over English law, but only of two distinct legal systems each operating within its own field, so it is possible to treat international law and municipal law in the same way. They are both the legal element contained within the domestic and international systems respectively, and they exist within different juridical orders.

What may, and often does, happen is what is termed ‘a conflict of obligations’, that is the state within its own domestic sphere does not act in accordance with its obligations as laid down by international law. In such a case, the domestic position is unaffected (and is not overruled by the contrary rule of international law), but rather the state as it operates internationally has

broken a rule of international law and the remedy will lie in the international field, whether by means of diplomatic protest or judicial action.

This method of solving the problem does not delve deeply into theoretical considerations, but aims at being practical and in accord with the majority of state practice and international judicial decisions.¹⁴ In fact, the increasing scope of international law has prompted most states to accept something of an intermediate position, where the rules of international law are seen as part of a distinct system, but capable of being applied internally depending on circumstance, while domestic courts are increasingly being obliged to interpret rules of international law.¹⁵ As a consequence of this realisation, a number of principles of coordination have arisen. From its perspective, international law underlines that (as noted in the following section) a state cannot evade a rule of international law by pleading a rule of municipal or national law. International instruments, particularly those establishing international or regional courts, seek to permit contracting states a space within which to operate their own rules. For example, the European Court of Human Rights has developed the concept of the margin of appreciation whereby parties to that convention may have rather more freedom of construction and application with regard to some provisions rather than others.¹⁶ Again, under article 5 of the Treaty on European Union 2012, the idea of subsidiarity establishes that decisions are to be taken as closely as possible to the citizen so that action taken at EU level is justified in light of the possibilities available at national, regional or local level. Subsidiarity is the principle whereby the Union does not take action (except in the areas that fall within its exclusive competence), unless it is more effective than action taken at national, regional or local level. It is closely bound up with the

principle of proportionality, which requires that any action by the Union should not go beyond what is necessary to achieve the objectives of the Treaties. Similarly, the principle of complementarity, a principle of admissibility in the International Criminal Court, reflected in article 17 of the Statute of that court, seeks to ensure that the court will only exercise jurisdiction where the national legal system cannot or will not investigate or prosecute the crime alleged.¹⁷ More generally, there is a rule that before a state can take up a claim on the international stage of one of its nationals, the latter should have exhausted available and effective local remedies¹⁸ and the same rule appears in international and regional human rights treaties.¹⁹ From the national perspective, principles have emerged that seek to manage the relationship, such as the presumption that legislation should be interpreted in a manner consistent with international law²⁰ and the concept that customary international law forms part of the common law unless there is contrary legislation.²¹ Particular difficulties have arisen of late concerning the relationship between national security and international human rights in an era of increased international terrorism.

The Role of Municipal Rules in International Law²²

The perspective from international law is very clear. The general rule with regard to the position of municipal law within the international sphere is that a state which has broken a stipulation of international law cannot justify itself by referring to its domestic legal situation. It is no defence to a breach of an international obligation to argue that the state acted in such a manner because it was following the dictates of its own municipal laws. The reasons for this inability to put forward internal rules as an excuse to evade international responsibility are obvious. Any other situation would permit international law to be evaded by the simple method of domestic legislation.

Accordingly, state practice and international cases have established this provision and thereby prevented countries involved in international litigation from pleading municipal law as a method of circumventing international law. Article 3 of the International Law Commission's Articles on State Responsibility declares that: 'The characterization of an act of a state as internationally wrongful is governed by international law. Such characterization is not affected by the characterization of the same act as lawful by internal law.'²³ Article 27 of the Vienna Convention on the Law of Treaties 1969 lays down that in so far as treaties are concerned, a party may not invoke the provisions of its internal law as justification for its failure to carry out an international agreement, while article 46(1) provides that a state may not invoke the fact that its consent to be bound by a treaty has been

expressed in violation of a provision of its internal law regarding competence to conclude treaties as invalidating its consent.²⁴ This is so unless the violation of its internal law in question was ‘manifest and concerned a rule of fundamental importance’. Article 46(2) states that such a violation is manifest where it would be objectively evident to any state conducting itself in the matter in accordance with normal practice and in good faith. The International Court considered this provision in *Cameroon v. Nigeria* in the context of Nigeria’s argument that the Maroua Declaration of 1975 signed by the two heads of state was not valid as it had not been ratified.²⁵ It was noted that article 7(2) of the Vienna Convention provided that heads of state belonged to the group of persons who in virtue of their functions and without having to produce full powers are considered as representing their state. The Court also took the view that ‘there is no general legal obligation for States to keep themselves informed of legislative and constitutional developments in other States which are or may become important for the international relations of these States’.²⁶

Such provisions are reflected in the case-law. In the *Alabama Claims* arbitration of 1872, the United States objected strenuously when Britain allowed a Confederate ship to sail from Merseyside to prey upon American shipping. It was held that the absence of British legislation necessary to prevent the construction or departure of the vessel could not be brought forward as a defence, and Britain was accordingly liable to pay damages for the depredations caused by the warship in question.²⁷ In the *Polish Nationals in Danzig* case, the Court declared that ‘a State cannot adduce as against another State its own constitution with a view to evading obligations incumbent upon it under international law or treaties in force’.²⁸

The International Court, in the *Applicability of the Obligation to Arbitrate* case,²⁹ has underlined ‘the fundamental principle of international law that international law prevails over domestic law’, while Judge Shahabuddeen emphasised in the *Lockerbie* case³⁰ that inability under domestic law to act was no defence to non-compliance with an international obligation. This was reinforced in the *LaGrand* case,³¹ where the Court noted that the effect of the US procedural default rule,³² which was to prevent counsel for the LaGrand brothers from raising the violation by the United States of its obligations under the Vienna Convention on Consular Relations 1963 before the US federal courts system, had no impact upon the responsibility of the United States for the breach of the convention.³³ The Court underlined this approach in *Avena (Mexico v. United States)*,³⁴ noting: ‘The rights guaranteed under the Vienna Convention are treaty rights which the United States has undertaken to comply with in relation to the individual concerned, irrespective of the due process rights under the United States constitutional law.’ The Court took a step further in that case, which also concerned the failure to allow foreign prisoners access to the consular officials of their state in breach of the Vienna Convention on Consular Relations, declaring that ‘the remedy to make good these violations should consist in an obligation on the United States to permit review and reconsideration of these nationals’ cases by the United States courts . . . with a view to ascertaining whether in each case the violation of Article 36 committed by the competent authorities caused actual prejudice to the defendant in the process of administration of criminal justice’.³⁵ By way of contrast, the International Court pointed out in the *Elettronica Sicula SpA (ELSI)* case³⁶ that the fact that an act of a public authority may have been unlawful in municipal law did not necessarily mean that the act in question was unlawful in international law.

However, such expressions of the supremacy of international law over municipal law in international tribunals do not mean that the provisions of domestic legislation are either irrelevant or unnecessary.³⁷ On the contrary, the role of internal legal rules is vital to the workings of the international legal machine. One of the ways that it is possible to understand and discover a state's legal position on a variety of topics important to international law is by examining municipal laws.³⁸ A country will express its opinion on such vital international matters as the extent of its territorial sea, or the jurisdiction it claims or the conditions for the acquisition of nationality through the medium of its domestic law-making. Thus, it is quite often that in the course of deciding a case before it, an international court will feel the necessity to make a study of relevant pieces of municipal legislation. Indeed, there have been instances, such as the *Serbian Loans* case of 1929,³⁹ when the crucial issues turned upon the interpretation of internal law, and the rules of international law in a strict sense were not at issue. Further, a court may turn to municipal law concepts where this is necessary in the circumstances.⁴⁰ However, it is clear that caution is necessary where an international court or tribunal is considering concepts of national law in the absence of an express or implied requirement so to do and no automatic transposition should occur.⁴¹

In addition to the role of municipal law in revealing the legal position of the state on topics of international importance, the rules of municipal law constitute facts in proceedings before international courts and tribunals, but may also be utilised as evidence of compliance or non-compliance with international obligations and part of any relevant applicable law.⁴² In the

Certain German Interests in Polish Upper Silesia case, the Permanent Court of International Justice declared that:

From the standpoint of International Law and of the Court, which is its organ, municipal laws are merely facts which express the will and constitute the activities of States, in the same manner as do legal decisions or administrative measures. The Court is certainly not called upon to interpret the Polish law as such; but there is nothing to prevent the Court's giving judgment on the question whether or not, in applying that law, Poland is acting in conformity with its obligations towards Germany under the Geneva Convention.⁴³

Nevertheless, and despite the many functions that municipal law rules perform within the sphere of international law, the point must be emphasised that the presence or absence of a particular provision within the internal legal structure of a state, including its constitution if there is one, cannot be applied to evade an international obligation. Any other solution would render the operations of international law rather precarious. On the other hand, international law cannot render invalid as such any rule of municipal law⁴⁴ and will rarely interpret a national law in a manner contrary to the domestic authorities.⁴⁵

International Law before Municipal Courts⁴⁶

The problem of the role of international law within the municipal law system as seen from the domestic system is, however, rather more complicated than the position discussed above, and there have been a number of different approaches to it. States are, of course, under a general obligation to act in conformity with the rules of international law and will bear responsibility for breaches of it, whether committed by the legislative, executive or judicial organs and irrespective of domestic law.⁴⁷ Further, international treaties may impose requirements of domestic legislation upon states parties,⁴⁸ while binding Security Council resolutions may similarly require that states take particular action within their jurisdictions.⁴⁹ There is indeed a clear trend towards the increasing penetration of international legal rules within domestic systems coupled with the exercise of an ever-wider jurisdiction with regard to matters having an international dimension by domestic courts. This has led to a blurring of the distinction between the two previously maintained autonomous zones of international and domestic law, a re-evaluation of the role of international legal rules and a greater preparedness by domestic tribunals to analyse the actions of their governments in the light of international law.⁵⁰ Further, domestic courts may often have to determine the meaning of an international rule that is relevant for a case before them⁵¹ or to seek to resolve conflicts between international rules, such as that between state immunity and the prohibition of torture⁵² and that between treaty rules of human rights and binding Security Council resolutions.⁵³ As between the two systems, there will be no *res judicata* (or binding or conclusive effect) at the international level with regard to a national decision in the absence of a specific direction to this effect in the particular case,⁵⁴ while practice is variable with regard to international decisions in the municipal system. Often, domestic courts will ascribe persuasive influence to such decisions and may

grant *res judicata* effect to international and domestic arbitral awards.⁵⁵ At the same time, the constitution of the state in question will be critical in determining precisely how the rules of international law will be treated within the domestic system, so that in the United Kingdom, for example, the key relevant principles will include the separation of powers, the supremacy of Parliament and the independence of the judiciary.⁵⁶

In this section, the approach adopted by municipal courts will be noted. We shall look first at the attitudes adopted by the British courts, and then proceed to note the views taken by the United States and other countries.⁵⁷

The United Kingdom⁵⁸

It is part of the public policy of the United Kingdom that the courts should in principle give effect to clearly established rules of international law.⁵⁹ This does not, however, mean that where a court is exercising a discretionary power, it is obliged to ensure that the government acts compatibly with its international obligations and not in breach of them.⁶⁰

Various theories have been put forward to explain the applicability of international law rules within the jurisdiction. One expression of the positivist–dualist position has been the doctrine of *transformation*. This is based upon the perception of two quite distinct systems of law, operating separately, and maintains that before any rule or principle of international law can have any effect within the domestic jurisdiction, it must be expressly and specifically ‘transformed’ into municipal law by the use of the appropriate constitutional machinery, such as an Act of Parliament. This doctrine grew from the procedure whereby international agreements are rendered operative in municipal law by the device of ratification by the sovereign and the idea has developed from this that any rule of international law must be transformed, or specifically adopted, to be valid within the internal legal order.

Another approach, known as the doctrine of *incorporation*, holds that international law is part of the municipal law automatically without the necessity for the interposition of a constitutional ratification procedure. The

best-known exponent of this theory is the eighteenth-century lawyer Blackstone, who declared in his *Commentaries* that:

the law of nations, wherever any question arises which is properly the object of its jurisdiction, is here adopted in its full extent by the common law, and it is held to be a part of the law of the land.⁶¹

This doctrine refers to customary international law and different rules apply to treaties. However, the previously accepted dichotomy between the reception of custom and treaty if now maintained absolutely would distort the many developments currently taking place. As will be seen, English courts have had to deal with the effect of legal decisions emanating from the European Union and its Court of Justice and the European Court of Human Rights,⁶² as well as the other consequences resulting from membership of the Union and of the Council of Europe; have been concerned with the interpretation of an increasing number of rules of international law incorporated into English law through the ratification of international treaties (particularly the significant number dealing with terrorist issues) and subsequent domestic legislation that they have required;⁶³ have sought to tackle conflicts of international legal rules and have dealt with the changing configuration of the doctrine of non-justiciability of issues raising questions as to the executive's conduct of foreign policy. They have also had to concern themselves with the validity of foreign laws deemed to conflict with international law and the acceptability of evidence obtained abroad in

circumstances that may have violated international law.⁶⁴ English courts take judicial notice of international law,⁶⁵ so that formal proof of a proposition does not need to be demonstrated (unlike propositions of foreign law which need to be proved as fact by evidence) and this itself has been a key factor in determining the relationship between international law and domestic law. Judges are deemed to know international law. In practice, this means that judges and lawyers trained in domestic law have had to grapple with the different sources of international law and the difficulties of this task have percolated through the relationship.

Customary International Law

It is in this sphere that the doctrine of incorporation became the main British approach. It is an old-established theory dating back to the eighteenth century, owing its prominence at that stage to the considerable discussion then taking place as to the precise extent of diplomatic immunity and in the light of the predominance of natural law concepts.

A few of the more important cases will be briefly surveyed. In *Buvot v. Barbuit*,⁶⁶ Lord Talbot declared unambiguously that ‘the law of nations in its full extent was part of the law of England’, so that a Prussian commercial agent could not be rendered liable for failing to perform a decree. This was followed twenty-seven years later by *Triquet v. Bath*,⁶⁷ where Lord Mansfield, discussing the issue as to whether a domestic servant of the Bavarian Minister to Britain could claim diplomatic immunity, upheld the earlier case and specifically referred to Talbot’s statement.

This acceptance of customary international law rules as part and parcel of the common law of England, so vigorously stated in a series of eighteenth-century cases, was subject to the priority granted to Acts of Parliament and tempered by the principle of *stare decisis* or precedent, maintained by the British courts and ensuring that the judgments of the higher courts are binding upon the lower courts of the hierarchical system. Accordingly, a rule of international law would not be implemented if it ran counter to a statute or decision by a higher court.⁶⁸ It is also important to note that during this period the rules of customary international law were relatively few in number so that few conflicts between the systems were to be envisaged in practice.

In the nineteenth century, a series of cases occurred which led many writers to dispute the validity of the hitherto accepted incorporation doctrine and replace it with the theory of transformation, according to which the rules of customary international law only form part of English law if they have been specifically adopted, either by legislation or case-law. This new approach reflected the decline in natural law thinking and the rise of positivism with its emphasis upon state sovereignty and state practice. The turning point in this saga is marked by the case of *R v. Keyn*,⁶⁹ where a German ship, the *Franconia*, collided with and sank a British vessel in the English Channel within three miles of the English coast. The German captain was indicted for manslaughter following the death of a passenger from the British ship, and the question that came before the Court for Crown Cases Reserved was whether an English court did indeed have jurisdiction to try the offence in such circumstances.

The Court came to the conclusion that no British legislation existed which provided for jurisdiction over the three-mile territorial sea around the coasts. It was true that such a rule might be said to exist in international law, but it was one thing to say that the state had the right to legislate over a part of what had previously been the high seas, and quite another to conclude that the state's laws operate at once there, independently of any legislation. One thing did not follow from another, and it was imperative to keep distinct on the one hand the power of Parliament to make laws, and on the other the authority of the courts, without appropriate legislation, to apply the criminal law where it could not have been applied before. The question, as Lord Cockburn emphasised, was whether, acting judicially, the Court could treat the power of Parliament to legislate as making up for the absence of actual legislation. The answer came in the negative and the German captain was released.

This case was seen by some as marking a change to a transformation approach,⁷⁰ but the judgment was in many respects ambiguous, dealing primarily with the existence or not of any right of jurisdiction over the territorial sea.⁷¹ In many respects, the differences between the incorporation and transformation theories have revolved in practice more around evidential questions than any comprehensive theoretical revolution. In any event, any doubts as to the outcome of any further *Franconia* situations were put to rest by the Territorial Waters Jurisdiction Act 1878, which expressed British jurisdiction rights in similar circumstances.

The opinions put forward in the *West Rand Gold Mining Company* case⁷² showed a further blurring of the distinction between the incorporation and transformation theories. Lord Alverstone declared that whatever had received

the common consent of civilised nations must also have received the assent of Great Britain and as such would be applied by the municipal tribunals. However, he went on to modify the impact of this by noting that any proposed rule of international law would have to be proved by satisfactory evidence to have been ‘recognised and acted upon by our own country’ or else be of such a nature that it could hardly be supposed any civilised state would repudiate it. Lord Mansfield’s view in the *Triquet* case could not be so interpreted as to include within the common law rules of international law which appear in the opinions of textbook writers and as to which there is no evidence that Britain ever assented.⁷³ This emphasis on assent, it must be noted, bears a close resemblance to the views put forward by the Court in *R v. Keyn* as to the necessity for conclusive evidence regarding the existence and scope of any particular rule of customary law. Indeed, the problem is often one of the uncertainty of existence and scope of customary law.

Not long after the *West Rand Gold Mining Company* case, another important dispute came before the courts. In *Mortensen v. Peters*,⁷⁴ a Danish captain was convicted by a Scottish court for contravening a fishing by-law regarding the Moray Firth. His ship had been operating within the Moray Firth and was within the area covered by the relevant by-law, but it was beyond the three-mile limit recognised by international law. The issue came to the Scottish High Court of Justiciary, where Lord Dunedin, in discussing the captain’s appeal, concentrated upon the correct construction to be made of the relevant legislation. He noted that an Act of Parliament duly passed and assented to was supreme and the Court had no option but to give effect to its provisions. In other words, statutes had predominance over customary law, and a British court would have to heed the terms of an Act of Parliament even if it

involved the breach of a rule of international law. This is so even though there is a presumption in British law that the legislation is to be so construed as to avoid a conflict with international law. Where such a conflict does occur, the statute has priority and the state itself will have to deal with the problem of the breach of a customary rule.⁷⁵

This modified incorporation doctrine was clearly defined by Lord Atkin in *Chung Chi Cheung v. R.*⁷⁶ He noted that:

international law has no validity except in so far as its principles are accepted and adopted by our own domestic law . . . The courts acknowledge the existence of a body of rules which nations accept among themselves. On any judicial issue they seek to ascertain what the relevant rule is, and having found it they will treat it as incorporated into the domestic law, so far as it is not inconsistent with rules enacted by statutes or finally declared by their tribunals.

It was thus a key requirement that any alleged rule of customary law must be proved to be a valid rule of international law, and not merely an unsupported proposition. This underlined the need to examine what states were actually doing.

In ascertaining the existence and nature of any particular rule, the courts may have recourse to a wider range of authoritative material than would normally be the case, such as ‘international treaties and conventions, authoritative textbooks, practice and judicial decisions’ of the courts of other countries.⁷⁷

The high-water-mark case of *Trendtex Trading Corporation Ltd v. Central Bank of Nigeria* raised anew many of these issues. The case concerned a claim for sovereign or state immunity by the Central Bank of Nigeria.⁷⁸ In *Trendtex*, all three judges of the Court of Appeal accepted the incorporation doctrine as the correct one. Lord Denning noted that ‘the rules of international law are incorporated into English law automatically and considered to be part of English law unless they are in conflict with an Act of Parliament’ and, reversing his opinion in an earlier case,⁷⁹ stressed that otherwise the courts could not recognise changes in the norms of international law.⁸⁰ Stephenson LJ emphasised, in an important statement, that:

it is the nature of international law and the specific problems of ascertaining it which create the difficulty in the way of adopting or incorporating or recognising as already incorporated a new rule of international law.⁸¹

The issue of *stare decisis*, or precedent, and customary international law was also discussed in this case. It had previously been accepted that the doctrine of *stare decisis* would apply in cases involving customary international law principles as in all other cases before the courts, irrespective of any changes

in the meantime in such law.⁸² This approach was reaffirmed in *Thai-Europe Tapioca Service Ltd v. Government of Pakistan*.⁸³ However, in *Trendtex*, Lord Denning and Shaw LJ emphasised that international law did not know a rule of *stare decisis*.⁸⁴ Where international law had changed, the court could implement that change ‘without waiting for the House of Lords to do it’.⁸⁵ The true principle, noted Shaw LJ, was that ‘the English courts must at any given time discover what the prevailing international rule is and apply that rule’.⁸⁶

The incorporationist approach was reaffirmed in principle by the Court of Appeal in *J. H. Rayner (Mincing Lane) Ltd v. Department of Trade and Industry*.⁸⁷ This case concerned the consequences of the demise of the International Tin Council and the attempts *inter alia* to render states that were members of the ITC liable for the debts incurred by that unfortunate organisation. Nourse LJ emphasised that the *Trendtex* case had resolved the rivalry between the incorporation and transformation doctrines in favour of the former.⁸⁸ One of the major points at issue in the *Tin Council* litigation was whether a rule existed in international law stipulating that the states members of an international organisation with separate personality could be rendered liable for the latter’s debts.

If such a rule did exist, the question would then arise as to how that would be accepted or manifested in the context of municipal law. This, of course, would depend upon the precise content of such a claimed international rule and, as Kerr LJ noted, no such rule did exist in international law permitting action against member states ‘in any national court’.⁸⁹ It was also not possible for an English court to remedy the gap in international law by itself

creating such a rule.⁹⁰ Nourse LJ, however, took a different position on this point, stating that ‘where it is necessary for an English court to decide such a question [i.e. an uncertain question of international law], and whatever the doubts and difficulties, it can and must do so’.⁹¹ This, with respect, is not and cannot be the case, not least because it strikes at the heart of the community-based system of international law creation.

Lord Oliver in the House of Lords judgment⁹² emphasised:

It is certainly not for a domestic tribunal in effect to legislate a rule into existence for the purposes of domestic law and on the basis of material that is wholly indeterminate.⁹³

Such approaches find support in the *Pinochet* decisions. Lord Lloyd, for example, in *R v. Bow Street Metropolitan Stipendiary Magistrate, ex parte Pinochet (No. 1)*, referred to the ‘well-established principles of customary international law, which principles form part of the common law of England’,⁹⁴ while Lord Slynn took the view that the doctrine of precedent did not apply to the incorporation of rules of customary international law.⁹⁵ Lord Millett in *Ex parte Pinochet (No. 3)* stressed: ‘Customary international law is part of the common law.’⁹⁶ In *Lord Advocate’s Reference No. 1 of 2000*, the High Court of Justiciary stated that ‘[a] rule of customary international law is a rule of Scots law’,⁹⁷ and the point was emphasised by the Arbitral Tribunal in *Sandline v. Papua New Guinea* that ‘it is part of the public policy of

England that its courts should give effect to clearly established rules of international law'.⁹⁸

The doctrine that customary international law formed part of the law of England was discussed by the House of Lords in *R v. Jones*,⁹⁹ where the issue focused upon whether the customary international law rule prohibiting aggression had automatically entered into English criminal law. Lord Bingham, while noting that the general principle was not at issue between the parties, commented that he 'would for [his] part hesitate, at any rate without much fuller argument, to accept this proposition in quite the unqualified terms in which it has often been stated'. Preference was expressed for the view maintained by Brierly that international law was not a part, but was rather one of the sources, of English law.¹⁰⁰

More specifically, the House of Lords unanimously accepted that the incorporation doctrine did not apply to the customary international law offence of aggression. While it was accepted that a crime recognised in customary international law 'may' be assimilated into domestic criminal law without statutory provision, this was not automatic.¹⁰¹ The English courts no longer had the power to create new criminal offences, which could only now be done by statute, and in practice when domestic effect was sought for customary international crimes, this was achieved through legislation.¹⁰² Further, a charge of aggression would involve a determination not only of the guilt of the accused, but also of the state itself and possibly of other states, should the state go to war with allies, and this raised constitutional issues as to non-justiciability.¹⁰³

This more nuanced approach was reaffirmed by the UK Supreme Court in *Keyu v. Secretary of State for Foreign and Commonwealth Affairs*, where Lord Mance noted that '[c]ommon law judges on any view retain the power and duty to consider how far customary international law on any point fits with domestic constitutional principles and understandings',¹⁰⁴ pointed out that domestic courts face a policy issue in deciding whether to recognise and enforce a rule of international law¹⁰⁵ and concluded that 'the presumption when considering any such policy issue is that CIL [customary international law], once established, can and should shape the common law, whenever it can do so consistently with domestic constitutional principles, statutory law and common law rules which the courts can themselves sensibly adapt without it being, for example, necessary to invite Parliamentary intervention or consideration'.¹⁰⁶ As Lloyd-Jones LJ put it: 'It seems preferable to regard customary international law not as a part but as a source of the common law on which national judges may draw.'¹⁰⁷ In addition, Lord Sumption emphasised:

In principle, judges applying the common law are not at liberty to create, abrogate or modify municipal law rights or obligations in accordance with unincorporated norms derived from international law, whether customary or treaty-based. But, as Lord Bingham pointed out in *R v. Lyons* [2003] 1 AC 976, at para 13, international law may none the less affect the interpretation of ambiguous statutory provisions, guide the exercise of judicial or

executive discretions and influence the development of the common law. Although the courts are not bound, even in these contexts, to take account of international law, they are entitled to do so if it is appropriate and relevant.¹⁰⁸

Accordingly, a considerable degree of caution may therefore now be necessary with regard to the traditionally and baldly expressed proposition that customary international law is part of English law.¹⁰⁹ This will be subject not only, as in the past, to the rule that common law (including where incorporating an international customary rule) gives way to statute, but also to considerations of a constitutional nature. Courts will be obliged to determine whether a particular provision indeed constitutes a rule of custom and, additionally, whether there are any constitutional bars to incorporation and indeed whether the custom in question is capable of being applied within the domestic legal system. This is since most of the rules of customary international law actually relate to matters of concern between two or more states and by definition a domestic court is unable to determine the rights and duties of a third state, partly because the domestic court would be unable in such circumstances to enforce its decision against or within the third state and partly because the international rule will often itself provide for implementation and sanctions within the international system upon a state-to-state or multilateral basis.¹¹⁰ Other relevant factors may well include whether the custom is inconsistent with an earlier rule of common law¹¹¹ or with public policy.¹¹² Accordingly, the approach positing automatic incorporation has given way to one proposing presumptive incorporation.

Treaties¹¹³

As far as treaties are concerned, different rules apply as to their application within the domestic jurisdiction for very good historical and political reasons. While customary law develops through the evolution of state practice, international conventions are in the form of contracts binding upon the signatories. For a custom to emerge it is usual, though not always necessary, for several states to act in a certain manner believing it to be in conformity with the law. Therefore, in normal circumstances the influence of one particular state is not usually decisive. In the case of treaties, the states involved may create new law that would be binding upon them irrespective of previous practice or contemporary practice. In other words, the influence of the executive is generally of greater impact where treaty law is concerned than is the case with customary law and this is particularly so where, as in the United Kingdom, ratification of treaties is an executive act.

It follows from this that were treaties to be rendered applicable directly within the state without any intermediate stage after signature and ratification and before domestic operation, the executive would be able to legislate without the legislature. Because of this, any incorporation theory approach to treaty law has been rejected. Indeed, as far as this topic is concerned, it seems to turn more upon the particular relationship between the executive and legislative branches of government than upon any preconceived notions of international law.

One of the principal cases in English law illustrating this dualist situation is *Parlement Belge*,¹¹⁴ which involved a collision between this ship and a British tug, and the claim for damages brought by the latter vessel before the Probate, Divorce and Admiralty division of the High Court. The *Parlement Belge* belonged to the King of the Belgians and was used as a cargo boat. During the case, the Attorney General intervened to state that the Court had no jurisdiction over the vessel as it was the property of the Belgian monarch, and that further, by a political agreement of 1876 between Britain and Belgium, the same immunity from foreign legal process as applied to warships should apply also to this packet boat. In discussing the case, the Court concluded that only public ships of war were entitled to such immunity and that such immunity could not be extended to other categories by a treaty without parliamentary consent. Indeed, it was stated that this would be ‘a use of the treaty-making prerogative of the Crown . . . without precedent, and in principle contrary to the law of the constitution’.¹¹⁵

It is the Crown which in the United Kingdom possesses the constitutional authority to enter into treaties and this prerogative power cannot be impugned by the courts.¹¹⁶ However, this power may be affected by legislation. Section 6 of the European Parliamentary Elections Act 1978 provided, for example, that no treaty providing for any increase in the powers of the European Parliament would be ratified by the United Kingdom without being first approved by Parliament.¹¹⁷ Thus it is that treaties cannot operate of themselves within the state, but require the passing of an enabling statute. The Crown in the United Kingdom retains the right to sign and ratify international agreements, but is unable to legislate directly. Before a treaty can become part of English law, an Act of Parliament is essential. This

fundamental proposition was clearly spelt out by Lord Oliver in the House of Lords decision in *J. H. Rayner (Mincing Lane) Ltd v. Department of Trade and Industry*.¹¹⁸ He noted:

as a matter of the constitutional law of the United Kingdom, the royal prerogative, whilst it embraces the making of treaties, does not extend to altering the law or conferring rights on individuals or depriving individuals of rights which they enjoy in domestic law without the intervention of Parliament. Treaties, as it is sometimes expressed, are not self-executing. Quite simply, a treaty is not part of English law unless and until it has been incorporated into the law by legislation.¹¹⁹

It therefore followed that as far as individuals were concerned such treaties were *res inter alia acta* from which they could not derive rights and by which they could not be deprived of rights or subjected to obligations.¹²⁰ Lord Templeman emphasised: ‘Except to the extent that a treaty becomes incorporated into the laws of the United Kingdom by statute, the courts of the United Kingdom have no power to enforce treaty rights and obligations at the behest of a sovereign government or at the behest of a private individual.’¹²¹ This was reaffirmed by Lord Bingham in *A (FC) and Others (FC) v. Secretary of State for the Home Department*, noting that ‘a treaty, even if ratified by the United Kingdom, has no binding force in the domestic law of this country unless it is given effect by statute or expresses principles of

customary international law'.¹²² The interpretation of treaties not incorporated by statute into municipal law, and the decision as to whether they have been complied with, are matters exclusively for the Crown as 'the court must speak with the same voice as the Executive'.¹²³ An exception is where reference to a treaty is needed in order to explain the relevant factual background,¹²⁴ for example where the terms of a treaty are incorporated into a contract.¹²⁵ Where the legislation in question refers expressly to a relevant but unincorporated treaty, it is permissible to utilise the latter in order to constrain any discretion provided for in the former.¹²⁶ Further, it has been argued that ratification of an international treaty (where no incorporation has taken place) may give rise to legitimate expectations that the executive, in the absence of statutory or executive indications to the contrary, will act in conformity with the treaty.¹²⁷ The constitutional position was reaffirmed in *Miller v. Secretary of State for Exiting the European Union*, where the Supreme Court underlined that it was a fundamental principle of the UK constitution that unless primary legislation permits it, the Royal prerogative does not enable ministers to change statute law or common law, nor may ministers prevent the effective operation of a statute by exercising prerogative powers at the international level.¹²⁸ The most significant area in which ministers exercise the Royal prerogative is in the field of foreign affairs, which includes the making of treaties and withdrawal from them and the prerogative power, noted the Supreme Court, rests upon two propositions: first, that treaties between sovereign states have effect in international law and are not governed by the domestic law of any states; and, secondly, that although binding in international law, treaties are not part of UK law and give rise to no legal rights or obligations under domestic law.¹²⁹

However, treaties relating to the conduct of war, cession of territory and the imposition of charges on the public purse¹³⁰ do not need an intervening act of legislation before they can be made binding upon the citizens of the country.¹³¹ A similar situation exists also with regard to relatively unimportant administrative agreements which do not require ratification, providing of course they do not purport to alter municipal law. In certain cases, Parliament will give its approval generically in advance for the conclusion of treaties in certain fields within specified limits, subject to the terms negotiated for particular treaties being promulgated by statutory instrument (secondary legislation).¹³² Such exceptions occur because it is felt that, having in mind the historical compromises upon which the British constitutional structure is founded, no significant legislative powers are being lost by Parliament. In all other cases where the rights and duties of British subjects are affected, an Act of Parliament is necessary to render the provisions of the particular treaty operative within Britain. Parliamentary legislation will be required where a treaty for its application in the United Kingdom requires a modification of, or addition to, existing common law or statute, affects private rights, creates financial obligations for the United Kingdom, provides for an increase in the powers of the European Parliament, involves the cession of British territory or increases the powers of the Crown.¹³³ Accordingly, in *Miller v. Secretary of State for Exiting the European Union*,¹³⁴ in considering the question of the necessary constitutional processes required upon withdrawal from a treaty which had been incorporated into domestic law, the Supreme Court held that in the light of the terms of the legislation by which the United Kingdom joined the European Union and accepted EU law as part of UK law, it was not open to the United Kingdom to withdraw from the European Union by virtue of

executive action alone. Section 2 of the European Communities Act had authorised the introduction of EU law as an independent and overriding source of domestic law and it had been accepted that UK domestic law would change as a result of the United Kingdom ceasing to be a party to the EU treaties and that the rights enjoyed by UK residents granted through EU law would be affected. Thus, authorisation by a prior Act of Parliament was required before the exercise by ministers of any power to withdraw from the EU Treaties.

There is no rule specifying the precise legislative method of incorporation of a treaty¹³⁵ and a variety of means are available in practice.¹³⁶ For example, a treaty may be incorporated into domestic law by being given the force of law in a statute with or without being scheduled to the relevant Act; by being referred to in a statute otherwise than in an incorporating statute; by tangential reference in a statute;¹³⁷ and by statutory referral to definitions contained in a treaty.¹³⁸

It had been the practice in the United Kingdom to lay before both Houses of Parliament all treaties which the United Kingdom had either signed or to which it intended to accede.¹³⁹ The text of any agreement requiring ratification, acceptance, approval or accession had to be laid before Parliament at least twenty-one sitting days before any of these actions was taken. This was termed the 'Ponsonby Rule'.¹⁴⁰ All treaties signed after 1 January 1997 and laid before Parliament under this rule are accompanied by an Explanatory Memorandum.¹⁴¹ The matter is now regulated by Part 2 of the Constitutional Reform and Governance Act 2010. This provides that a treaty may only be ratified if a period of twenty-one days has elapsed from

the placing of the treaty before Parliament by the relevant Minister calling for ratification and the House of Commons has not otherwise resolved.¹⁴²

There is in English law a presumption that legislation is to be so construed as to avoid a conflict with international law.¹⁴³ This operates particularly where the Act of Parliament which is intended to bring the treaty into effect is itself ambiguous. Accordingly, where the provisions of a statute implementing a treaty are capable of more than one meaning, and one interpretation is compatible with the terms of the treaty while others are not, it is the former approach that will be adopted. For, as Lord Diplock pointed out: ‘Parliament does not intend to act in breach of international law, including therein specific treaty obligations.’¹⁴⁴ It is also to be noted that the words of a statute may require consideration of international law by the relevant domestic authorities.¹⁴⁵

Although there is a general presumption that English law accords with international obligations,¹⁴⁶ where the words of a statute are unambiguous the courts have no choice but to apply them irrespective of any conflict with international agreements.¹⁴⁷ Of course, any breach of an international obligation will import the responsibility of the United Kingdom at the international level irrespective of domestic considerations.¹⁴⁸ Attempts have been made in the past to consider treaties in the context of domestic legislation not directly enacting them, or as indications of public policy, particularly with regard to human rights treaties,¹⁴⁹ and it seems that account may be taken of them in seeking to interpret ambiguous provisions.¹⁵⁰ However, ministers are under no obligation to do this in reaching decisions.¹⁵¹

One particular issue has arisen in the case of the implementation of international obligations and that relates to UN sanctions. In the United Kingdom, such sanctions are enforced as a consequence of the United Nations Act 1946, which enables the Crown to adopt Orders in Council so that effect can be given to sanctions.¹⁵² Such secondary legislation tends to be detailed and thus the possibility of differential interpretations arises. It is to be noted that the relevance and application of rules of the European Union may also be in issue.¹⁵³ Further, one may note the obligation contained in article 29 of the ICTY Statute, adopted by binding UN Security Council resolution 827 (1993), for all states to cooperate with the Tribunal and in particular to ‘comply without undue delay with any request for assistance or an order issued by a Trial Chamber’, including the arrest and detention of persons and their surrender or transfer to the Tribunal. This was implemented by secondary legislation adopted under the United Nations Act 1946.¹⁵⁴ While Security Council resolutions may create international legal obligations, they do not without domestic legislation become part of the domestic law of the United Kingdom, for example, under the United Nations Act 1946, which allows for such resolutions to be incorporated by way of Orders in Council.¹⁵⁵

There is a rule of statutory interpretation that requires statutes to be construed, if possible, in a way which conforms with existing international treaty obligations.¹⁵⁶ In the interpretation of international treaties incorporated by statute, the English courts have adopted a broader approach than is customary in statutory interpretation, utilising the international rules of treaty interpretation as reflected in the Vienna Convention on the Law of Treaties 1969 rather than the stricter rules of statutory construction.¹⁵⁷ In

particular, recourse to the relevant *travaux préparatoires* may be possible.¹⁵⁸ However, different approaches have been taken by the British courts as to how to deal with the question of interpretation in such circumstances. In *Sidhu v. British Airways*, Lord Hope, adopting the broad approach signalled in *Fothergill v. Monarch Airlines*, stated that it was ‘well-established that a purposive approach should be taken to the interpretation of international conventions which have the force of law in this country’.¹⁵⁹ Lord Mustill in *Semco Salvage v. Lancer Navigation* took a more traditional approach founded upon the relevant articles of the Vienna Convention on the Law of Treaties 1969,¹⁶⁰ in particular emphasising the significance of a textual interpretation of the words in question as understood in their ordinary meaning.¹⁶¹ In *Al Attiya v. Al Thani*,¹⁶² it was noted that it was legitimate to construe the terms of the Vienna Convention on the Law of Treaties 1969 that have been incorporated into domestic law by reference to all of its provisions, including those that had not been so incorporated.

In a rather special position is the Human Rights Act 1998, which incorporated the European Convention on Human Rights. Section 3(1) provides that, ‘[s]o far as it is possible to do so, primary and subordinate legislation must be read and given effect in a way which is compatible with Convention rights’, although this does not affect the validity, continuing operation or enforcement of any incompatible primary legislation.¹⁶³ The obligation imposed by section 3 arises crucially in relation to both previous and subsequent enactments.¹⁶⁴ Where legislation cannot be rendered compatible with Convention rights, then a declaration of incompatibility can be made under section 4 and Parliament may then modify the offending provisions under section 10.

The courts have also adopted a broader, purposive approach to interpretation of domestic legislation in order to ensure its compatibility with the Convention.¹⁶⁵ In the process of interpreting domestic legislation so as to render it compatible if possible with the Convention rights, the courts ‘must take into account’¹⁶⁶ any relevant jurisprudence from the European Court of Human Rights, although this is not a provision imposing an obligation to follow such case-law.¹⁶⁷ Reference should also be made to EU law in this context. The case-law of the Communities demonstrates that fundamental rights are an integral part of the general principles of law, the observance of which the European Court of Justice seeks to ensure. The system provides that Community law prevails over national law and that the decisions of the European Court are to be applied by the domestic courts of the member states. The potential for change through this route was, therefore, significant prior to the United Kingdom’s withdrawal from the organisation.¹⁶⁸ Further, in interpreting domestic legislation made pursuant to the European Communities Act 1972 where the former appears to conflict with the Treaty of Rome (establishing the European Community), the House of Lords held that a purposive approach should be adopted.¹⁶⁹

The United States¹⁷⁰

As far as the American position on the relationship between municipal law and customary international law is concerned, it appears to be very similar to British practice, apart from the need to take the Constitution into account.

The US Supreme Court in *Boos v. Barry* emphasized: ‘As a general proposition, it is of course correct that the United States has a vital national interest in complying with international law.’ However, the rules of international law were subject to the Constitution.¹⁷¹

An early acceptance of the incorporation doctrine was later modified as in the United Kingdom. It was stated in the *Paquete Habana* case¹⁷² that

international law is part of our law and must be ascertained and administered by the courts of justice of appropriate jurisdiction as often as questions of right depending upon it are duly presented for their determination.¹⁷³

Similarly, the early pure incorporation cases gave way to a more cautious approach.¹⁷⁴

The current accepted position is that customary international law in the United States is federal law and that its determination by the federal courts is binding on the state courts,¹⁷⁵ although this masks some controversy as to the impact upon such incorporation upon democratic governance.¹⁷⁶ The

similarity of approach with the United Kingdom is not surprising in view of common historical and cultural traditions 3000, and parallel restraints upon the theories are visible. US courts are bound by the doctrine of precedent and the necessity to proceed according to previously decided cases, and they too must apply statute as against any rules of customary international law that do not accord with it.¹⁷⁷ The Court of Appeals reaffirmed this position in the *Committee of United States Citizens Living in Nicaragua v. Reagan* case,¹⁷⁸ where it was noted that ‘no enactment of Congress can be challenged on the ground that it violates customary international law’.¹⁷⁹

It has been noted that the political and judicial organs of the United States have the power to ignore international law, where this occurs pursuant to a statute or ‘controlling executive act’. This has occasioned much controversy,¹⁸⁰ as has the general relationship between custom and inconsistent pre-existing statutes.¹⁸¹ However, it is now accepted that statutes supersede earlier treaties or customary rules of international law.¹⁸² It has also been held that it would run counter to the Constitution for a court to decide that a decision of the International Court of Justice overrules a binding decision of the US Supreme Court and thus affords a judicial remedy to an individual for a violation of the Constitution.¹⁸³ However, the question of the impact of a ruling of the International Court upon US courts has been discussed in the light of decisions of the former¹⁸⁴ as to the violation of the Vienna Convention on Consular Relations 1963 by the failure to permit access to consular officials by imprisoned foreigners.¹⁸⁵

There does exist, as in English law, a presumption that legislation does not run counter to international law and, as it was stated by the Court in

Schroeder v. Bissell,¹⁸⁶

unless it unmistakably appears that a congressional act was intended to be in disregard of a principle of international comity, the presumption is that it was intended to be in conformity with it.¹⁸⁷

The relationship between US law and customary law has been the subject of re-examination in the context of certain human rights situations. In *Filartiga v. Pena-Irala*,¹⁸⁸ the US Court of Appeals for the Second Circuit dealt with an action brought by Paraguayans against a Paraguayan for the torture and death of the son of the plaintiff. The claim was based on the Alien Tort Statute of 1789¹⁸⁹ which provides that '[t]he district courts shall have original jurisdiction of any civil action by an alien for a tort only, committed in violation of the law of nations'. The Court of Appeals held that torture constituted a violation of international customary law and was thus actionable. The Court accordingly held against the defendant despite the fact that both parties were alien and all the operative acts occurred in Paraguay. The Court also noted that in ascertaining the content of international law, the contemporary rules and principles of international law were to be interpreted and not those as of the date of the prescribing statute.¹⁹⁰ Other cases came before the courts in which the incorporation of international customary law provisions concerning human rights issues was argued with mixed success.¹⁹¹ An attempt to obtain a judgment in the United States against the Republic of Argentina for torturing its own citizens, however, ultimately foundered upon

the doctrine of sovereign immunity,¹⁹² while it has been held that acts of ‘international terrorism’ are not actionable under the Alien Tort Statute.¹⁹³ In *Kadić v. Karadžić*,¹⁹⁴ the US Court of Appeals for the Second Circuit held that claims based on official torture and summary executions did not exhaust the list of actions that may be covered by the Alien Tort Statute and that allegations of genocide, war crimes and other violations of international humanitarian law would also be covered.¹⁹⁵ However, in *Sosa v. Alvarez-Machain*,¹⁹⁶ the Supreme Court held that the Alien Tort Statute was a jurisdictional statute creating no new causes of action and enacted on the understanding that the common law would provide a cause of action for the modest number of international law violations thought to carry personal liability at the time, being offences against ambassadors, violation of safe conducts and piracy. The federal courts, it was declared, should not recognise claims under federal common law for violations of any international law norm with less ‘definite content and acceptance among civilized nations’ than these particular offences deemed to exist at the date of the adoption of the Act.¹⁹⁷ Accordingly, both ‘a specificity comparable to the features of the 18th-century paradigms’ and a foundation resting upon ‘a norm of international character accepted by the civilized world’ were required in order to form the basis of a claim under the statute.¹⁹⁸

The ambit of the Alien Tort Statute was further limited by the Supreme Court in *Kiobel v. Royal Dutch Petroleum Company*, where the court in examining whether and under what circumstances the courts may recognise a cause of action under the Act for violations of the law of nations occurring within the territory of a sovereign other than the United States, held that the

presumption against extraterritoriality applied to claims under the Act, and that nothing in the statute rebutted that presumption.¹⁹⁹

The relative convergence of practice between Britain and the United States with regard to the assimilation of customary law is not reflected as regards the treatment of international treaties.²⁰⁰ In the United Kingdom, it is the executive branch which negotiates, signs and ratifies international agreements, with the proviso that parliamentary action is required prior to the provisions of the agreement being accepted as part of English law. In the United States, on the other hand, Article VI Section 2 of the Constitution provides that:

all Treaties made or which shall be made with the authority of the United States, shall be the supreme law of the land and the Judges in every state shall be bound thereby, anything in the Constitution or Laws of any state to the contrary notwithstanding.²⁰¹

There is also a difference in the method of approval of treaties, for Article II of the Constitution notes that while the President has the power to negotiate and make international agreements, he may only ratify them if at least two-thirds of the Senate approve. After that has happened, the President then determines whether to ratify or otherwise make the treaty on behalf of the United States.

There is an exception and this is the institution of the executive agreements. These are usually made by the President on his own authority, but still constitute valid treaties within the framework of international law. As distinct from ordinary treaties, the creation of executive agreements is not expressly covered by the Constitution, but rather implied from its terms and subsequent practice, and they have been extensively used. The Supreme Court, in cases following the 1933 Litvinov Agreement, which established US recognition of the Soviet government and provided for the assignment to the United States of particular debts owing to the Soviet Union, emphasised that such executive agreements possessed the same status and dignity as treaties made by the President with the advice and consent of the Senate under Article II of the Constitution.²⁰²

US doctrines as to treaty law and domestic law are founded upon the distinction between ‘self-executing’ and ‘non-self-executing’ treaties.²⁰³ The former are able to operate automatically within the domestic sphere, without the need for any municipal legislation, while the latter require enabling acts before they can function inside the country and bind the US courts. Self-executing treaties apply directly within the United States as part of the supreme law of the land, whereas those conventions deemed not self-executing are obliged to undergo a legislative transformation and, until they do so, they cannot be regarded as legally enforceable against American citizens or institutions.²⁰⁴

But how does one know when an international agreement falls into one category or the other? This matter has absorbed the US courts for many years, and the distinction appeared until recently to have been made upon the

basis of a variety of factors, including political content. In other words, where a treaty involves political questions of definition or exposition, then the issue should be left to the legislative organs of the nation, rather than automatic operation.²⁰⁵ Examples of this would include the acquisition or loss of territory and financial arrangements. The Supreme Court in *Edye v. Robertson*²⁰⁶ declared that treaties which

contain provisions which are capable of enforcement as between private parties in the courts of the country . . . [are] in the same category as other laws of Congress.

This would seem to mean that an international convention would become a law of the land, where its terms determine the rights and duties of private citizens, and contrasts with the position where a political issue is involved and the treaty is thereby treated as non-self-executing.

Of course, such generalisations as these are bound to lead to considerable ambiguity and doubt in the case of very many treaties; and the whole matter was examined again in 1952 before the Supreme Court of California in *Sei Fujii v. California*.²⁰⁷ The plaintiff was a Japanese citizen who had purchased some land in 1948 in California. By legislation enacted in that state, aliens had no right to acquire land. To prevent the property from going to the state, the plaintiff argued that, among other things, such legislation was not consistent with the Charter of the United Nations, an international treaty which called for the promotion of human rights without racial distinction.

The issue raised was whether the UN Charter was a self-executing treaty and, by virtue of such, part of the law of the land, which would supersede inconsistent local statutes. The Court declared that, in making a decision as to whether a treaty was self-executing or not, it would have to consult the treaty itself to try to deduce the intentions of the signatories and examine all relevant circumstances. Following the *Edye* case it would have to see whether the provisions of the treaty laid down rules that were to be enforceable of themselves in the municipal courts.

The Court concluded after a comprehensive survey that the relevant provisions of the UN Charter were not intended to be self-executing. They laid down various principles and objectives of the United Nations organisation, but ‘do not purport to impose legal obligations on the individual member nations or to create rights in private persons’. The Court held that it was obvious that further legislative action by the signatories would be called for to turn the principles of the United Nations into domestic laws binding upon the individual citizens of states.²⁰⁸ Accordingly, they could not be regarded as part of the law of the land and could not operate to deflect the Californian legislation in question. The case was decided in favour of the plaintiff, but on other grounds altogether.²⁰⁹

However, in *Medellín v. Texas*, the US Supreme Court focused heavily upon a textual analysis of the relevant treaty (the UN Charter) rather than upon a wider range of factors and concluded that the Charter (and the ICJ Statute and the Optional Protocol to the Vienna Convention on Consular Relations) were not self-executing and in the absence of incorporation into US law, the international instruments in question would not be given judicial effect.²¹⁰

The Court thus rejected the view that there existed a presumption in favour of self-execution, tending rather to the approach that the matter had to be settled on a treaty-by-treaty basis, depending upon the text, structure and ratification history of the particular treaty in question. However, it was noted that there was a presumption that treaties did not confer privately enforceable rights.²¹¹

As is the case with the UK system, it is possible for the US legislature to take action which not only takes no account of international law rules but may be positively contrary to them, and in such an instance the legislation would be supreme within the American jurisdiction.

In *Diggs v. Schultz*,²¹² for example, the Court had to consider the effect of the Byrd Amendment which legalised the importation into the United States of strategic materials, such as chrome from Rhodesia, a course of action that was expressly forbidden by a UN Security Council resolution which in the circumstances was binding. The Court noted that the Byrd Amendment was ‘in blatant disregard of our treaty undertakings’, but concluded that: ‘under our constitutional scheme, Congress can denounce treaties if it sees fit to do so, and there is nothing the other branches of government can do about it’. Although in municipal terms the Amendment was unchallengeable, the United States was, of course, internationally liable for the breach of an international legal rule.²¹³

However, there is a presumption that Congress will not legislate contrary to the international obligations of the state²¹⁴ and a principle of interpretation that where an Act and a treaty deal with the same subject, the courts will seek to construe them so as to give effect to both of them without acting contrary

to the wording of either. Where the two are inconsistent, the general rule has been posited that the later in time will prevail, provided the treaty is self-executing.²¹⁵

The question of a possible conflict between treaty obligations and domestic legislation was raised in *United States v. Palestine Liberation Organisation*.²¹⁶ The Anti-Terrorism Act of the previous year²¹⁷ provided for the closure of all PLO offices in the United States and this was construed by the Attorney-General to include the PLO mission to the United Nations, an action which would have breached the obligations of the United States under the UN Headquarters Agreement. However, the District Court found that it could not be established that the legislation clearly and unequivocally intended that an obligation arising out of the Headquarters Agreement, a valid treaty, was to be violated.²¹⁸

The issue of the relationship between international treaties and municipal law came before the US Supreme Court in *Breard v. Greene*.²¹⁹ The Court noted that ‘respectful consideration’ should be given to the interpretation of an international treaty by a relevant international court;²²⁰ however, ‘it has been recognised in international law that absent a clear and express statement to the contrary, the procedural rules of the forum State govern the implementation of the treaty in that State’.²²¹ Accordingly, the effect of resort to a domestic procedural rule might result in preventing the provision of an international treaty from being applied in any given case. The Supreme Court also affirmed that international treaties under the Constitution were recognised as the ‘supreme law of the land’, but so were the provisions of the

Constitution. An Act of Congress was ‘on full parity’ with a treaty, so that a later statute would render an earlier treaty null to the extent of any conflict.²²²

Other Countries

(i) Other Common Law and Related Legal Systems

In other countries where the English common law was adopted, such as the majority of Commonwealth states and, for example, Israel,²²³ it is possible to say that in general the same principles apply. Customary law is regarded on the whole as part of the law of the land.²²⁴ Municipal laws are presumed not to be inconsistent with rules of international law, but in cases of conflict the former have precedence.

The Canadian Supreme Court in the *Re Secession of Quebec* judgment²²⁵ noted that it had been necessary for the Court in a number of cases to look to international law to determine the rights or obligations of some actor within the Canadian legal system.²²⁶ As far as treaties are concerned, Lord Atkin expressed the general position in *Attorney-General for Canada v. Attorney-General for Ontario*,²²⁷ in a case dealing with the respective legislative competences of the Dominion Parliament and the provincial legislatures. He noted that within the then British Empire it was well enshrined that the making of a treaty was an executive act, while the performance of its obligations, if they involved alteration of the existing domestic law, required legislative action. ‘The question’, remarked Lord Atkin,

is not how is the obligation formed, that is the function of the executive, but how is the obligation to be performed, and that depends upon the authority of the competent legislature or legislatures.²²⁸

The doctrine that customary international law forms part of the domestic law of Canada has been reaffirmed in a number of cases.²²⁹ This has also been accepted in New Zealand²³⁰ and in Australia.²³¹ In *Horgan v. An Taoiseach*, it was affirmed that ‘established principles of customary international law may be incorporated into Irish domestic law *providing* that they are not contrary to the provisions of the Constitution, statute law or common law’.²³² The relationship between treaties and domestic law was examined by the High Court of Australia in *Minister of State for Immigration and Ethnic Affairs v. Teoh*.²³³ The Court upheld the traditional doctrine to the effect that the provisions of an international treaty to which Australia is a party do not form part of Australian law, and do not give rise to rights, unless those provisions have been validly incorporated into municipal law by statute.²³⁴ It was noted that this was because of the constitutional separation of functions whereby the executive made and ratified treaties, while the legislature made and altered laws.²³⁵ The majority of the Court, however, went on to hold that the fact that a treaty had not been incorporated did not mean that its ratification by the executive held no significance for Australian law. Where a statute or subordinate legislation was ambiguous, the courts should favour that construction which accorded with Australia’s obligations under the particular treaty,²³⁶ while a statute generally had to be interpreted as far as its language permitted so that it was in conformity and not in conflict with the

established rules of international law.²³⁷ Indeed, the Court felt that a narrow conception of ambiguity in this context should be rejected.²³⁸ Referring to *R v. Secretary of State for the Home Department, ex parte Brind*,²³⁹ the Court stated that this principle was no more than a canon of construction and did not import the terms of the treaty into municipal law.²⁴⁰ Moving beyond this approach, which is generally consistent with common law doctrines, the majority of the Court took the view that ratification of a convention itself would constitute an adequate foundation for a legitimate expectation (unless there were statutory or executive indications to the contrary) that administrative decision-makers would act in conformity with the unincorporated but ratified convention.²⁴¹ This particular proposition is controversial in legal doctrine, but is an interesting example of the fact that internal decision-makers may not always be expected to be immune from the influence of obligations undertaken by the state.²⁴²

There are further signs of an increasingly flexible approach. For example, in *Hosking & Hosking v. Runting and Pacific Magazines NZ Ltd*,²⁴³ the New Zealand Court of Appeal referred to the ‘increasing recognition of the need to develop the common law consistently with international treaties to which New Zealand is a party. That is an international trend. The historical approach to the State’s international obligations as having no part in the domestic law unless incorporated by statute is now recognised as too rigid.’ Further, the Canadian Supreme Court, in noting that genocide was a crime in both customary international law and treaty law, declared that international law was therefore called upon to play a crucial role as an aid in interpreting domestic law, particularly as regards the elements of the crime of incitement to genocide, and emphasised the importance of interpreting domestic law in a

manner that accorded with the principles of customary international law and with Canada's treaty obligations.²⁴⁴ This, however, would go further than most common law states would accept.

Although the basic approach adopted by the majority of common law states is clear, complications have arisen where the country in question has a written constitution, whether or not specific reference is made therein to the treatment of international agreements. The use of international law in interpreting the Constitution has occasioned much debate in Australia.²⁴⁵ In *Ahmed Ali Al-Kateb v. Godwin*, for example, two judges of the High Court of Australia came to radically different conclusions. One judge regarded the view that the Constitution should be read consistently with the rules of international law as 'heretical',²⁴⁶ while another declared that 'opinions that seek to cut off contemporary Australian law (including constitutional law) from the persuasive force of international law are doomed to fail'.²⁴⁷ This debate reflects differing approaches to constitutional interpretation.²⁴⁸

The Indian Constitution refers only in the vaguest of terms to the provisions of international law,²⁴⁹ whereas by contrast the Irish Constitution clearly states that the country will not be bound by any treaty involving a charge upon public funds unless the terms of the agreement have been approved by the Dáil.²⁵⁰ Under article 169(3) of the Cyprus Constitution, treaties concluded in accordance with that provision have, as from publication in the Official Gazette of the Republic, 'superior force to any municipal law on condition that such treaties, conventions and agreements are applied by the other party thereto'.²⁵¹ In such cases where there is a written constitution, serious questions of constitutional law may be involved, and one would have

to consider the situation as it arises and within its own political context.²⁵² But in general common law states tend to adopt the British approach.

(ii) Civil Law Systems

The practice of those states which possess the civil law system, based originally on Roman law, manifests certain differences.²⁵³ The Basic Law of the Federal Republic of Germany,²⁵⁴ for example, specifically states in article 25 that ‘the general rules of public international law are an integral part of federal law. They shall take precedence over the laws and shall directly create rights and duties for the inhabitants of the federal territory.’²⁵⁵ This provision, which not only treats international law as part of municipal law, but regards it as superior to municipal legislation, has been the subject of a great deal of controversy as writers and lawyers have tried to establish whether international legal rules would invalidate any inconsistent municipal legislation and, indeed, whether international rules could override the constitution. Similarly, the phrase ‘general rules of public international law’ has led to problems over interpretation as it may refer to all aspects of international law, including customary and treaty rules, or merely general principles common to all, or perhaps only certain nations.²⁵⁶ German courts will seek to interpret domestic law consistently with international law.²⁵⁷

As far as treaties are concerned, the German federal courts will regard these as superior to domestic legislation, though they will not be allowed to operate so as to affect the constitution. Article 59 of the Basic Law declares that treaties which regulate the political relations of the federation or relate to matters of federal legislation shall require the consent or participation, in the

form of a federal law, of the bodies competent in any specific case for such federal legislation. Thereafter such treaties will be treated as incorporated into German law, but with the status (no higher) of a federal law. Such laws may indeed be challenged before the German courts by means of a constitutional complaint if the treaty in question contains provisions directly encroaching upon the legal sphere of the individual.²⁵⁸ In its Decision of 15 December 2015, the German Constitutional Court (second Senate) confirmed that by a process of ‘treaty override’ the German Parliament, in the light of the constitutional principle of democracy, was able to make or amend a law, even if this violated an international treaty ratified by a previous Parliament.²⁵⁹

Article 91(1) of the Netherlands Constitution 1983 requires the prior approval of Parliament before treaties, or their denunciation, become binding, while article 91(3) provides that any provisions of a treaty that conflict with the Constitution or which lead to conflicts with it may be approved by the Chambers of the Parliament, provided that at least two-thirds of the votes cast are in favour. Article 93 states that provisions of treaties and of decisions by international organisations which may be binding by virtue of their contents are to become binding after they have been published, while article 94 provides that statutory regulations in force within the kingdom shall not be applicable if such application is in conflict with provisions of treaties that are binding on all persons or with resolutions by international institutions.²⁶⁰ Customary international law is not referred to in the Constitution. It is deemed to apply internally, although it seems that statute will prevail in cases of conflict.²⁶¹ It is for the courts to establish whether the provisions of a

treaty or decision by an international organisation are binding on all persons within the meaning of articles 93 and 94 of the Constitution.²⁶²

In a provision contained in other constitutions, article 10 of the Italian Constitution of 1947 stipulates that the Italian legal order ‘shall conform with the generally recognised rules of international law’. This is interpreted to indicate that international customary law will override inconsistent ordinary national legislation.²⁶³ In *Judgment No. 238–2014*, the Italian Constitutional Court held that international customary law obligations on state immunity from jurisdiction could be applied automatically within the Italian legal order, but only as long as they were in conformity with the fundamental rights contained in the Constitution.²⁶⁴

Article 8(1) of the Portuguese Constitution provides that the rules and principles of general or customary international law are an integral part of Portuguese law,²⁶⁵ while under article 87 of Poland’s Constitution of 1997, a ratified international treaty, equal to a statute, is one of the sources of law.²⁶⁶ The Supreme Court of Belgium has taken the view that directly effective treaty provisions have superiority over the Constitution,²⁶⁷ as well as over a conflicting legislative act.²⁶⁸

The French Constitution of 1958 declares that treaties duly ratified and published shall operate as laws within the domestic system.²⁶⁹ However, the Constitution provides that, although in principle it is the President of the Republic who negotiates and ratifies ordinary treaties under article 52, with regard to important treaties such as peace treaties, commercial treaties which entail some form of financial outlay, treaties relating to international

organisations, treaties modifying legislation, treaties involving the cession, exchange or acquiring of territory and treaties affecting personal status, ratification must take place by Act of Parliament, thus effectively approximating this to the common law dualist approach (article 53). Once the relevant legislation has been passed, the agreement is promulgated and becomes binding upon the courts. Article 55 of the Constitution provides that duly ratified or approved treaties or agreements shall upon publication override domestic laws, subject only to the application of the treaty or agreement by the other party or parties to the treaty.²⁷⁰ It is also now accepted that the French courts may declare a statute inapplicable for conflicting with an earlier treaty.²⁷¹ However, the Cour de Cassation has held that the supremacy of international agreements in the domestic order does not extend to constitutional provisions.²⁷²

In 1993, South Africa adopted a new (interim) constitution.²⁷³ Whereas the previous constitutions of 1910, 1961 and 1983 had been silent on the question of international law, the 1993 Constitution contained several relevant provisions. These provisions were considered and refined by the Constitutional Assembly, which on 8 May 1996 adopted a new constitution.²⁷⁴

Section 231(1) of this Constitution provides that the negotiating and signing of all international agreements is the responsibility of the national executive, while such an agreement would only bind the Republic after approval by resolution in both the National Assembly and the National Council of Provinces.²⁷⁵ Any international agreement becomes domestic law when enacted into law by national legislation, although a self-executing provision

of an agreement that has been approved by Parliament is law in the Republic unless it is inconsistent with the Constitution or an Act of Parliament.²⁷⁶

Section 232 provides that customary international law is law in the Republic unless it is inconsistent with the Constitution or an Act of Parliament, while section 233 stipulates that when interpreting any legislation, every court must prefer any reasonable interpretation of the legislation which is consistent with international law over any alternative interpretation that is inconsistent with international law. It is also to be particularly noted that section 200(2) of the Constitution states that the primary object of the defence force is to defend and protect the Republic, its territorial integrity and its people, ‘in accordance with the Constitution and the principles of international law regulating the use of force’.²⁷⁷ In *Democratic Alliance v. Minister of International Relations and Others*,²⁷⁸ the High Court of South Africa examined section 231 in the context of the purported withdrawal of South Africa from the Rome Statute of the International Criminal Court. The South African Constitution contained no explicit provision on withdrawal from treaties, but since section 231(2) of the Constitution required Parliamentary approval for treaties subject to ratification, the Court found that it could be inferred that this provision required the consent of Parliament to withdraw from such treaties. In these circumstances, the government’s notice of withdrawal was unconstitutional and invalid.²⁷⁹

The Russian Federation adopted a new constitution in 1993.²⁸⁰ Under article 86, the President negotiates and signs treaties and signs the ratification documents, while under article 106 the Federal Council (the upper chamber of the federal parliament) must consider those federal laws adopted by the State Duma (the lower chamber) that concern the ratification and

denunciation of international agreements. The Constitutional Court may review the constitutionality of treaties not yet in force (article 125(2)) and treaties that conflict with the Constitution are not to be given effect (article 125(6)). Article 15(4) of the Constitution provides that ‘the generally recognised principles and norms of international law and the international treaties of the Russian Federation shall constitute part of its legal system. If an international treaty of the Russian Federation establishes other rules than those stipulated by the law, the rules of the international treaty shall apply’. Thus, both treaty law and customary law²⁸¹ are incorporated into Russian law, while treaty rules have a higher status than domestic laws, but not superior to the Constitution.²⁸² The Constitutional Court takes the view that customary international law and international treaties ratified by Russia are norms incorporated into Russian law.²⁸³ It has also noted that an international decision, in this case a judgment of the European Court of Human Rights, deemed explicitly or implicitly contrary to the Constitution cannot be implemented. In such a case, the task of the Court was to find a reasonable balance in order to give effect to the letter and spirit of the European Court of Human Rights’ judgment without conflicting with the Constitution.²⁸⁴

Under article 73(3) of the Japanese Constitution of 1946,²⁸⁵ the Cabinet has authority to conclude treaties with the prior or subsequent approval of the Diet, although executive agreements may be entered into without such approval, usually by simple exchange of notes. Promulgation of a treaty takes place by publication in the Official Gazette under the name of the Emperor once the Diet has approved and the Cabinet ratified the agreement (article 7). Article 98(2) provides that ‘treaties concluded by Japan and established laws of nations shall be faithfully observed’ and this provision is taken as

incorporating international law, both relevant treaty and customary law, into Japan's legal system.²⁸⁶ Japan has also experienced some difficulty²⁸⁷ in the context of the relative definition of self-governing and non-self-governing treaties.

China's role in international law has been growing significantly.²⁸⁸ It emphasises the five principles of peaceful co-existence (mutual respect for sovereignty and territorial integrity, non-aggression, non-interference in internal affairs, equality and peaceful co-existence) and the concept of 'one country, two systems' by which Hong Kong and Macao returned to Chinese sovereignty, but with a different economic order.²⁸⁹ China has also become increasingly involved in international affairs, from underlining its maritime rights in such areas as the South China and the East China seas to developing the 'belt and road initiative', by which substantial investment is being made in transportation and other facilities across the world.²⁹⁰

China's Constitution (as amended in 2004)²⁹¹ makes no explicit mention of the position of international law in the domestic legal order, although article 67 provides that the Standing Committee of the National People's Congress has the power to decide on the ratification or abrogation of treaties and important agreements concluded with foreign states (paragraph 14) and to decide, when the National People's Congress is not in session, on the proclamation of a state of war in the event of an armed attack on the country or in fulfilment of international treaty obligations concerning common defence against aggression (paragraph 18). However, a number of substantive treaty obligations undertaken by China have been incorporated into special national laws and treaties are concluded in accordance with the law on the

Procedure of the Conclusion of Treaties 1990. In principle, international treaties to which China is a party have binding force in domestic law, except for those provisions to which China has made reservations. The Legislation Law 2000 provides that the Constitution ranks the highest in domestic law, followed by laws, administrative regulations and local regulations. There is no reference to international law in this legislation. There are over seventy domestic laws which contain specific provisions regarding treaty obligations.²⁹² Further, the principle whereby a domestic provision is to be interpreted consistently with international law also operates.²⁹³

(iii) Conclusion

This survey of the attitudes adopted by various countries of the common law and civil law traditions leads to a few concluding remarks. The first of these is that a strict adherence to either the monist or the dualist position will not suffice. Most countries accept the operation of customary rules within their own jurisdictions, providing there is no conflict with existing laws, and some will allow international law to prevail over municipal provisions in certain circumstances. One can regard this as a significant element in extending the principles and protection of international law, whether or not it is held that the particular provision permitting this, whether by constitutional enactment or by case-law, illustrates the superiority of municipal law in so acting. In noting this, it must be emphasised that an increasing number of states now subject the incorporation of customary international law to the supremacy of constitutional provisions or principles. The concept of the automatic incorporation of customary international law into domestic law is now to be

seen as an insufficient description of what actually happens within municipal legal systems.

The situation as regards treaties is much more complex, as different attitudes are maintained by different states. In some countries, certain treaties will operate internally by themselves (self-executing), while others must undergo a process of domestic legalisation. There are countries where legislation is needed for virtually all international agreements: for example, Belgium.²⁹⁴ It is by no means settled as a general principle whether treaties prevail over domestic rules. Some countries allow treaties to supersede all municipal laws, whether made earlier or later than the agreement. Others, such as Norway, adopt the opposite stance. Where there are written constitutions, an additional complicating factor is introduced and some reasonably stable hierarchy incorporating ordinary laws, constitutional provisions and international law has to be maintained. This is particularly so where a federal system is in operation. It will be up to the individual country to adopt its own list of preferences.²⁹⁵

Of course, such diverse attitudes can lead to confusion, but in the light of the present state of international law, it is inevitable that its enforcement and sphere of activity will become entangled with the ideas and practices of municipal law. Indeed, it is precisely because of the inadequate enforcement facilities that lie at the disposal of international law that one must consider the relationship with municipal law as of more than marginal importance. This is because the extent to which domestic courts apply the rules of international law may well determine the effectiveness of international legislation and judicial decision-making.

However, to declare that international legal rules therefore prevail over all relevant domestic legislation at all times is incorrect in the vast majority of cases and would be to overlook the real in the face of the ideal. States jealously guard their prerogatives, and few are more meaningful than the ability to legislate free from outside control; and, of course, there are democratic implications. The consequent supremacy of municipal legal systems over international law in the domestic sphere is not exclusive, but it does exist as an undeniable general principle.

It is pertinent to refer here briefly to the impact of the European Union.²⁹⁶ Article 3(5) of the consolidated version of the Treaty on European Union (TEU) states that in its relations with the wider world the Union shall uphold and promote its values and shall contribute to the strict observance and the development of international law, including respect for the principles of the UN Charter. The European Court of Justice has underlined that the European Union must respect international law, including customary international law. For example, in *Air Transport Association of America and Others v. Secretary of State for Energy and Climate Change*, the Court noted that in the light of article 3(5), when the Union ‘adopts an act, it is bound to observe international law in its entirety, including customary international law, which is binding upon the institutions of the European Union’.²⁹⁷ Further, it was emphasised that the principles of customary international law ‘may be relied upon by an individual for the purpose of the Court’s examination of the validity of an act of the European Union in so far as, first, those principles are capable of calling into question the competence of the European Union to adopt that act . . . and, second, the act in question is liable to affect rights

which the individual derives from European Union law or to create obligations under European Union law in his regard'.²⁹⁸

In terms of the relationship between EU law and national law, the European Court of Justice has held that Community law has supremacy over ordinary national law,²⁹⁹ and indeed over domestic constitutional law.³⁰⁰ In addition to the treaties creating the European Community,³⁰¹ there is a great deal of secondary legislation issuing forth from its institutions, which can apply to the member states. This takes the form of regulations, decisions or directives. Of these, the first two are directly applicable and enforceable within each of the countries concerned without the need for enabling legislation. While it is true that the legislation for this type of activity has been passed – for example, section 2(1) of the European Communities Act 1972³⁰² in the United Kingdom, which permits in advance this form of indirect law-making, and is thus assimilated into municipal law – the fact remains that the member states have accepted an extraterritorial source of law, binding in certain circumstances upon them. The effect is thus that directly effective Community law has precedence over inconsistent UK legislation. This was confirmed by the House of Lords in *Factortame Ltd v. Secretary of State for Transport*.³⁰³ It was further noted that one of the consequences of UK entry into the European Communities and the European Communities Act 1972 was that an interim injunction could be granted, the effect of which would be to suspend the operation of a statute on the grounds that the legislation in question allegedly infringed Community law. This is one illustration of the major effect which joining the Community has had in terms of the English legal system and previously accepted legal principles. The mistake, however, should not be made of generalising from this specific relationship to the

sphere of international law as a whole. The United Kingdom withdrew from the European Union on 31 January 2020.³⁰⁴

Non-Justiciability, Act of State and Related Doctrines

An issue is justiciable basically if it can be tried according to law.³⁰⁵ In this context, there must be a presumption of competence for the court to hear a matter brought before it in a manner consistent with the relevant procedural rules. There are, however, a number of principles of constraint, flowing from constitutional law and/or international law, which impact upon this presumption. These include, for example, the rule against the enforcement of foreign penal, revenue or public laws.³⁰⁶

Matters that are accepted constitutionally as falling within the exclusive competence of the executive branch of government are not justiciable before the courts. Accordingly, the test as to whether a matter is or is not justiciable involves an illumination of that grey area where the spheres of executive and judiciary merge and overlap. Recent years have seen a significant reduction in the sphere of exclusive competence of the executive free from judicial oversight and a number of important cases have sought to redraw the boundary, reflecting the increasing transparency of society in a number of states, as well as the vast increase in the availability of relevant information. The rise in the scope of justiciability also reflects the decline in the absolute nature of the sovereignty of foreign states as a concept restricting the competence of domestic courts to hear cases with a foreign element and the switch to concern with the internal constitutional balance with the state. As

part of the latter dynamic is the move to restrain and limit the power of the state to adopt decisions that cannot be reviewed by the courts.

Non-justiciability as a concept is associated but not identical with the doctrine of act of state, which generally concerns the activities of the executive in relations with the sovereign acts of foreign states.³⁰⁷ In the context of international law and municipal courts, non-justiciability refers particularly to the doctrine that no state can exercise jurisdiction over another state.³⁰⁸ As such, it is based upon the principles of the sovereignty and equality of states.³⁰⁹ Non-justiciability acts as an evidential bar, since an issue cannot be raised or proved, in contrast to sovereign immunity, another doctrine of constraint, which provides that the courts cannot exercise the jurisdiction that exists with regard to the matter in question due to the status of the entity or individual concerned, although it is open to the state concerned to waive its immunity and thus remove the jurisdictional bar.³¹⁰ Non-justiciability will usually concern a clear inter-state relationship or situation which is impleaded in a seemingly private action, while immunity issues will invariably arise out of a state–private party relationship not usually relating to inter-state activities as such.³¹¹ Nevertheless, it is not entirely clear whether the consequence of a finding of non-justiciability is that the claim to this effect is struck out with the possibility that a defence relying upon it is deprived of one of its arguments (or indeed the only one) or whether the otherwise justiciable claim is struck out on the ground that it cannot fairly be tried in the absence of the non-justiciable defence. Authority would seem to favour the latter.³¹²

The concept of non-justiciability is essentially a composite doctrine with a number of manifestations. There are primarily two sources. The first is the internal, constitutional aspect, being the prerogative of the executive in the areas of foreign policy and national defence,³¹³ where it is essentially a rule of law principle in a democratic system of government delineating the separation of powers,³¹⁴ to respect for the sovereignty and independence of foreign states.³¹⁵ Accordingly, both domestic and foreign executive acts are covered, but from the perspective of the government and its competence constitutionally.³¹⁶ Thus, the courts will refuse, or at the least be extremely reluctant, to adjudicate upon an exercise of sovereign power, such as making war and peace, making international treaties or ceding territory.³¹⁷ This would include the definition of territories within the United Kingdom,³¹⁸ as well as the conduct of foreign affairs.³¹⁹ Lord Hoffmann held in *R v. Jones* that ‘the making of war and peace and the disposition of the armed forces has always been regarded as a discretionary power of the Crown into the exercise of which the courts will not enquire’.³²⁰ This was cited with approval by Lord Mance in *Keyu v. Secretary of State for Foreign and Commonwealth Affairs*.³²¹

The second aspect relates to the acts of foreign states and relies upon the international law principles of sovereignty and legal equality of states. Lord Wilberforce, in the classic statement on the doctrine, declared in *Buttes Gas and Oil Company v. Hammer (No. 3)*:³²²

there exists in English law a general principle
that the courts will not adjudicate upon the
transactions of foreign sovereign states . . . it

seems desirable to consider this principle . . .
not as a variety of 'act of state' but one for
judicial restraint or abstention.³²³

Such a principle was not one of discretion, but inherent in the nature of the judicial process. It flows not from internal constitutional concerns, but from the character of the international system. Although the *Buttes Gas and Oil* case concerned litigation in the areas of libel and conspiracy, the House of Lords felt that a determination of the issue would have involved the court in reviewing the transactions of four sovereign states and having to find that part of those transactions was contrary to international law. Quite apart from the possibility of embarrassment to the foreign relations of the executive, about which one needs to be cautious,³²⁴ there were no judicial or manageable standards by which to judge such issues.³²⁵ This is because such international decisions were taken in the light not just of international law, but also of policy and politics.³²⁶ It has been held, for example, that judicial review would not be appropriate in a matter which would have serious international repercussions and which was more properly the sphere of diplomacy.³²⁷ It has also been held that the courts could not adjudicate upon the claimed international law fishing rights of Mauritius within the waters of the British Indian Ocean Territory in the absence of that state as a party to the case.³²⁸ The acts in question had to be of a sovereign rather than of a commercial nature and performed within the territory of a foreign state. The Court of Appeal has noted that the keeping and disposal of foreign bank notes for commercial purposes in the United Kingdom could not be treated as sovereign acts so as to bring the activity within the protection of the *Buttes*

Gas and Oil non-justiciability doctrine.³²⁹ Legislation can, of course, impinge upon the question as to whether an issue is or is not justiciable,³³⁰ while the State Immunity Act 1978 removed sovereign immunity for commercial transactions, thus rendering the state subject to the jurisdiction of the court.³³¹ One of the questions that the Court of Appeal addressed in *Maclaine Watson v. International Tin Council*³³² was whether in such circumstances the doctrine of non-justiciability survived. It was emphasised that the two concepts of immunity and non-justiciability had to be kept separate and concern was expressed that the *Buttes Gas and Oil* non-justiciability principle could be used to prevent proceedings being brought against states in commercial matters, contrary to the Act.³³³ Further, the English courts are likely to decline to seek to determine an issue where this could be ‘damaging to the public interest in the field of international relations, national security or defence’.³³⁴ Lord Bingham noted in *R v. Jones* that the courts would be ‘very slow to adjudicate upon rights arising out of transactions entered into between sovereign states on the plane of international law’.³³⁵

The issue of justiciability was discussed in *J. H. Rayner (Mincing Lane) Ltd v. Department of Trade and Industry* both by the Court of Appeal³³⁶ and by the House of Lords³³⁷ in the context of the creation of the collapsed International Tin Council by a group of states by a treaty which was unincorporated into English law. Kerr LJ emphasised that the doctrine in this context rested upon the principles that unincorporated treaties do not form part of the law of England and that such international agreements were not contracts which the courts could enforce.³³⁸ However, this did not prevent reference to an unincorporated treaty where it was necessary or convenient,

for example in order to assess the legal nature of the International Tin Council.³³⁹ Lord Oliver in the House of Lords decision, in reaffirming the essence of the doctrine of non-justiciability, noted that it was

axiomatic that municipal courts have not and cannot have the competence to adjudicate upon or to enforce the rights arising out of transactions entered into by independent sovereign states between themselves on the plane of international law.³⁴⁰

However, this did not mean that the court must never look at or construe a treaty. A treaty could be examined as a part of the factual background against which a particular issue has arisen.³⁴¹ It was pointed out that the creation of the International Tin Council by a group of states was a sovereign act and that the adjudication of the rights and obligations between the member states of the Council and the Council itself could only be undertaken on the international plane.³⁴² In other words, the situation appeared to involve not only the *Buttes Gas and Oil* form of non-justiciability concerning transactions involving foreign states, but also non-justiciability on the basis of an unincorporated treaty,³⁴³ a question which crosses the distinction between constitutional and international non-justiciability.

Hoffmann LJ in *Littrell v. United States (No. 2)*³⁴⁴ pointed out in the context of a Status of Forces Agreement (providing for the placement of NATO troops in the United Kingdom) that the courts could look at such agreement to ensure that the foreign troops were here by invitation since the conclusion

of a treaty was as much a fact as any other,³⁴⁵ but this could not be taken to mean that the courts would actually enforce the terms of an unincorporated treaty. Additionally, it would not be open to the courts to determine whether a foreign sovereign state had broken a treaty.³⁴⁶ The basic position is that: ‘Ordinarily speaking, English courts will not rule upon the true meaning and effect of international instruments which apply only at the level of international law.’³⁴⁷ However, the rule is not absolute.³⁴⁸ The courts are willing to look at the terms of an unincorporated treaty in specific situations: first, as noted above, in order to ascertain certain facts such as the existence and terms of, and the parties to, a treaty or where the treaty in question is incorporated into a contract or referred to in domestic legislation and is necessary to a particular decision; and, secondly, where the national courts have to adjudicate upon the interpretation of a particular international treaty in order to determine private rights and obligations under domestic law.³⁴⁹ The latter proposition would operate, for example, with regard to extradition and asylum cases where a view has to be taken with regard to the Geneva Convention Relating to the Status of Refugees 1951 as a result of domestic legislation, the Asylum and Immigration Act 1996.³⁵⁰ In *Ecuador v. Occidental Exploration and Production Company*, the Court of Appeal, while affirming this principle, emphasised that context was always important, so that a treaty intended by its signatories to give rise to rights in favour of private investors capable of enforcement under the treaty in consensual arbitration against one or other of its signatory states in domestic proceedings would fall within this exception and thus be justiciable.³⁵¹ The exception to non-justiciability laid down in the *Campaign for Nuclear Disarmament* and *Occidental* cases was reaffirmed in *AY Bank Ltd v. Bosnia and Herzegovina and Others*,³⁵² where it was held that the right to prove in the liquidation of a

joint venture bank in the United Kingdom (involving the National Bank of Yugoslavia), upon the dissolution of the Federal Republic of Yugoslavia and its National Bank and consequential apportionment among the successor states, arose in domestic law, so that the existence of the Agreement on Succession Issues, signed by the successor states formally apportioning the assets and debts of the Former Yugoslavia, did not render the question non-justiciable.

Further, a treaty may be rendered justiciable where a government or public official expressly states that he or she has taken such treaty into consideration in reaching a decision or justifies the decision in relation to the terms of the treaty.³⁵³

It will thus be seen that the principle of non-justiciability operates across two planes. In the first, it functions as a constitutional principle based on the separation of powers as between the executive and the judiciary. This is founded upon the norm of democratic governance, but also constitutes a recognition that in certain situations only the executive has access to the special information and expertise relevant to the particular circumstances.³⁵⁴ This would cover the allocation of determining authority in certain limited areas, such as resort to the use of force, as well as the reluctance to permit indirect legislation by virtue of the automatic incorporation of treaties. In this area, it is clear that the scope of the non-justiciable prerogative has been narrowing significantly and this simply reflects political changes within society where the mere invocation of, for example, the Crown Prerogative no longer suffices as such to withdraw the matter from the competence of the court to review decisions.

In the second instance, non-justiciability is a reflection of the sovereignty and equality of states, with the consequential requirement in general principle that the courts of one state cannot sit in judgment upon the sovereign acts of another state. This category is also shrinking as the emphasis in the justification for non-justiciability flows towards constitutional concerns. Further, there may be a distinction between an executive act on the international plane and the consequences of this act in domestic law. For example, in *The Freedom and Justice Party v. Secretary of State for Foreign and Commonwealth Affairs*,³⁵⁵ the Court of Appeal noted that while recognition by the Foreign Office of a special mission from abroad was not justiciable, the actual question of the immunity granted was a matter subject to the jurisdiction of the court. This reflects the argument in cases such as the *Campaign for Nuclear Disarmament* and *AY Bank* cases discussed above, where the courts will look at questions which it sees as necessary in order to determine private rights or, in other words, where the apparently non-justiciable element has ‘no foothold in domestic law’³⁵⁶ or ‘no domestic foothold’.³⁵⁷

The precise relationship between non-justiciability and act of state is unclear. On the one hand, the view is taken that the two concepts are separate from each other,³⁵⁸ while on the other, the approach has been expressed that the two are part of the same principle.³⁵⁹ The principle of non-justiciability must exist in an international system founded upon sovereign and formally equal states.³⁶⁰ Having said that, there is no doubt that the extent of the doctrine is open to question. While the courts would regard a question concerning the constitutionality of a foreign government as non-justiciable³⁶¹ and would not as a general rule inquire into the validity of acts done in a sovereign capacity,

such as the constitutionality of foreign laws,³⁶² the latter proposition may be subject to limitation.³⁶³ The House of Lords addressed the question in *Kuwait Airways Corporation v. Iraqi Airways Company*.³⁶⁴ Lord Nicholls noted that in appropriate circumstances it was legitimate for an English court to have regard to the content of international law in deciding whether to recognise a foreign law and it did not flow inevitably from the non-justiciability principle that the judiciary must ignore a breach of international law committed by one state against another ‘where the breach is plain and, indeed, acknowledged’.³⁶⁵ In such cases, the difficulty discussed by Lord Wilberforce in *Buttes Gas and Oil* concerning the lack of judicial or manageable standards by which to deal with a sovereignty dispute between two foreign states did not apply.³⁶⁶ The acceptability of a provision of foreign law had to be judged by contemporary standards and the courts had to give effect to clearly established rules of international law.³⁶⁷ Where foreign legislation was adopted consequential upon a fundamental breach of international law (such as the Iraqi invasion of Kuwait in 1990 and seizure of its assets), enforcement or recognition of such law by the courts would be ‘manifestly contrary to the public policy of English law’. Further, it was emphasised that international law recognised that a national court may decline to give effect to legislative and other acts of foreign states which are in violation of international law.³⁶⁸ Lord Steyn noted that the extension of the public policy exception to recognition of foreign laws from human rights violations to ‘flagrant breaches of international law’ was correct. Reference was made to the UN Charter, binding Security Council resolutions and international opinion in general.³⁶⁹ Lord Hope emphasised that ‘very narrow limits must be placed on any exception to the act of state rule’, but there was no need for restraint on grounds of public policy ‘where it is plain beyond

dispute that a clearly established norm of international law has been violated'.³⁷⁰ He concluded that 'a legislative act by a foreign state which is in flagrant breach of clearly established rules of international law ought not to be recognised by the courts of this country as forming part of the *lex situs* of that state'.³⁷¹

The courts may thus not feel constrained in expressing their views as to foreign sovereign activities where a breach of international law, particularly human rights, is involved³⁷² and may not feel constrained from investigating, in a dispute involving private rights, the legal validity of an act done by a citizen purporting to act on behalf of the sovereign or sovereign state, this being distinct from examining the legal validity of an act of an undisputed sovereign.³⁷³ It is clear that the courts will regard as non-justiciable policy decisions by the government concerning relationships with friendly foreign states, on the basis that foreign policy is pre-eminently an area for the government and not the courts.³⁷⁴ In particular, a number of cases have laid down the proposition that decisions taken by the executive in its dealings with foreign states regarding the protection of British citizens abroad are non-justiciable.³⁷⁵

This approach, however, is subject to some qualification.³⁷⁶ This concerns in particular the evolving law of judicial review³⁷⁷ both with regard to its scope concerning the executive and in terms of 'legitimate expectation',³⁷⁸ or a reasonable expectation that a regular practice will continue. Where diplomatic protection of a national abroad is concerned, the Court of Appeal has noted: 'The Secretary of State must be free to give full weight to foreign policy considerations, which are not justiciable. However, this does not mean

the whole process is immune from judicial scrutiny. The citizen's legitimate expectation is that his request will be "considered", and that in that consideration all relevant factors will be thrown into the balance.'³⁷⁹ Taylor LJ referred, for example, in *Ex parte Everett* to the 'normal expectation of every citizen' that, if he were subjected abroad to a violation of a fundamental right, the British government would not simply wash their hands of the matter and abandon him to his fate.³⁸⁰ The Court in *Abbasi* concluded that judicial review would lie where the Foreign and Commonwealth Office, contrary to its stated policy, refused even to consider whether to make diplomatic representations on behalf of a subject whose fundamental rights were being violated. However, beyond this, no general proposition could be stated, being dependent upon the precise circumstances. In particular, there was no enforceable duty to protect the citizen, only a discretion.³⁸¹ In *R (Al-Rawi) v. Secretary of State for Foreign and Commonwealth Affairs*, the Court of Appeal denied that any such legitimate expectation as to the exercise of discretion would extend to the position of non-nationals.³⁸²

The approach to non-justiciability was further examined by the Supreme Court in *Shergill v. Khaira*.³⁸³ In a judgment by Lords Neuberger, Sumption and Hodge (with which Lords Mance and Clarke agreed), reference was made to the *Buttes Gas and Oil* case,³⁸⁴ where the issue in question was non-justiciable because it was political and it was political for two reasons: first, since it trespassed on the proper province of the executive, as the organ of the state charged with the conduct of foreign relations; and, secondly, because of the absence of judicial or manageable standards. This was because the dispute in question had been resolved by the four states concerned 'by a mixture of diplomacy, political pressure and force' and to deal with the

claimant's argument would involve the Court in 'assessing decisions and acts of sovereign states which had not been governed by law but by power politics'.³⁸⁵ The Supreme Court held that non-justiciable cases generally fell into one of two categories. The first comprised cases where the issue in question was beyond the constitutional competence assigned to the courts under the concept of the separation of powers. Cases in this category were 'rare, and rightly so, for they may result in a denial of justice which could only exceptionally be justified either at common law or under article 6 of the Human Rights Convention'. The paradigm cases would be the non-justiciability of certain transactions of foreign states and of proceedings in Parliament. The distinctive feature of all these cases, it was noted, was that once the 'forbidden area' is identified, the court 'may not adjudicate on the matters within it, even if it was necessary to do so in order to decide some other issue which is itself unquestionably justiciable'.

The second category comprised claims or defences which were based neither on private legal rights or obligations, nor on reviewable matters of public law. Examples here would include: domestic disputes; transactions not intended by the participants to affect their legal relations; and issues of international law which engage no private right of the claimant or reviewable question of public law. Where the court was asked to decide them in the abstract, they might well be non-justiciable. However, they would be justiciable where their resolution was necessary in order to decide some other issue which was in itself justiciable. The best-known examples are in the domain of public law. Where no legal right of the citizen was engaged in public or private law, then the courts would decline to adjudicate, but the court would adjudicate if a justifiable legitimate expectation or European

Human Rights Convention right depended upon it, similarly where a private law liability was asserted which depended on such a matter.³⁸⁶ Also relevant in such issues in particular circumstances might be the question of temporal jurisdiction or time bar questions, where the court may decline to adjudicate on the basis of a procedural time hurdle.³⁸⁷ In addition, while sovereign or state immunity may be waived, the principles of act of state or non-justiciability cannot.³⁸⁸

The issue was thoroughly examined by the Supreme Court in *Belhaj and Rahmatullah (No. 1)*,³⁸⁹ where it was emphasised that whether an issue was or was not non-justiciable had to be considered on a case-by-case basis. It was both fact- and issue-sensitive.³⁹⁰ The key was whether the issue was of a sovereign, international or inter-state nature upon which a domestic court could not or should not appropriately adjudicate; in essence, could a domestic judge deal with the matter or should it be more appropriately dealt with on the international level?³⁹¹ The Court distinguished between private law, ‘traditional’ or ‘municipal’ forms of foreign act of state in respect of legislation, property and other acts within the jurisdiction or sovereignty of the state in question on the one hand, which would be non-justiciable,³⁹² and a different common law doctrine of judicial restraint on the other, which applied to the wider interactions of foreign states on the international stage. The latter doctrine was based both on international comity in the relationships between states and on the domestic constitutional principle of the separation of powers.³⁹³ As Lord Neuberger stated, there are ‘issues which are inappropriate for the courts of the United Kingdom to resolve because they involve a challenge to the lawfulness of the act of a foreign state which is of such a nature that a municipal judge cannot or ought not rule on it. Thus, the

courts of this country will not interpret or question dealings between sovereign states.’³⁹⁴ At the core of such non-justiciability lay the use of armed force by one state against another.³⁹⁵ However, it was agreed that public policy considerations (such as violations of fundamental human rights) were relevant as an exception to non-justiciability or, arguably, as a part of its structure.³⁹⁶ In *Ukraine v. Law Debenture Trust*,³⁹⁷ the Court of Appeal underlined this judgment, noting that Ukraine’s defence of duress in the case constituted acts of high policy by Russia in the sphere of international relations in the exercise of sovereign authority. However, the public policy exception was held to apply for a number of cumulative reasons, including the facts that Russia had chosen to submit to the jurisdiction of the English courts; that this was not a case of the absence of judicial or manageable standards as the English courts were well capable of construing treaty obligations and general obligations of states under international law; that there would be no conflict with the government’s conduct of foreign affairs bearing in mind the UK position with regard to the seizure of Crimea; and, finally, that ‘there is an especially strong public policy in this country that no country should be able to take advantage of its own violation of norms of *ius cogens*’.³⁹⁸

The approach that had been adopted in *Abbasi* was approved in *Kaunda v. President of South Africa* by the Constitutional Court of South Africa, which noted: ‘A decision as to whether, and if so, what protection should be given, is an aspect of foreign policy which is essentially the function of the executive.’³⁹⁹ This did not mean that the South African courts had no jurisdiction to deal with issues concerned with diplomatic protection. Since the exercise of all public power was subject to constitutional control, this

would also apply to an allegation that the government has failed to respond appropriately to a request for diplomatic protection. If, for instance, the decision were to be irrational or made in bad faith, the court could intervene to require the government to deal with the matter properly.⁴⁰⁰

Australian courts also have emphasised the importance of separation of powers and the need for courts to exercise considerable caution with regard to foreign policy, expressly citing the *Buttes Gas and Oil* case.⁴⁰¹ The question of justiciability was one for the federal judicial branch.⁴⁰² It has been noted, for example, that any question of a dispute as to the assessment made by the executive and legislative branches of government of the ‘terrorist threat’ to the safety of the public would not be justiciable, but that this situation would change upon the adoption of relevant legislation.⁴⁰³ In *Habib v. Australia*,⁴⁰⁴ the full court of the Federal Court of Australia decided that the doctrine of non-justiciability or act of state did not prevent consideration of a case concerning an Australian citizen, alleging torture in Pakistan, Egypt and Guantanamo Bay by state officials of the respective states, in view of the serious nature of the alleged human rights abuses.

The US courts have similarly recognised the existence of areas of non-justiciability for sensitive political reasons. This is usually referred to as the ‘political question’ doctrine and operates to prevent the courts from considering issues of political delicacy in the field of foreign affairs.⁴⁰⁵ In *Greenham Women against Cruise Missiles v. Reagan*,⁴⁰⁶ for example, the Court held that a suit to prevent the US deployment of cruise missiles at an air force base in the United Kingdom constituted a non-justiciable political question, not appropriate for judicial resolution.⁴⁰⁷ Similarly, issues relating

to rights of succession to the assets of a foreign state were non-justiciable.⁴⁰⁸ Much will depend upon the particular circumstances of the case. In *Linder v. Portocarrero*,⁴⁰⁹ for instance, concerning the murder of a US citizen working for the Nicaraguan government by rebel forces (the Contras), the US Court of Appeals for the Eleventh Circuit held that the political question doctrine was not implicated since the complaint neither challenged the legitimacy of US policy on Nicaragua nor sought to require the Court to decide who was right and who was wrong in the civil war in that country. The complaint was rather narrowly focused on the lawfulness of the conduct of the defendants in a single incident. In *Koochi v. United States*,⁴¹⁰ the US Court of Appeals for the Ninth Circuit held that the courts were not precluded from reviewing military decisions, whether taken during war or peacetime, which caused injury to US or enemy civilians. The Court in *Baker v. Carr*,⁴¹¹ the leading case on the political question doctrine, while noting that not every case touching foreign relations was non-justiciable, provided a list of six factors that might render a case non-justiciable.⁴¹² The Court of Appeals underlined in *Kadić v. Karadžić*⁴¹³ that ‘judges should not reflexively invoke these doctrines [political question and act of state doctrines] to avoid difficult and somewhat sensitive decisions in the context of human rights’. The fact that judicially discoverable and manageable standards exist would indicate that the issues involved were indeed justiciable.⁴¹⁴ In *Corrie v. Caterpillar*, the US Court of Appeals for the Ninth Circuit reaffirmed that the political question doctrine was a jurisdictional issue and that the *Baker v. Carr* factors precluded justiciability, noting in particular that the provision of military assistance by the United States to foreign states constituted such a political question.⁴¹⁵ Further, in *El-Shifa v. United States*, the DC Court of Appeals, adopting a functional approach distinguishing between claims requiring the courts to

decide whether taking military action was wise (being a policy choice) on the one hand and fully justiciable claims presenting purely legal issues such as whether the government had legal authority to act on the other, held that a suit seeking review of ‘the President’s decision to launch an attack on a foreign target’ presented a non-justiciable political question,⁴¹⁶ while in *Re Nazi Era Cases Against German Defendants Litigation*, the Third Circuit Court of Appeals affirmed dismissal of the case as presenting a non-justiciable political question because adjudication ‘would express a lack of respect for the Executive Branch because of the Executive Branch’s long-standing foreign policy interest that issues relating to World War II and Nazi-era claims be resolved through intergovernmental negotiation’.⁴¹⁷

However, in *Zivotofsky v. Clinton*,⁴¹⁸ the US Supreme Court appeared to narrow the scope of the doctrine by reframing a question apparently questioning the executive’s right to define foreign policy (with regard to Israel’s sovereignty over Jerusalem) into one of statutory interpretation and the constitutionality of the statute in question (permitting US citizens born in Jerusalem to have their birthplace inscribed in a US passport as ‘Jerusalem, Israel’).⁴¹⁹ The first two of the *Baker* factors were specifically noted.⁴²⁰ This approach rejecting justiciability challenges where the key issues can be interpreted as ones of the constitutionality and interpretation of statutes has since been followed by the lower courts.⁴²¹

Also relevant in the context of non-justiciability is the doctrine of act of state as it operates in the United States. The *Third US Restatement of Foreign Relations Law*⁴²² provides that ‘in the absence of a treaty or other unambiguous agreements regarding controlling legal principles, courts in the

United States will generally refrain from examining the validity of a taking by a foreign state of property within its own territory, or from sitting in judgment on other acts of a governmental character done by a foreign state within its own territory and applicable there'.⁴²³ In *Banco Nacional de Cuba v. Sabbatino*,⁴²⁴ the US Supreme Court held that the act of state concept was not a rule of public international law, but related instead to internal constitutional balances.⁴²⁵ It was a rule of judicial self-restraint. The Court declared that the judicial branch would not examine the validity of a taking of property within its own territory by a foreign sovereign government,⁴²⁶ irrespective of the legality in international law of that action.⁴²⁷ This basic approach was supported in a subsequent case,⁴²⁸ whereas in *Alfred Dunhill of London Inc. v. Cuba*,⁴²⁹ the Supreme Court employed sovereign immunity concepts as the reason for not recognising the repudiation of the commercial obligations of a state instrumentality as an act of state. However, it now appears that there is an exception to the strict act of state doctrine where a relevant treaty provision between the parties specifies the standard of compensation to be payable and thus provides 'controlling legal principles'.⁴³⁰

In an important case in 1990, the Supreme Court examined anew the extent of the act of state doctrine. *Kirkpatrick v. Environmental Tectonics*⁴³¹ concerned a claim brought by an unsuccessful bidder on a Nigerian government contract in circumstances where the successful rival had bribed Nigerian officials. The Court unanimously held that the act of state doctrine did not apply since the validity of a foreign sovereign act was not at issue. The Court also made the point that act of state issues only arose when a court 'must decide – that is, when the outcome of the case turns upon – the effect of

official action by a foreign sovereign’.⁴³² While the doctrine clearly meant that a US court had to accept that the acts of foreign sovereigns taken within their jurisdictions were to be deemed valid, this did not extend to cases and controversies that might embarrass foreign governments in situations falling outside this. Act of state was not to be extended.⁴³³ The act of state doctrine was not a doctrine of judicial abstention, but a rule of decision which, where applicable, requires the Court to decide cases by deeming acts of a foreign state to be valid.

Executive Certificates

There is an established practice adopted by the British courts of applying to the executive branch of government for the conclusive ascertainment of certain facts. Examples include the status of a foreign state or government, questions as to whether a state of war is in operation as regards a particular country or as between two foreign states, and whether or not a particular person is entitled to diplomatic status. This means that in such matters of state the courts will consult the government and regard the executive certificate (or Foreign Office certificate as it is sometimes called), which is issued following the request, as conclusive, irrespective of any relevant rules of international law.⁴³⁴ This was firmly acknowledged in *Duff Development Company Ltd v. Kelantan*,⁴³⁵ which concerned the status of the state of Kelantan in the Malay Peninsula and whether it was able to claim immunity in the English courts. The government declared that it was regarded as an independent state and the House of Lords noted that ‘where such a statement is forthcoming, no other evidence is admissible or needed’, and that:

it was not the business of the Court to inquire whether the Colonial Office rightly concluded that the Sultan [of Kelantan] was entitled to be recognised as a sovereign by international law.⁴³⁶

This basic position was reaffirmed in *R v. Secretary of State for Foreign and Commonwealth Affairs, ex parte Trawnik*,⁴³⁷ in which it was held that certificates under section 40(3) of the Crown Proceedings Act 1947 and section 21 of the State Immunity Act 1978 were reviewable in the courts only if they constituted a nullity in that they were not genuine certificates or if, on their face, they had been issued outside the scope of the relevant statutory power. The contents of such certificates were conclusive of the matters contained therein and, in so far as they related to recognition of foreign states, were matters within the realm of the royal prerogative and not subject to judicial review. In *R v. Mohammed Gul*,⁴³⁸ a Foreign Office certificate was provided declaring that the conflicts in Iraq post-28 June 2004 and Afghanistan post-December 2001 constituted non-international armed conflicts. The appellant accepted this as highly persuasive, but maintained that the decision had to be one for a jury. The point was not taken further and the Court took the ‘provisional view that the Certificate was conclusive’, but that the way in which the case had developed did not require any further inquiry. In *Khurts Bat v. Secretary of State for Foreign and Commonwealth Affairs*,⁴³⁹ the Court treated a letter from the Foreign Office that it had not consented to the visit of a Mongolian official (in the context of a German extradition request and the claim that the person in question was on a special mission to the United Kingdom) as binding.⁴⁴⁰

Problems have arisen in the context of the decision of the United Kingdom announced in 1980 not to accord recognition to governments, but rather to treat the question of an unconstitutional change of regimes as one relating to diplomatic relations.⁴⁴¹ In *Somalia v. Woodhouse Drake and Carey (Suisse) SA*,⁴⁴² the Court was faced with a confused situation concerning whether the interim government of Somalia was actually in effective control and the extent to which other factions controlled different areas of the country. The Court noted that in reaching its decision as to whether the interim government was or was not the valid successor to the former legitimate government in the light of the degree of actual control exercised over the country, letters from the Foreign and Commonwealth Office became part of the evidence in the case. In so far as the three letters concerned statements as to what was happening in the country, ‘such letters may not be the best evidence’, but in so far as they dealt with the question as to whether and to what extent the UK government had dealings with the foreign government, such letters ‘will almost certainly be the best and only conclusive evidence of that fact’.⁴⁴³

The US State Department similarly offers ‘suggestions’ on such matters, although they tend to be more extensive than their British counterparts, and include comments upon the issues and occasionally the views of the executive rather than bare facts without legal conclusions.⁴⁴⁴ These are accepted as binding.⁴⁴⁵

⁴⁹ See as to the effect of counter-terrorism and weapons of mass destruction proliferation measures taken by the Security Council, below [Chapter 21](#), p. 1023.

⁵⁰ See e.g. Shany, *Regulating Jurisdictional Relations*; A. Nollkaemper, ‘Internationally Wrongful Acts in Domestic Courts’, 101 *AJIL*, 2007, p. 760; and Nollkaemper, *New Perspectives*. See also Conforti, *International Law*.

⁵¹ For example, the concept of jurisdiction as laid down in the European Convention on Human Rights: see *Al-Skeini v. Secretary of State for Defence* [2007] UKHL 26; 133 ILR, p. 693.

⁵² See e.g. *Jones v. Saudi Arabia* [2006] UKHL 26; 129 ILR, p. 713.

⁵³ See *Al-Jedda v. Secretary of State for Defence* [2007] UKHL 58.

⁵⁴ See e.g. *Brownlie’s Principles*, p. 55.

⁵⁵ See Shany, *Regulating Jurisdictional Relations*, pp. 159 ff. See also UK Arbitration Act 1996, sections 58 and 66; 9 USC § 13 and UNCITRAL Model Law on International Commercial Law, 2006, article 17(H)1. Much will, of course, depend upon the parties and subject-matter in question. See as to the precedential effect of decisions and opinions of the ICJ, below, [Chapter 18](#), p. 969.

⁵⁶ See e.g. *R v. Lyons* [2002] UKHL 44, para. 105, per Lord Millett.

⁵⁷ Note the view expressed in *Oppenheim's International Law*, p. 54, that 'states show considerable flexibility in the procedures whereby they give effect within their territories to the rules of international law . . . while the procedures vary, the result that effect is given within states to the requirements of international law is by and large achieved by all states'.

⁵⁸ See e.g. Morgenstern, 'Judicial Practice'; H. Lauterpacht, 'Is International Law a Part of the Law of England?', **25** *Transactions of the Grotius Society*, 1939, p. 51; J. E. S. Fawcett, *The British Commonwealth in International Law*, London, 1963, chapter 2; *Oppenheim's International Law*, pp. 39–41; and W. Holdsworth, *Essays in Law and History*, Oxford, 1946, p. 260. See also J. Collier, 'Is International Law Really Part of the Law of England?', **38** *ICLQ*, 1989, p. 924; Higgins, *Problems and Process*, chapter 12; R. O'Keefe, 'Customary International Crimes in English Courts', **72** *BYIL*, 2001, p. 293; K. Reece Thomas, 'The Changing Status of International Law in English Domestic Law', **53** *NILR*, 2006, p. 371; S. Fatima, *Using International Law in Domestic Courts*, Oxford, 2005; D. Feldman, 'Monism, Dualism and Constitutional Legitimacy', **20** *Australian YIL*, 1999, p. 105; and C. McLachlan, *Foreign Relations Law*, Cambridge, 2014. See also P. Sales and J. Clement, 'International Law in Domestic Courts: The Developing Framework', *LQR*, 2008, p. 388; *Sanctions, Accountability and Governance in a Globalised World* (ed. J. Farrall and K. Rubenstein), Cambridge, 2014; and S. Fatima, 'The Domestic Application of International Law in British Courts', in *Oxford Handbook of Comparative Foreign Relations Law*, chapter 27.

⁵⁹ See e.g. Upjohn J in *Re Claim by Herbert Wragg & Co. Ltd* [1956] Ch 323, 334; and Lord Cross in *Oppenheimer v. Cattermole* [1976] AC 249, 277; **72** *ILR*, p. 446. See *The Cabinet Manual*, 1st ed., October 2011, p. 26, para. 3.46, which notes: 'Ministers are under an overarching duty to comply with the law, including international law and treaty obligations.' This references the Ministerial Code. However, the October 2015 version of the UK Ministerial Code, setting out standards of conduct expected of ministers, replaced

the previous requirement to ‘comply with the law including international law and treaty obligations’ by the phrase simply to ‘comply with the law’. This occasioned some disquiet. However, the Cabinet Office declared that the new phrase was meant to include international law. See E. Faulkner and M. Everett, House of Commons Briefing Paper, ‘The Ministerial Code and the Independent Adviser on Ministers’ Interests, No. 03750, 21 October 2015. See *R (GCHR) v. Prime Minister* [2018] EWCA Civ 1855, paras. 19 ff. The August 2019 version of the Code retains the 2015 wording. However, in September 2020, the government introduced the Internal Market Bill to amend the UK’s Brexit deal with the EU which, it was said, would violate the withdrawal agreement in a ‘specific and limited way’, www.bbc.co.uk/news/uk-politics-54073836. See also the New Zealand Cabinet Manual, 2017, <https://dpmc.govt.nz/sites/default/files/2017-06/cabinet-manual-2017.pdf>.

Warbrick, ‘Treaties’, **49** *ICLQ*, 2000, p. 944. See also *The Role of Domestic Courts in Treaty Enforcement: A Comparative Study* (ed. D. Sloss), Cambridge, 2014.

114 (1879) 4 PD 129.

115 *Ibid.*, p. 154.

116 See e.g. *Council of Civil Service Unions v. Minister for the Civil Service* [1985] AC 374, 418. See also *Rustomjee v. R* (1876) 2 QBD 69; and *Lonrho Exports v. ECGD* [1996] 4 All ER 673; 108 ILR, pp. 596, 611.

117 See *R v. Secretary of State for Foreign and Commonwealth Affairs, ex parte Rees-Mogg* [1994] 2 WLR 115.

118 [1989] 3 All ER 523, 531; 81 ILR, pp. 671, 684. See also *Lonrho Exports v. ECGD* [1996] 4 All ER 673, 687; 108 ILR, pp. 596, 611.

119 [1989] 3 All ER 523, 544–5; 81 ILR, p. 701. See also *Littrell v. US (No. 2)* [1995] 1 WLR 82; and *Thomas v. Baptiste* [2000] 2 AC 1 (PC) at 23 and 31–3. But see R. Y.

Jennings, 'An International Lawyer Takes Stock', **39 ICLQ**, 1990, pp. 513, 523–6.

120 [1989] 3 All ER 523, 544–5; 81 ILR, p. 701. See further as to the non-justiciability of unincorporated treaties, below, p. 163.

121 [1989] 3 All ER 523, 526; 81 ILR, p. 676. See also *R v. Secretary of State for the Home Department, ex Parte Brind* [1991] 1 AC 696, 747–8; 85 ILR, p. 29; *R v. Lyons* [2002] UKHL 44; 131 ILR, p. 538; and *R (Akarcay) v. Chief Constable of the West Yorkshire Police* [2017] EWHC 159 (Admin), para. 21.

122 [2005] UKHL 71, para. 27. Lord Bingham in *R v. Asfaw* [2008] UKHL 31, para. 29 stated: 'While, therefore, one would expect any government intending to legislate inconsistently with an obligation binding on the UK to make its intention very clear, there can on well known authority be no ground in domestic law for failing to give effect to an enactment in terms unambiguously inconsistent with such an obligation.'

123 *Lonrho Exports v. ECGD* [1996] 4 All ER 673, 688; 108 ILR, pp. 596, 613. See also *GUR Corp. v. Trust Bank of Africa Ltd* [1986] 3 All ER 449, 454, 459 and 466–7; 75 ILR, p. 675; and *Sierra Leone Telecommunications v. Barclays Bank* [1998] 2 All ER 821, 828; 114 ILR, p. 466. See in addition *R v. Lyons* [2003] 1 AC 976, 995 (Lord Hoffmann).

124 Lord Oliver in *J. H. Rayner (Mincing Lane) Ltd v. Department of Trade and Industry* emphasised that the conclusion of an international treaty is a question of fact, thus a treaty may be referred to as part of the factual background against which a particular issue arises, [1989] 3 All ER 523, 545; 81 ILR, pp. 671, 702. See further below, p. 164

125 *Lonrho Exports v. ECGD* [1996] 4 All ER 673, 688; 108 ILR, pp. 596, 613.

126 See e.g. *R v. Secretary of State, on the Application of the Channel Tunnel Group* 119 ILR, pp. 398, 407–8.

127 See Lord Woolf MR in *Ex parte Ahmed and Patel* [1998] INLR 570, 584, relying upon the approach of the High Court of Australia in *Minister of Immigration v. Teoh*, as to which see below, p. 147. Hobhouse LJ in *Ex parte Ahmed and Patel* noted that where the Secretary of State had adopted a specific policy, it was not possible to derive a legitimate expectation from the treaty going beyond the scope of the policy: at 592. Note, as to the

special position of human rights treaties as against other multilateral treaties, e.g. *Matthew v. Trinidad and Tobago State* [2004] UKPC 33; 134 ILR, p. 687.

¹²⁸ [2017] UKSC 5, paras. 50, 51. The European Union (Withdrawal) Act 2018 provided in section 13 that the negotiated withdrawal agreement and the framework for the future relationship would have to be approved by a resolution of the House of Commons on a motion moved by a Minister of the Crown. This was accomplished by the European Union (Withdrawal) Act 2020.

¹²⁹ *Ibid.*, paras. 54, 55.

¹³⁰ See the evidence presented by the Foreign and Commonwealth Office to the Royal Commission on the Reform of the House of Lords, UKMIL, 70 BYIL, 1999, p. 405.

¹³¹ See e.g. S. de Smith and R. Brazier, *Constitutional and Administrative Law*, 6th ed., London, 1989, pp. 140–2; and W. Wade and O. H. Phillips, *Constitutional and Administrative Law*, 9th ed., London, 1977, pp. 303–6. See also *Attorney-General for Canada v. Attorney-General for Ontario* [1937] AC 326, 347; 8 AD, p. 41; *Walker v. Baird* [1892] AC 491; *Italy v. Hambro's Bank* [1950] 1 All ER 430; *Cheney v. Conn* [1968] 1 WLR 242; 41 ILR, p. 421; *Porter v. Freudenberg* [1915] 1 KB 857, 874–80; and McNair, *Law of Treaties*, pp. 89–91.

¹³² See the evidence presented by the Foreign and Commonwealth Office to the Royal Commission on the Reform of the House of Lords, UKMIL, 70 BYIL, 1999, p. 405, citing the examples of extradition and double-taxation treaties.

¹³³ Sinclair and Dickson, 'National Treaty Law', p. 230.

¹³⁴ [2017] UKSC 5, paras. 76 ff. The Court underlined the proposition that 'the consequential loss of a source of law is a fundamental legal change which justifies the conclusion that prerogative powers cannot be invoked to withdraw from the EU treaties', *ibid.*, para. 83.

¹³⁵ See *R (European Roma Rights Centre) v. Immigration Officer at Prague Airport and Another* [2004] UKHL 55, para. 42; 131 ILR, p. 683 (per Lord Steyn).

¹³⁶ See e.g. Fatima, *Using International Law*, pp. 57 ff.

¹³⁷ For example, section 2 of the Asylum and Immigration Appeals Act 1993 provides that nothing in the immigration rules within the Immigration Act 1971 shall lay down any practice contrary to the Refugee Convention.

¹³⁸ See e.g. the International Criminal Court Act 2001.

¹³⁹ It is also the practice to put before Parliament Orders in Council made under the UN Act 1946 in order, for example, to implement UN sanctions internally: see section 1(4) of the Act; and H. Fox and C. Wickremasinghe, 'UK Implementation of UN Economic Sanctions', 42 *ICLQ*, 1993, pp. 945, 959. See also *R v. HM Treasury and the Bank of England, ex parte Centro-Com*, Decision of the Divisional Court, Times Law Reports, 7 October 1993.

¹⁴⁰ See 171 HC Deb., col. 2001, 1 April 1924.

¹⁴¹ UKMIL, 70 *BYIL*, 1999, p. 406. See now section 24 of the Constitutional Reform and Governance Act 2010.

¹⁴² Section 20. This section does not apply to a treaty if a Minister is of the opinion that, exceptionally, the treaty should be ratified without the requirements of that section having been met, unless either House of Parliament has resolved that there be no ratification. There are also certain kinds of treaties which are not covered by these provisions: see e.g. section 23 (treaties providing for increase in European Parliament's powers are not to be ratified unless approved by Act of Parliament); and treaties concluded (under authority given by the UK government) by the government of a British overseas territory, of any of the Channel Islands or of the Isle of Man). See also *Miller v. Secretary of State for Exiting the European Union* [2017] UKSC 5, para. 58.

¹⁴³ See e.g. *Garland v. British Rail Engineering Ltd* [1983] 2 AC 751; 93 ILR, p. 622; and *R v. Secretary of State for the Home Department, ex parte Brind* [1991] 1 AC 696, 748; 85 ILR, p. 29, where this presumption is referred to as 'a mere canon of construction which involves no importation of international law into the domestic field'. See also *Maxwell on the Interpretation of Statutes*, 12th ed., London, 1969, p. 183; *A (FC) and Others (FC) v. Secretary of State for the Home Department* [2005] UKHL 71, para. 27; and *Al-Skeini v. Secretary of State for Defence* [2007] UKHL 26, para. 45; 133 ILR, pp. 715–16 (per Lord Rodger).

¹⁴⁴ *Salomon v. Commissioners of Customs and Excise* [1967] 2 QB 116, 143; *Post Office v. Estuary Radio Ltd* [1968] 2 QB 740; and *Brown v. Whimster* [1976] QB 297. See also *National Smokeless Fuels Ltd v. IRC*, *The Times*, 23 April 1986, p. 36; Lord Oliver in *J. H. Rayner (Mincing Lane) Ltd v. Department of Trade and Industry* [1989] 3 All ER 523, 545; 81 ILR, pp. 671, 702; and *R (Adams) v. Secretary of State for Justice* [2011] UKSC 18, para. 14 (Lord Phillips).

¹⁴⁵ Section 1(4) of the Diplomatic and Consular Premises Act 1987 permits the Secretary of State to change the status of diplomatic and consular premises by giving or withdrawing consent or withdrawing acceptance to such status only ‘if he is satisfied that to do so is permissible under international law’.

¹⁴⁶ Lord Hoffmann noted in *R v. Lyons* [2002] UKHL 44, para. 27, that ‘there is a strong presumption in favour of interpreting English law (whether common law or statute) in a way which does not place the United Kingdom in breach of an international obligation’. See also *Assange v. The Swedish Prosecution Authority* [2012] UKSC 22, para. 10 (Lord Phillips); *Hounga v. Allen* [2014] UKSC 47, para. 50 (Lord Wilson); and *Pham v. Secretary of State for the Home Department* [2015] UKSC 19, para. 77 (Lord Mance), noting: ‘But it is not axiomatic that consistency is either always achievable or what Parliament intended or did achieve’, *ibid.*

¹⁴⁷ *Ellerman Lines v. Murray* [1931] AC 126; 5 AD, p. 342; and *IRC v. Collco Dealings Ltd* [1962] AC 1; 33 ILR, p. 1. See Sinclair, ‘Principles of Treaty Interpretation’; and C. Schreuer, ‘The Interpretation of Treaties by Domestic Courts’, 45 *BYIL*, 1971, p. 255. See also F. A. Mann, *Foreign Affairs in English Courts*, Oxford, 1986, pp. 97–114; R. Gardiner, ‘Treaty Interpretation in the English Courts since *Fothergill v. Monarch Airlines* (1980)’, 44 *ICLQ*, 1995, p. 620; and Fatima, *Using International Law*, pp. 65 ff. The UK Supreme Court emphasised in *HM Treasury v. Ahmed* [2010] UKSC 2, paras. 45 ff., that the principle of legality required that general or ambiguous statutory words should not be interpreted in a manner that infringed fundamental rights.

¹⁴⁸ See above, p. 118.

¹⁴⁹ See e.g. *Blathwayt v. Baron Cawley* [1976] AC 397.

150 See e.g. in the context of the European Convention on Human Rights prior to its incorporation by the Human Rights Act 1998, *R v. Secretary of State for the Home Department, ex parte Bhajan Singh* [1975] 2 All ER 1081; 61 ILR, p. 260; *R v. Chief Immigration Officer, Heathrow Airport, ex parte Salamat Bibi* [1976] 3 All ER 843; 61 ILR, p. 267; *R v. Secretary of State for the Home Department, ex parte Phansopkar* [1976] QB 606; 61 ILR, p. 390; *Waddington v. Miah* [1974] 1 WLR 683; 57 ILR, p. 175; *Cassell v. Broome* [1972] AC 1027; *Malone v. MPC* [1979] Ch 344; 74 ILR, p. 304; *R v. Secretary of State for the Home Department, ex parte Anderson* [1984] 1 All ER 920; *Trawnik v. Ministry of Defence* [1984] 2 All ER 791; and *Ex parte Launder* [1997] 1 WLR 839. In *R v. Secretary of State for the Home Department, ex parte Brind* [1991] 1 AC 696, it was held that subordinate legislation and executive discretion did not fall into this category. See also *Derbyshire County Council v. Times Newspapers Ltd* [1993] AC 534 HL; *Rantzen v. Mirror Group Newspapers (1986) Ltd* [1993] 3 WLR 953 (CA); *Attorney-General v. Associated Newspapers Ltd* [1993] 3 WLR 74; *R v. Secretary of State for the Home Department, ex parte Wynne* [1993] 1 WLR 115; and *R v. Brown* [1993] 2 WLR 556. See also A. Cunningham, 'The European Convention on Human Rights, Customary International Law and the Constitution', **43 ICLQ**, 1994, p. 537.

151 See e.g. *R v. Secretary of State for the Home Department, ex parte Fernandes* [1984] 2 All ER 390.

153 See e.g. *R v. HM Treasury and the Bank of England, ex parte Centro-Com*, Decision of the ECJ, [1994] 1 CMLR 109; [1997] ECR I-81; [1997] 3 WLR 239; 117 ILR, p. 444. See also R. Pavoni, 'UN Sanctions in EU and National Law: The Centro-Com Case', **48 ICLQ**, 1999, p. 582.

154 The UN (International Tribunal) (Former Yugoslavia) Order 1996, SI 1996 No. 716. See for differing approaches to this procedure, C. Warbrick, 'Co-operation with the International Criminal Tribunal for Yugoslavia', **45 ICLQ**, 1996, p. 947; and H. Fox, 'The Objections to Transfer of Criminal Jurisdiction to the Tribunal', **46 ICLQ**, 1997, p. 434.

¹⁵⁵ See e.g. *R (Akarçay) v. Chief Constable of the West Yorkshire Police* [2017] EWHC 159 (Admin), para. 20.

¹⁵⁶ *Ibid.*, para. 22. See also *R v. Reeves Taylor* [2019] UKSC 51, paras. 23 ff. (per Lord Lloyd-Jones) for a thorough discussion by the UK Supreme Court of the meaning and scope of torture in international law as incorporated into English law by section 134 of the Criminal Justice Act 1988.

¹⁵⁷ Lord Slynn stated in *R (Al Fawwaz) v. Governor of Brixton Prison* that ‘to apply to extradition treaties the strict canons appropriate to the construction of domestic statutes would often tend to defeat rather than to serve [their] purpose’: [2001] UKHL 69, para. 39, citing Lord Bridge in *Ex parte Postlethwaite* [1988] AC 924, 947; and *Reyes v. Al-Malki* [2017] UKSC 61, para. 10, where Lord Sumption noted: ‘It is not in dispute that so far as an English statute gives effect to an international treaty, it falls to be interpreted by an English court in accordance with the principles of interpretation applicable to treaties as a matter of international law.’ See also M. Waibel, ‘Principles of Treaty Interpretation: Developed for and Applied by National Courts’, in *The Interpretation of International Law by Domestic Courts* (ed. H. P. Aust and G. Nolte), Oxford, 2016, p. 9.

¹⁵⁸ See *Buchanan v. Babco* [1978] AC 141; and *Fothergill v. Monarch Airlines* [1981] AC 251; 74 ILR, p. 648. Cf. in the latter case the restrictive approach of Lord Wilberforce, [1981] AC 278; 74 ILR, p. 656 with that of Lord Diplock, [1981] AC 283; 74 ILR, pp. 661–2. See also *Goldman v. Thai Airways International Ltd* [1983] 3 All ER 693. Note also that in *Wahda Bank v. Arab Bank plc*, Times Law Reports, 16 December 1992, Phillips J referred to UN sanctions resolutions in examining the question of the applicability of the Order in Council implementing the sanctions internally to the case in question. See further *Re H (Minors)* [1998] AC 72. See also *R (ST) v. Secretary of State for the Home Department* [2012] UKSC 12, para. 30 (Lord Hope). It was also noted that ‘however generous and purposive its approach to interpretation may be, the court’s task remains one of interpreting the document to which the contracting parties have committed themselves by their agreement. As Lord Bingham was at pains to emphasise in the *Roma Rights* case, para. 18, it must interpret what the parties have agreed to’ (para. 31).

¹⁵⁹ [1997] 1 All ER 193, 202.

¹⁶⁰ [1977] UKHL 2. See below, [Chapter 15](#).

161 [1997] 1 All ER 502, 512.

162 [2016] EWHC 212 (QB), para. 39.

163 Section 3(2)(b). Nor that of incompatible subordinate legislation where primary legislation prevents removal of the incompatibility: section 3(2)(c).

164 Section 3(2)(a). See further H. Fenwick, *Civil Liberties and Human Rights*, 3rd ed., London, 2002, p. 139; and R. Clayton and H. Tomlinson, *Human Rights Law*, London, 2000, chapter 4.

165 See e.g. the Decision of the House of Lords in *R v. A* [2001] 2 WLR 1546; and *R (Alconbury Ltd) v. Secretary of State for the Environment, Transport and the Regions* [2001] 2 All ER 929. Note also the issue raised in *HM Treasury v. Ahmed* [2010] UKSC 2 concerning the application of UN sanctions imposed within the UK by Orders in Council under the terms of section 1(1) of the UN Act 1946. Lord Hope emphasised that ‘fundamental rights cannot be overridden by general or ambiguous words’, para. 61.

166 Section 2 of the Human Rights Act.

167 See further below, [Chapter 6](#), p. 292.

168 See e.g. *Nold v. EC Commission* [1974] ECR 491, 508; and *Rutili v. Ministry of Interior of French Republic* [1975] ECR 1219.

171 99 L.Ed.2d 333, 345–7 (1988); 121 ILR, p. 551.

172 175 US 677 (1900). See also *Respublica v. De Longchamps* 1 Dall. 111 (1784).

173 175 US 677, 700. This is only when there is not already a controlling executive or legislative act, *ibid*. See *Hilton v. Guyot* 159 US 113; and *US v. Melekh* 190 F.Supp. 67 (1960); cf. *Pauling v. McElroy* 164 F.Supp. 390 (1958).

174 See e.g. *Cook v. US* 288 US 102 (1933); 6 AD, p. 3; and *US v. Claus* 63 F.Supp. 433 (1944).

175 See *US v. Belmont* 301 US 324, 331 (1937); 57 S.Ct. 758, 761 (1937); 8 AD, p. 34; and *Third US Restatement of Foreign Relations Law*, St Paul, 1987, vol. I, pp. 48–52. See also *Kadić v. Karadžić* 70 F.3d 232, 246 (2nd Cir. 1995); 104 ILR, pp. 149, 159; and *Re Estate of Ferdinand E. Marcos Human Rights Litigation* 978 F.2d 493, 502 (9th Cir. 1992); 103 ILR, pp. 521, 529. However, see C. A. Bradley and J. L. Goldsmith, ‘Customary International Law as Federal Common Law: A Critique of the Modern Position’, **110** *Harvard Law Review*, 1997, p. 816; and J. Paust, ‘Customary International Law in the United States: Clean and Dirty Laundry’, **40** *German YIL*, 1997, p. 78.

176 See e.g. Bradley, *International Law in the US*, chapter 5. See also G. Born, ‘Customary International Law in United States Courts’, **92** *Washington Law Review*, 2017, p. 1641, who concludes that such rules will only be directly applicable in US courts when the federal political branches have expressly or impliedly provided for judicial application of a particular rule.

¹⁷⁷ See e.g. *Schroeder v. Bissell* 5 F.2d 838, 842 (1925).

¹⁷⁸ 859 F.2d 929 (1988).

¹⁷⁹ *Ibid.*, at 939. See also *Tag v. Rogers* 267 F.2d 664, 666 (1959); 28 ILR, p. 467; and *US v. Yunis* (No. 3) 924 F.2d 1086, 1091 (1991); 88 ILR, pp. 176, 181. This position has essentially been reaffirmed in *Sosa v. Alvarez-Machain* 542 US 692, 737–8 (2004); and *Samantar v. Yousuf* 130 S.Ct. 2278 (2010).

¹⁸⁰ See *Brown v. US* 12 US (8 Cranch) 110, 128 (1814); and *Whitney v. Robertson* 124 US 190, 194 (1888). See also Henkin, ‘International Law’, p. 1555. See also *Rodriguez-Fernandez v. Wilkinson* 654 F.2d 1382 (1981); 505 F.Supp. 787 (1980); *US v. PLO* 695 F.Supp. 1456 (1988); and *Klinghoffer v. SNC Achille Lauro* 739 F.Supp. 854 (1990).

¹⁸¹ See *Third US Restatement of Foreign Relations Law*, pp. 63–9 (§ 115); *Reagan* 859 F.2d 929 (1988); and J. M. Goldklang, ‘Back on Board the Paquete Habana’, 25 *Va. JIL*, 1984, p. 143.

¹⁸² See **previous note**.

¹⁸³ *Valdez v. Oklahoma*, Case No. PCD-2001-1011, US Court of Criminal Appeals of Oklahoma, 2002.

¹⁸⁴ See *LaGrand (Germany v. US)*, ICJ Reports, 2001, p. 466; 134 ILR, p. 1; and *Avena (Mexico v. US)*, ICJ Reports, 2004, p. 12; 134 ILR, p. 120.

¹⁸⁵ See e.g. *Torres v. State of Oklahoma* 43 ILM, 2004, p. 1227; and *Sanchez-Llamas v. Oregon* 126 S.Ct. 2669 (2006), holding that a violation of article 36 of the Vienna Convention on Consular Relations did not necessarily require reversal of a criminal conviction or sentence. As to civil remedies, see *US v. Rodriguez* 162 Fed. Appx. 853, 857 (11th Cir. 2006); *Cornejo v. County of San Diego* 504 F.3d 853, 872 (9th Cir. 2007); and *Gandara v. Bennett*, Court of Appeals for the Eleventh Circuit, Judgment of 22 May 2008, holding that the Vienna Convention did not create judicially enforceable individual rights. It was emphasised in *Cornejo* that ‘[f]or any treaty to be susceptible to judicial enforcement it must both confer individual rights and be self-executing’, at p. 856.

186 5 F.2d 838 (1925).

187 *Ibid.*, p. 842. See also *Macleod v. US* 229 US 416 (1913); and *Littlejohn & Co. v. US* 270 US 215 (1926); 3 AD, p. 483.

188 630 F.2d 876 (1980); 77 ILR, p. 169. See e.g. R. B. Lillich, *Invoking Human Rights Law in Domestic Courts*, Charlottesville, 1985; and Comment, ‘Torture as a Tort in Violation of International Law’, **33** *Stanford Law Review*, 1981, p. 353.

189 28 USC 1350 (1988). Also termed the Alien Tort Claims Act.

190 630 F.2d 876, 881 (1980); 77 ILR, pp. 169, 175. See also *Amerada Hess Shipping Corp. v. Argentina* 830 F.2d 421 (1987); 79 ILR, p. 1. The norms of international law were to be found by ‘consulting the works of jurists, writing professedly on public law; or by the general usage and practice of nations; or by judicial decisions recognising and enforcing that law’, 630 F.2d 876, 880 (1980); 77 ILR, p. 174, quoting *US v. Smith* 18 US (5 Wheat.) 153, 160–1. See also *Kadić v. Karadžić* 34 ILM, 1995, p. 1592. Note that Bradley writes that after *Filartiga*, the ‘leading academic view’ was that customary international law had the status in the US of ‘self-executing federal common law’. However, more recently this has been challenged: see *International Law in the US*, pp. 155 ff. His conclusion is that US courts should proceed cautiously in incorporating it into domestic law, *ibid.*, p.167.

191 See e.g. *Fernandez v. Wilkinson* 505 F.Supp. 787 (1980); and *Re Alien Children Education Litigation* 501 F.Supp. 544 (1980).

192 *Siderman de Blake and Others v. Argentina and Others*, No. CV 82-1772-RMT (MCx); and *International Practitioner’s Notebook*, July 1985, p. 1. See also below, [Chapter 12](#).

193 *Tel-Oren v. Libya* 517 F.Supp. 542 (1981), *aff’d per curiam*, 726 F.2d 774 (1984), *cert. denied* 53 USLW 3612 (1985); 77 ILR, p. 192. See e.g. A. D’Amato, ‘What Does *Tel-Oren* Tell Lawyers?’, **79** *AJIL*, 1985, p. 92. See also *De Sanchez v. Banco Central de Nicaragua* 770 F.2d 1385, 1398 (1985); 88 ILR, pp. 75, 90; and *Linder v. Portocarrero* 747 F.Supp. 1452 (1990); 99 ILR, p. 55.

194 34 ILM, 1995, p. 1592.

195 Note that the US Torture Victim Protection Act 1991, 106 Stat. 73 (1992) (codified at 28 USC § 1350 (1994)), provides a cause of action for official torture and extrajudicial killing where an individual, under actual or apparent authority or colour of law of any foreign law subjects, engages in such activities. In *Mohamad v. Palestinian Authority*, the Supreme Court held that the Act only covered natural persons and did not impose liabilities against legal persons or corporations, Slip Opinion 11-88, 566 US 449 (2012). The Act is not a jurisdictional statute, so that claims of official torture will be pursued under the jurisdiction conferred by the Alien Tort Claims Act or under the general federal question jurisdiction of section 1331: see e.g. *Xuncax v. Gramajo* 886 F.Supp. 162 (1995); 104 ILR, p. 165. In addition, local remedies must have been exhausted. See e.g. E. Apostolova, 'The Relationship between the Alien Tort Statute and the Torture Victim Protection Act', **28** *Berkeley Journal of International Law*, 2010, p. 640.

196 542 US 692, 714 ff. (2004). See also *Sarei v. Rio Tinto, plc* 671 F.3d 736, 747 (CA9 2011) (en banc); and *Doe v. Exxon Mobil Corp.* 654 F.3d 11, 20 (CADDC 2011).

197 *Ibid.*, 732.

198 *Ibid.*, 725, 738. See also *Vietnam Association for Victims of Agent Orange v. Dow Chemical Co.*, US Court of Appeals for the Second Circuit, Docket No. 05-1953-cv, Judgment of 22 February 2008.

199 Slip Opinion 10-1491, 569 US (2013).

200 See e.g. Jackson, 'Status of Treaties', p. 310; and D. Vagts, 'The United States and its Treaties: Observance and Breach', **95** *AJIL*, 2001, p. 313. See also Bradley, *International Law in the US*, chapter 2; and The American Law Institute, *Fourth Restatement of the Foreign Relations Law of the United States*, St Paul, 2018, Part III.

201 See e.g. *Ware v. Hylton* 3 US (3 Dall.) 199 (1796); *Foster v. Neilson* 27 US (2 Pet.) 253 (1829); and *US v. Belmont* 301 US 324, 331 (1937). See also on treaty powers and the 'reserved powers' of the states, the tenth amendment, *Missouri v. Holland* 252 US 416 (1920); 1 AD, p. 4; and *US v. Curtiss-Wright Export Corp.* 299 US 304 (1936); 8 AD, p. 48. See also D. Sloss, *The Death of Treaty Supremacy*, Oxford, 2016.

²⁰² See e.g. *US v. Pink* 315 US 203 (1942); 10 AD, p. 48. See, as regards the President's power to settle claims and create new rules of law applicable to pending legislation, *Dames & Moore v. Regan* 101 SC 2972 (1981); 72 ILR, p. 270. See also Bradley, *International Law in the US*, chapter 3. The *Fourth US Restatement of the Foreign Relations Law of the United States* provides in § 301 that: '(1) Treaties made under the authority of the United States are part of the laws of the United States and are supreme over State and local law. (2) Cases arising under treaties fall within the judicial power of the federal courts. (3) Treaties create international legal obligations for the United States, and limitations of the domestic enforceability of treaties do not alter the United States' obligation under international law to comply with relevant treaty provisions.' See also J. Galbraith, 'International Agreements and US Foreign Relations Law: Complexity in Action', in *Oxford Handbook of Comparative Foreign Relations Law*, chapter 9.

²⁰³ See e.g. Y. Iwasawa, 'The Doctrine of Self-Executing Treaties in the United States: A Critical Analysis', **26** *Va. JIL*, 1986, p. 635; J. Paust, 'Self-Executing Treaties', **82** *AJIL*, 1986, p. 760; T. Buergenthal, 'Self-Executing and Non-Self-Executing Treaties in National and International Law', **235** *HR*, 1992 IV, p. 303; and C. M. Vázquez, 'The Four Doctrines of Self-Executing Treaties', **89** *AJIL*, 1995, p. 695. See also The American Law Institute, *Fourth Restatement of the Foreign Relations Law*, § 310, including comments and reporters' notes.

²⁰⁴ See e.g. *Foster v. Neilson* 27 US (2 Pet.) 253, 311 (1829); 7 L.Ed. 415 (1829); *US v. Percheman* 32 US (7 Pet.) 51 (1833); *US v. Postal* 589 F.2d 862, 875 (5th Cir. 1979), *cert. denied*, 444 US 832; and *Linder v. Portocarrero* 747 F.Supp. 1452, 1463 (1990); 99 ILR, pp. 55, 67–8.

²⁰⁵ See Chief Justice Marshall, *Foster v. Neilson* 27 US (2 Pet.) 253, 314 (1829). See also J. C. Yoo, 'Globalism and the Constitution: Treaties, Non-Self-Execution, and the Original Understanding', **99** *Columbia Law Review*, 1999, p. 1955; and Vagts, 'US and its Treaties', p. 321. In *US v. Postal* 589 F.2d 862, 877 (5th Cir. 1979), the court referred *inter alia* to the purposes of the treaty, the existence of domestic procedures, the availability and feasibility of alternative enforcement methods and the consequences of self- or non-self execution.

²⁰⁶ 112 US 580 (1884).

207 38 Cal (2d) 718 (1952).

208 *Ibid.*, p. 721.

209 See e.g. *People of Saipan ex rel. Guerrero v. US Department of Interior* 502 F.2d 90 (1974); 61 ILR, p. 113. See also *Camacho v. Rogers* 199 F.Supp. 155 (1961); and *Diggs v. Dent* 14 ILM, 1975, p. 797. Note also O. Schachter, ‘The Charter and the Constitution’, 4 *Vanderbilt Law Review*, 1951, p. 643. In *Medellín v. Texas* 128 S.Ct. 1346 (2008), the US Supreme Court held that the Decision of the ICJ in *Avena (Mexico v. US)*, ICJ Reports, 2004, p. 12, requiring the US to provide ‘further review and reconsideration’ of the convictions in question, did not constitute directly enforceable federal law as the relevant treaties (the UN Charter, the ICC Statute and the Optional Protocol to the Vienna Convention on Consular Relations) were non-self-executing. See further as to *Avena*, below, [Chapter 12](#), p. 672 and [Chapter 18](#), p. 968, note 343. See also the similar conclusion adopted by the Supreme Court of the Netherlands in *Association of Lawyers for Peace and Four Other Organizations v. State of the Netherlands*, Nr C02/217HR; LJN: AN8071; NJ 2004/329.

210 552 US 491, 508 and 511 (2008).

211 *Ibid.*, 506 n. 3. See also *Bond v. US* 134 S.Ct. 2077 (2014); and *Marshall Islands v. US*, No. 15-15636 (9th Cir. 2017).

212 470 F.2d 461, 466–7 (1972); 60 ILR, pp. 393, 397. See also *Breard v. Greene* 523 US 371, 376 (1998); and *Havana Club Holding, Inc. v. Galleon SA* 974 F.Supp. 302 (SDNY 1997), *aff’d* 203 F.3d (2nd Cir. 2000).

213 This, of course, reflects the general rule. See e.g. G. Hackworth, *Digest of International Law*, Washington, DC, 1940–44, vol. V, pp. 185–6, 324–5. See also *Third US Restatement of Foreign Relations Law*, 1987, para. 115(1)b.

214 See e.g. Marshall CJ, *Murray v. Schooner Charming Betsy* 6 US (2 Cranch) 64; *Weinberger v. Rossi* 456 US 25 (1982); and *Cook v. US* 288 US 102 (1933). See also R. Steinhardt, ‘The Role of International Law as a Canon of Domestic Statutory Construction’, 43 *Vanderbilt Law Review*, 1990, p. 1103; and C. A. Bradley, ‘The *Charming Betsy* Canon and Separation of Powers’, 86 *Georgia Law Journal*, 1998, p. 479.

215 See the Decision of the Supreme Court in *Whitney v. Robertson* 124 US 190 (1888). The *Third US Restatement of Foreign Relations Law*, pp. 63 ff. suggests that an Act of Congress will supersede an earlier rule of international law or a provision in an international agreement ‘if the purpose of the act to supersede the earlier rule or provision is clear or if the act and the earlier rule or provision cannot be fairly reconciled’.

216 695 F.Supp. 1456 (1988).

217 22 USCA, paras. 5201–3.

218 *Ibid.* See the Advisory Opinion of the ICJ in *Applicability of the Obligation to Arbitrate*, ICJ Reports, 1988, p. 12; 82 ILR, p. 225. See also *DUSPIL*, 1981–88, part I, pp. 8 ff.

219 140 L.Ed. 2d 529 (1998); 118 ILR, p. 22. See also S. Breyer, *The Court and the World: American Law and the New Global Realities*, New York, 2015, chapter 9.

220 The issue concerned the Vienna Convention on Consular Relations 1963, and the international court in question was the ICJ in *Paraguay v. US*, ICJ Reports, 1998, p. 248; 118 ILR, p. 1.

221 140 L.Ed.2d 529, 537 (1998); 118 ILR, p. 22.

222 *Ibid.* See above, **note 183**. As to the interpretation of treaties, the US Supreme Court in *Lozano v. Montoya Alvarez* 572 US (2014), pp. 8–15, held, citing *US v. Choctaw Nation* 179 US 494, 535 (1900), that the Court’s ‘duty [i]s to ascertain the intent of the parties’ by looking to the document’s text and context. See also *Abbott v. Abbott* 560 US 1 (2010). The courts will accord ‘great weight’ to the executive’s interpretation of treaties, *ibid.*, 15 and *Medellín v. Texas* 552 US 491, 513 (2008). See also Breyer, *The Court and the World*, chapter 7. The reporters’ notes to § 306 of The American Law Institute, *Fourth Restatement of the Foreign Relations Law*, concludes in para. 13 that the approach of US courts to treaty interpretation has generally been consistent with the principles in the Vienna Convention on the Law of Treaties 1969; see below, [Chapter 15](#), p. 813.

223 See *Eichmann* 36 ILR, p. 5; T. Einhorn, ‘Israel’, in Shelton, *International Law and Domestic Legal Systems*, p. 288; R. Lapidoth, *Les Rapports entre le Droit International*

Public et le Droit Interne en Israel, Paris, 1959; and R. Lapidot, 'International Law Within the Israel Legal System', **24 Israel Law Review**, 1990, p. 251. Residences [1943] SCR 208. See also *R v. Munyaneza* [2009] QJ No. 4913; ILDC 1339 (CA 2009).

²³⁰ See W. J. Hopkins, 'New Zealand', in Shelton, *International Law and Domestic Legal Systems*, p. 429; and e.g. *Marine Steel Ltd v. Government of the Marshall Islands* [1981] 2 NZLR 1; 64 ILR, p. 539; and *Governor of Pitcairn and Associated Islands v. Sutton* [1995] 1 NZLR 426; 104 ILR, p. 508. The courts have also referred to a presumption of statutory interpretation that, so far as wording allows, legislation should be read in a way that is consistent with New Zealand's obligations: see e.g. *Rajan v. Minister of Immigration* [1996] 3 NZLR 543, 551; and *Wellington District Legal Services v. Tangiora* [1998] 1 NZLR 129, 137; 115 ILR, pp. 655, 663. See, as to the use of treaties in statutory interpretation, *Attorney-General v. Zaoui* [2005] NZSC 38; [2006] 1 NZLR 289; (2005) 7 HRNZ 860. See also *Nguyen Tuong Van v. Public Prosecutor* [2004] SGCA 47; 134 ILR, p. 660 with regard to Singapore.

²³¹ See e.g. *Potter v. BHP Co. Ltd* (1906) 3 CLR 479, 495, 506–7 and 510; *Wright v. Cantrell* (1943) 44 SR (NSW) 45; *Polites v. Commonwealth* (1945) 70 CLR 60; and *Chow Hung Ching v. R* (1948) 77 CLR 449. These cases are unclear as to whether the incorporationist or transformation approaches have been adopted as the appropriate theoretical basis. As to the view that international law is the 'source' of domestic law, see Dixon J in *Chow Hung Ching* and Merkel J in *Nulyarimma v. Thompson* (1999) 165 ALR 621, 653–5; 120 ILR, p. 353. See also *Public International Law: An Australian Perspective* (ed. S. Blay, R. Piotrowicz and B. M. Tsamenyi), Oxford, 1997, chapter 5; S. Reye, 'The Place of Customary International Law in Australian Law: Unfinished Business', 21 *Australian YIL*, 2001, p. 39; and A. de Jonge, 'Australia', in Shelton, *International Law and Domestic Legal Systems*, p. 23.

²³² 132 ILR, pp. 407, 442 (emphasis in the original).

²³³ (1995) 128 ALR 353; 104 ILR, p. 466. See also Blay *et al.*, *Public International Law*.

²³⁴ See e.g. judgment by Mason CJ and Deane J, (1995) 128 ALR 353, 361. See also *Dietrich v. The Queen* (1992) 177 CLR 292, 305; and *Coe v. Commonwealth of Australia* (1993) 118 ALR 193, 200–1; 118 ILR, p. 322. Reaffirmed by the High Court in *Kruger v. Commonwealth of Australia* (1997) 146 ALR 126, 161; 118 ILR, p. 371. See e.g. *Kenneth Good v. Attorney-General*, Court of Appeal Civil Appeal No. 028 of 2005 for the similar situation in Botswana. In *Dube v. American Embassy*, ILDC 1347 (BW 2006), the Court in

Botswana noted that the rules of customary international law became part of the law of the land unless they were in conflict with statutes or common law. See also *Nallaratnam Singarasa v. Attorney General*, SC Spl (LA) No. 182/99 (2006) with regard to Sri Lanka.

235 (1995) 128 ALR 353, 362; and see e.g. *Simsek v. Macphee* (1982) 148 CLR 636, 641–2.

236 Judgment of Mason CJ and Deane J. See also *Chung Kheng Lin v. Minister for Immigration* (1992) 176 CLR 1, 38. In *Kruger v. Commonwealth of Australia*, Dawson J noted that such a construction was not required where the obligations arise only under a treaty and the legislation in question was enacted before the treaty, (1997) 146 ALR 126, 161; 118 ILR, p. 371.

237 See also *Kartinyeri v. The Commonwealth* (1998) 195 CLR 337 at 384; and *Ahmed Ali Al-Kateb v. Goodwin* [2004] HCA 37. In the latter case, McHugh J criticised the rule, but concluded that it was too well established to be repealed by judicial decision: *ibid.*, para. 65.

238 (1995) 128 ALR 353, 361. See also *Polites v. Commonwealth* (1945) 70 CLR 60, 68–9, 77, 80–1.

239 [1991] 1 AC 696 at 748; 85 ILR, p. 29.

240 (1995) 128 ALR 353, 362.

241 *Ibid.*, 365. See also the judgment of Toohey J, *ibid.*, at 371–2, and the judgment of Gaudron J, *ibid.*, at 375–6. Cf. the judgment of McHugh J, *ibid.*, at 385–7.

242 Note that after the decision in *Teoh*, the Minister for Foreign Affairs and the Attorney-General issued a Joint Statement (10 May 1995) denying the existence of any such legitimate expectation upon the ratification of a treaty: see M. Allars, ‘One Small Step for Legal Doctrine, One Giant Leap Towards Integrity in Government: *Teoh*’s Case and the Internationalisation of Administrative Law’, 17 *Sydney Law Review*, 1995, pp. 204, 237–41. The government also introduced the Administrative Decisions (Effect of International Instruments) Bill 1995 into the Parliament with the specific purpose of denying that treaties or conventions give rise to a legitimate expectation of how a decision-maker will make a decision in an area affected by such international instruments. See also *Trick or Treaty?*

Commonwealth Power to Make and Implement Treaties, a Report by the Senate Legal and Constitutional References Committee, November 1995. See now also *Minister for Immigration and Multicultural Affairs, ex parte Lam* [2003] HCA 6, which is critical of *Teoh*.

Czaplinski, ‘International Law and Polish Municipal Law – a Case Study’, **8** *Hague Yearbook of International Law*, 1995, p. 31.

²⁹⁶ On 23 June 2016, the UK held a referendum in which the majority voted to leave the EU. On 29 March 2017, the UK made the required notification under article 50 of the Treaty on European Union providing a two-year notice to leave the EU; see www.gov.uk/government/publications/prime-ministers-letter-to-donald-tusk-triggering-article-50 and www.consilium.europa.eu/en/press/press-releases/2017/03/29-euco-50-statement-uk-notification/. The UK withdrew from the EU as from 11.00 pm (UK time) on 31 January 2020; see Withdrawal Agreement, *Official Journal of the European Union*, C

384 I/1, 12.11.2019. As to the EU, see e.g. S. Weatherill, *Cases and Materials on EU Law*, 12th ed., Oxford, 2016; P. Craig and G. de Búrca, *EU Law: Text, Cases and Materials*, 6th ed., Oxford, 2015; *Steiner and Woods EU Law* (ed. L. Woods and P. Watson), Oxford, 2014; L. Collins, *European Community Law in the United Kingdom*, 4th ed., London, 1990; and H. Kovar, 'The Relationship Between Community Law and National Law', in *Thirty Years of Community Law* (Commission of the European Communities), 1981, p. 109.

²⁹⁷ Case No. C-366/10, [2012] 2 CMLR 4, para. 101, citing *Poulsen and Diva Navigation*, Case No. C-286/90, [1992] ECR I-6019, paras. 9, 10; and *Racke v. Hauptzollamt Mainz*, Case No. C-162/96, [1998] ECR I-3655, paras. 45, 46.

²⁹⁸ *Ibid.*, para. 107 (citing *Ahlström Osakeyhtiö and Others v. Commission*, Joined Case Nos. 89/85, 104/85, 114/85, 116/85, 117/85 and 125–129/85, [1988] ECR 5193, paras. 14–18; and *Mondiet v. Armement Ishis*, Case No. C-405/92, [1993] ECR I-6133, paras. 11–16). Note the Advocate General's Opinion in *Yassin Abdullah Kadi and Al Barakaat International Foundation v. Council of the European Union and Commission of the European Communities*, that: 'The application and interpretation of Community law is accordingly guided by the presumption that the Community wants to honour its international commitments. The Community Courts therefore carefully examine the obligations by which the Community is bound on the international stage and take judicial notice of those obligations': Case No. C-402/05 P, 2008, para. 22, citing the cases of *Van Duyn v. Home Office*, Case No. 41/74, [1974] ECR 1337, para. 22; *Poulsen and Diva Navigation*, Case No. C-286/90, [1992] ECR I-6019, paras. 9–11; *Merck Genéricos-Produtos Farmacêuticos*, Case No. C-431/05, [2007] ECR I-07001; *Dior and Others*, Case No. C-300/98, [2000] ECR I-11307, para. 33; *Racke v. Hauptzollamt Mainz*, Case No. C-162/96, [1998] ECR I-3655; and *International Fruit Co. and Others*, Joined Case Nos. 21–24/72, [1972] ECR 1219.

Nicholson, 'The Political Unconscious of the English Foreign Act of State and Non-justiciability Doctrines', 64 *ICLQ*, 2015, p. 743.

306 See e.g. *Oppenheimer v. Cattermole* [1976] AC 249; and *Shergill v. Khaira* [2014] UKSC 33, para. 41. The question of Crown act of state was discussed in *Rahmatullah (No. 2) v. Ministry of Defence* [2017] UKSC 1. This doctrine was defined as a 'prerogative act of policy in the field of international affairs performed by the Crown in the course of its relationship with another state or its subjects', *ibid.*, para. 2 (as cited by Lady Hale). It was unanimously held that this doctrine (not to be confused with foreign act of state or non-

justiciability, as discussed in this section, where the acts of foreign states are in issue and not that, or not only that, of the UK) defeated claims brought by non-UK citizens seeking to sue the government in the English courts in respect of alleged torts committed abroad.

307 See e.g. Wade and Phillips, *Constitutional and Administrative Law*, pp. 299–303; J. B. Moore, *Acts of State in English Law*, New York, 1906; Mann, *Foreign Affairs*, chapter 9; M. Singer, ‘The Act of State Doctrine of the UK’, **75 AJIL**, 1981, p. 283; M. Akehurst, ‘Jurisdiction in International Law’, **46 BYIL**, 1972–3, pp. 145, 240; and M. Zander, ‘The Act of State Doctrine’, **53 AJIL**, 1959, p. 826. Note that judicial acts will not be regarded as acts of state for the purposes of the act of state doctrine: see *Altimo Holdings and Investment Ltd v. Kyrgyz Mobil Tel Ltd* [2012] 1 WLR 1804; *Yukos v. Rosneft* [2012] EWCA Civ 855, paras. 73 ff., 87 ff.; and *Belhaj v. Straw* [2014] EWCA Civ 1394, para. 54.

308 See Lord Pearson, *Nissan v. Attorney-General* [1970] AC 179, 239; 44 ILR, pp. 359, 390.

309 See *Oppenheim’s International Law*, p. 365.

310 See *R v. Bow Street Metropolitan Stipendiary Magistrate, ex parte Pinochet Ugarte (No. 3)* [2000] 1 AC 147 at 269 (per Lord Millett) noting the connection between act of state and certain aspects of sovereign immunity, but noting that ‘state immunity is a creature of international law and operates as a bar to the jurisdiction of the national court, whereas the act of state doctrine is a rule of domestic law which holds the national court incompetent to adjudicate upon the lawfulness of the sovereign acts of a foreign state’. See also *Yukos v. Rosneft* [2012] EWCA Civ 855, paras. 43 ff.; and *Belhaj v. Straw* [2014] EWCA Civ 1394, paras. 48 ff. See further as to sovereign or state immunity and diplomatic immunity, below, [Chapter 12](#).

311 See e.g. *Amalgamated Metal Trading v. Department of Trade and Industry*, *The Times*, 21 March 1989, p. 40. See also *Shergill v. Khaira* [2014] UKSC 33, para. 41.

312 *Ibid.*, para. 42.

313 In the UK, areas traditionally covered by the Crown prerogative: see below, p. 166.

314 See e.g. Lord Hoffmann in *R v. Lyons* [2002] UKHL 44, para. 40; 131 ILR, p. 555; Lord Millett in *R v. Lyons*, para. 105; 131 ILR, p. 575; and Richards J in *Campaign for Nuclear Disarmament* [2002] EWHC 2777 (Admin), para. 60.

315 See *Underhill v. Hernandez* 168 US 250, 252 (1897).

316 See *Nissan v. Attorney-General* [1970] AC 179; and *Buron v. Denman* (1848) 145 ER 450. See also de Smith and Brazier, *Constitutional and Administrative Law*, pp. 145–51; and Mann, *Foreign Affairs*, chapter 10.

317 See *Miller v. Secretary of State for Exiting the European Union* [2017] UKSC 5, 54, referring to the royal prerogative in foreign affairs as including diplomatic relations, deployment of armed forces abroad and the treaty-making power (including terminating or withdrawing from treaties). This is not simply because such powers form part of the Crown's prerogative powers, but also because such powers are discretionary: see *Council of Civil Service Unions v. Minister for the Civil Service* [1984] 3 All ER 935, 956; and Lord Hoffmann in *R v. Jones* [2006] UKHL 16, para. 65; 132 ILR, pp. 695–6. See also Lord Reid in *Chandler v. DPP* [1964] AC 763, 791; Simon Brown LJ, *R v. Ministry of Defence, ex parte Smith* [1996] QB 517, 539; Laws LJ, *Marchiori v. Environment Agency* [2002] EWCA Civ 3, paras. 38, 40; 127 ILR, pp. 642, 643; *R (Campaign for Nuclear Disarmament) v. Prime Minister* [2002] EWHC 2759, paras. 15 (Simon Brown LJ), 50 (Maurice Kay J), 59 (Richards J); 126 ILR, pp. 735, 750, 753; and *R (Abbasi) v. Secretary of State for Foreign and Commonwealth Affairs* [2002] EWCA Civ 1598, para. 106(iii); 126 ILR, p. 725. See also *R (Al-Rabbat) v. Blair and Others* [2017] EWHC 1969 (Admin).

318 See *The Fagernes* [1927] P 311, 324 (per Atkin LJ). See also *Christian v. The Queen* [2006] UKPC 47, paras. 9–10 (Lord Hoffmann) and 33 (Lord Woolf); 130 ILR, pp. 699–700, 707.

319 See e.g. *R (Al-Rawi) v. Secretary of State for Foreign and Commonwealth Affairs* [2006] EWCA Civ 1279, paras. 131 ff. (Laws LJ), and cases cited in note 314 above.

320 [2006] UKHL 16, para. 65; 132 ILR, p. 696. He concluded: ‘The decision to go to war [against Iraq], whether one thinks it was right or wrong, fell squarely within the discretionary powers of the Crown to defend the realm and conduct its foreign affairs . . . The discretionary nature or non-justiciability of the power to make war is in my opinion

simply one of the reasons why aggression is not a crime in domestic law’ (paras. 66, 67, *ibid.*), and see also Lord Mance, para. 103; *ibid.*, pp. 705–6. More cautiously, Lord Bingham noted that ‘there are well established rules that the courts will be very slow to review the exercise of prerogative powers in relation to the conduct of foreign affairs and the deployment of the armed services’ (para. 30, *ibid.*, p. 684). The *Jones* approach was applied by the Court of Appeal in *R (Gentle) v. Prime Minister* [2006] EWCA Civ 1689, para. 33 (Clarke MR); 132 ILR, p. 737, where it was held that the question whether the UK had acted unlawfully in sending troops to Iraq was non-justiciable for two reasons: first, because it would require consideration of at least two international instruments (Security Council resolutions 678 and 1441); and, secondly, because it would require detailed consideration of policy decisions in the fields of foreign affairs and defence ‘which are the exclusive responsibility of the executive government’. In the House of Lords, [2008] UKHL 20, their Lordships essentially focused on the meaning of article 2 of the European Convention on Human Rights, but Lord Bingham referred to the ‘restraint traditionally shown by the courts in ruling on what has been called high policy – peace and war, the making of treaties, the conduct of foreign relations’, *ibid.*, para. 2, while Lord Hope noted: ‘The issue of legality in this area of international law [the use of force by states] belongs to the area of relations between states . . . [and] . . . is a matter of political judgment . . . It is not part of domestic law reviewable here’, *ibid.*, para. 24 (and see para. 26). See also Lady Hale, *ibid.*, para. 58.

321 [2015] UKSC 69, para. 145.

322 [1982] AC 888; 64 ILR, p. 331.

323 [1982] AC 888, 931; 64 ILR, p. 344. See also *Duke of Brunswick v. King of Hanover* (1848) 2 HLC 1. See Fatima, *Using International Law*, pp. 385 ff. Note also *R v. Director of the Serious Fraud Office and BAE Systems* [2008] EWHC 714 (Admin), paras. 74, 160.

324 See *Korea National Insurance Corp. v. Allianz Global Corporate & Speciality AG* [2008] EWCA Civ 1355, para. 32. A distinction needs to be drawn between mild or marginal embarrassment and the disruption of international relations. The former would not be a bar as such to justiciability, but the latter clearly underpinned the doctrine of non-justiciability: see *Yukos v. Rosneft* [2012] EWCA Civ 855, para. 65; and *Belhaj v. Straw* [2014] EWCA Civ 1394, para. 66. See also *Habib v. Australia*, Decision on justiciability, (2010) FCAFC 12; ILDC 1518 (AU 2010), para. 118.

325 [1982] AC 888, 938; 64 ILR, p. 351.

326 See the analysis in *Shergill v. Khaira* [2014] UKSC 33, below p. 170.

327 See e.g. *R v. Secretary of State for Foreign and Commonwealth Affairs, ex parte Pirbhai* 107 ILR, p. 462. But see the *Abbasi* case below, p. 169.

328 *R (Bancoult) v. Secretary of State for Foreign and Commonwealth Affairs* [2013] EWHC 1502 (Admin), para. 153.

329 *A Ltd v. B Bank* 111 ILR, pp. 590, 594–6.

330 So that, e.g., issues related to war crimes were justiciable in the light of the International Criminal Courts Act 2001: see *R v. Jones* [2006] UKHL 16, paras. 4, 28; 132 ILR, pp. 672, 683.

331 See *Empresa Exportadora de Azucar v. Industria Azucarera Nacional SA* [1983] 2 LL. R 171, 194–5; 64 ILR, p. 368. Note the view expressed in *Yukos v. Rosneft* [2012] EWCA Civ 855, paras. 92 ff.; and *Belhaj v. Straw* [2014] EWCA Civ 1394, paras. 54 ff. that there was a commercial exception to the non-justiciability or act of state rule. See further below as to state immunity, [Chapter 12](#).

332 [1988] 3 WLR 1169; 80 ILR, p. 191.

333 [1988] 3 WLR 1169, 1188 per Kerr LJ; 80 ILR, p. 209.

334 *R (Campaign for Nuclear Disarmament) v. Prime Minister* [2002] EWHC 2759, para. 47, cited with approval by the Irish High Court in *Horgan v. An Taoiseach*, Judgment of 28 April 2003, as emphasising ‘the strictly circumspect role which the courts adopt when called upon to exercise jurisdiction in relation to the Executive’s conduct of international relations generally’, 132 ILR, pp. 407, 440.

335 [2006] UKHL 16, para. 30; 132 ILR, p. 684. See also *R (Islamic Human Rights Commission) v. CAA* [2006] EWHC 2465; 132 ILR, p. 707; and *R (Gentle) v. Prime Minister* [2008] UKHL 20, above, p. 161, **note** 320.

336 [1988] 3 WLR 1033; 80 ILR, p. 49.

337 [1989] 3 All ER 523; 81 ILR, p. 671.

338 [1988] 3 WLR 1033, 1075; 80 ILR, pp. 49, 86.

339 [1988] 3 WLR 1033, 1075–6. See also Nourse LJ, *ibid.*, p. 1130; 80 ILR, p. 148.

340 [1989] 3 All ER 523, 544; 81 ILR, pp. 671, 700. See also *R v. Director of the Serious Fraud Office and BAE Systems* [2008] EWHC 714 (Admin), para. 107.

341 [1989] 3 All ER 523, 545; 81 ILR, p. 701. See also *AY Bank Ltd v. Bosnia and Herzegovina and Others* [2005] EWCA Civ 1116; and *Croatia v. Serbia* [2009] EWHC 1559 (Ch), para. 40. Note that in *Kirkpatrick v. Environmental Tectonics* 110 S.Ct. 701, 822 ff. (1990); 88 ILR, p. 93, the US Supreme Court underlined that the act of state doctrine was not a doctrine of judicial abstention, but a rule of decision which, where applicable, requires the court to decide cases by deeming acts of a foreign state to be valid. The Court noted that the doctrine does not apply where the only issue was whether certain official acts of a foreign sovereign had occurred, as opposed to where the Court was asked to inquire into them for the purpose of adjudicating upon their legal validity. This became known as the ‘Kirkpatrick exception’: see *Yukos v. Rosneft* [2012] EWCA Civ 855, paras. 95 ff.; and *Belhaj v. Straw* [2014] EWCA Civ 1394, paras. 54, 89.

342 [1989] 3 All ER 523, 559; 81 ILR, p. 722. See also Ralph Gibson LJ in the Court of Appeal judgment [1988] 3 WLR 1033, 1143–4; 80 ILR, pp. 49, 163.

343 But see *Re McKerr*, where Lord Steyn noted that faced with the narrowness of this decision, a critical re-examination of this area of the law might become necessary in the future in the light of the ‘growing support for the view that human rights treaties enjoy a special status’: [2004] UKHL 12, paras. 51–2.

344 [1995] 1 WLR 82, 93.

345 Similarly, Colman J in *Westland Helicopters Ltd v. Arab Organization for Industrialization* [1995] 2 WLR 126, 149, held that reference to the terms of the treaty establishing an international organisation and to the terms of the basic statute of that

organisation in order to ascertain the governing law of that organisation and its precise nature did not transgress the boundary between what was justiciable and what was non-justiciable.

346 See *British Airways Board v. Laker Airways Ltd* [1985] AC 58, 85–6; *Ex parte Molyneaux* [1986] 1 WLR 331; 87 ILR, p. 329; and *Westland Helicopters Ltd v. Arab Organization for Industrialization* [1995] 2 WLR 126, 136. See also *Minister for Arts, Heritage and Environment v. Peko-Wallsend Ltd* (1987) 75 ALR 218, 250–4; 90 ILR, pp. 32, 51–5, where the Australian Federal Court held that a Cabinet decision involving Australia’s international relations in implementing a treaty was not a justiciable matter; and *Syria v. Egypt* 91 ILR, pp. 288, 305–6, where the Supreme Court of Brazil held that the courts of a third state could not exercise jurisdiction in a matter essentially of state succession between two other states even where the property was within the jurisdiction.

347 *R (Campaign for Nuclear Disarmament) v. Prime Minister* [2002] EWHC 2777 (Admin), paras. 23, 36, 47. See also *R v. Lyons* [2002] 3 WLR 1562; 131 ILR, p. 538.

348 See Lord Oliver in *J. H. Rayner (Mincing Lane) Ltd v. Department of Trade and Industry* [1989] 3 All ER 523, 544. Lord Steyn in *Kuwait Airways Corp. v. Iraqi Airways Co. (Nos. 4 and 5)* [2002] 2 AC 883, 1101 considered that the principle was not ‘a categorical rule’. See also Fatima, *Using International Law*, pp. 273 ff.

349 See e.g. *R (Campaign for Nuclear Disarmament) v. Prime Minister* [2002] EWHC 2777 (Admin), paras. 35–6 (Simon Brown LJ), 61(iii) (Richards J). See also above, **note** 314, p. 161. See also *Belhaj v. Straw* [2014] EWCA Civ 1394, para. 92, noting that ‘when it is necessary to do so for the vindication of justiciable rights, courts in this jurisdiction will be under an obligation to decide issues of public international law’; *R (Abbasi) v. Secretary of State for Foreign and Commonwealth Affairs* [2002] EWCA Civ 1598; *R (Gentle) v. Prime Minister* [2008] 1 AC 1356, para. 8; and *Shergill v. Khaira* [2014] UKSC 33, para. 43.

350 See e.g. *Ex parte Adan* [2000] UKHL 67.

351 [2005] EWCA Civ 1116, paras. 31, 37. Mance LJ went on to say: ‘For the English Court to treat the extent of such rights as non-justiciable would appear to us to involve an extension, rather than an application, of existing doctrines developed in different contexts’,

ibid. See also paras. 39–42. Somewhat confusingly, Mance LJ concluded that the doctrine of non-justiciability could not be ousted by consent, *ibid.*, para. 57.

³⁵² [2006] EWHC 830 (Ch), paras. 51 ff. See also *R v. Director of the Serious Fraud Office and BAE Systems* [2008] EWHC 714 (Admin), paras. 118–20; and *Croatia v. Serbia* [2009] EWHC 1559 (Ch), paras. 27 ff. Note that in this case, Briggs J declared (para. 31) that the *AY Bank* case was also authority for a further exception to the non-justiciability principle, to the effect that even where the English courts will not adjudicate upon the merits of a dispute between foreign states, they may nonetheless grant protective measures so as to preserve the status quo pending the outcome of such disputes.

³⁵³ *R (Corner House Research) v. Serious Fraud Office* (HL(E)) [2009] 1 AC 756, paras. 118–19.

³⁵⁴ See e.g. Lord Hoffmann, *Secretary of State for the Home Department v. Rehman* [2003] 1 AC 153, para. 62; and Laws LJ, *Marchiori v. Environment Agency* [2002] EWCA Civ 3, para. 38. See also *Binyam Mohamed v. Secretary of State for Foreign and Commonwealth Affairs* [2010] EWCA Civ 65; and *R (Noor Khan) v. Secretary of State for Foreign and Commonwealth Affairs* [2014] EWCA Civ 24.

³⁵⁵ [2016] EWHC 2010, para. 57.

³⁵⁶ Simon Brown LJ in *R (Campaign for Nuclear Disarmament) v. Prime Minister* [2002] EWHC 2777 (Admin), para. 40; see also paras. 36, 37, 47(i).

³⁵⁷ See *R (Al-Haq) v. Secretary of State for Foreign and Commonwealth Affairs* [2009] EWHC 1910 (Admin), para. 60. See also *Ukraine v. Law Debenture Trust* [2018] EWCA Civ 2026, paras. 159 ff. Issues of international law may constitute the necessary domestic foothold where implicated by some relevant plea of domestic law, *ibid.*, para. 163; and *Serdar Mohamed v. Ministry of Defence* [2017] UKSC 1, paras. 58, 79.

³⁵⁸ A distinction has been drawn between a narrower doctrine of act of state, which concerns the recognition of acts of a foreign state within its own territory, and a broader principle of non-justiciability in respect of ‘certain sovereign acts’ of a foreign state with effects beyond its own territory: see Mance J in *Kuwait Airways Corp. v. Iraqi Airways Co.* [1999] CLC 31, 56; 116 ILR, pp. 534, 568, basing himself upon Lord Wilberforce in *Buttes Gas and Oil v. Hammer (No. 3)* [1982] AC 888, 930–2; 64 ILR, p. 331. Mance J’s analysis

was approved by Lord Lloyd in *R v. Bow Street Metropolitan Stipendiary Magistrate, ex parte Pinochet (No. 1)* [2000] 1 AC 61, 102; 119 ILR, pp. 51, 91. See also *Shergill v. Khaira* [2014] UKSC 33, para. 41; *Rahmattullah v. Ministry of Defence* [2014] EWHC 3846 (QB), paras. 120, 123; *Serdar Mohammed v. Ministry of Defence* [2015] EWCA Civ 843, paras. 318, 320, 339 ff.; and *Belhaj v. Straw* [2014] EWCA Civ 1394, para. 129.

359 See e.g. *Yukos v. Rosneft* [2012] EWCA Civ 855, paras. 40 ff., 66, particularly noting that non-justiciability was ‘not so much a *separate* principle’ from act of state but rather a ‘more *general and fundamental* principle’, para. 48 (emphasis in the original). See further *Yukos v. Rosneft (No. 2)* [2014] QB 458; and *Belhaj v. Straw* [2014] EWCA Civ 1394, paras. 53–5, 67. See also *Serdar Mohammed v. Ministry of Defence* [2015] EWCA Civ 843, para. 318.

360 See e.g. the Decision of the Belgian Conseil d’État in *T v. Belgium* on 9 April 1998 that the process of declaring a foreign diplomat persona non grata was not justiciable both because the request from the receiving state was a matter between states and because it was the sending state that had to recall the person in question or terminate his functions and the Conseil d’État had no jurisdiction over an act emanating from a foreign state: 115 ILR, p. 442.

361 See e.g. *Ex parte Turkish Cypriot Association* 112 ILR, p. 735.

362 See *Buck v. Attorney-General* [1965] 1 Ch 745; 42 ILR, p. 11.

363 See *Yukos v. Rosneft* [2012] EWCA Civ 855, paras. 68 ff. Note that in this case Rix LJ stated that where a foreign court has acted in a way which is an abuse of its own responsibilities as a court of law: ‘the courts of this country are not obliged to give effect to the potential jurisdiction or past acts of such a court, provided that the failings of the foreign court are sufficiently cogently brought home to the English court. We consider that this is the teaching of the Privy Council in *AK Investment v. Kyrgyz Mobil* [2011] 4 All ER 1027, paras. 73, 87. See also *Berezovsky v. Abramovich* [2011] EWCA Civ 153, paras. 93 ff.

364 Decision of 16 May 2002: [2002] UKHL 19; 125 ILR, p. 677.

365 *Ibid.*, para. 26.

³⁶⁶ See above, p. 163.

³⁶⁷ [2002] UKHL 19, para. 28. See also *Blathwayt v. Baron Cawley* [1976] AC 397, 426; and *Oppenheimer v. Cattermole* [1976] AC 249, 278.

³⁶⁸ [2002] UKHL 19, para. 29. See also *Oppenheim's International Law*, pp. 371 ff.

³⁶⁹ [2002] UKHL 19, para. 114.

³⁷⁰ *Ibid.*, paras. 138–40.

³⁷¹ *Ibid.*, para. 148. See also Lord Scott, *ibid.*, para. 192.

³⁷² See e.g. *R (Abbasi) v. Secretary of State for Foreign and Commonwealth Affairs* [2002] EWCA Civ 1598, paras. 57, 66 (per Lord Phillips MR); 126 ILR, pp. 710, 713. See also *Secretary of State for Foreign and Commonwealth Affairs v. Rahmatullah* [2012] UKSC 48. See views expressed in *Belhaj and Rahmatullah (No. 1) v. Ministry of Defence* [2017] UKSC 3.

³⁷³ See e.g. *Dubai Bank v. Galadari* [1990] 1 WLR 731. See also *Belhaj v. Straw* [2014] EWCA Civ 1394, para. 89, where the Court of Appeal noted that ‘the act of state doctrine would not impose any constraints upon such an investigation or examination by our courts in circumstances where the validity, legality, lawfulness or effectiveness of an act of a foreign state or its agents is not directly in issue in the proceedings’, citing *Kirkpatrick v. Environmental Tectonics* 110 S.Ct. 701, 822 ff. (1990).

³⁷⁴ See *Ex parte Everett* [1989] 1 QB 811; 84 ILR, p. 713; *Ex parte Ferhut Butt* 116 ILR, pp. 607, 620–1; and *Foday Saybana Sankoh* 119 ILR, pp. 389, 396. See further above, p. 161. In *Belhaj and Rahmatullah (No. 1) v. Ministry of Defence* [2017] UKSC 3, however, there are indications that certain of the Supreme Court justices seemed to regard foreign act of state as the overriding category with non-justiciability referring to a sub-category, that is the rule of judicial restraint concerning the acts of foreign states outside their own territory: *ibid.*, 40 (Lord Mance) and 123 (Lord Neuberger).

³⁷⁵ See e.g. *Council of Civil Service Unions v. Minister for the Civil Service* [1985] 1 AC 374, 411 (per Lord Diplock); *R v. Secretary of State for Foreign and Commonwealth*

Affairs, ex parte Pirbhai 107 ILR, pp. 462, 479; *Ex parte Ferhut Butt* 116 ILR, pp. 607, 615, 622; and *R (Suresh and Manickavasagam) v. Secretary of State for the Home Department* [2001] EWHC Admin 1028, para. 19; 123 ILR, p. 598.

376 See Lord Phillips MR in *R (Abbasi) v. Secretary of State for Foreign and Commonwealth Affairs* [2002] EWCA Civ 1598, paras. 80 ff.; 126 ILR, p. 718. See also *Secretary of State for Foreign and Commonwealth Affairs v. Rahmatullah* [2012] UKSC 48.

377 See e.g. S. A. De Smith, H. Woolf and J. Jowell, *Judicial Review*, 5th ed., London, 1998, pp. 419 ff.

378 See *Secretary of State for the Foreign and Commonwealth Office v. The Queen (on the application of Bancoult)* [2007] EWCA Civ 498, paras. 72 ff.

379 Per Lord Phillips MR in *R (Abbasi) v. Secretary of State for Foreign and Commonwealth Affairs* [2002] EWCA Civ 1598, para. 99.

380 [1989] 1 QB 811, paras. 96–8.

381 [2002] EWCA Civ 1598, paras. 104–7. The Court concluded that this discretion was a very wide one, but there was no reason why the decision or inaction of the Foreign Office should not be reviewable if it can be shown that the same is irrational or contrary to legitimate expectation. However, the Court could not enter into the forbidden areas, including decisions affecting foreign policy: *ibid.*, para. 106(iii). See also *R v. Director of the Serious Fraud Office and BAE Systems* [2008] EWHC 714 (Admin), para. 56.

382 [2006] EWCA Civ 1279, para. 89. Note, however, that in *Ramadan Bashir v. Sovereign Base Authority* [2016] EWHC 954 (Admin), Foskett J held that while the Refugee Convention 1951 did not apply as a matter of international law to the British Sovereign Bases on the island of Cyprus, the UK government acting in its own right and through the Sovereign Base Authority had adopted a policy of treating the claimants as refugees and acting within the spirit of the Convention with regard to them and that as a matter of domestic public law, the adoption of this policy required the Secretary of State when making any decision concerning the claimants to have regard to the spirit of the Convention obligations.

383 [2014] UKSC 33, paras. 37 ff. See also *Ukraine v. Law Debenture Trust* [2018] EWCA Civ 2026, paras. 154 ff.

384 See above, p. 168.

385 [2014] UKSC 33, para. 40.

386 *Ibid.*, paras. 42–3, citing *R (Campaign for Nuclear Disarmament) v. Prime Minister* [2002] EWHC 2777 (Admin); *R (Al-Haq) v. Secretary of State for Foreign and Commonwealth Affairs* [2009] EWHC 1910 (Admin); *R (Abbasi) v. Secretary of State for Foreign and Commonwealth Affairs* [2003] UKHRR 76; and *R (Gentle) v. Prime Minister* [2008] 1 AC 1356. These comments were cited by the Court of Appeal in *Serdar Mohammed v. Secretary of State for Defence* [2015] EWCA Civ 843, para. 320. See also the discussion in *States of Guernsey and Another v. Secretary of State for Environment, Food and Rural Affairs* [2016] EWHC 1847 (Admin), paras. 67 ff.

387 See here *Keyu v. Secretary of State for Foreign and Commonwealth Affairs* [2015] UKSC 69; and *Ministry of Defence v. Iraqi Civilians* [2016] UKSC 25.

388 See *High Commissioner of Pakistan v. Jah* [2016] EWHC 1465 (Ch), para. 89. See further on state immunity, [Chapter 12](#).

389 [2017] UKSC 3. See also *Ukraine v. Law Debenture Trust* [2018] EWCA Civ 2026, paras. 169 ff.

390 *Ibid.*, paras. 11(iv)(c), 90 (Lord Mance).

391 *Ibid.*, paras. 101, 107(v) (Lord Mance). Lord Sumption noted that an English court had to ask whether the matter was one that could properly be resolved by reference to domestic law: para. 239.

392 *Ibid.*, paras. 11(iii)(a)–(c), 11(iv) (Lord Mance), 159 (Lord Neuberger). It was accepted, however, on the existing case-law that this was subject to an exception where foreign legislation was inconsistent with fundamental principles of public policy: see para. 153 (Lord Neuberger) citing *Oppenheimer v. Cattermole and Kuwait Airways Corp. v. Iraqi Airways Co.*

393 *Ibid.*, paras. 89 ff. (Lord Mance), 147 (Lord Neuberger), 234 ff. (Lord Sumption). It was accepted that this principle (termed ‘foreign act of state’) was one of judicial restraint: *ibid.*, paras. 40 ff. (Lord Mance), 146, 151 (Lord Neuberger), 234 ff. (Lord Sumption).

394 *Ibid.*, para. 123.

395 *Ibid.*, paras. 107(iii) (Lord Mance), 234 (Lord Sumption).

396 *Ibid.*, paras. 155 ff. (Lord Neuberger), 249 ff. (Lord Sumption); cf. para. 11(iv)(c) (Lord Mance). Note that the Court of Appeal had regarded it as ‘established that the doctrine [of act of state] may be disapplied on grounds of public policy where there is a violation of international law or a grave infringement of fundamental human rights’, [2014] EWCA Civ 1394, para. 81.

397 [2018] EWCA Civ 2026, para. 173.

398 *Ibid.*, paras. 175–80.

399 CCT 23/04, [2004] ZACC 5, para. 77 (per Chief Justice Chaskalson). See also *Swissborough Diamond Mines v. South Africa*, Supreme Court, Transvaal Provincial Division, 1997, 132 ILR, p. 454; and the Decision of the German Federal Constitutional Court in *Hess*, where it was held that ‘the Federal Government enjoys wide discretion in deciding the question of whether and in what manner to grant protection against foreign States’, BVerfGE 55, 349; 90 ILR 386, 395.

400 CCT 23/04, [2004] ZACC 5, paras. 78–80.

401 See the Decision of the High Court of Australia in *Thorpe v. Commonwealth of Australia* (No. 3) (1997) 144 ALR 677, 690–1; 118 ILR, p. 353; *Re Ditfort* (1988) 19 FCR 347, 369; 87 ILR, p. 170; *Petrotimor Companhia de Petroleos SARL v. Commonwealth of Australia* [2003] FCAFC 3; and *Victoria Leasing Ltd v. US* (2005) 218 ALR 640. See also McLachlan, *Foreign Relations Law*, p. 533; G. Lindell, ‘The Justiciability of Political Questions: Recent Developments’, in *Australian Constitutional Perspectives* (ed. H. P. Lee and G. Winterton), Sydney, 1992, p. 180; and R. Garnett, ‘Foreign States in Australian Courts’, *Melbourne University Law Review*, 2005, p. 704.

402 *Wilson v. Minister for Aboriginal and Torres Strait Islander Affairs* [1996] HCA 18; (1996) 189 CLR 1, 11.

403 *Thomas v. Mowbray* [2007] HCA 33, para. 107.

404 Decision on justiciability, (2010) FCAFC 12; ILDC 1518 (AU 2010). See e.g. B. Batros and P. Webb, ‘Accountability for Torture Abroad and the Limits of the Act of State Doctrine: Comments on *Habib v Commonwealth of Australia*’, **8** *Journal of International Criminal Justice*, 2010, p. 1153.

405 See e.g. *Underhill v. Hernandez* 168 US 250 (1897); *Baker v. Carr* 369 US 181 (1962); and *American Insurance Association v. Garamendi*, US Court of Appeals for the Ninth Circuit, 23 June 2003. 406 591 F.Supp. 1332 (1984); 99 ILR, p. 44.

407 But see *Japan Whaling Association v. American Cetacean Society* 478 US 221 (1986), where the Supreme Court held that the judicial interpretation of a US statute, even if it involved foreign relations, was not a political question precluding justiciability. See also *Dellums v. Bush* 752 F.Supp. 1141 (1990).

408 See e.g. *Can and Others v. US* 14 F.3d 160 (1994); 107 ILR, p. 255.

409 963 F.2d 332, 337 (1992); 99 ILR, pp. 54, 79.

410 976 F.2d 1328, 1331–2 (1992); 99 ILR, pp. 80, 84–5.

411 369 US 186, 211 (1962).

412 That there should be (1) a textually demonstrable constitutional commitment of the issue to a coordinate political department; or (2) a lack of judicially discoverable and

manageable standards for resolving it; or (3) the impossibility of deciding without an initial policy determination of a kind clearly for non-judicial discretion; or (4) the impossibility of a court's undertaking independent resolution without expressing lack of respect due coordinate branches of government; or (5) an unusual need for unquestioning adherence to a political decision already made; or (6) the potentiality of embarrassment of multifarious pronouncements by various departments on one question: *Baker v. Carr* 369 US 181, 217 (1962). See also *Schneider v. Kissinger* 412 F.3d 190 (DC Cir. 2005); *Bancoult v. McNamara* 445 F.3d 427 (DC Cir. 2006); *Gonzalez-Vera v. Kissinger* 449 F.3d 1260 (2006).

415 503 F.3d 974 CA 9 (Wash.), 2007.

416 607 F.3d 836, 844 (DC Cir. 2010) (en banc). See also *Ali Jaber v. US*, No. 16-5093, 2017.

417 196 Fed. Appx. 93, 98 (3rd Cir. 2006).

418 132 S.Ct. 1421, 1425 (2012).

419 Foreign Relations Authorization Act, Fiscal Year 2003, 116 Stat. 1350.

420 See above, **note** 412, p. 174.

421 See e.g. *Kaplan v. Central Bank of Islamic Republic of Iran* 961 F.Supp.2d 185, 191–3 (DDC 2013).

422 1987, para. 443, pp. 366–7. See also e.g. J. Harrison, 'The American Act of State Doctrine', 47 *Georgetown Journal of International Law*, 2016, p. 507.

423 This doctrine is subject to modification by act of Congress: *Third US Restatement of Foreign Relations Law*, para. 444.

424 376 US 398 (1964); 35 ILR, p. 2.

425 376 US 398, 427–8 (1964); 35 ILR, p. 37. In *US v. Noriega* 746 F.Supp. 1506, 1521–3 (1990); 99 ILR, pp. 143, 163–5, the US District Court noted that the act of state doctrine was a function of the separation of powers, since it precluded judicial examination of the acts of foreign governments which might otherwise hinder the executive’s conduct of foreign relations.

426 376 US 398 (1964); 35 ILR, p. 2.

427 This approach was reversed by Congress in the Hickenlooper Amendment to the Foreign Assistance Act of 1964, Pub. L No. 86–663, para. 301(d)(4), 78 Stat. 1013 (1964), 79 Stat. 653, 659, as amended 22 USC, para. 23470(e)(2), (1982). Note that in *Williams & Humbert Ltd v. W & H Trade Marks (Jersey) Ltd* [1986] 1 All ER 129; 75 ILR, p. 312, the House of Lords held that an English court would recognise a foreign law effecting compulsory acquisition and any change of title to property which came under the control of the foreign state as a result and would accept and enforce the consequences of that compulsory acquisition without considering its merits.

428 *First National City Bank v. Banco Nacional de Cuba* 406 US 759 (1972); 66 ILR, p. 102.

429 96 S.Ct. 1854 (1976); 66 ILR, p. 212. See also M. Halberstam, ‘Sabbatino Resurrected’, 79 *AJIL*, 1985, p. 68.

430 See *Kalamazoo Spice Extraction Co. v. Provisional Military Government of Socialist Ethiopia* 729 F.2d 422 (1984). See also *AIG v. Iran* 493 F.Supp. 522 (1980); 4 Iran–US CTR 96; and Justice Harlan in *Sabbatino*, 376 US 398, 428 (1964); 35 ILR, pp. 25, 37. Note also *McKesson Corp. v. Iran* 672 F.3d 1066 (DDC 2012).

431 110 S.Ct. 701 (1990); 88 ILR, p. 93.

432 110 S.Ct. 701, 705 (1990) (emphasis in the original).

433 See also *Fourth US Restatement of Foreign Relations Law*, § 441, pp. 303 ff.; *Bandes v. Harlow & Jones*, 82 *AJIL*, 1988, p. 820, where the Court of Appeals held that the act of

state doctrine was inapplicable to takings by a foreign state of property located outside its territory; and *First American Corp. v. Al-Nahyan* 948 F.Supp. 1107 (1996). Note that the party claiming the application of the doctrine bears the burden of proving its applicability: see *Daventree Ltd v. Azerbaijan* 349 F.Supp.2d 736, 754 (SDNY 2004).

⁴³⁴ See e.g. *Oppenheim's International Law*, pp. 1046 ff.

⁴³⁵ [1924] AC 797; 2 AD, p. 124. See also *The Fagernes* [1927] P 311; 3 AD, p. 126; and *Post Office v. Estuary Radio Ltd* [1968] 2 QB 740; 43 ILR, p. 114. But cf. *Hesperides Hotels v. Aegean Turkish Holidays* [1978] QB 205; [1978] 1 All ER 277; 73 ILR, p. 9.

⁴³⁶ Note that under section 7, Diplomatic Privileges Act 1964 and section 21, State Immunity Act 1978, such certificates are 'conclusive evidence' as to issues of diplomatic and state immunity. ⁴³⁹ [2011] EWHC 2029 (Admin).

⁴⁴⁰ At that time there was no formal procedure for the reception of special missions. In a written ministerial statement made on 4 March 2013, the then Foreign Secretary announced a new pilot process so that the government's consent to a special mission could be addressed expressly before the mission arrives in the UK. Embassies and High Commissions in London were to be invited to inform the Foreign Office of forthcoming visits in cases where they wished to seek the government's express consent as a special mission. It was noted that any legal consequences would ultimately be a matter for the courts:

5

The Subjects of International Law

Legal Personality – Introduction

In any legal system, certain entities, whether they be individuals or companies, will be regarded as possessing rights and duties enforceable at law.¹ Thus, an individual may prosecute or be prosecuted for assault and a company can sue for breach of contract. They are able to do this because the law recognises them as ‘legal persons’ possessing the capacity to have and to maintain certain rights, and being subject to perform specific duties. Just which persons will be entitled to what rights in what circumstances will depend upon the scope and character of the law. But it is the function of the law to apportion such rights and duties to such entities as it sees fit. Legal personality is crucial. Without it institutions and groups cannot operate, for they need to be able to maintain and enforce claims. In municipal law individuals, limited companies and public corporations are recognised as each possessing a distinct legal personality, the terms of which are circumscribed by the relevant legislation.² It is the law which will determine the scope and nature of personality. Personality involves the examination of certain concepts within the law such as status, capacity and competence, as well as the nature and extent of particular rights and duties. The status of a particular entity may well be determinative of certain powers and obligations, while capacity will link together the status of a person with particular rights

and duties. The whole process operates within the confines of the relevant legal system, which circumscribes personality, its nature and definition. This is especially true in international law. A particular view adopted of the system will invariably reflect upon the question of the identity and nature of international legal persons.³

Personality in international law necessitates the consideration of the interrelationship between rights and duties afforded under the international system and capacity to enforce claims. One needs to have close regard to the rules of international law in order to determine the precise nature of the capacity of the entity in question. Certain preliminary issues need to be faced. Does the personality of a particular claimant, for instance, depend upon its possession of the capacity to enforce rights? Indeed, is there any test of the nature of enforcement, or can even the most restrictive form of operation on the international scene be sufficient? One view suggests, for example, that while the quality of responsibility for violation of a rule usually co-exists with the quality of being able to enforce a complaint against a breach in any legal person, it would be useful to consider those possessing one of these qualities as indeed having juridical personality.⁴ Other writers, on the other hand, emphasise the crucial role played by the element of enforceability of rights within the international system.⁵

However, a range of factors needs to be carefully examined before it can be determined whether an entity has international personality and, if so, what rights, duties and competences apply in the particular case. Personality is a relative phenomenon varying with the circumstances. One of the distinguishing characteristics of contemporary international law has been the

wide range of participants. These include states, international organisations, regional organisations, non-governmental organisations, public companies, private companies and individuals. To these may be added groups engaging in international terrorism. Not all such entities will constitute legal persons, although they may act with some degree of influence upon the international plane. International personality is participation plus some form of community acceptance. The latter element will be dependent upon many different factors, including the type of personality under question. It may be manifested in many forms and may in certain cases be inferred from practice. It will also reflect a need. Particular branches of international law here are playing a crucial role. Human rights law, the law relating to armed conflicts and international economic law are especially important in generating and reflecting increased participation and personality in international law. Groups, entities of various kinds, international organisations, multinational corporations and individuals not constituting states are often referred to as non-state actors, a term which brings together a large and increasing collection of those affecting or affected by international law in a manner which perhaps does not fully recognise the many differences between such persons.⁶ It is, indeed, a characteristic of the modern international legal system that a wide range of participants act on the international scene and therefore have an impact upon the development and content of international law.

States

Despite the increasing range of actors and participants in the international legal system, states remain by far the most important legal persons and,

despite the rise of globalisation and all that this entails, states retain their attraction as the primary focus for the social activity of humankind and thus for international law.

Lauterpacht observed that ‘the orthodox positivist doctrine has been explicit in the affirmation that only states are subjects of international law’.⁷

However, it is less clear that in practice this position was maintained. The Holy See (particularly from 1871 to 1929), insurgents and belligerents, international organisations, chartered companies and various territorial entities such as the League of Cities were all at one time or another treated as possessing the capacity to become international persons.⁸

Creation of Statehood⁹

The relationship in this area between factual and legal criteria is a crucial shifting one. Whether the birth of a new state is primarily a question of fact or law and how the interaction between the criteria of effectiveness and other relevant legal principles may be reconciled are questions of considerable complexity and significance. Since *terrae nullius* are no longer apparent,¹⁰ the creation of new states in the future, once the decolonisation process is at an end, can only be accomplished as a result of the diminution or disappearance of existing states, and the need for careful regulation thus arises. Recent events such as the break-up of the Soviet Union, the Socialist Federal Republic of Yugoslavia (SFRY) and Czechoslovakia underline this. In addition, the decolonisation movement has stimulated a re-examination of the traditional criteria. Article 1 of the Montevideo Convention on Rights and Duties of States 1933¹¹ lays down the most widely accepted formulation of the criteria of statehood in international law. It notes that the state as an international person should possess the following qualifications: ‘(a) a permanent population; (b) a defined territory; (c) government; and (d) capacity to enter into relations with other states’.

The Arbitration Commission of the European Conference on Yugoslavia¹² in Opinion No. 1 declared that ‘the state is commonly defined as a community which consists of a territory and a population subject to an organised political authority’ and that ‘such a state is characterised by sovereignty’. It was also noted that the form of internal political organisation and constitutional provisions constituted ‘mere facts’, although it was necessary to take them

into account in order to determine the government's sway over the population and the territory.¹³

Such provisions are neither exhaustive nor immutable. As will be seen below, other factors may be relevant, including self-determination and recognition, while the relative weight given to such criteria in particular situations may very well vary. What is clear, however, is that the relevant framework revolves essentially around territorial effectiveness.¹⁴

The existence of a permanent population¹⁵ is naturally required and there is no specification of a minimum number of inhabitants, as examples such as Nauru and Tuvalu¹⁶ demonstrate. However, one of the issues raised by the Falkland Islands conflict does relate to the question of an acceptable minimum with regard to self-determination issues,¹⁷ and it may be that the matter needs further clarification as there exists a number of small islands awaiting decolonisation.¹⁸

The need for a defined territory focuses upon the requirement for a particular territorial base upon which to operate. However, there is no necessity in international law for defined and settled boundaries. A state may be recognised as a legal person even though it is involved in a dispute with its neighbours as to the precise demarcation of its frontiers, so long as there is a consistent band of territory which is undeniably controlled by the government of the alleged state. For this reason at least, therefore, the 'State of Palestine' declared in November 1988 at a conference in Algiers cannot be regarded as a valid state. The Palestinian organisations did not control any part of the territory they claim.¹⁹

Albania prior to the First World War was recognised by many countries even though its borders were in dispute.²⁰ More recently, Israel has been accepted by the majority of nations as well as the United Nations as a valid state despite the fact that its frontiers have not been finally settled and despite its involvement in hostilities with its Arab neighbours over its existence and territorial delineation.²¹ What matters is the presence of a stable community within a certain area, even though its frontiers may be uncertain. Indeed, it is possible for the territory of the state to be split into distinct parts, for example Pakistan prior to the Bangladesh secession of 1971 or present-day Azerbaijan.

For a political society to function reasonably effectively it needs some form of government or central control. However, this is not a precondition for recognition as an independent country.²² It should be regarded more as an indication of some sort of coherent political structure and society, than the necessity for a sophisticated apparatus of executive and legislative organs.²³ A relevant factor here might be the extent to which the area not under the control of the government is claimed by another state as a matter of international law as distinct from *de facto* control. The general requirement might be seen to relate to the nineteenth-century concern with ‘civilisation’ as an essential of independent statehood and ignores the modern tendency to regard sovereignty for non-independent peoples as the paramount consideration, irrespective of administrative conditions.²⁴

As an example of the former tendency one may note the *Aaland Islands* case of 1920. The report of the International Committee of Jurists appointed to investigate the status of the islands remarked, with regard to the

establishment of the Finnish Republic in the disordered days following the Russian Revolution, that it was extremely difficult to name the date that Finland became a sovereign state. It was noted that:

This certainly did not take place until a stable political organisation had been created, and until the public authorities had become strong enough to assert themselves throughout the territories of the state without the assistance of the foreign troops.²⁵

Recent practice with regard to the new states of Croatia and Bosnia and Herzegovina emerging out of the former Yugoslavia suggests the modification of the criterion of effective exercise of control by a government throughout its territory. Both Croatia and Bosnia and Herzegovina were recognised as independent states by European Community member states²⁶ and admitted to membership of the United Nations (which is limited to ‘states’ by article 4 of the UN Charter²⁷)²⁸ at a time when both states were faced with a situation where non-governmental forces controlled substantial areas of the territories in question in civil war conditions. More recently, Kosovo declared independence on 17 February 2008 with certain Serb-inhabited areas apparently not under the control of the central government.²⁹ In such situations, lack of effective central control might be balanced by significant international recognition, culminating in membership of the United Nations. Nevertheless, a foundation of effective control is required for statehood. Conversely, however, a comprehensive breakdown in order and

the loss of control by the central authorities in an independent state will not obviate statehood. Whatever the consequences in terms of possible humanitarian involvement, whether by the United Nations or otherwise depending upon the circumstances, the collapse of governance within a state (sometimes referred to as a 'failed state') has no necessary effect upon the status of that state as a state. Indeed, the very designation of 'failed state' is controversial and, in terms of international law, misleading.³⁰

The capacity to enter into relations with other states is an aspect of the existence of the entity in question as well as an indication of the importance attached to recognition by other countries. It is a capacity not limited to sovereign nations, since international organisations, non-independent states and other bodies can enter into legal relations with other entities under the rules of international law. But it is essential for a sovereign state to be able to create such legal relations with other units as it sees fit. Where this is not present, the entity cannot be an independent state. The concern here is not with political pressure by one country over another, but rather the lack of competence to enter into legal relations. The difference is the presence or absence of legal capacity, not the degree of influence that may affect decisions.

The essence of such capacity is independence. This is crucial to statehood and amounts to a conclusion of law in the light of particular circumstances. It is a formal statement that the state is subject to no other sovereignty and is unaffected either by factual dependence upon other states or by submission to the rules of international law.³¹ It is arguable that a degree of actual as well as formal independence may also be necessary. This question was raised in

relation to the grant of independence by South Africa to its Bantustans. In the case of the Transkei, for example, a considerable proportion, perhaps 90 per cent, of its budget at one time was contributed by South Africa, while Bophuthatswana was split into a series of areas divided by South African territory.³² Both the Organisation of African Unity and the United Nations declared such 'independence' invalid and called upon all states not to recognise the new entities. These entities were, apart from South Africa, totally unrecognised.³³ However, many states are as dependent upon aid from other states, and economic success would not have altered the attitude of the international community. Since South Africa as a sovereign state was able to alienate parts of its own territory under international law, these entities would appear in the light of the formal criteria of statehood to have been formally independent. However, it is suggested that the answer as to their status lay elsewhere than in an elucidation of this category of the criteria of statehood. It lay rather in understanding that actions taken in order to pursue an illegal policy, such as apartheid, cannot be sustained.³⁴

An example of the complexities that may attend such a process is provided by the unilateral declaration of independence by Lithuania, one of the Baltic states unlawfully annexed by the Soviet Union in 1940, on 11 March 1990.³⁵ The 1940 annexation was never recognised *de jure* by the Western states and thus the control exercised by the Soviet Union was accepted only upon a *de facto* basis. The 1990 declaration of independence was politically very sensitive, coming at a time of increasing disintegration within the Soviet Union, but went unrecognised by any state. In view of the continuing constitutional crisis within the Soviet Union and the possibility of a new confederal association freely accepted by the fifteen Soviet republics, it was

at that time premature to talk of Lithuania as an independent state, not least because the Soviet authorities maintained substantial control within that territory.³⁶ The independence of Lithuania and the other Baltic states was recognised during 1991 by a wide variety of states, including crucially the Soviet Union.³⁷

It is possible, however, for a state to be accepted as independent even though, exceptionally, certain functions of government are placed in the hands of an outside body. In the case of Bosnia and Herzegovina, for example, the Dayton Peace Agreement of 1995 provided for a High Representative to be appointed as the ‘final authority in theatre’ with regard to the implementation of the agreement,³⁸ and the High Representative has, for example, removed a number of persons from public office. None of this has been understood by the international community to affect Bosnia’s status as an independent state, but the arrangement did arise as an attempt to reach and implement a peace agreement in the context of a bitter civil war with third-party intervention. More controversially, after a period of international administration,³⁹ Kosovo declared its independence on 17 February 2008, noting specifically that it accepted the obligations for Kosovo under the Comprehensive Proposal for the Kosovo Status Settlement (the Ahtisaari Plan).⁴⁰ This Plan called for ‘independence with international supervision’ and the obligations for Kosovo included human rights and decentralisation guarantees, together with an international presence to supervise implementation of the Settlement. The provisions of the Settlement were to take precedence over all other legal provisions in Kosovo. The international presence was to take the form of an International Civilian Representative (ICR), who would also be the European Union Special Representative, to be appointed by the International Steering

Group.⁴¹ The ICR would be the final authority in Kosovo regarding interpretation of the civilian aspects of the Settlement and, in particular, would have the ability to annul decisions or laws adopted by the Kosovo authorities and sanction and remove public officials whose actions were determined to be inconsistent with the Settlement terms.⁴² In addition, an international military presence, led by NATO, would ensure a safe environment throughout Kosovo.⁴³

Self-Determination and the Criteria of Statehood

It is the criterion of government which, as suggested above, has been most affected by the development of the legal right to self-determination. The traditional exposition of the criterion concentrated upon the stability and effectiveness needed for this factor to be satisfied,⁴⁴ while the representative and democratic nature of the government has also been put forward as a requirement. The evolution of self-determination has affected the standard necessary as far as the actual exercise of authority is concerned, so that it appears a lower level of effectiveness, at least in traditional decolonisation situations, has been accepted.⁴⁵ This can be illustrated by reference to a couple of cases.

The former Belgian Congo became independent on 30 June 1960 in the midst of widespread tribal fighting which had spread to the capital. Within a few weeks the Force Publique had mutinied, Belgian troops had intervened and the province of Katanga announced its secession. Notwithstanding the virtual breakdown of government, the Congo was recognised by a large number of states after independence and was admitted to the United Nations as a

member state without opposition. Indeed, at the time of the relevant General Assembly resolution in September 1960, two different factions of the Congo government sought to be accepted by the United Nations as the legitimate representatives of the state. In the event, the delegation authorised by the head of state was accepted and that of the Prime Minister rejected.⁴⁶ A rather different episode occurred with regard to the Portuguese colony of Guinea-Bissau. In 1972, a UN Special Mission was dispatched to the ‘liberated areas’ of the territory and concluded that the colonial power had lost effective administrative control of large areas of the territory.⁴⁷ On 24 September 1973, the PAIGC proclaimed the Republic of Guinea Bissau an independent state. The issue of the ‘illegal occupation by Portuguese military forces of certain sections of the Republic of Guinea-Bissau’ came before the General Assembly and a number of states affirmed the validity of the independence of the new state in international law. Western states denied that the criteria of statehood had been fulfilled. However, ninety-three states voted in favour of Assembly resolution 3061 (XXVIII), constitutionally no more than a recommendation, which mentioned ‘the recent accession to independence of the people of Guinea-Bissau thereby creating the sovereign state of the Republic of Guinea-Bissau’.⁴⁸ In such cases, admission to membership of the United Nations is likely to be determinative in the light of the requirement of statehood for membership (article 4, UN Charter) and the universality of membership, requiring positive votes by both the General Assembly and the Security Council.

In addition to modifying the traditional principle with regard to the effectiveness of government in certain circumstances, the principle of self-determination may also be relevant as an additional criterion of statehood. In

the case of Rhodesia, UN resolutions denied the legal validity of the unilateral declaration of independence on 11 November 1965 and called upon member states not to recognise it.⁴⁹ No state did recognise Rhodesia and a civil war ultimately resulted in its transformation into the recognised state of Zimbabwe. Rhodesia might have been regarded as a state by virtue of its satisfaction of the factual requirements of statehood, but this is a dubious proposition. The evidence of complete non-recognition, the strenuous denunciations of its purported independence by the international community and the developing civil war militate strongly against this. It could be argued, on the other hand, that, in the absence of recognition, no entity could become a state, but this constitutive theory of recognition is not acceptable.⁵⁰ The best approach is to accept the development of self-determination as an additional criterion of statehood, denial of which would obviate statehood. This can only be acknowledged in relation to self-determination situations and would not operate in cases, for example, of secessions from existing states.⁵¹ In other words, in the case of an entity seeking to become a state and accepted by the international community as being entitled to exercise the right of self-determination, it may well be necessary to demonstrate that the internal requirements of the principle have not been offended. One cannot define this condition too rigorously in view of state practice to date, but it would appear to be a sound proposition that systematic and institutionalised discrimination might invalidate a claim to statehood.

In particular, one may point to the practice of the international community concerning the successor states to the former Yugoslavia. The European Community adopted Guidelines on Recognition of New States in Eastern Europe and the Soviet Union on 16 December 1991,⁵² which constituted a

common position on the process of recognition of such new states and referred specifically to the principle of self-determination. The Guidelines underlined the need to respect the rule of law, democracy and human rights and mentioned specifically the requirement for guarantees for the rights of minorities. Although these Guidelines deal with the issue of recognition and not as such the criteria for statehood, the two are interlinked and conditions required for recognition may in the circumstances, especially where expressed in general and not specific terms, often in practice be interpreted as additions to the criteria for statehood.

Recognition

Recognition is a method of accepting certain factual situations and endowing them with legal significance, but this relationship is a complicated one. In the context of the creation of statehood, recognition may be viewed as constitutive or declaratory, as will be noted in more detail in Chapter 8. The former theory maintains that it is only through recognition that a state comes into being under international law, whereas the latter approach maintains that once the factual criteria of statehood have been satisfied, a new state exists as an international person, recognition becoming merely a political and not a legal act in this context. Various modifications have been made to these theories, but the role of recognition, at the least in providing strong evidential demonstration of satisfaction of the relevant criteria, must be acknowledged. In many situations, expressed requirements for recognition may be seen as impacting upon the question of statehood as the comments in the previous section on the EC Guidelines indicate. There is also an integral relationship between recognition and the criteria for statehood in the sense that the more

overwhelming the scale of international recognition is in any given situation, the less may be demanded in terms of the objective demonstration of adherence to the criteria. Conversely, the more sparse international recognition is, the more attention will be focused upon proof of actual adherence to the criteria concerned.

Extinction of Statehood⁵³

Extinction of statehood may take place as a consequence of merger, absorption or, historically, annexation. It may also occur as a result of the dismemberment of an existing state.⁵⁴ In general, caution needs to be exercised before the dissolution of a state is internationally accepted.⁵⁵ While the disappearance, like the existence, of a state is a matter of fact,⁵⁶ it is a matter of fact that is legally conditioned in that it is international law that will apportion particular legal consequences to particular factual situations and the appreciation of these facts will take place within a certain legal framework.

While it is not unusual for governments to disappear, it is rather rarer for states to become extinct. This will not happen in international law as a result of the illegal use of force, as the Kuwait crisis of August 1990 and the consequent UN response clearly demonstrates,⁵⁷ nor as a consequence of internal upheavals within a state,⁵⁸ but it may occur by consent. Three recent examples may be noted. On 22 May 1990, North and South Yemen united, or merged, to form one state, the Republic of Yemen,⁵⁹ while on 3 October 1990, the two German states reunified as a result of the constitutional accession of the *Länder* of the German Democratic Republic to the Federal Republic of Germany.⁶⁰ The dissolution of Czechoslovakia⁶¹ on 1 January

1993 and the establishment of the two new states of the Czech Republic and Slovakia constitutes a further example of the dismemberment, or disappearance, of a state.⁶²

During 1991, the process of disintegration of the Soviet Union gathered force as the Baltic states reasserted their independence⁶³ and the other republics of the Soviet Union stated their intention to become sovereign. In December of that year, the Commonwealth of Independent States was proclaimed, and it was stated in the Alma Ata Declaration⁶⁴ that, with the establishment of the CIS, ‘the Union of Soviet Socialist Republics ceases to exist’. The states of the CIS agreed to support ‘Russia’s continuance of the membership of the Union of Soviet Socialist Republics in the United Nations, including permanent membership of the Security Council, and other international organisations’.⁶⁵ It has been commonly accepted that Russia constitutes a continuation of the Soviet Union, with consequential adjustments to take account of the independence of the other former republics of the Soviet Union.⁶⁶ It is therefore a case of dismemberment basically consisting of the transformation of an existing state. The disappearance of the Soviet Union was accompanied by the claim, internationally accepted, of the Russian Federation to be the continuation of that state. While the element of continuity is crucial in the framework of the rules of state succession,⁶⁷ it does constitute a complication in the context of extinction of states.

By way of contrast, not all the relevant parties accepted that the process of dissolution of the former SFRY during 1991 to 1992 resulted in the dissolution of that state.⁶⁸ The Federal Republic of Yugoslavia, comprising the former Republics of Serbia and Montenegro, saw itself as the

continuation of the former state within reduced boundaries, while the other former republics disputed this and maintained rather that the Federal Republic of Yugoslavia (Serbia and Montenegro) was a successor to the former Yugoslavia precisely on the same basis as the other former republics such as Croatia, Slovenia, and Bosnia and Herzegovina. The matter was discussed by the Yugoslav Arbitration Commission. In Opinion No. 1 of 29 November 1991, it was noted that at that stage the SFRY was ‘in the process of dissolution’.⁶⁹ However, in Opinion No. 8, adopted on 4 July 1992, the Arbitration Commission stated that the process of dissolution had been completed and that the SFRY no longer existed. This conclusion was reached on the basis of the fact that Slovenia, Croatia, and Bosnia and Herzegovina had been recognised as new states, the republics of Serbia and Montenegro had adopted a new constitution for the ‘Federal Republic of Yugoslavia’ and UN resolutions had been adopted referring to ‘the former SFRY’.⁷⁰ The Commission also emphasised that the existence of federal states was seriously compromised when a majority of the constituent entities, embracing a majority of the territory and population of the federal state, constitute themselves as sovereign states with the result that federal authority could no longer be effectively exercised.⁷¹ The UN Security Council in resolution 777 (1992) stated that ‘the state formerly known as the Socialist Federal Republic of Yugoslavia has ceased to exist’. This was reiterated in resolution 1022 (1995) in which the Security Council, in welcoming the Dayton Peace Agreement (the General Framework Agreement for Peace in Bosnia and Herzegovina) between the states of the former Yugoslavia and suspending the application of sanctions, stated that the SFRY ‘has ceased to exist’. On 1 November 2000, Yugoslavia was admitted to the United Nations as a new

member,⁷² following its request sent to the Security Council on 27 October 2000.⁷³

The Fundamental Rights of States

The fundamental rights of states exist by virtue of the international legal order, which is able, as in the case of other legal orders, to define the characteristics of its subjects.⁷⁴

Independence⁷⁵

Perhaps the outstanding characteristic of a state is its independence, or sovereignty.⁷⁶ This was defined in the Draft Declaration on the Rights and Duties of States prepared in 1949 by the International Law Commission as the capacity of a state to provide for its own well-being and development free from the domination of other states, providing it does not impair or violate their legitimate rights.⁷⁷ By independence, one is referring to a legal concept and it is no deviation from independence to be subject to the rules of international law. Any political or economic dependence that may in reality exist does not affect the legal independence of the state, unless that state is formally compelled to submit to the demands of a superior state, in which case dependent status is concerned.

A discussion on the meaning and nature of independence took place in the *Austro-German Customs Union* case before the Permanent Court of International Justice in 1931.⁷⁸ It concerned a proposal to create a free trade customs union between the two German-speaking states and whether this was incompatible with the 1919 Peace Treaties (coupled with a subsequent

protocol of 1922) pledging Austria to take no action to compromise its independence. In the event, and in the circumstances of the case, the Court held that the proposed union would adversely affect Austria's sovereignty. Judge Anzilotti noted that restrictions upon a state's liberty, whether arising out of customary law or treaty obligations, do not as such affect its independence. As long as such restrictions do not place the state under the legal authority of another state, the former maintains its status as an independent country.⁷⁹

The Permanent Court emphasised in the *Lotus* case⁸⁰ that '[r]estrictions upon the independence of states cannot therefore be presumed'. A similar point in different circumstances was made by the International Court of Justice in *Nicaragua v. United States*,⁸¹ where it was stated that 'in international law there are no rules, other than such rules as may be accepted by the state concerned, by treaty or otherwise, whereby the level of armaments of a sovereign state can be limited, and this principle is valid for all states without exception'. The Court also underlined in the *Legality of the Threat or Use of Nuclear Weapons*⁸² that '[s]tate practice shows that the illegality of the use of certain weapons as such does not result from an absence of authorisation but, on the contrary, is formulated in terms of prohibition'. The starting point for the consideration of the rights and obligations of states within the international legal system remains that international law permits freedom of action for states, unless there is a rule constraining this. However, such freedom exists within and not outside the international legal system and it is therefore international law which dictates the scope and content of the independence of states and not the states themselves individually and unilaterally.

The notion of independence in international law implies a number of rights and duties: for example, the right of a state to exercise jurisdiction over its territory and permanent population, or the right to engage upon an act of self-defence in certain situations. It implies also the duty not to intervene in the internal affairs of other sovereign states. Precisely what constitutes the internal affairs of a state is open to dispute and is in any event a constantly changing standard. It was maintained by the Western powers for many years that any discussion or action by the United Nations⁸³ with regard to their colonial possessions was contrary to international law.

However, this argument by the European colonial powers did not succeed and the United Nations examined many colonial situations.⁸⁴ In addition, issues related to human rights and racial oppression do not now fall within the closed category of domestic jurisdiction. It was stated on behalf of the European Community, for example, that the ‘protection of human rights and fundamental freedoms can in no way be considered an interference in a state’s internal affairs’. Reference was also made to ‘the moral right to intervene whenever human rights are violated’.⁸⁵

This duty not to intervene in matters within the domestic jurisdiction of any state was included in the Declaration on Principles of International Law Concerning Friendly Relations and Co-operation among States adopted in October 1970 by the UN General Assembly. It was emphasised that:

No state or group of states has the right to
intervene, directly or indirectly, for any reason
whatever, in the internal or external affairs of

any other state. Consequently, armed intervention and all other forms of interference or attempted threats against the personality of the state or against its political, economic and cultural elements, are in violation of international law.

The prohibition also covers any assistance or aid to subversive elements aiming at the violent overthrow of the government of a state. In particular, the use of force to deprive peoples of their national identity amounts to a violation of this principle of non-intervention.⁸⁶

The principles surrounding sovereignty, such as non-intervention, are essential in the maintenance of a reasonably stable system of competing states. Setting limits on the powers of states vis-à-vis other states contributes to some extent to a degree of stability within the legal order. As the International Court of Justice pointed out in the *Corfu Channel* case in 1949, ‘between independent states, respect for territorial sovereignty is an essential foundation of international relations’.⁸⁷

By a similar token a state cannot purport to enforce its laws in the territory of another state without the consent of the state concerned. However, international law would seem to permit in some circumstances the state to continue to exercise its jurisdiction, notwithstanding the illegality of the apprehension.⁸⁸ It also follows that the presence of foreign troops on the territory of a sovereign state requires the consent of that state.⁸⁹

Equality⁹⁰

One other crucial principle is the legal equality of states, that is equality of legal rights and duties. States, irrespective of size or power, have the same juridical capacities and functions, and are likewise entitled to one vote in the UN General Assembly. The doctrine of the legal equality of states is an umbrella category for it includes within its scope the recognised rights and obligations which fall upon all states.

This was recognised in the 1970 Declaration on Principles of International Law. This provides that:

All states enjoy sovereign equality. They have equal rights and duties and are equal members of the international community, notwithstanding differences of an economic, social, political or other nature.

In particular, sovereign equality includes the following elements:

- (a) States are juridically equal;
- (b) Each state enjoys the rights inherent in full sovereignty;
- (c) Each state has the duty to respect the personality of other states;
- (d) The territorial integrity and political independence of the state are inviolable;

- (e) Each state has the right freely to choose and develop its political, social, economic and cultural systems;
- (f) Each state has the duty to comply fully and in good faith with its international obligations and to live in peace with other states.⁹¹

In many respects this doctrine owes its origins to Natural Law thinking. Just as equality was regarded as the essence of man and thus contributed philosophically to the foundation of the state, so naturalist scholars treated equality as the natural condition of states. With the rise in positivism, the emphasis altered and, rather than postulating a general rule applicable to all and from which a series of rights and duties may be deduced, international lawyers concentrated upon the sovereignty of each and every state, and the necessity that international law be founded upon the consent of states.

The notion of equality before the law is accepted by states in the sense of equality of legal personality and capacity. However, it would not be strictly accurate to talk in terms of the equality of states in creating law. The major states will always have an influence commensurate with their status, if only because their concerns are much wider, their interests much deeper and their power more effective.⁹²

Within the UN General Assembly, the doctrine of equality is maintained by the rule of one state, one vote.⁹³ However, one should not overlook the existence of the veto possessed by the United States, Russia, China, France and the United Kingdom in the Security Council.⁹⁴

Peaceful Co-Existence

This concept has been formulated in different ways and with different views as to its legal nature by the Soviet Union, China and the Developing Countries. It was elaborated in 1954 as the Five Principles of Peaceful Co-existence by India and China, which concerned mutual respect for each other's territorial integrity and sovereignty, mutual non-aggression, non-interference in each other's affairs and the principle of equality.⁹⁵

The idea was expanded in a number of international documents such as the final communiqué of the Bandung Conference in 1955 and in various resolutions of the United Nations.⁹⁶ Its recognised constituents also appear in the list of Principles of the Charter of the Organisation of African Unity. Among the points enumerated are the concepts of sovereign equality, non-interference in the internal affairs of states, respect for the sovereignty and territorial integrity of states, as well as a condemnation of subversive activities carried out from one state and aimed against another. Other concepts that have been included in this category comprise such principles as non-aggression and the execution of international obligations in good faith. The Soviet Union had also expressed the view that peaceful co-existence constituted the guiding principle in contemporary international law.⁹⁷ Interest in the concept has recently been renewed with the adoption of the Russia–China Declaration on the Promotion of International Law of 25 June 2016, which underlined the continuing relevance of the Five Principles of Co-existence of 1954.⁹⁸

Protectorates and Protected States⁹⁹

A distinction is sometimes made between a protectorate and a protected state. In the former case, in general, the entity concerned enters into an arrangement with a state under which, while separate legal personality may be involved, separate statehood is not. In the case of a protected state, the entity concerned retains its status as a separate state, but enters into a valid treaty relationship with another state affording the latter certain extensive functions possibly internally and externally. However, precisely which type of arrangement is made and the nature of the status, rights and duties in question will depend upon the circumstances and, in particular, the terms of the relevant agreement and third-party attitudes.¹⁰⁰

In the case of Morocco, the Treaty of Fez of 1912 with France gave the latter the power to exercise certain sovereign powers on behalf of the former, including all of its international relations. Nevertheless, the International Court of Justice emphasised that Morocco had in the circumstances of the case remained a sovereign state.¹⁰¹

In the case of sub-Saharan Africa in the colonial period, treaties of protection were entered into with tribal entities that were not states. Such institutions were termed ‘colonial protectorates’ and constituted internal colonial arrangements. They did not constitute international treaties with internationally recognised states.¹⁰²

The extent of powers delegated to the protecting state in such circumstances may vary, as may the manner of the termination of the arrangement. In these cases, formal sovereignty remains unaffected and the entity in question retains its status as a state, and may act as such in the various international

fora, regard being had of course to the terms of the arrangement. The obligation may be merely to take note of the advice of the protecting state, or it may extend to a form of diplomatic delegation subject to instruction, as in the case of Liechtenstein. Liechtenstein was refused admission to the League of Nations since it was held unable to discharge all the international obligations imposed by the Covenant in the light of its delegation of sovereign powers, such as diplomatic representation, administration of post, telegraph and telephone services and final decisions in certain judicial cases.¹⁰³ Liechtenstein, however, has been a party to the ICJ Statute and was a party to the *Nottebohm*¹⁰⁴ case before the Court, a facility only open to states. Liechtenstein joined the United Nations in 1990.

Federal States¹⁰⁵

There are various forms of federation or confederation, according to the relative distribution of power between the central and local organs. In some states, the residue of power lies with the central government, in others with the local or provincial bodies. A confederation implies a more flexible arrangement, leaving a considerable degree of authority and competence with the component units to the detriment of the central organ.¹⁰⁶

The Yugoslav Arbitration Commission noted in Opinion No. 1 that in the case of a federal state embracing communities possessing a degree of autonomy where such communities participate in the exercise of political power within the framework of institutions common to the federation, the ‘existence of the state implies that the federal organs represent the components of the federation and wield effective power’.¹⁰⁷ In addition, the

existence of such a federal state would be seriously compromised ‘when a majority of these entities, embracing the greater part of the territory and population, constitute themselves as sovereign states with the result that federal authority may no longer be effectively exercised’.¹⁰⁸

The division of powers inherent in such arrangements often raises important questions for international law, particularly in the areas of personality, responsibility and immunity. Whether the federation dissolves into two or more states also brings into focus the doctrine of self-determination in the form of secession. Such dissolution may be the result of an amicable and constitutional agreement or may occur pursuant to a forceful exercise of secession. In the latter case, international legal rules may be pleaded in aid, but the position would seem to be that (apart from recognised colonial situations) there is no right of self-determination applicable to independent states that would justify the resort to secession. There is, of course, no international legal duty to refrain from secession attempts, in the absence of a Security Council decision to the contrary: the situation remains subject to the domestic law. However, should such a secession prove successful in fact, then the concepts of recognition and the appropriate criteria of statehood would prove relevant and determinative as to the new situation.¹⁰⁹

The federal state will itself, of course, have personality, but the question of the personality and capability of the component units of the federation on the international plane can really only be determined in the light of the constitution of the state concerned and state practice. For instance, the then Soviet Republics of Byelorussia and the Ukraine were admitted as members of the United Nations in 1945 and to that extent possessed international

personality.¹¹⁰ Component states of a federation that have been provided with a certain restricted international competence may thus be accepted as having a degree of international personality. The issue has arisen especially with regard to treaties. Lauterpacht, in his Report on the Law of Treaties, for example, noted that treaties concluded by component units of federal states ‘are treaties in the meaning of international law’,¹¹¹ although Fitzmaurice adopted a different approach in his Report on the Law of Treaties by stating that such units act as agents for the federation which alone possesses international personality and which is the entity bound by the treaty and responsible for its implementation.¹¹² Article 5(2) of the International Law Commission’s Draft Articles on the Law of Treaties provided that

[s]tates members of a federal union may
possess a capacity to conclude treaties if such
capacity is admitted by the federal constitution
and within the limits there laid down

but this was ultimately rejected at the Vienna Conference on the Law of Treaties,¹¹³ partly on the grounds that the rule was beyond the scope of the Convention itself. The major reasons for the rejection, however, were that the provision would enable third states to intervene in the internal affairs of federal states by seeking to interpret the constitutions of the latter and that, from another perspective, it would unduly enhance the power of domestic law to determine questions of international personality to the detriment of international law. This perhaps would indeed have swung the balance too far away from the international sphere of operation.

Different federations have evolved different systems with regard to the allocation of treaty-making powers. In some cases, component units may enter into such arrangements subject to varying conditions. The Constitution of Switzerland, for example, enables the cantons to conclude treaties with foreign states on issues concerning public economy, frontier relations and the police, subject to the provision that the Federal Council acts as the intermediary.¹¹⁴ In the case of the United States, responsibility for the conduct of foreign relations rests exclusively with the Federal Government,¹¹⁵ although American states have entered into certain compacts with foreign states or component units (such as Manitoba and Quebec, provinces of Canada) dealing with the construction and maintenance of highways and international bridges, following upon consultations with the foreign state conducted by the federal authorities. In any event, it is clear that the internal constitutional structure is crucial in endowing the unit concerned with capacity. What, however, turns this into international capacity is recognition.

An issue recently the subject of concern and discussion has been the question of the domestic implementation of treaty obligations in the case of federations, especially in the light of the fact that component units may possess legislative power relating to the subject-matter of the treaty concerned. Although this issue lies primarily within the field of domestic constitutional law, there are important implications for international law. In the United States, for example, the approach adopted has been to insert ‘federal’ reservations to treaties in cases where the states of the Union have exercised jurisdiction over the subject-matter in question, providing that the Federal Government would take appropriate steps to enable the competent

authorities of the component units to take appropriate measures to fulfil the obligations concerned.¹¹⁶ In general, however, there have been few restrictions on entry into international agreements.¹¹⁷

The question as to divided competence in federations and international treaties has arisen in the past, particularly with regard to conventions of the International Labour Organization, which typically encompass areas subject to the law-making competence of federal component units. In Canada, for example, early attempts by the central government to ratify ILO conventions were defeated by the decisions of the courts on constitutional grounds, supporting the views of the provinces,¹¹⁸ while the United States has a poor record of ratification of ILO conventions on similar grounds of local competence and federal treaty-making.¹¹⁹ The issue that arises therefore is either the position of a state that refuses to ratify or sign a treaty on grounds of component unit competence in the area in question or alternatively the problem of implementation and thus responsibility where ratification does take place. In so far as the latter is concerned, the issue has been raised in the context of article 36 of the Vienna Convention on Consular Relations 1963, to which the United States is a party, and which requires, among other things, that states parties inform a foreigner under arrest of his or her right to communicate with the relevant consulate. The International Court of Justice has twice held the United States in violation of this requirement, noting that the domestic doctrine known as the procedural default rule, preventing a claimant from raising an issue on appeal or on review if it had not been raised at trial, could not excuse or justify that violation.¹²⁰ The US Supreme Court has held that while the International Court's decisions were entitled to 'respectful consideration', they were not binding.¹²¹ This was so even though

the US President in a memorandum dated 28 February 2005 had declared that the United States would fulfil its obligations under the *Avena* decision by having states' courts give effect to it.¹²² The Texas Court of Criminal Appeals, however, held that neither the International Court's *Avena* decision nor the President's memorandum constituted binding federal law pre-empting Texas law, so that Medellín (the applicant) would not be provided with the review called for by the International Court and by the President.¹²³

In Australia, the issue has turned on the interpretation of the constitutional grant of federal power to make laws 'with respect to . . . external affairs'.¹²⁴ Two recent cases have analysed this, in the light particularly of the established principle that the Federal Government could under this provision legislate on matters, not otherwise explicitly assigned to it, which possessed an intrinsic international aspect.¹²⁵

In *Koowarta v. Bjelke-Petersen*¹²⁶ in 1982, the Australian High Court, in dealing with an action against the Premier of Queensland for breach of the Racial Discrimination Act 1975 (which incorporated parts of the International Convention on the Elimination of All Forms of Racial Discrimination adopted in 1965), held that the relevant legislation was valid with regard to the 'external affairs' provision under section 51(29) of the Constitution. In other words, the 'external affairs' power extended to permit the implementation of an international agreement, despite the fact that the subject-matter concerned was otherwise outside federal power. It was felt that if Australia accepted a treaty obligation with regard to an aspect of its own internal legal order, the subject of the obligation thus became an 'external affair' and legislation dealing with this fell within section 51(29), and was

thereby valid constitutionally.¹²⁷ It was not necessary that a treaty obligation be assumed: the fact that the norm of non-discrimination was established in customary international law was itself sufficient in the view of Stephen J to treat the issue of racial discrimination as part of external affairs.¹²⁸

In *Commonwealth of Australia v. Tasmania*,¹²⁹ the issue concerned the construction of a dam in an area placed on the World Heritage List established under the 1972 UNESCO Convention for the Protection of the World Cultural and Natural Heritage, to which Australia was a party. The Federal Government in 1983 wished to stop the scheme by reference *inter alia* to the ‘external affairs’ power as interpreted in *Koowarta*, since it possessed no specific legislative power over the environment. The majority of the Court held that the ‘external affairs’ power extended to the implementation of treaty obligations. It was not necessary that the subject-matter of the treaty be inherently international.

The effect of these cases seen, of course, in the context of the Australian Constitution, is to reduce the problems faced by federal states of implementing international obligations in the face of local jurisdiction.

The difficulties faced by federal states have also become evident with regard to issues of state responsibility.¹³⁰ As a matter of international law, states are responsible for their actions, including those of subordinate organs irrespective of domestic constitutional arrangements.¹³¹ The International Court in the *Difference Relating to Immunity from Legal Process of a Special Rapporteur* case stated that it was a well-established rule of customary international law that ‘the conduct of any organ of a State must be regarded

as an act of that State’¹³² and this applies to component units of a federal state. As the Court noted in its Order of 3 March 1999 on provisional measures in the *LaGrand* case, ‘the international responsibility of a State is engaged by the action of the competent organs and authorities acting in that State, whatever they may be’. In particular, the United States was under an obligation to transmit the Order to the Governor of the State of Arizona, while the Governor was under an obligation to act in conformity with the international undertakings of the United States.¹³³ Similarly, the Court noted in the *Difference Relating to Immunity from Legal Process of a Special Rapporteur* case that the government of Malaysia was under an obligation to communicate the Court’s Advisory Opinion to the Malaysian courts in order that Malaysia’s international obligations be given effect.¹³⁴

Thus, international responsibility of the state may co-exist with an internal lack of capacity to remedy the particular international wrong. In such circumstances, the central government is under a duty to seek to persuade the component unit to correct the violation of international law,¹³⁵ while the latter is, it seems, under an international obligation to act in accordance with the international obligations of the state.

Federal practice in regulating disputes between component units is often of considerable value in international law. This operates particularly in cases of boundary problems, where similar issues arise.¹³⁶ Conversely, international practice may often be relevant in the resolution of conflicts between component units.¹³⁷

Sui Generis Territorial Entities¹³⁸

Mandated and Trust Territories¹³⁹

After the end of the First World War and the collapse of the Axis and Russian empires, the Allies established a system for dealing with the colonies of the defeated powers that did not involve annexation. These territories would be governed according to the principle that ‘the well-being and development of such peoples form a sacred trust of civilisation’. The way in which this principle would be put into effect would be to entrust the tutelage of such people to ‘advanced nations who by reason of their resources, their experience or their geographical position’ could undertake the responsibility. The arrangement would be exercised by them as mandatories on behalf of the League.¹⁴⁰

Upon the conclusion of the Second World War and the demise of the League, the mandate system was transmuted into the UN trusteeship system under Chapters XII and XIII of the UN Charter.¹⁴¹ The strategic trust territory of the Pacific, taken from Japan, the mandatory power, was placed in a special category subject to Security Council rather than Trusteeship Council supervision for security reasons,¹⁴² while South Africa refused to place its mandated territory under the system. Quite who held sovereignty in such territories was the subject of extensive debates over many decades.¹⁴³

As far as the trust territory of the Pacific was concerned, the United States signed a Covenant with the Commonwealth of the Northern Mariana Islands and Compacts of Free Association with the Federated States of Micronesia and with the Republic of the Marshall Islands. Upon their entry into force in autumn 1986, it was determined that the trusteeship had been terminated.

This procedure providing for political union with the United States was accepted by the Trusteeship Council as a legitimate exercise of self-determination.¹⁴⁴ However, the proposed Compact of Free Association with the Republic of Palau (the final part of the former trust territory) did not enter into force as a result of disagreement over the transit of nuclear-powered or armed vessels and aircraft through Palauan waters and airspace and, therefore, the United States continued to act as administering authority under the trusteeship agreement.¹⁴⁵ These difficulties were eventually resolved.¹⁴⁶

South West Africa was administered after the end of the First World War as a mandate by South Africa, which refused after the Second World War to place the territory under the trusteeship system. Following this, the International Court of Justice in 1950 in its Advisory Opinion on the *International Status of South West Africa*¹⁴⁷ stated that, while there was no legal obligation imposed by the UN Charter to transfer a mandated territory into a trust territory, South Africa was still bound by the terms of the mandate agreement and the Covenant of the League of Nations, and the obligations that it had assumed at that time. The Court emphasised that South Africa alone did not have the capacity to modify the international status of the territory. This competence rested with South Africa acting with the consent of the United Nations, as successor to the League of Nations. Logically flowing from this decision was the ability of the United Nations to hear petitioners from the territory in consequence of South Africa's refusal to heed UN decisions and in pursuance of League of Nations practices.¹⁴⁸

In 1962, the International Court of Justice heard the case brought by Ethiopia and Liberia, the two African members of the League, that South Africa was

in breach of the terms of the mandate and had thus violated international law. The Court initially affirmed that it had jurisdiction to hear the merits of the dispute.¹⁴⁹ However, by the Second Phase of the case, the Court (its composition having slightly altered in the meanwhile) decided that Ethiopia and Liberia did not have any legal interest in the subject-matter of the claim (the existence and supervision of the mandate over South West Africa) and accordingly their contentions were rejected.¹⁵⁰ Having thus declared on the lack of standing of the two African appellants, the Court did not discuss any of the substantive questions which stood before it.

This judgment aroused a great deal of feeling, particularly in the Developing Countries, and occasioned a shift in emphasis in dealing with the problem of the territory in question.¹⁵¹

The General Assembly resolved in October 1966 that since South Africa had failed to fulfil its obligations, the mandate was therefore terminated. South West Africa (or Namibia as it was to be called) was to come under the direct responsibility of the United Nations.¹⁵² Accordingly, a Council was established to oversee the territory and a High Commissioner appointed.¹⁵³ The Security Council in a number of resolutions upheld the action of the Assembly and called upon South Africa to withdraw its administration from the territory. It also requested other states to refrain from dealing with the South African government in so far as Namibia was concerned.¹⁵⁴

The Security Council ultimately turned to the International Court and requested an Advisory Opinion as to the *Legal Consequences for States of the Continued Presence of South Africa in Namibia*.¹⁵⁵ The Court concluded that

South Africa's presence in Namibia was indeed illegal in view of the series of events culminating in the UN resolutions on the grounds of a material breach of a treaty (the mandate agreement) by South Africa, and further that 'a binding determination made by a competent organ of the United Nations to the effect that a situation is illegal cannot remain without consequence'. South Africa was obligated to withdraw its administration from the territory, and other states members of the United Nations were obliged to recognise the illegality and the invalidity of its acts with regard to that territory and aid the United Nations in its efforts concerning the problem.¹⁵⁶

The opinion was approved by the Security Council in resolution 301 (1971), which also reaffirmed the national unity and territorial integrity of Namibia. In 1978, South Africa announced its acceptance of proposals negotiated by the five Western contact powers (the United Kingdom, the United States, France, Canada and West Germany) for Namibian independence involving a UN supervised election and peacekeeping force.¹⁵⁷ After some difficulties,¹⁵⁸ Namibia finally obtained its independence on 23 April 1990.¹⁵⁹

Germany 1945

With the defeat of Germany on 5 June 1945, the Allied Powers assumed 'supreme authority' with regard to that country, while expressly disclaiming any intention of annexation.¹⁶⁰ Germany was divided into four occupation zones with four-power control over Berlin. The Control Council established by the Allies acted on behalf of Germany and in such capacity entered into binding legal arrangements. The state of Germany continued, however, and the situation, as has been observed, was akin to legal representation or agency

of necessity.¹⁶¹ Under the 1952 Treaty between the three Western powers and the Federal Republic of Germany, full sovereign powers were granted to the latter subject to retained powers concerning the making of a peace treaty, and in 1972 the Federal Republic of Germany and the German Democratic Republic, established in 1954 by the Soviet Union in its zone, recognised each other as sovereign states.¹⁶²

However, following a series of dramatic events during 1989 in Central and Eastern Europe, deriving in essence from the withdrawal of Soviet control, the drive for a reunified Germany in 1990 became unstoppable.¹⁶³ A State Treaty on German Economic, Monetary and Social Union was signed by the Finance Ministers of the two German states on 18 May and this took effect on 1 July.¹⁶⁴ A State Treaty on German Unification was signed on 31 August, providing for unification on 3 October by the accession to the Federal Republic of Germany of the *Länder* of the German Democratic Republic under article 23 of the Basic Law of the Federal Republic, with Berlin as the capital.¹⁶⁵ The external obstacle to unity was removed by the signing on 12 September of the Treaty on the Final Settlement with Respect to Germany, between the two German states and the four wartime allies (the United Kingdom, the United States, the Soviet Union and France).¹⁶⁶ Under this treaty, a reunified Germany agreed to accept the current Oder–Neisse border with Poland and to limit its armed forces to 370,000 persons, while pledging not to acquire atomic, chemical or biological weapons. The Agreement on the Settlement of Certain Matters Relating to Berlin between the Federal Republic and the three Western powers on 25 September 1990 provided for the relinquishment of Allied rights with regard to Berlin.¹⁶⁷

Condominium

In this instance two or more states equally exercise sovereignty with regard to a territory and its inhabitants. There are arguments as to the relationship between the states concerned, the identity of the sovereign for the purposes of the territory and the nature of the competences involved.¹⁶⁸ In the case of the New Hebrides, a series of Anglo–French agreements established a region of joint influence, with each power retaining sovereignty over its nationals and neither exercising separate authority over the area.¹⁶⁹ A Protocol listed the functions of the condominiumal government and vested the power to issue joint regulations respecting them in a British and a French High Commissioner. This power was delegated to resident commissioners who dealt with their respective nationals. Three governmental systems accordingly co-existed, with something of a legal vacuum with regard to land tenure and the civil transactions of the indigenous population.¹⁷⁰ The process leading to the independence of the territory also reflected its unique status as a condominium.¹⁷¹ It was noted that the usual independence Bill would not have been appropriate, since the New Hebrides was not a British colony. Its legal status as an Anglo-French condominium had been established by international agreement and could only be terminated in the same fashion. The nature of the condominium was such that it assumed that the two metropolitan powers would always act together and unilateral action was not provided for in the basic constitutional documents.¹⁷² The territory became independent on 30 July 1980 as the state of Vanuatu. The entity involved prior to independence grew out of an international treaty and established an administrative entity arguably distinct from its metropolitan governments, but

more likely operating on the basis of a form of joint agency with a range of delegated powers.¹⁷³

The Central American Court of Justice in 1917¹⁷⁴ held that a condominium existed with regard to the Gulf of Fonseca providing for rights of co-ownership of the three coastal states of Nicaragua, El Salvador and Honduras. The issue was raised in the *El Salvador/Honduras* case before the International Court of Justice.¹⁷⁵ The Court noted that a condominium arrangement being ‘a structured system for the joint exercise of sovereign governmental powers over a territory’ was normally created by agreement between the states concerned, although it could be created as a juridical consequence of a succession of states (as in the Gulf of Fonseca situation itself), being one of the ways in which territorial sovereignty could pass from one state to another. The Court concluded that the waters of the Gulf of Fonseca beyond the three-mile territorial sea were historic waters and subject to a joint sovereignty of the three coastal states. It based its decision, apart from the 1917 judgment, upon the historic character of the Gulf waters, the consistent claims of the three coastal states and the absence of protest from other states.¹⁷⁶

International Administration of Territories

In such cases a particular territory is placed under a form of international regime, but the conditions under which this has been done have varied widely, from autonomous areas within states to relatively independent entities.¹⁷⁷ The United Nations is able to assume the administration of territories in specific circumstances. The trusteeship system was founded

upon the supervisory role of the United Nations,¹⁷⁸ while in the case of *South West Africa*, the General Assembly supported by the Security Council ended South Africa's mandate and asserted its competence to administer the territory pending independence.¹⁷⁹ Beyond this, UN organs exercising their powers may assume a variety of administrative functions over particular territories where issues of international concern have arisen. Attempts were made to create such a regime for Jerusalem under the General Assembly partition resolution for Palestine in 1947 as a '*corpus separatum* under a special international regime . . . administered by the United Nations', but this never materialised for a number of reasons.¹⁸⁰ Further, the Security Council in 1947 adopted a Permanent Statute for the Free Territory of Trieste, under which the Council was designated as the supreme administrative and legislative authority of the territory.¹⁸¹

More recently, the United Nations has become more involved in important administrative functions, authority being derived from a mixture of international agreements, domestic consent and the powers of the Security Council under Chapter VII to adopt binding decisions concerning international peace and security, as the case may be. For example, the 1991 Paris Peace Agreements between the four Cambodian factions authorised the United Nations to establish civil administrative functions in that country pending elections and the adoption of a new constitution. This was accomplished through the UN Transitional Authority in Cambodia (UNTAC), to which were delegated 'all powers necessary to ensure the implementation' of the peace settlement and which also exercised competence in areas such as foreign affairs, defence, finance and so forth.¹⁸²

Annex 10 of the General Framework Agreement for Peace in Bosnia and Herzegovina (the Dayton Peace Agreement)¹⁸³ established the post of High Representative with extensive powers with regard to the civilian implementation of the peace agreement and with the final authority to interpret the civilian aspects of the settlement.¹⁸⁴ This was endorsed and confirmed by the Security Council in binding resolution 1031 (1995). The relatively modest powers of the High Representative under Annex 10 were subsequently enlarged in practice by the Peace Implementation Council, a body with fifty-five members established to review progress regarding the peace settlement, in the decisions it took at the Bonn Summit of December 1997 (the Bonn Conclusions).¹⁸⁵ These provided, for example, for measures to be taken against persons found by the High Representative to be in violation of legal commitments made under the Peace Agreement. This has included removal from public office, the competence to impose interim legislation where Bosnia's institutions had failed to do so¹⁸⁶ and 'other measures to ensure implementation of the Peace Agreement throughout Bosnia and Herzegovina and its Entities, as well as the smooth running of the common institutions'.¹⁸⁷ The High Representative has taken a wide-ranging number of decisions, from imposing the Law on Citizenship of Bosnia and Herzegovina in December 1997¹⁸⁸ and imposing the Law on the Flag of Bosnia and Herzegovina in February 1998¹⁸⁹ to enacting the Law on Changes and Amendments to the Election Law in January 2006 to mark the ongoing process of transferring High Representative powers to the domestic authorities in the light of the improving situation.¹⁹⁰ This unusual structure with regard to an independent state arises, therefore, from a mix of the consent of the parties and binding Chapter VII activity by the Security Council.

In resolution 1244 (1999), the Security Council authorised the Secretary-General to establish an interim international civil presence in Kosovo (United Nations Mission in Kosovo, UNMIK),¹⁹¹ following the withdrawal of Yugoslav forces from that part of the country consequent upon NATO action. Under this resolution, UNMIK performed a wide range of administrative functions, including health and education, banking and finance, post and telecommunications, and law and order. It was tasked *inter alia* to promote the establishment of substantial autonomy and self-government in Kosovo, to coordinate humanitarian and disaster relief, support the reconstruction of key infrastructure, maintain civil law and order, promote human rights and assure the return of refugees. Administrative structures were established and elections held. The first regulation adopted by the Special Representative of the UN Secretary-General appointed under resolution 1244 vested all legislative and executive authority in Kosovo in UNMIK as exercised by the Special Representative.¹⁹² This regulation also established that the law in the territory was that in existence in so far as this did not conflict with the international standards referred to in section 2 of the regulation, the fulfilment of the mandate given to UNMIK under resolution 1244, or the present or any other regulation issued by UNMIK. A Constitutional Framework for Provisional Self-Government was promulgated by the Special Representative in May 2001.¹⁹³ This comprehensive administrative competence was founded upon the reaffirmation of Yugoslavia's sovereignty and territorial integrity (and thus continuing territorial title over the province) and the requirement for 'substantial autonomy and meaningful self-administration for Kosovo'.¹⁹⁴ Accordingly, this arrangement illustrated a complete division between title to the territory and the exercise of power and control over it. It flowed from a

binding Security Council resolution, which referred to Yugoslavia's consent to the essential principles therein contained.¹⁹⁵

The UN Transitional Administration in East Timor (UNTAET) was established by Security Council resolution 1272 (1999) acting under Chapter VII. It was 'endowed with overall responsibility for the administration of East Timor' and 'empowered to exercise all legislative and executive authority, including the administration of justice'.¹⁹⁶ Its widespread mandate included, in addition to public administration, humanitarian responsibilities and a military component and it was authorised to take all necessary measures to fulfil its mandate. UNTAET's mandate was extended to 20 May 2002, the date of East Timor's independence as the new state of Timor-Leste.¹⁹⁷ It was thereafter succeeded by the UN Mission of Support in East Timor (UNMISET).¹⁹⁸

Taiwan¹⁹⁹

This territory was ceded by China to Japan in 1895 by the Treaty of Shimonoseki and remained in the latter's hands until 1945. Japan undertook on surrender not to retain sovereignty over Taiwan and this was reaffirmed under the Peace Treaty 1951 between the Allied Powers (but not the Soviet Union and China) and Japan, under which all rights to the island were renounced without specifying any recipient. After the Chinese Civil War, the communist forces took over the mainland while the nationalist regime installed itself on Taiwan (Formosa) and the Pescadores. Both the United States and the United Kingdom took the view at that stage that sovereignty over Taiwan was uncertain or undetermined.²⁰⁰ The key point affecting status has been that both governments have claimed to represent the whole of China. No claim of separate statehood for Taiwan has been made and in such a case it is difficult to maintain that such an unsought status exists. Total lack of recognition of Taiwan as a separate independent state merely reinforces this point. In 1979, the United States recognised the People's Republic of China as the sole and legitimate government of China.²⁰¹ Accordingly, Taiwan would appear to be a non-state territorial entity which is capable of acting independently on the international scene, but is most probably *de jure* part of China. It is interesting to note that when in early 1990 Taiwan sought accession to the General Agreement on Tariffs and Trade (GATT), it did so by requesting entry for the 'customs territory' of 'Taiwan, Penghu, Kinmen and Matsu', thus avoiding an assertion of statehood.²⁰² The accession of 'Chinese Taipei' to the World Trade Organization was approved by the Ministerial Conference in November 2001.²⁰³

The ‘Turkish Republic of Northern Cyprus’ (TRNC)²⁰⁴

In 1974, following a coup in Cyprus backed by the military regime in Greece, Turkish forces invaded the island. The Security Council in resolution 353 (1974) called upon all states to respect the sovereignty, independence and territorial integrity of Cyprus and demanded an immediate end to foreign military intervention in the island that was contrary to such respect. On 13 February 1975, the Turkish Federated State of Cyprus was proclaimed in the area occupied by Turkish forces. A resolution adopted at the same meeting of the Council of Ministers and the Legislative Assembly of the Autonomous Turkish Cypriot Administration at which the proclamation was made, emphasised the determination ‘to oppose resolutely all attempts against the independence of Cyprus and its partition or union with any other state’ and resolved to establish a separate administration until such time as the 1960 Cyprus Constitution was amended to provide for a federal republic.²⁰⁵

On 15 November 1983, the Turkish Cypriots proclaimed their independence as the ‘Turkish Republic of Northern Cyprus’.²⁰⁶ This was declared illegal by the Security Council in resolution 541 (1983) and its withdrawal called for. All states were requested not to recognise the ‘purported state’ or assist it in any way. This was reiterated in Security Council resolution 550 (1984). The Committee of Ministers of the Council of Europe decided that it continued to regard the government of the Republic of Cyprus as the sole legitimate government of Cyprus and called for respect for the independence and territorial integrity of Cyprus.²⁰⁷ The European Court of Human Rights in its judgment of 10 May 2001 in *Cyprus v. Turkey* concluded that ‘it is evident from international practice . . . that the international community does not

recognise the “TRNC” as a state under international law’ and declared that ‘the Republic of Cyprus has remained the sole legitimate government of Cyprus’.²⁰⁸ In the light of this and the very heavy dependence of the territory upon Turkey, it cannot be regarded as a sovereign state, but remains as a *de facto* administered entity within the recognised confines of the Republic of Cyprus and dependent upon Turkish assistance.²⁰⁹

The Saharan Arab Democratic Republic²¹⁰

In February 1976, the Polisario liberation movement conducting a war to free the Western Saharan territory from Moroccan control declared the independent sovereign Saharan Arab Democratic Republic (SADR).²¹¹ Over the succeeding years, many states recognised the new entity, including a majority of Organisation of African Unity members. In February 1982, the OAU Secretary-General sought to seat a delegation from SADR on that basis, but this provoked a boycott by some nineteen states and a major crisis. However, in November 1984, the Assembly of Heads of State and Government of the OAU did agree to seat a delegation from SADR, despite Morocco's threat of withdrawal from the organisation.²¹² This, therefore, can be taken as OAU recognition of statehood and, as such, of evidential significance. However, although in view of the arguably reduced importance of the effectiveness of control criterion in such self-determination situations a credible argument could now be made regarding SADR's statehood, the issue is still controversial in view of the continuing hostilities and effective Moroccan control. It is to be noted that the legal counsel to the United Nations gave an opinion in 2002 to the effect that Western Sahara continued as a non-self-governing territory and that this status was unaffected by the transfer of administrative authority to Morocco and Mauritania in 1975. The view was also taken that exploration and exploitation activities undertaken in disregard of the interests and wishes of the people of Western Sahara would violate international law.²¹³ The Council of the European Union approved a trade agreement with Morocco in 2010, being a development of a 2000 Association Agreement, which was challenged by Polisario on the basis that

Morocco had been applying the 2000 agreement to Western Sahara. The Court of Justice of the European Union issued a judgment in December 2016, denying the standing of Polisario to challenge the decision, but holding that the General Court had erred in law when it assumed that the Association Agreement applied also to Western Sahara.²¹⁴

Kosovo

Following a period of UN administration authorised by Security Council resolution 1244 (1999),²¹⁵ the Yugoslav (later Serbian) province of Kosovo declared independence on 17 February 2008. This was preceded by the Comprehensive Proposal for the Kosovo Status Settlement formulated by Martti Ahtisaari which had in March 2007 called for independence for Kosovo with international supervision.²¹⁶ This was rejected by Serbia. The international community was divided as to the question of recognition of Kosovo's independence. It was recognised swiftly by the United States, the United Kingdom, Germany and the majority of EU states, Japan and others. Russia and Serbia, on the other hand, made it clear that they opposed recognition, as did Spain and Greece. Accordingly, in the current circumstances, while many countries recognise Kosovo, many do not and entry into the United Nations is not possible until, for example, Russia is prepared to lift its opposition in view of its veto power.²¹⁷ The International Court of Justice in its Advisory Opinion on the *Accordance with International Law of the Unilateral Declaration of Independence in Respect of Kosovo*, although faced with wide-ranging arguments as to that entity and the criteria of statehood, confined itself to a narrow interpretation of the issue

and found that the declaration of independence was not itself contrary to international law.²¹⁸

At the moment of writing, Kosovo is recognised as a state by 116 states;²¹⁹ however, this excludes some key members of the international community so that the question as to the status of Kosovo as a sovereign state is still, for the moment, open.

Palestine²²⁰

The Palestine Liberation Organization (PLO) was permitted by the Security Council from 1972 to participate in its debates with the same rights of participation as conferred upon a member state not a member of the Council, although this was controversial.²²¹ In 1974, the General Assembly invited the PLO to participate as an observer.²²² In December 1988, the General Assembly decided that the designation ‘Palestine’ should be used in place of the designation ‘Palestine Liberation Organization’ in the UN system.²²³

The position of the PLO, however, began to evolve considerably with the Israel–PLO Declaration of Principles on Interim Self-Government Arrangements signed in Washington, DC on 13 September 1993.²²⁴ By virtue of this Declaration, the PLO team in the Jordanian–Palestinian delegation to the Middle East Peace Conference was accepted as representing the Palestinian people. It was agreed to establish a Palestinian Interim Self-Government Authority as an elected Council for the Palestinian people in the West Bank and Gaza (occupied by Israel since 1967) for a transitional period of up to five years leading to a permanent solution. Its jurisdiction was to

cover the territory of the West Bank and Gaza, save for issues to be negotiated in the permanent status negotiations. Upon the entry into force of the Declaration, a transfer of authority was to commence from the Israel military government and its civil administration. The Cairo Agreement of 4 May 1994²²⁵ provided for the immediate withdrawal of Israeli forces from Jericho and the Gaza Strip and transfer of authority to a separately established Palestinian Authority. This Authority, distinct from the PLO it should be emphasised, was to have certain specified legislative, executive and judicial powers. The process continued with a transfer of further powers and responsibilities in a Protocol of 27 August 1995 and with the Interim Agreement on the West Bank and Gaza of 28 September 1995, under which an additional range of powers and responsibilities was transferred to the Palestinian Authority pending the election of the Council and arrangements were made for Israeli withdrawal from a number of cities and villages on the West Bank.²²⁶ An accord concerning Hebron followed in 1997²²⁷ and the Wye River agreement in 1998, both marking further Israeli redeployments, while the Sharm el Sheikh memorandum and a later Protocol of 1999 concerned safe-passage arrangements between the Palestinian Authority areas in Gaza and the West Bank.²²⁸ The increase in the territorial and jurisdictional competence of the Palestinian Authority established as a consequence of these arrangements raised the question of legal personality. While Palestinian statehood was clearly not accepted by the international community, the Palestinian Authority could be regarded as possessing some form of limited international personality.²²⁹ Such personality, however, derived from the agreements between Israel and the PLO and existed separately from the personality of the PLO as a national liberation movement, which relied upon the recognition of third parties.²³⁰ Since neither side has to

date denounced the Oslo Accords and succeeding instruments, they remain in effect.

However, on 22 January 2009, the Palestinian Authority purported to accept the jurisdiction of the International Criminal Court,²³¹ such jurisdiction being limited under the Court's Statute to states.²³² After extensive argument, the Prosecutor of the Court made a decision on 3 April 2012 refusing the request on the basis that he did not possess the necessary competence.²³³ On 23 September 2011, the Palestinian Authority applied to become a member of the United Nations,²³⁴ but this did not succeed due to deep divisions (and the existence of the veto power) in the Security Council, whose approval is required for membership.²³⁵ In November 2012, the General Assembly voted to accord 'Palestine' the status of non-member observer state.²³⁶ On 1 January 2015, the President of the Palestine Authority (in the name of 'Palestine') issued a declaration accepting the jurisdiction of the International Criminal Court with regard to alleged crimes committed since 13 June 2014. On the following day Palestine acceded to the Rome Statute by depositing its instrument of accession with the UN Secretary-General and the Statute of the Court was deemed to enter into force on 1 April 2015.²³⁷ On 16 January 2016, the Prosecutor opened a preliminary examination of the situation in Palestine.²³⁸ On 22 May 2018, Palestine further referred the situation to the Prosecutor.²³⁹ The Prosecutor concluded that there was a reasonable basis to initiate an investigation, but in view of the complexity of the situation sought an opinion from the Pre-Trial Chamber as to whether the Court's territorial jurisdiction included 'the Occupied Palestinian Territory, that is the West Bank, including East Jerusalem, and Gaza'.²⁴⁰

A number of states recognise Palestine as an independent state²⁴¹ and Palestine has joined a number of international organisations and become a party to a number of international treaties.²⁴²

However, the matter remains controversial due to the divisions within the international community and the continuing application of the Oslo Accords (in the absence of the denunciation of the agreements by the parties), as well as the efforts to seek a peace agreement founded upon the acceptance of two states (Israel and Palestine) within the boundaries of mandated Palestine.

Various Secessionist Claimants

A number of secessionist claims from recognised independent states exist where such claimants in practice exercise some degree of effective control over all or part of the territory claimed. The former territory of British Somaliland, being the northern part of the new state of Somalia after its independence in 1960, asserted its own independence on 17 May 1991.²⁴³ A constitution was adopted in 2001, but the Organisation of African Unity refused to support any action that would affect the unity and sovereignty of Somalia.²⁴⁴ ‘Somaliland’ is unrecognised by any state or international organisation, although a number of dealings with the authorities of that entity have taken place.²⁴⁵ Following an armed conflict between Armenia and Azerbaijan in the early 1990s, Armenian forces captured and occupied the area of Nagorno-Karabakh (and seven surrounding districts) from Azerbaijan. Nagorno-Karabakh, an area with a majority ethnic Armenian population, declared its independence from Azerbaijan as the ‘Nagorno-Karabakh Republic’ (‘NKR’). However, this has not been recognised by any state

(including Armenia) and the UN Security Council adopted resolutions 822, 853, 874 and 884 reaffirming the sovereign and territorial integrity of Azerbaijan and calling for withdrawal from the occupied territories of Azerbaijan.²⁴⁶ The issue of the status of the NKR came before the European Court of Human Rights in the context of individual applications. In *Chiragov v. Armenia* (Merits), the leading case, the court in its judgment,²⁴⁷ reflecting the similar cases concerning northern Cyprus,²⁴⁸ concluded that Armenia ‘has had a significant and decisive influence over the “NKR”’ and

that the two entities are highly integrated in virtually all important matters and that this situation persists to this day. In other words, the ‘NKR’ and its administration survives by virtue of the military, political, financial and other support given to it by Armenia which, consequently, exercises effective control over Nagorno-Karabakh and the surrounding territories, including the district of Lachin. The matters complained of therefore come within the jurisdiction of Armenia for the purposes of Article 1 of the Convention.

The former Soviet republic of Moldova became independent on 23 June 1990 as the Soviet Union dissolved. On 2 September 1990, the ‘Moldavian Republic of Transdnistria’ was proclaimed as an independent state in an area of Moldova bordering Ukraine. This entity has been able to maintain itself as a result of Russian assistance. However, it has not been recognised by any

state.²⁴⁹ Similarly, the areas of South Ossetia and Abkhazia in Georgia have established separate *de facto* governments respectively with Russian support.²⁵⁰ Russia and a very few states have recognised them,²⁵¹ but in the light of effective Russian control and the paucity of international recognition, there can be no question of independent statehood.²⁵² The region of Catalonia sought to secede from Spain following a referendum in October 2017 authorised by a Catalanian Referendum Law adopted the previous month. The Spanish Constitutional Court held that the Constitution did not recognise a unilateral right of secession and that international law only recognised such a right in the context of people under foreign subjugations, domination or exploitation. Beyond that, the principle of territorial integrity applied. Accordingly, the Referendum Law was unlawful.²⁵³ International reaction was unanimous in reaffirming Spain's territorial integrity and disregarding Catalonia's declaration of independence.²⁵⁴

Associations of States

There are a number of ways in which states have become formally associated with one another. Such associations do not constitute states, but have a certain effect upon international law. Confederations, for example, are probably the closest form of cooperation and they generally involve several countries acting together by virtue of an international agreement, with some kind of central institutions with limited functions.²⁵⁵ This is to be contrasted with federations. A federal unit is a state with strong centralised organs and usually a fairly widespread bureaucracy with extensive powers over the citizens of the state, even though the powers of the state are divided between

the different units.²⁵⁶ However, a state may comprise component units with extensive powers.²⁵⁷

There are in addition certain ‘associated states’ which by virtue of their smallness and lack of development have a close relationship with another state. One instance is the connection between the Cook Islands and New Zealand, where internal self-government is allied to external dependence.²⁵⁸ Another example was the group of islands which constituted the Associated States of the West Indies. These were tied to the United Kingdom by the terms of the West Indies Act 1967, which provided for the latter to exercise control with regard to foreign and defence issues. Nevertheless, such states were able to and did attain their independence.²⁵⁹

The status of such entities in an association relationship with a state will depend upon the constitutional nature of the arrangement and may in certain circumstances involve international personality distinct from the metropolitan state depending also upon international acceptance. It must, however, be noted that such status is one of the methods accepted by the United Nations of exercising the right to self-determination.²⁶⁰ Provided that an acceptable level of powers, including those dealing with domestic affairs, remain with the associated state, and that the latter may without undue difficulty revoke the arrangement, some degree of personality would appear desirable and acceptable.

The Commonwealth of Nations (the former British Commonwealth) is perhaps the most well-known of the loose associations which group together sovereign states on the basis usually of common interests and historical ties.

Its members are all fully independent states who cooperate through the assistance of the Commonwealth Secretariat and periodic conferences of Heads of Government. Regular meetings of particular ministers also take place. The Commonwealth does not constitute a legally binding relationship, but operates as a useful forum for discussions. Relations between Commonwealth members display certain special characteristics: for example, ambassadors are usually referred to as High Commissioners. It would appear unlikely in the circumstances that it possesses separate international personality.²⁶¹ However, the more that the Commonwealth develops distinctive institutions and establishes common policies with the capacity to take binding decisions, the more the argument may be made for international legal personality.

Following the dissolution of the Soviet Union and the coming to independence of the constituent republics, with the Russian Federation being deemed the continuation of the Soviet Union, it was decided to establish the Commonwealth of Independent States.²⁶² Originally formed by Russia, Belarus and Ukraine on 8 December 1991, it was enlarged on 21 December 1991 to include eleven former republics of the Soviet Union. Georgia joined the CIS on 8 October 1993. Thus all the former Soviet Republics, excluding the three Baltic states, are now members of that organisation.²⁶³ The agreement establishing the CIS provided for respect for human rights and other principles and called for co-ordination between the member states. The Charter of the CIS was adopted on 22 June 1993 as a binding international treaty²⁶⁴ and laid down a series of principles ranging from respect for the sovereignty and territorial integrity of states, self-determination of peoples, prohibition of the use or threat of force and settlement of disputes by peaceful

means. It was noted that the CIS was neither a state nor ‘supranational’ (article 1) and a number of common coordinating institutions were established. In particular, the Council of Heads of State is the ‘highest body of the Commonwealth’ and it may ‘take decisions on the principal issues relating to the activity of the member states in the field of their mutual interests’ (article 21), while the Council of the Heads of Government has the function of coordinating cooperation among executive organs of member states (article 22). Both Councils may take decisions on the basis of consensus (article 23). A Council of Foreign Ministers was also established together with a Co-ordination and Consultative Committee, as a permanent executive and coordinating body of the Commonwealth.²⁶⁵ The CIS has adopted in addition a Treaty on Economic Union²⁶⁶ and a Convention on Human Rights and Fundamental Freedoms.²⁶⁷ The increasing development of the CIS as a directing international institution suggests its possession of international legal personality.

The European Union²⁶⁸ is an association, of twenty-seven states,²⁶⁹ which has established a variety of common institutions and which has the competence to adopt not only legal acts binding upon member states, but also acts having direct effect within domestic legal systems. The Union consists essentially of the European Community (itself an amalgam of the European Coal and Steel Community, EURATOM and the European Economic Community) and two additional pillars, viz. the Common Foreign and Security Policy, and Justice and Home Affairs. Only the European Coal and Steel Community Treaty provided explicitly for international legal personality (article 6), but the case-law of the European Court of Justice demonstrates its belief that the other two communities also possess such

personality.²⁷⁰ It is also established that Community law has superiority over domestic law. The European Court of Justice early in the history of the Community declared that the Community constituted ‘a new legal order of international law’.²⁷¹ It has also been noted that although the European Union constitutes a separate and autonomous legal order,²⁷² it is one that is founded upon international treaties and thus part of international law at least to that extent.²⁷³ In the circumstances, it seems hard to deny that the Community possesses international legal personality, but unlikely that the cooperative processes involved in the additional two pillars are so endowed.²⁷⁴ The European Community has the power to conclude and negotiate agreements in line with its external powers, to become a member of an international organisation and to have delegations in non-member countries. However, the Treaty on European Union contained no provision on the legal personality of the Union. The Union does not have institutionalised treaty-making powers, but is able to conclude agreements through the Council of the European Union or by asserting its position on the international stage, especially in connection with the Common Foreign and Security Policy. However, article 55 of the Treaty of Lisbon 2007 provided for the insertion into the Treaty on European Union of a new article 46A, which expressly asserts that the Union has legal personality.²⁷⁵

Conclusions

Whether or not the entities discussed above constitute international persons or indeed states or merely part of some other international person is a matter for careful consideration in the light of the circumstances of the case, in particular the claims made by the entity in question, the facts on the ground,

especially with regard to third-party control and the degree of administrative effectiveness manifested, and the reaction of other international persons. The importance here of recognition, acquiescence and estoppel is self-evident. Acceptance of some international personality need not be objective so as to bind non-consenting states nor unlimited as to time and content factors. These elements will be considered below. It should, however, be noted here that the international community itself also has needs and interests that bear upon this question as to international status. This is particularly so with regard to matters of responsibility and the protection of persons via the rules governing the recourse to and conduct of armed conflicts.²⁷⁶

Special Cases

The Sovereign Order of Malta

This Order, established during the Crusades as a military and medical association, ruled Rhodes from 1309 to 1522 and was given to Malta by treaty with Charles V in 1530 as a fief of the Kingdom of Sicily. This sovereignty was lost in 1798, and in 1834 the Order established its headquarters in Rome as a humanitarian organisation.²⁷⁷ The Order already had international personality at the time of its taking control of Malta and even when it had to leave the island it continued to exchange diplomatic legations with most European countries. The Italian Court of Cassation in 1935 recognised the international personality of the Order, noting that ‘the modern theory of the subjects of international law recognises a number of collective units whose composition is independent of the nationality of their constituent members and whose scope transcends by virtue of their universal

character the territorial confines of any single state'.²⁷⁸ This is predicated upon the functional needs of the entity as accepted by third parties. It is to be noted, for example, that the Order maintains diplomatic relations with or is recognised by over eighty states and has observer status in the UN General Assembly.²⁷⁹ It is not a state and it is questionable whether it has general international personality beyond those states and organisations expressly recognising it.²⁸⁰

The Holy See and the Vatican City²⁸¹

In 1870, the conquest of the Papal states by Italian forces ended their existence as sovereign states. The question therefore arose as to the status in international law of the Holy See, deprived, as it then was, of normal territorial sovereignty. In 1929, the Lateran Treaty was signed with Italy which recognised the state of the Vatican City and 'the sovereignty of the Holy See in the field of international relations as an attribute that pertains to the very nature of the Holy See, in conformity with its traditions and with the demands of its mission in the world'.²⁸² The question thus interrelates with the problem of the status today of the Vatican City. The latter has no permanent population apart from Church functionaries and exists only to support the work of the Holy See. Italy carries out a substantial number of administrative functions with regard to the City. Some writers accordingly have concluded that it cannot be regarded as a state.²⁸³ Nevertheless, it is a party to many international treaties and is a member of the Universal Postal Union and the International Telecommunications Union. It would appear that by virtue of recognition and acquiescence in the context of its claims, it does

exist as a state. The Vatican City is closely linked with the Holy See and they are essentially part of the same construct.

The Holy See, the central organisational authority of the Catholic Church, continued after 1870 to engage in diplomatic relations and enter into international agreements and concordats.²⁸⁴ Accordingly, its status as an international person was accepted by such partners. In its joint eleventh and twelfth report submitted to the UN Committee on the Elimination of Racial Discrimination in 1993,²⁸⁵ the Holy See reminded the Committee of its ‘exceptional nature within the community of nations; as a sovereign subject of international law, it has a mission of an essentially religious and moral order, universal in scope, which is based on minimal territorial dimensions guaranteeing a basis of autonomy for the pastoral ministry of the Sovereign Pontiff’.²⁸⁶ Crawford has concluded that the Holy See is both an international legal person in its own right and the government of a state (the Vatican City).²⁸⁷

Insurgents and Belligerents

International law has recognised that such entities may in certain circumstances, primarily dependent upon the *de facto* administration of specific territory, enter into valid arrangements.²⁸⁸ In addition they will be bound by the rules of international law with regard to the conduct of hostilities and may in due course be recognised as governments. The traditional law is in process of modification as a result of the right to self-determination, and other legal principles such as territorial integrity,

sovereign equality and non-intervention in addition to recognition will need to be taken into account.²⁸⁹

International Public Companies

This type of entity, which may be known by a variety of names, for example multinational public enterprises or international bodies corporate, is characterised in general by an international agreement providing for cooperation between governmental and private enterprises.²⁹⁰ One writer, for example, defined such entities as corporations which

have not been constituted by the exclusive application of one national law; whose members and directors represent several national sovereignties; whose legal personality is not based, or at any rate not entirely, on the decision of a national authority or the application of a national law; whose operations, finally, are governed, at least partially, by rules that do not stem from a single or even from several national laws.²⁹¹

Such enterprises may vary widely in constitutional nature and in competences. Examples of such companies would include INTELSAT, established in 1973 as an intergovernmental structure for a global commercial telecommunications satellite system; Eurofima, established in 1955 by fourteen European states in order to lease equipment to the railway

administrations of those states; and the Bank of International Settlement, created in 1930 by virtue of a treaty between five states, and the host country, Switzerland. The personality question will depend upon the differences between municipal and international personality. If the entity is given a range of powers and is distanced sufficiently from municipal law, an international person may be involved, but it will require careful consideration of the circumstances.

Transnational Corporations

Another possible candidate for international personality is the transnational or multinational enterprise. Various definitions exist of this important phenomenon in international relations.²⁹² They in essence constitute private business organisations comprising several legal entities linked together by parent corporations and are distinguished by size and multinational spread. In the years following the *Barcelona Traction* case,²⁹³ an increasing amount of practice has been evident on the international plane dealing with such corporations. What has been sought is a set of guidelines governing the major elements of the international conduct of these entities.²⁹⁴ Progress has been slow and several crucial issues remain to be resolved, including the legal effect, if any, of such guidelines.²⁹⁵ The question of the international personality of transnational corporations remains an open one.²⁹⁶ However, on 6 July 2011, the UN Human Rights Council adopted the Guiding Principles on ‘Business and Human Rights: Implementing the United Nations “Protect, Respect and Remedy” Framework’.²⁹⁷ These Principles do not create international legal obligations as such. They emphasise the duty of states to respect, protect and fulfil the human rights of individuals and in

particular to protect against human rights abuse within their territory and/or jurisdiction by third parties, including business enterprises. States must ensure that those affected by abuses taking place within their territory and/or jurisdiction must have access to an effective remedy. The Principles declare that business enterprises should respect human rights, avoid infringing on the rights of others and address adverse human rights impacts with which they are involved. The reference to human rights here refers to internationally recognised human rights. It is provided that the responsibility to respect human rights is a global standard of expected conduct for business enterprises. The realm is that of ‘soft law’, of expectations, of anticipation, not of binding international (as opposed to national) legal regulation. This responsibility to respect human rights requires that business enterprises avoid causing or contributing to adverse human rights impacts through their own activities and to seek to prevent or mitigate adverse human rights impacts that are *directly linked* to their operations, products or services by their business relationships.²⁹⁸

The Right of All Peoples to Self-Determination²⁹⁹

The Establishment of the Legal Right

This principle, which traces its origin to the concepts of nationality and democracy as evolved primarily in Europe, first appeared in major form after the First World War. Despite President Wilson’s efforts, it was not included in the League of Nations Covenant and it was clearly not regarded as a legal

principle.³⁰⁰ However, its influence can be detected in the various provisions for minority protection³⁰¹ and in the establishment of the mandates system based as it was upon the sacred trust concept. In the ten years before the Second World War, there was relatively little practice regarding self-determination in international law. A number of treaties concluded by the Soviet Union in this period noted the principle,³⁰² but in the *Aaland Islands* case it was clearly accepted by both the International Commission of Jurists and the Committee of Rapporteurs dealing with the situation that the principle of self-determination was not a legal rule of international law, but purely a political concept.³⁰³ The situation, which concerned the Swedish inhabitants of an island alleged to be part of Finland, was resolved by the League's recognition of Finnish sovereignty coupled with minority guarantees.

The Second World War stimulated further consideration of the idea and the principle was included in the UN Charter. Article 1(2) noted as one of the organisation's purposes the development of friendly relations among nations based upon respect for the principle of equal rights and self-determination, and article 55 reiterated the phraseology. It is disputed whether the reference to the principle in these very general terms was sufficient to entail its recognition as a binding right, but the majority view is against this. Not every statement of a political aim in the Charter can be regarded as automatically creative of legal obligations. On the other hand, its inclusion in the Charter, particularly within the context of the statement of purposes of the United Nations, provided the opportunity for the subsequent interpretation of the principle both in terms of its legal effect and consequences and with regard to its definition. It is also to be noted that Chapters XI and XII of the Charter

deal with non-self-governing and trust territories and may be seen as relevant within the context of the development and definition of the right to self-determination, although the term is not expressly used.³⁰⁴

Practice since 1945 within the United Nations, both generally as regards the elucidation and standing of the principle and more particularly as regards its perceived application in specific instances, can be seen as having ultimately established the legal standing of the right in international law. This may be achieved either by treaty or by custom or indeed, more controversially, by virtue of constituting a general principle of law. All these routes are relevant, as will be seen. The UN Charter is a multilateral treaty which can be interpreted by subsequent practice, while the range of state and organisation practice evident within the UN system can lead to the formation of customary law. The amount of material dealing with self-determination in the United Nations testifies to the importance of the concept and some of the more significant of this material will be briefly noted.

Resolution 1514 (XV), the Declaration on the Granting of Independence to Colonial Countries and Peoples, adopted in 1960 by eighty-nine votes to none, with nine abstentions, stressed that:

all peoples have the right to self-determination;
by virtue of that right they freely determine
their political status and freely pursue their
economic, social and cultural development.

Inadequacy of political, social, economic or educational preparedness was not to serve as a protest for delaying independence, while attempts aimed at the partial or total disruption of the national unity and territorial integrity of a country were deemed incompatible with the UN Charter. The Colonial Declaration set the terms for the self-determination debate in its emphasis upon the colonial context and its opposition to secession. The International Court described the Declaration as having ‘a declaratory character with regard to the right to self-determination as a customary norm, in view of its content and the conditions of its adoption’³⁰⁵ and underlined that ‘the wording used . . . has a normative character, in so far as it affirms that “[a]ll peoples have the right to self-determination”’.

The Declaration was reinforced by the establishment of a Special Committee on Decolonisation, which now deals with all dependent territories and has proved extremely active, and virtually all UN resolutions dealing with self-determination expressly refer to it.

In 1966, the General Assembly adopted the International Covenants on Human Rights. Both these Covenants have an identical first article, declaring *inter alia* that ‘[a]ll peoples have the right to self-determination. By virtue of that right they freely determine their political status’, while states parties to the instruments ‘shall promote the realisation of the right of self-determination and shall respect that right in conformity with the provisions of the Charter of the United Nations’. The Covenants came into force in 1976 and thus constitute binding provisions as between the parties, but in addition they also may be regarded as authoritative interpretations of several human rights provisions in the Charter, including self-determination. The 1970

Declaration on Principles of International Law Concerning Friendly Relations can be regarded as constituting an authoritative interpretation of the seven Charter provisions it expounds. The Declaration states *inter alia* that ‘by virtue of the principle of equal rights and self-determination of peoples enshrined in the Charter of the United Nations, all people have the right freely to determine . . . their political status’, while all states are under the duty to respect this right in accordance with the Charter. The Declaration was specifically intended to act as an elucidation of certain important Charter provisions and was indeed adopted without opposition by the General Assembly.³⁰⁶

In addition to this general, abstract approach, the UN organs have dealt with self-determination in a series of specific resolutions with regard to particular situations and this practice may be adduced as reinforcing the conclusions that the principle has become a right in international law by virtue of a process of Charter interpretation. Numerous resolutions have been adopted in the General Assembly and also the Security Council.³⁰⁷ It is also possible that a rule of customary law has been created since practice in the UN system is still state practice, but the identification of the *opinio juris* element is not easy and will depend upon careful assessment and judgment.

Judicial discussion of the principle of self-determination has been relatively rare and centres on the *Namibia*³⁰⁸ and *Western Sahara*³⁰⁹ Advisory Opinions by the International Court. In the former case, the Court emphasised that ‘the subsequent development of international law in regard to non-self-governing territories as enshrined in the Charter of the United Nations made the principle of self-determination applicable to all of them’.³¹⁰ The *Western*

Sahara case reaffirmed this point.³¹¹ This case arose out of the decolonisation of that territory, controlled by Spain as the colonial power, but subject to irredentist claims by Morocco and Mauritania. The Court was asked for an opinion with regard to the legal ties between the territory at that time and Morocco and the Mauritanian entity. The Court stressed that the request for an opinion arose out of the consideration by the General Assembly of the decolonisation of Western Sahara and that the right of the people of the territory to self-determination constituted a basic assumption of the questions put to the Court.³¹² After analysing the Charter provisions and Assembly resolutions noted above, the Court concluded that the ties which had existed between the claimants and the territory during the relevant period of the 1880s were not such as to affect the application of resolution 1514 (XV), the Colonial Declaration, in the decolonisation of the territory and in particular the right to self-determination. In other words, it is clear that the Court regarded the principle of self-determination as a legal one in the context of such territories.

The Court moved one step further in the *East Timor (Portugal v. Australia)* case³¹³ when it declared: ‘Portugal’s assertion that the right of peoples to self-determination, as it evolved from the Charter and from United Nations practice, has an *erga omnes* character, is irreproachable.’ The Court emphasised that the right of peoples to self-determination was ‘one of the essential principles of contemporary international law’.³¹⁴ However, in that case, the Court, while noting that for both Portugal and Australia, East Timor (under Indonesian military occupation since the invasion of 1975) constituted a non-self-governing territory and pointing out that the people of East Timor had the right to self-determination, held that the absence of Indonesia from

the litigation meant that the Court was unable to exercise its jurisdiction.³¹⁵ These propositions were all reaffirmed by the International Court in the *Construction of a Wall* Advisory Opinion,³¹⁶ in the *Kosovo* Advisory Opinion³¹⁷ and in the *Chagos* Advisory Opinion.³¹⁸

The issue of self-determination came before the Supreme Court of Canada in *Re Secession of Quebec* in 1998 in the form of three questions posed. The second question asked whether there existed in international law a right to self-determination which would give Quebec the right unilaterally to secede.³¹⁹ The Court declared that the principle of self-determination ‘has acquired a status beyond “convention” and is considered a general principle of international law’.³²⁰

The Definition of Self-Determination

If the principle exists as a legal one, and it is believed that such is the case, the question arises then of its scope and application. As noted above, UN formulations of the principle from the 1960 Colonial Declaration to the 1970 Declaration on Principles of International Law and the 1966 International Covenants on Human Rights stress that it is the right of ‘all peoples’. If this is so, then all peoples would become thereby to some extent subjects of international law as the direct repositories of international rights, and if the definition of ‘people’ used was the normal political–sociological one,³²¹ a major rearrangement of international law perceptions would have been created. In fact, that has not occurred and an international law concept of what constitutes a people for these purposes has been evolved, so that the ‘self’ in question must be determined within the accepted colonial territorial

framework. Attempts to broaden this have not been successful and the United Nations has always strenuously opposed any attempt at the partial or total disruption of the national unity and territorial integrity of a country.³²² The United Nations has based its policy on the proposition that ‘the territory of a colony or other non-self-governing territory has under the Charter a status separate and distinct from the territory of the state administering it’ and that such status was to exist until the people of that territory had exercised the right to self-determination.³²³ Self-determination has also been used in conjunction with the principle of territorial integrity so as to protect the territorial framework of the colonial period in the decolonisation process and to prevent a rule permitting secession from independent states from arising.³²⁴ The Canadian Supreme Court noted in *Re Secession of Quebec* that ‘international law expects that the right to self-determination will be exercised by peoples within the framework of existing sovereign states and consistently with the maintenance of the territorial integrity of those states’.³²⁵ It clearly applies within the context, however, of decolonisation of the European empires and thus provides the peoples of such territories with a degree of international personality. Self-determination as a concept is capable of developing further so as to include the right to secession from existing states, but that has not as yet convincingly happened. There is an argument, however, that seeks to build upon a savings clause in the 1970 Declaration on Principles of International Law Concerning Friendly Relations in order to justify an exception to the principle of territorial integrity and self-determination in this context. The clause in question states that nothing in the section on self-determination shall be construed as authorising or encouraging the dismembering or impairing of the territorial integrity of states conducting themselves in compliance with the principle of self-

determination ‘and thus possessed of a government representing the whole people belonging to the territory without distinction as to race, creed or colour’.³²⁶ However, whether this apparent affirmation of the principle of territorial integrity and internal self-determination can be seen *a contrario* as offering legitimacy to secession from an independent state in exceptional circumstances is highly controversial and indeed very doubtful.

The Canadian Supreme Court in *Re Secession of Quebec* emphasised that a right to *external* self-determination (i.e. a claim to a right to unilateral secession) ‘arises in only the most extreme of cases and, even then, under carefully defined circumstances’.³²⁷ The issue was raised in the *Kosovo* case. The Court in its Advisory Opinion noted that:

Whether, outside the context of non-self-governing territories and peoples subject to alien subjugation, domination and exploitation, the international law of self-determination confers upon part of the population of an existing State a right to separate from that State is, however, a subject on which radically different views were expressed by those taking part in the proceedings and expressing a position on the question. Similar differences existed regarding whether international law provides for a right of ‘remedial secession’ and, if so, in what circumstances.³²⁸

The Court did not take the matter further as it felt that it was not necessary to decide on such matters for the purposes of the case.³²⁹ Nevertheless, it would be extraordinary for such a foundational principle as territorial integrity to be subject to a critical exception by way of an *a contrario* argument and not by way of positive affirmation. Furthermore, there is no international practice demonstrating the unequivocal acceptance of the so-called right of remedial secession, whether in general terms or with regard to specific situations.

To summarise: the principle of self-determination provides that the people of the colonially defined territorial unit in question may freely determine their own political status. Such determination may result in independence, integration with a neighbouring state, free association with an independent state or any other political status freely decided upon by the people concerned.³³⁰ Self-determination also has a role within the context of creation of statehood, preserving the sovereignty and independence of states, in providing criteria for the resolution of disputes, and in the area of the permanent sovereignty of states over natural resources.³³¹

Individuals³³²

The question of the status in international law of individuals is closely bound up with the rise in the international protection of human rights and, increasingly, with regard to investment protection. This section will be confined to some general comments about the former. The object theory in this regard maintains that individuals constitute only the subject-matter of intended legal regulation as such. Only states, and possibly international organisations, are subjects of the law.³³³ This has been a theory of limited value. The essence of international law has always been its ultimate concern for the human being and this was clearly manifest in the Natural Law origins of classical international law.³³⁴ The growth of positivist theories, particularly in the nineteenth century, obscured this and emphasised the centrality and even exclusivity of the state in this regard. Nevertheless, modern practice does demonstrate that individuals have become increasingly recognised as participants and subjects of international law. This has occurred primarily, but not exclusively, through human rights law.

The link between the state and the individual for international law purposes has historically been the concept of nationality. This was and remains crucial, particularly in the spheres of jurisdiction and the international protection of the individual by the state. It is often noted that the claim of an individual against a foreign state, for example, becomes subsumed under that of his national state.³³⁵ Each state has the capacity to determine who are to be its nationals and this is to be recognised by other states in so far as it is consistent with international law, although in order for other states to accept

this nationality there has to be a genuine connection between the state and the individual in question.³³⁶

Individuals as a general rule lack standing to assert violations of international treaties in the absence of a protest by the state of nationality,³³⁷ although states may agree to confer particular rights on individuals which will be enforceable under international law, independently of municipal law. Under article 304(b) of the Treaty of Versailles 1919, for example, nationals of the Allied and Associated Powers could bring cases against Germany before the Mixed Arbitral Tribunal in their own names for compensation, while the Treaty of 1907 between five Central American states establishing the Central American Court of Justice provided for individuals to bring cases directly before the Court.³³⁸

This proposition was reiterated in the *Danzig Railway Officials* case³³⁹ by the Permanent Court of International Justice, which emphasised that under international law treaties did not as such create direct rights and obligations for private individuals, although particular treaties could provide for the adoption of individual rights and obligations enforceable by the national courts where this was the intention of the contracting parties. Under the provisions concerned with minority protection in the 1919 Peace Treaties, it was possible for individuals to apply directly to an international court in particular instances. Similarly, the Tribunal created under the Upper Silesia Convention of 1922 decided that it was competent to hear cases by the nationals of a state against that state.³⁴⁰

Since then, a wide range of other treaties have provided for individuals to have rights directly and have enabled individuals to have direct access to international courts and tribunals. One may mention as examples the European Convention on Human Rights 1950; the European Communities treaties 1957; the Inter-American Convention on Human Rights 1969; the Optional Protocol to the International Covenant on Civil and Political Rights 1966; the International Convention on the Elimination of All Forms of Racial Discrimination 1965; and the Convention on the Settlement of Investment Disputes 1965.

However, the question of the legal personality of individuals under international law extends to questions of direct criminal responsibility also. It is now established that international law proscribes certain heinous conduct in a manner that imports direct individual criminal responsibility. This is dealt with in [Chapter 7](#).

International Organisations

International organisations have played a crucial role in the sphere of international personality. Since the nineteenth century, a growing number of such organisations have appeared and thus raised the issue of international legal personality. In principle, it is now well established that international organisations may indeed possess objective international legal personality.³⁴¹ Whether that will be so in any particular instance will depend upon the particular circumstances of that case. Whether an organisation possesses personality in international law will hinge upon its constitutional status, its actual powers and practice. Significant factors in this context will include the

capacity to enter into relations with states and other organisations and conclude treaties with them, and the status it has been given under municipal law. Such elements are known in international law as the indicia of personality. International organisations will be dealt with in Chapter 22.

The Acquisition, Nature and Consequences of Legal Personality – Some Conclusions

The above survey of existing and possible subjects of international law demonstrates both the range of interaction upon the international scene by entities of all types and the pressures upon international law to come to terms with the contemporary structure of international relations. The International Court clearly recognised the multiplicity of models of personality in stressing that ‘the subjects of law in any legal system are not necessarily identical in their nature or in the extent of their rights’.³⁴² There are, however, two basic categories – objective and qualified personality. In the former case, the entity is subject to a wide range of international rights and duties and it will be entitled to be accepted as an international person by any other international person with which it is conducting relations. In other words, it will operate *erga omnes*. The creation of objective international personality will of necessity be harder to achieve and will require the action in essence of the international community as a whole or a substantial element of it. The Court noted in the *Reparation for Injuries* case that:

fifty states, representing the vast majority of the members of the international community, have

the power, in conformity with international law, to bring into being an entity possessing objective international personality and not merely personality recognised by them alone, together with capacity to bring international claims.³⁴³

The attainment of qualified personality, on the other hand, binding only the consenting subject, may arise more easily and it is clear that in this respect at least theory ought to recognise existing practice. Any legal person may accept that another entity possesses personality in relation to itself and that determination will operate only *in personam*.

States are the original and major subjects of international law. Their personality derives from the very nature and structure of the international system. Statehood will arise as a result of the factual satisfaction of the stipulated legal criteria. The constitutive theory of recognition is not really acceptable, although recognition, of course, contributes valuable evidence of adherence to the required criteria. All states, by virtue of the principle of sovereign equality, will enjoy the same degree of international legal personality. It has been argued that some international organisations, rather than being derivative subjects of international law, will as sovereign or self-governing legal communities possess an inherent personality directly from the system and will thus constitute general and even objective subjects of international law. Non-sovereign persons, including non-governmental organisations and individuals, would be derived subjects possessing only such international powers as conferred exceptionally upon them by the

necessary subjects of international law.³⁴⁴ This view may be questioned, but it is true that the importance of practice via the larger international organisations cannot be underestimated.

Similarly, the role of the Holy See (particularly prior to 1929) as well as the UN experience demonstrates that the derivative denomination is unsatisfactory. The significance of this relates to their ability to extend their international rights and duties on the basis of both constituent instruments and subsequent practice and to their capacity to affect the creation of further international persons and to play a role in the norm-creating process.

Recognition, acquiescence and estoppel are important principles in the context of international personality, not only with regard to states and international organisations, but throughout the range of subjects. They will affect not only the creation of new subjects, but also the definition of their nature and rights and duties.

Personality may be acquired by a combination of treaty provisions and recognition or acquiescence by other international persons. For instance, the International Committee of the Red Cross, a private non-governmental organisation subject to Swiss law, was granted special functions under the 1949 Geneva Red Cross Conventions and has been accepted as being able to enter into international agreements under international law with international persons, such as with the EEC under the World Food Programme.³⁴⁵ Another possible method of acquiring international personality is by subjecting an agreement between a recognised international person and a private party directly to the rules of international law. This would have the effect of

rendering the latter an international person in the context of the arrangement in question so as to enable it to invoke in the field of international law the rights it derives from that arrangement.³⁴⁶ While this currently may not be entirely acceptable to Developing Countries, this is probably because of a perception of the relevant rules of international law which may very well alter.³⁴⁷ Personality may also be acquired by virtue of being directly subjected to international duties. This would apply to individuals in specific cases such as war crimes, piracy and genocide, and might in the future constitute the method by which transnational corporations may be accepted as international persons.

Community needs with regard to the necessity to preserve international stability and life may well be of relevance in certain exceptional circumstances. In the case of non-state territorial entities that are not totally dominated by a state, there would appear to be a community need to ensure that at least the rules relating to the resort to force and the laws of war operate. Not to accept some form of qualified personality in this area might be to free such entities from having to comply with such rules and that clearly would affect community requirements.³⁴⁸ The determining point here, it is suggested, must be the degree of effective control maintained by the entity in its territorial confines. However, even so, recognition may overcome this hurdle, as the recognition of Byelorussia and the Ukraine as non-sovereign state entities prior to the demise of the Soviet Union and the emergence of these entities as the independent states of Belarus and Ukraine demonstrated.³⁴⁹

All these entities may be easily contained within the category of qualified personality, possessing a limited range of rights and duties valid as against those accepting their personality. There are no pre-set rules governing the extent of rights and duties of international persons. This will depend upon the type of entity concerned, its claims and expectations, functions and attitude adopted by the international community. The exception here would be states which enter upon life with an equal range of rights and obligations. Those entities with objective personality will, it is suggested, benefit from a more elastic perception of the extent of their rights and duties in the form of a wider interpretation of implied powers through practice. However, in the case of qualified subjects implied powers will be more difficult to demonstrate and accept and the range of their rights and duties will be much more limited. The presumption, thus, will operate the other way.

The precise catalogue of rights and duties is accordingly impossible to list in advance; it will vary from case to case. The capacity to function on the international scene in legal proceedings of some description will not be too uncommon, while the power to make treaties will be less widespread. As to this the International Law Commission noted that ‘agreements concluded between entities other than states or than international organisations seem too heterogeneous a group to constitute a general category, and the relevant body of international practice is as yet too exiguous for the characteristics of such a general category to be inferred from it’.³⁵⁰ The extent to which subjects may be internationally responsible is also unclear, although in general such an entity will possess responsibility to the extent of its rights and duties; but many problem areas remain. Similarly controversial is the norm-creating role of such diverse entities, but the practice of all international persons is

certainly relevant material upon which to draw in an elucidation of the rules and principles of international law, particularly in the context of the entity in question.

International personality thus centres not so much upon the capacity of the entity as such to possess international rights and duties, as upon the actual attribution of rights and/or duties on the international plane as determined by a variety of factors ranging from claims made to prescribed functions.

Procedural capacity with regard to enforcement is important, but not essential,³⁵¹ but in the case of non-individual entities the claimant will have to be in 'such a position that it possesses, in regard to its members, rights which it is entitled to ask them to respect'.³⁵² This, noted the International Court, expressed 'the essential test where a group, whether composed of states, of tribes or of individuals, is claimed to be a legal entity distinct from its members'.³⁵³

A wide variety of non-subjects exist and contribute to the evolution of the international system. Participation and personality are two concepts, but the general role played in the development of international relations and international law by individuals and entities of various kinds that are not international legal subjects as such cannot be ignored. The structure of participation in international law is a pyramid, with states at the top and descending levels of other persons and entities with lesser rights and obligations, and with the base constituted by those of no recognised personality as such in the system, but interested in, contributing to and affected by the rules, principles and structures of international law. However, what is clear is that international law is in the process of evolving towards a

more inclusive and flexible position with regard to personality and participation.

¹²¹ *Medellín v. Dretke* 118 S.Ct. 1352 (2005); and *Sanchez-Llamas v. Oregon* 126 S.Ct. 2669 (2006); 134 ILR, p. 719.

¹²² 44 ILM, 2005, p. 964.

¹²³ *Medellín v. Dretke*, Application No. AP-75,207 (Tex. Crim. App. 15 November 2006). Note that the US Supreme Court held that a writ of certiorari to consider the effect of the International Court’s decision had been ‘improvidently granted’ prior to the Texas appeal: see 44 ILM, 2005, p. 965. However, the Supreme Court did grant certiorari on 30 April 2007 (after the Texas decision) to consider two questions: ‘1. Did the President of the United States act within his constitutional and statutory foreign affairs authority when he determined that the states must comply with the United States’ treaty obligation to give effect to the *Avena* judgment in the cases of the 51 Mexican nationals named in the judgment? [and] 2. Are state courts bound by the Constitution to honor the undisputed international obligation of the United States, under treaties duly ratified by the President with the advice and consent of the Senate, to give effect to the *Avena* judgment in the cases

that the judgment addressed?’ See now *Medellín v. Texas* 128 S.Ct. 1346 (2008) and above, p. 143.

¹²⁴ See e.g. L. R. Zines, *The High Court and the Constitution*, Sydney, 1981; and A. Byrnes and H. Charlesworth, ‘Federalism and the International Legal Order: Recent Developments in Australia’, **79 AJIL**, 1985, p. 622.

Shany), Oxford, 2008, p. 369; and Rousseau, *Droit International Public*, vol. II, pp. 413–48.

¹⁷⁸ See further above, p. 203.

¹⁷⁹ See above, p. 204.

¹⁸⁰ Resolution 18(II). See e.g. E. Lauterpacht, *Jerusalem and the Holy Places*, London, 1968; and Ydit, *Internationalised Territories*, pp. 273–314. Note that on 28 September 2018, the state of Palestine instituted proceedings against the US alleging a violation of the Vienna Convention on Diplomatic Relations due to the relocation of the US Embassy in Israel from Tel Aviv to Jerusalem. It was claimed that Jerusalem had a 'special status', *Application Instituting Proceedings*, p. 2, www.icj-cij.org/files/case-related/176/176-20180928-APP-01-00-EN.pdf.

¹⁸¹ See Security Council resolution 16 (1947). Like the Jerusalem idea, this never came into being. See also the experiences of the League of Nations with regard to the Saar and Danzig, Ydit, *Internationalised Territories*, chapter 3.

¹⁸² See Article 6 and Annex I of the Paris Peace Settlement. See also C. Stahn, 'International Territorial Administration in the Former Yugoslavia: Origins, Developments and Challenges Ahead', *ZaöRV*, 2001, p. 107. UNTAC lasted from March 1992 to September 1993 and involved some 22,000 military and civilian personnel: see <https://peacekeeping.un.org/sites/default/files/past/untac.htm>. Note also e.g. the operations of the UN Transition Group in Namibia which, in the process leading to Namibian independence, exercised a degree of administrative power: see Report of the UN Secretary-General, A/45/1 (1991), and the UN Transitional Administration for Eastern Slavonia (UNTAES), which facilitated the transfer of the territory from Serb to Croat rule over a two-year period: see Security Council resolution 1037 (1996).

183 Initialled at Dayton, Ohio, and signed in Paris, 1995.

184 The final authority with regard to the military implementation of the agreement remains the commander of SFOR: see article 12 of the Agreement on the Military Aspects of the Dayton Peace Agreement. Note also the establishment of the War Crimes Chamber, the majority of whose members are from other states: see below, [Chapter 7](#), p. 357, and the Commission for Displaced Persons and Refugees: see Annexes 6 and 7 of the Peace Agreement.

185 See e.g. the documentation available at www.ohr.int/?page_id=1220. See also Security Council resolutions 1144 (1997), 1256 (1999) and 1423 (2002).

186 See www.ohr.int/?cat=350. The competence of the High Representative to adopt binding decisions with regard to interim measures when the parties are unable to reach agreement remains in force until the Presidency or Council of Ministers has adopted a decision consistent with the Peace Agreement on the issue concerned.

187 Para. XI of the Bonn Conclusions. See also Security Council resolutions 1247 (1999), 1395 (2000), 1357 (2001), 1396 (2002) and 1491 (2003).

²⁴⁰ *Prosecution Request Pursuant to Article 19(3) for a Ruling on the Court's Territorial Jurisdiction in Palestine*, ICC-01/18, 22 January 2020. This prompted a wide range of amicus curiae opinions, see www.icc-cpi.int/Pages/crm-refined.aspx?situation=ICC-01/18. The Prosecutor produced her response on 30 April 2020. The matter is at the date of writing before the Pre-Trial Chamber.

²⁴¹ See <http://palestineun.org/about-palestine/diplomatic-relations/>.

²⁴² For example, the General Conference of UNESCO accepted Palestine as a member on 31 October 2011, www.unesco.org/new/en/media-services/single-view/news/general_conference_admits_palestine_as_unesco_member/.

In April 2014, Palestine presented letters for accession to fifteen international conventions, www.un.org/apps/news/story.asp?NewsID=47490#.V6S0XJMrJjR. See also L. Trigeaud, 'L'Influence des Reconnaissances d'Etat sur la Formation des Engagements Conventionnels', 119 *RGDIP*, 2015, p. 571.

²⁴³ See e.g. Crawford, *Creation of States*, pp. 412 ff.; and *Somalia: A Country Study* (ed. H. C. Metz), 4th ed., Washington, DC, 1993. See generally P. Kolsto, 'The Sustainability and Future of Unrecognized Quasi-States', 43 *Journal of Peace Research*, 2006, p. 723.

²⁴⁴ See Report of the UN Secretary-General on the Situation in Somalia, S/2001/963, paras. 16 ff. (2001).

²⁴⁵ See e.g. the provision of assistance to the authorities of the area by the UK and the visit to the UK and meetings with UK government officials by the ‘president of Somaliland’ in July 2006: see FCO Press Release, 16 August 2006. See also *Secretary of State for the Home Department v. CC and CF* [2012] EWHC 2837 (Admin); UKMIL, 76 *BYIL*, 2005, p. 715; UKMIL, 81 *BYIL*, 2010, p. 503; and UKMIL, 83 *BYIL*, 2012, pp. 360–1.

²⁴⁶ See e.g. the Reports of the International Crisis Group on Nagorno-Karabakh of 14 September 2005, 11 October 2005, 14 November 2007 and 4 July 2016. See also resolution 1416 of the Council of Europe Parliamentary Assembly, 2005.

²⁴⁷ ECtHR, Judgment of 16 June 2015, paras. 168 ff. at para. 186.

²⁴⁸ See above, p. 212.

²⁴⁹ See the Reports of the International Crisis Group on Moldova of 12 August 2003, 17 June 2004 and 17 August 2006. See also *Ilaşcu v. Moldova and Russia*, ECtHR, Judgment of 8 July 2004, pp. 8–40.

²⁵⁰ See the Reports of the International Crisis Group on South Ossetia of 26 November 2004, 19 April 2005 and 7 June 2007; and the Reports on Abkhazia of 15 September 2006 and 18 January 2007.

²⁵¹ Russia recognised Abkhazia and South Ossetia as independent states on 26 August 2008: International Crisis Group, Europa Report No. 202, *Abkhazia: Deepening Dependence*, 2010, p. 1. In April 2009, Russia signed a five-year agreement with South Ossetia to take formal control of its frontiers with Georgia proper, as well as those of Abkhazia. In 2014, Russia and Abkhazia signed a ‘strategic partnership’ agreement: www.bbc.co.uk/news/world-europe-18175394. In 2015, Russia signed an ‘alliance and integration agreement’ with South Ossetia that abolished border checkpoints: www.bbc.co.uk/news/world-europe-18269210. Nicaragua, Venezuela and Nauru recognised South Ossetia and Abkhazia in 2008–09: <http://in.reuters.com/article/idINIndia-44730620091215>. Vanuatu apparently recognised South Ossetia and Abkhazia in 2011 and then withdrew this recognition: <https://eurasianet.org/abkhazia-vanuatu-changes-its-mind-again>. See also A. Nußberger, ‘South Ossetia’ and ‘Abkhazia’, *Max Planck Encyclopedia of Public International Law*, 2013. Note the statement by the US Department of State on 17 March 2015 emphasising that South Ossetia and Abkhazia remained integral parts of

Georgia and declaring that the US did not recognise the legitimacy of the ‘treaty’ between Russia and the ‘*de facto* leaders’ of the breakaway regions of South Ossetia and Abkhazia: <https://ge.usembassy.gov/statement-intended-signing-agreement-de-facto-leaders-georgias-south-ossetia-region-russian-federation-march-17/>. See also <https://osce.usmission.gov/russias-violations-georgian-sovereignty/>. The UK has taken the same position as to the status of these territories: see e.g. Foreign and Commonwealth Minister’s statement, 568 HC Deb., cols. 46W–47W, 8 October 2013.

²⁵² As to the secession of Crimea and its subsequent annexation by Russia, see *Chapter 9*, p. 446.

²⁵³ *Prime Minister of Spain v. Parliament of Catalonia*, STC/114/2017, ILDC 2814 (ES 2017), Spanish Constitutional Court, Judgment of 17 October 2017. Acting under article 155 emergency powers, the central government dissolved the Catalan parliament and called for an election for 21 December that year. The former Catalan president and four other leaders fled abroad and extradition proceedings followed, www.bbc.co.uk/news/world-europe-41584864 and www.bbc.co.uk/news/world-europe-29478415.

²⁵⁴ See www.politico.eu/article/how-the-world-reacted-to-catalan-independence-declaration, particularly referencing the reaction of the German, British and US governments. See also www.bbc.co.uk/news/world-europe-41464712. Note that a referendum calling for the independence of the Kurdistan Regional Government, a part of Iraq, was passed in September 2017, but provoked international condemnation. See eg. the reaction of the US, www.rudaw.net/english/world/080620172 and the UK, www.gov.uk/government/news/foreign-secretary-statement-on-the-kurdish-regional-governments-intention-to-hold-a-referendum-on-independence-from-iraq. Iraq took armed action and on 24 October 2017 the Kurdistan Regional Government suspended the results of the referendum, www.cabinet.gov.krd/a/d.aspx?s=0400000&1=12&a=55938. See generally M. Sterio, ‘Self-Determination and Secession under International Law: The Cases of Kurdistan and Catalonia’, 22 *ASIL Insights*, 2018; and P. S. Hadji, ‘The Case for Kurdish Statehood in Iraq’, 41 *Case Western Reserve Journal of International Law*, 2009, p. 513.

²⁵⁵ Note e.g. the Preliminary Agreement Concerning the Establishment of a Confederation between the Federation of Bosnia and Herzegovina and the Republic of Croatia, 1994, 33 ILM, 1994, p. 605. This Agreement ‘anticipated’ the creation of a Confederation, but provides that its ‘establishment shall not change the international identity or legal

personality of Croatia or of the Federation'. The Agreement provided for cooperation between the parties in a variety of areas and for Croatia to grant the Federation of Bosnia and Herzegovina free access to the Adriatic through its territory. This Confederation did not come about.

²⁵⁶ See Crawford, *Creation of States*, pp. 479 ff.; and above, p. 198. See also with regard to the proposed arrangement between Gambia and Senegal, 21 ILM, 1982, pp. 44–7.

²⁵⁷ See e.g. the Dayton Peace Agreement 1995, Annex 4 laying down the constitution of Bosnia and Herzegovina as an independent state consisting of two entities, the Federation of Bosnia and Herzegovina and the Republika Srpska. The boundary between the two entities was laid down in Annex 2.

²⁵⁸ Crawford, *Creation of States*, pp. 625 ff. and *ibid.* as regards Puerto Rico and Niue. See also as to the Cook Islands, M. N. Shaw, 'The Article 12(3) Declaration of the Palestinian Authority, the International Criminal Court and International Law', pp. 36 ff., https://papers.ssrn.com/sol3/papers.cfm?abstract_id=1782668.

²⁵⁹ See e.g. J. E. S. Fawcett, *Annual Survey of Commonwealth Law*, London, 1967, pp. 709–11.

²⁶⁰ See, with regard to the successors of the trust territory of the Pacific, above, p. 204.

²⁶¹ See J. E. S. Fawcett, *The British Commonwealth in International Law*, London, 1963; Oppenheim's *International Law*, p. 256; O'Connell, *International Law*, pp. 346–56; Whiteman, *Digest*, vol. I, pp. 476–544; Rousseau, *Droit International Public*, vol. II, pp. 214–64; and Sale, *The Modern Commonwealth*, 1983. See also, as regards the French Community, Whiteman, *Digest*, pp. 544–82; and O'Connell, *International Law*, pp. 356–9.

The International Protection of Human Rights

The Nature of Human Rights¹

The preamble to the Universal Declaration of Human Rights adopted on 10 December 1948 emphasises that ‘recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family is the foundation of freedom, justice and peace in the world’. While there is widespread acceptance of the importance of human rights in the international structure, there is considerable confusion as to their precise nature and role in international law.² The question of what is meant by a ‘right’ is itself controversial and the subject of intense jurisprudential debate.³ Some ‘rights’, for example, are intended as immediately enforceable binding commitments, others merely as specifying a possible future pattern of behaviour.⁴ The problem of enforcement and sanctions with regard to human rights in international law is another issue which can affect the characterisation of the phenomenon. There are writers who regard the high incidence of non-compliance with human rights norms as evidence of state practice that argues against the existence of a structure of human rights principles in international law.⁵ Although sight must not be lost of violations of human rights laws, such an approach is not only academically incorrect, but also profoundly negative.⁶ The concept of human rights is closely allied with ethics and morality. Those rights that reflect the values of a community will be those with the most chance of successful implementation. Positive rights may be taken to include those rights enshrined within a legal system, whether or not reflective of moral considerations, whereas a moral right is not necessarily enforceable by law. One may easily discover positive rights. Deducing or

inferring moral rights is another matter entirely and will depend upon the perception of the person seeking the existence of a particular right.⁷

Rights may be seen as emanating from various sources, whether religion or the nature of man or the nature of society. The Natural Law view, as expressed in the traditional formulations of that approach or by virtue of the natural rights movement, is that certain rights exist as a result of a higher law than positive or man-made law. Such a higher law constitutes a universal and absolute set of principles governing all human beings in time and space. The natural rights approach of the seventeenth century, associated primarily with John Locke, founded the existence of such inalienable rights as the rights to life, liberty and property upon a social contract marking the end of the difficult conditions of the state of nature. This theory enabled recourse to be had to a superior type of law and thus was able to provide a powerful method of restraining arbitrary power.⁸ Although this approach fell out of favour in the nineteenth century due to the problems of its non-empirical and diffuse methodology, it proved of immense value in the last century in the establishment of human rights within the international community as universal principles. Positivism as a theory emphasised the authority of the state and as such left little place for rights in the legal system other than specific rights emanating from the constitutional structure of that system,⁹ while the Marxist doctrine, although based upon the existence of certain immutable historical laws governing the development of society, nevertheless denied the existence of rights outside the framework of the legal order.¹⁰ Modern rights theories cover a wide range of approaches, and this clearly emphasises the need to come to terms with the requirements of an evolving

legal system that cannot be totally comprehended in terms of that system itself.¹¹

Of particular interest is the work of the policy-oriented movement that seeks to identify, characterise and order a wide variety of relevant factors in the process of human rights creation and equipment. Eight interdependent values are noted (viz. demands relating to respect, power, enlightenment, well-being, health, skill, affection and rectitude) and various environmental influences stressed. Human dignity is seen as the key concept in relation to these values and to the ultimate goal of a world community in which a democratic distribution of values is sought.¹²

All these theories emphasise the complexity of the nature of the concept of human rights in the context of general legal and political processes, but also the importance and centrality of such notions. The broad issues are similarly raised within the framework of international law.

Of particular interest is the tension between the universalism of human rights and the relativism of cultural traditions. This has led to arguments by some adherents of the latter tendency that human rights can only be approached within the context of particular cultural or religious traditions, thus criticising the view that human rights are universal or transcultural. The danger, of course, is that states violating human rights that they have accepted by becoming parties to human rights treaties, as well as being bound by relevant customary international law, might seek to justify their actions by pleading cultural differences.¹³

The Development of International Human Rights Law¹⁴

In the nineteenth century, the positivist doctrines of state sovereignty and domestic jurisdiction reigned supreme. Virtually all matters that today would be classified as human rights issues were at that stage universally regarded as within the internal sphere of national jurisdiction. The major exceptions to this were related to piracy *jure gentium* and slavery. In the latter case, a number of treaties were entered into to bring about its abolition.¹⁵ Concern also with the treatment of sick and wounded soldiers and with prisoners of war developed as from 1864 in terms of international instruments,¹⁶ while states were required to observe certain minimum standards in the treatment of aliens.¹⁷ In addition, certain agreements of a general welfare nature were beginning to be adopted by the turn of the century.¹⁸ The nineteenth century also appeared to accept a right of humanitarian intervention, although its range and extent were unclear.¹⁹

An important change occurred with the establishment of the League of Nations in 1919.²⁰ Article 22 of the Covenant of the League set up the mandates system for peoples in ex-enemy colonies ‘not yet able to stand by themselves in the strenuous conditions of the modern world’. The mandatory power was obliged to guarantee freedom of conscience and religion and a Permanent Mandates Commission was created to examine the reports the mandatory authorities had undertaken to make. The arrangement was termed ‘a sacred trust of civilisation’. Article 23 of the Covenant provided for just treatment of the native populations of the territories in question.²¹ The 1919

Peace Treaties with Eastern European and Balkan states included provisions relating to the protection of minorities,²² providing essentially for equality of treatment and opportunities for collective activity.²³ These provisions were supervised by the League of Nations, to whom there was a right of petition.²⁴

Part XIII of the Treaty of Versailles provided for the creation of the International Labour Organization, among the purposes of which were the promotion of better standards of working conditions and support for the right of association. The impact of the Second World War upon the development of human rights law was immense as the horrors of the war and the need for an adequate international system to maintain international peace and protect human rights became apparent to all. In addition, the rise of non-governmental organisations, particularly in the sphere of human rights, has had an immense effect.²⁵ While the post-Second World War world witnessed the rise of intergovernmental committees and organs and courts to deal with human rights violations, whether by public debate, states' reports, comments, inter-state or individual petition procedures, recent years have seen the interposition of domestic amnesty laws and this has given rise to the question of the acceptability of impunity.²⁶ Further developments have included the establishment of truth and reconciliation commissions²⁷ and various other alternative justice systems such as the Rwandan Gacaca court system,²⁸ while the extent to which participants in the international legal system apart from states have become involved both in the process of formulating and seeking the implementation of human rights and in being the subjects of human rights concern and regulation is marked.²⁹

Some Basic Principles

Domestic Jurisdiction³⁰

The basic rule of international law providing that states have no right to encroach upon the preserve of other states' internal affairs is a consequence of the equality and sovereignty of states and is mirrored in article 2(7) of the UN Charter. It has, however, been subject to a process of reinterpretation in the human rights field³¹ as this and the two succeeding chapters will make apparent, so that states may no longer plead this rule as a bar to international concern and consideration of internal human rights situations.³² It is, of course, obvious that where a state accepts the right of individual petition under an international procedure, it cannot thereafter claim that the exercise of such a right constitutes interference with its domestic affairs.³³

The Rule on the Exhaustion of Domestic (or Local) Remedies³⁴

This rule flows from the above principle. It is a method of permitting states to solve their own internal problems in accordance with their own constitutional procedures before accepted international mechanisms can be invoked, and is well established in general international law.³⁵ However, where such internal remedies are non-existent or unduly and unreasonably prolonged or unlikely to bring effective relief, the resort to international measures will not be required.³⁶ The existence of such a remedy must be certain not only in theory, but also in practice.³⁷ A provision regarding the need to exhaust domestic remedies before the various international mechanisms may be resorted to appears in all the international and regional human rights instruments³⁸ and has been the subject of much consideration by the Human Rights Committee under the Optional Protocol procedure of the International Covenant on Civil and Political Rights,³⁹ and within the European Convention⁴⁰ and Inter-American Convention human rights systems.⁴¹

Priorities of Rights

Certain rights may not be derogated from in the various human rights instruments even in times of war or other public emergency threatening the nation. In the case of the European Convention,⁴² these are the rights to life (except in cases resulting from lawful acts of war), the prohibition on torture and slavery, and non-retroactivity of criminal offences.⁴³ In the case of the Inter-American Convention,⁴⁴ the following rights are non-derogable: the

rights to juridical personality, life and humane treatment, freedom from slavery, freedom from *ex post facto* laws, freedom of conscience and religion, rights of the family, to a name, of the child, nationality and participation in government.⁴⁵ By article 4 of the International Covenant on Civil and Political Rights, the rights to life and recognition as a person before the law, the freedoms of thought, conscience and religion and the prohibition on torture, slavery, retroactivity of criminal legislation and imprisonment on grounds solely of inability to fulfil a contractual obligation are non-derogable.⁴⁶

Such non-derogable rights clearly are regarded as possessing a special place in the hierarchy of rights.⁴⁷ In addition, it must be noted, many rights are subject to a limitation or clawback clause, whereby the absolute right provided for will not operate in certain situations.⁴⁸ Those rights therefore that are not so limited may be regarded as of particular value.⁴⁹

The COVID-19 Crisis⁵⁰

These considerations came to the fore in the COVID-19 pandemic that commenced in late 2019 in view of the extraordinary measures that have been needed to be taken to deal with the disease, ranging from various forms of quarantine or lockdown to regulating social distancing and the wearing of masks and to the various surveillance measures taken to control movement and thus the spread of the disease. Large-scale shutdown of industries and shops taken together with the closing of schools and places of worship have underlined the unprecedented interference with rights in the circumstances. Faced with the global crisis, the various human rights bodies have issued

guidance. The Human Rights Committee, for example, declared in its statement of 30 April 2020,⁵¹ that

in the face of the COVID-19 pandemic, states parties must take effective measures to protect the right to life and health of all individuals within their territory and all those subject to their jurisdiction. It also recognizes that such measures may, in certain circumstances, result in restrictions on the enjoyment of individual rights guaranteed by the Covenant.

Furthermore, the Committee acknowledges that states parties confronting the threat of widespread contagion may, on a temporary basis, resort to exceptional emergency powers and invoke their right of derogation from the Covenant under article 4 provided that it is required to protect the life of the nation.

However, it was emphasised that there were certain conditions to such derogation, these being official proclamation of a state of emergency; formal notification to the Secretary-General; the strict necessity and proportionality of any derogating measure taken; the conformity of measures taken with other international obligations; non-discrimination; and the prohibition on derogating from certain non-derogable rights. The Committee added that there should be no toleration even in such emergency situations of national, racial or religious hatred that would constitute incitement to discrimination,

hostility or violence, and steps must be taken to ensure that public discourse in connection with the COVID-19 pandemic did not constitute advocacy or incitement against specific marginalised or vulnerable groups, including minorities and foreign nationals. The other human rights bodies issued similar statements.⁵²

More generally, the crisis focused on the right to health in international law and the role of the World Health Organization (WHO).⁵³ The recognition of a right to health may be traced to the preamble of the Constitution of the WHO 1946, which emphasises that '[t]he enjoyment of the highest attainable standard of health is one of the fundamental rights of every human being without distinction of race, religion, political belief, economic or social condition',⁵⁴ while article 25(1) of the Universal Declaration on Human Rights 1948 states: 'Everyone has the right to a standard of living adequate for the health and well-being of himself and of his family, including food, clothing, housing and medical care and necessary social services, and the right to security in the event of unemployment, sickness, disability, widowhood, old age or other lack of livelihood in circumstances beyond his control.' Moving beyond these essentially hortatory or non-binding statements, article 12(1) of the International Covenant on Economic, Social and Cultural Rights 1966 declares that 'the States Parties to the present Covenant recognize the right of everyone to the enjoyment of the highest attainable standard of physical and mental health'.⁵⁵ This provision, like the other provisions of this binding treaty, is reviewed by the Committee established under the Covenant.⁵⁶ In General Comment No. 14, the Committee analysed article 12 in detail.⁵⁷ In particular, it noted that the right included the freedoms to control one's health and body, including sexual and

reproductive freedom, and the right to be free from interference, such as the right to be free from torture, non-consensual medical treatment and experimentation. In addition, the right included entitlements to a system of health protection which provides equality of opportunity for people to enjoy the highest attainable level of health, taking into account both the individual's biological and socio-economic preconditions and a state's available resources. The Committee noted that the right to health was an inclusive one and extended to the underlying determinants of health, such as access to safe and potable water and adequate sanitation, an adequate supply of safe food, nutrition and housing, healthy occupational and environmental conditions, and access to health-related education and information. A number of relevant principles was noted, including availability, accessibility, acceptability and quality.⁵⁸

Article 12(2) of the Covenant continues by providing that the steps to be taken by the states parties to achieve the full realisation of this right shall include those necessary for *inter alia* '(c) The prevention, treatment and control of epidemic, endemic, occupational and other diseases; and (d) The creation of conditions which would assure to all medical service and medical attention in the event of sickness'. A number of other general conventions refer to the right to health either generally or with regard to specific groups,⁵⁹ as do a number of regional conventions.⁶⁰ A Special Rapporteur on the Right of Everyone to the Enjoyment of the Highest Attainable Standard of Physical and Mental Health was appointed in 2002 and their mandate has been extended and expanded subsequently.⁶¹

The Assembly of the WHO adopted the binding International Health Regulations in 2005 (revising those adopted in 1969) and these were subsequently amended in 2014. The purposes of the Regulations are ‘to prevent, protect against, control and provide a public health response to the international spread of disease in ways that are commensurate with and restricted to public health risks, and which avoid unnecessary interference with international traffic and trade’. The Regulations are not limited to any specific disease, provide for certain minimum core public health capacities, oblige states parties to notify the WHO of events that may constitute a public health emergency of international concern and establish procedures for the determination by the Director-General of a ‘public health emergency of international concern’ and provide for the issuance of corresponding temporary recommendations.⁶² Criticisms have been made of the WHO’s response to the COVID-19 crisis and the organisation has responded.⁶³ It appears that the WHO lacks the necessary executive competences to deal with a pandemic outbreak in the absence of the cooperation of states.

Customary International Law and Human Rights

In addition to the many international and regional treaty provisions concerning human rights to be noted in this chapter,⁶⁴ certain human rights may now be regarded as having entered into the category of customary international law in the light of state practice. These would certainly include the prohibition of torture, genocide and slavery and the principle of non-discrimination.⁶⁵ In addition, human rights established under treaty may constitute obligations *erga omnes* for the states parties.⁶⁶

The UN System – General⁶⁷

There are a number of human rights provisions in the Charter.⁶⁸ Article 1 includes in the purposes of the organisation the promotion and encouragement of respect for human rights and fundamental freedoms for all without distinction as to race, sex, language or religion. Article 13(1) notes that the General Assembly shall initiate studies and make recommendations regarding the realisation of human rights for all, while article 55 provides that the United Nations shall promote universal respect for and observance of human rights. In a significant provision, article 56 states that:

all members pledge themselves to take joint and separate action in cooperation with the organisation for the achievement of the purposes set forth in article 55.⁶⁹

The League of Nations mandate system was replaced by the trusteeship system in 1945, one of the basic objectives of which was, by article 76, the encouragement of respect for human rights, while, with regard to non-self-governing territories, the administering powers under article 73 of the Charter recognised the principle that the interests of the inhabitants were paramount, and accepted as a sacred trust the obligation to promote the well-being of the inhabitants. It can thus be seen that the Charter provisions on human rights were very general and vague. No enforcement procedures were laid down. Some have argued that the term ‘pledge’ in article 56 had the effect of

converting the enumerated purposes of article 55 into legal obligations,⁷⁰ but this has been disputed.⁷¹ Certainly, as of 1946, this would have been a difficult proposition to sustain, particularly in view of the hortatory language used in the provisions and the fact that the respect for human rights stipulation does not identify precise legal rights.⁷² However, in *Legal Consequences for States of the Continued Presence of South Africa in Namibia* of 1971, the Court noted that under the UN Charter:

the former Mandatory had pledged itself to observe and respect, in a territory having international status, human rights and fundamental freedoms for all without distinction as to race. To establish instead and to enforce, distinctions, exclusions, restrictions and limitations, exclusively based on grounds of race, colour, descent or national or ethnic origin which constitute a denial of fundamental human rights is a flagrant violation of the purposes and principles of the Charter.⁷³

It may be that this provision can only be understood in the light of the special, international status of that territory, but in the light of extensive practice since the 1940s in the general area of non-discrimination and human rights, the broader interpretation is to be preferred.

The Charter does contain a domestic jurisdiction provision. Article 2(7) provides that:

nothing contained in the present Charter shall
authorise the United Nations to intervene in
matters which are essentially within the
domestic jurisdiction of any state

but as noted later,⁷⁴ this has over the years been flexibly interpreted, so that human rights issues are no longer recognised as being solely within the domestic jurisdiction of states.

The elucidation, development and protection of human rights through the United Nations has proved to be a seminal event. A range of declarations and treaties has emerged, coupled with the establishment of a variety of advisory services and implementation and enforcement mechanisms. Large numbers of studies and reports of various kinds have appeared, while the whole process has been accompanied by extensive debate and consideration in a variety of UN organs and committees. Notwithstanding a certain degree of cynicism, it can be concluded that the acceptance of the centrality of human rights concerns within the international community has been due in no small measure to the unceasing consideration of human rights issues within the framework of the United Nations.

The cornerstone of UN activity has been without doubt the Universal Declaration of Human Rights adopted by the UN General Assembly on 10 December 1948.⁷⁵ The Declaration was approved without a dissenting vote (the Byelorussian SSR, Czechoslovakia, Poland, Ukrainian SSR, the Soviet Union, Yugoslavia and Saudi Arabia abstained). It was intended not as a legally binding document as such but, as its preamble proclaims ‘a common

standard of achievement for all peoples and nations'. Its thirty articles cover a wide range of rights, from liberty and security of the person (article 3), equality before the law (article 7), effective remedies (article 8), due process (articles 9 and 10), prohibitions on torture (article 5) and arbitrary interference with privacy (article 12), to rights protecting freedom of movement (article 13), asylum (article 14), expression (article 19), conscience and religion (article 18) and assembly (article 20). One should also note that included in the Declaration are social and economic rights such as the right to work and equal pay (article 23), the right to social security (article 25) and the right to education (article 26).

Although clearly not a legally enforceable instrument as such, the question arises as to whether the Declaration has subsequently become binding either by way of custom⁷⁶ or general principles of law, or indeed by virtue of interpretation of the UN Charter itself by subsequent practice.⁷⁷ The Declaration has had a marked influence upon the constitutions of many states and upon the formulation of subsequent human rights treaties and resolutions.⁷⁸ The Declaration has also been referred to in many cases,⁷⁹ and its importance within the context of UN human rights law should not be disregarded.⁸⁰ The intention had been that the Declaration would be followed immediately by a binding universal convention on human rights, but this process took considerably longer than anticipated. In the meantime, a number of important international conventions dealing with selective human rights issues were adopted, including the Genocide Convention 1948⁸¹ and the Convention on the Elimination of All Forms of Racial Discrimination 1965.⁸²

The Protection of the Collective Rights of Groups and

Individuals⁸³

International law since 1945 has focused primarily upon the protection of individual human rights, as can be seen from the Universal Declaration of Human Rights. In recent years, however, more attention has been given to various expressions of the concept of collective rights, although it is often difficult to maintain a strict differentiation between individual and collective rights. Some rights are purely individual, such as the right to life or freedom of expression; others are individual rights that are necessarily expressed collectively, such as freedom of assembly or the right to manifest one's own religion. Some rights are purely collective, such as the right to self-determination or the physical protection of the group as such through the prohibition of genocide; others constitute collective manifestations of individual rights, such as the right of persons belonging to minorities to enjoy their own culture and practise their own religion or use their own language. In addition, the question of the balancing of the legitimate rights of the state, groups and individuals is in practice crucial and sometimes not sufficiently considered. States, groups and individuals have legitimate rights and interests that should not be ignored. All within a state have an interest in ensuring the efficient functioning of that state in a manner consistent with respect for the rights of groups and individuals, while the balancing of the rights of groups and individuals may itself prove difficult and complex.

Prohibition of Discrimination

Apart from the overwhelming requirement of protection from physical attack upon their very existence as a group,⁸⁴ groups need protection from

discriminatory treatment as such.⁸⁵ The norm of non-discrimination thus constitutes a principle relevant both to groups and to individual members of groups.

The International Convention on the Elimination of All Forms of Racial Discrimination⁸⁶ was signed in 1965 and entered into force in 1969. It builds on the non-discrimination provisions in the UN Charter. Racial discrimination is defined as:

any distinction, exclusion, restriction or preference based on race, colour, descent or national or ethnic origin which has the purpose or effect of nullifying or impairing the recognition, enjoyment or exercise, on an equal footing, of human rights and fundamental freedoms in the political, economic, social, cultural or any other field of public life.

States parties undertake to prohibit racial discrimination and guarantee equality for all in the enjoyment of a series of rights and to assure to all within their jurisdiction effective protection and remedies regarding such human rights. As noted later in this chapter, a Committee on the Elimination of All Forms of Racial Discrimination was established.⁸⁷ In addition to the existence of this Convention, the prohibition of discrimination on racial grounds is contrary to customary international law.⁸⁸ This conclusion may be reached on the basis *inter alia* of articles 55 and 56 of the UN Charter, articles 2 and 7 of the Universal Declaration of Human Rights, the

International Covenants on Human Rights,⁸⁹ regional instruments on human rights protection⁹⁰ and general state practice. Discrimination on other grounds, such as religion⁹¹ and gender,⁹² may also be contrary to customary international law. The International Covenant on Civil and Political Rights provides in article 2(1) that all states parties undertake to respect and ensure to all individuals within their territories and within their jurisdictions the rights recognised in the Covenant ‘without distinction of any kind such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status’.⁹³ Article 26 stipulates that all persons are equal before the law and, thus, ‘the law shall prohibit any discrimination and guarantee to all persons equal and effective protection against discrimination on any ground such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status’.⁹⁴ The UN Human Rights Committee established under this Covenant⁹⁵ has noted in its General Comment No. 18 on Non-Discrimination⁹⁶ that non-discrimination ‘constitutes a basic and general principle relating to the protection of human rights’. The Committee, while adopting the definition of the term ‘discrimination’ as used in the Racial Discrimination and Women’s Discrimination Conventions, concludes that it should be understood to imply any distinction, exclusion, restriction or preference which is based on any ground such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status and which has the purpose or effect of nullifying or impairing the recognition, enjoyment or exercise by all persons, on an equal footing, of all rights and freedoms.

The principle of non-discrimination requires the establishment of equality in fact as well as formal equality in law. As the Permanent Court of International Justice noted in the *Minority Schools in Albania* case,⁹⁷ ‘equality in law precludes discrimination of any kind; whereas equality in fact may involve the necessity of different treatment in order to attain a result which establishes an equilibrium between different situations’.⁹⁸ The appropriate test of acceptable differentiation in such circumstances will centre upon what is just or reasonable⁹⁹ or objectively and reasonably justified.¹⁰⁰ The application of equality in fact may also require the introduction of affirmative action measures in order to diminish or eliminate conditions perpetuating discrimination. Such measures would need to be specifically targeted and neither absolute nor of infinite duration.¹⁰¹

The Principle of Self-Determination as a Human Right¹⁰²

The right to self-determination has already been examined in so far as it relates to the context of decolonisation.¹⁰³ The question arises whether this right, which has been widely proclaimed, has an application beyond the colonial context. Article 1 of both International Covenants on Human Rights provides that ‘all peoples have the right to self-determination. By virtue of that right they freely determine their political status and freely pursue their economic, social and cultural development’, while the Helsinki Final Act of 1975¹⁰⁴ refers to ‘the principle of equal rights and self-determination . . . all peoples have the right, in full freedom, to determine, when and as they wish, their internal and external political status, without external interference, and to pursue as they wish their political, economic, social and cultural development’. Article 20 of the African Charter on Human and Peoples’ Rights 1981¹⁰⁵ stipulates that ‘all peoples shall have the right to existence. They shall have the unquestionable and inalienable right to self-determination. They shall freely determine their political status and shall pursue their economic and social development according to the policy they have chosen.’ The 1970 Declaration on Principles of International Law Concerning Friendly Relations¹⁰⁶ referred to the colonial situation and noted that subjection of peoples to alien subjugation, domination and exploitation constituted a violation of the principle. A number of UN resolutions have discussed the relevance of self-determination also to situations of alien occupation where the use of force has been involved.¹⁰⁷ The International

Law Commission in 1988 expressed its view that the principle of self-determination was of universal application,¹⁰⁸ while the practice of the UN Human Rights Committee has been of particular significance.

Before this is briefly noted, reference must be made to the crucial importance of the principle of territorial integrity.¹⁰⁹ This norm protects the territorial framework of independent states and is part of the overall concept of the sovereignty of states. In terms of the concept of the freezing of territorial boundaries as at the moment of independence (save by mutual consent), the norm is referred to as *uti possidetis juris*.¹¹⁰ This posits that boundaries established and existing at the moment of independence cannot be altered unless the relevant parties consent to change. It is supported by international instruments¹¹¹ and by judicial pronouncement. In the *Burkina Faso/Mali* case,¹¹² the Chamber of the International Court of Justice emphasised that *uti possidetis* constituted a general principle, whose purpose was to prevent the independence and stability of new states from being endangered by fratricidal struggles provoked by the challenging of frontiers. This essential requirement of stability had induced newly independent states to consent to the respecting of colonial borders ‘and to take account of it in the interpretation of the principle of self-determination of peoples’. The Arbitration Commission of the European Conference on Yugoslavia emphasised in Opinion No. 2¹¹³ that ‘it is well established that, whatever the circumstances, the right to self-determination must not involve changes to existing frontiers at the time of independence (*uti possidetis juris*) except where the states concerned agree otherwise’.

The principle of self-determination, therefore, applies beyond the colonial context, within the territorial framework of independent states. It cannot be utilised as a legal tool for the dismantling of sovereign states.¹¹⁴ Its use, however, as a crucial principle of collective human rights¹¹⁵ has been analysed by the Human Rights Committee in interpreting article 1 of the Civil and Political Rights Covenant.¹¹⁶ In its General Comment on Self-Determination adopted in 1984,¹¹⁷ the Committee emphasised that the realisation of the right was ‘an essential condition for the effective guarantee and observance of individual human rights’. Nevertheless, the principle is seen as a collective one and not one that individuals could seek to enforce through the individual petition procedures provided in the First Optional Protocol to the Covenant.¹¹⁸ The Committee takes the view, as Professor Higgins¹¹⁹ noted,¹²⁰ that ‘external self-determination requires a state to take action in its foreign policy consistent with the attainment of self-determination in the remaining areas of colonial or racist occupation. But internal self-determination is directed to their own peoples.’ In the context of the significance of the principle of self-determination within independent states, the Committee has encouraged states parties to provide in their reports details about participation in social and political structures,¹²¹ and in engaging in dialogue with representatives of states parties, questions are regularly posed as to how political institutions operate and how the people of the state concerned participate in the governance of their state.¹²² This necessarily links in with consideration of other articles of the Covenant concerning, for example, freedom of expression (article 19), freedom of assembly (article 21), freedom of association (article 22) and the right to take part in the conduct of public affairs and to vote (article 25). The right of self-determination, therefore, provides the overall framework for the

consideration of the principles relating to democratic governance.¹²³ The Committee on the Elimination of Racial Discrimination adopted General Recommendation No. 21 in 1996 in which it similarly divided self-determination into an external and an internal aspect and noted that the latter referred to the ‘right of every citizen to take part in the conduct of public affairs at any level’.¹²⁴ The Canadian Supreme Court has noted that self-determination ‘is normally fulfilled through *internal* self-determination – a people’s pursuit of its political, economic, social and cultural development within the framework of an existing state’.¹²⁵

The Protection of Minorities¹²⁶

Various attempts were made in the post-First World War settlements, following the collapse of the German, Ottoman, Russian and Austro-Hungarian Empires and the rise of a number of independent nation-based states in Eastern and Central Europe, to protect those groups to whom sovereignty and statehood could not be granted.¹²⁷ Persons belonging to racial, religious or linguistic minorities were to be given the same treatment and the same civil and political rights and security as other nationals in the state in question. Such provisions constituted obligations of international concern and could not be altered without the assent of a majority of the League of Nations Council. The Council was to take action in the event of any infraction of obligations concerning minorities. There also existed a petition procedure by minorities to the League, although they had no standing as such before the Council or the Permanent Court of International Justice.¹²⁸ However, the schemes of protection did not work well, ultimately for a variety of reasons ranging from the sensitivities of newly independent states

to international supervision of minority issues to overt exploitation of minority issues by Nazi Germany in order to subvert neighbouring countries. After the Second World War, the focus shifted to the international protection of universal individual human rights, although several instruments dealing with specific situations incorporated provisions concerning the protection of minorities,¹²⁹ and in 1947 the Sub-Commission on the Prevention of Discrimination and the Protection of Minorities was established.¹³⁰ It was not, however, until the adoption of the International Covenant on Civil and Political Rights in 1966 that the question of minority rights came back onto the international agenda. Article 27 of this Covenant provides that ‘in those states in which ethnic, religious or linguistic minorities exist, persons belonging to such minorities shall not be denied the right, in community with the other members of their group, to enjoy their own culture, to profess and practise their own religion, or to use their own language’.

This modest and rather negative provision as formulated centres upon ‘persons belonging’ to minorities rather than upon minorities as such and does not define the concept of minorities.¹³¹ Nevertheless, the UN Human Rights Committee has taken the opportunity to consider the issue in discussing states’ reports, individual petitions and in a General Comment. In commenting upon states’ reports made pursuant to the International Covenant, the Committee has made clear, for example, that the rights under article 27 apply to all members of minorities within a state party’s territory and not just nationals,¹³² and it has expressed concern with regard to the treatment of minorities within particular states.¹³³

In the *Lovelace* case,¹³⁴ the Committee decided that there had been a violation of article 27 with regard to an Indian woman who, by having married a non-Indian, had lost her rights by Canadian law to reside on the Tobique Reserve, something which she wished to do upon the collapse of her marriage. The Committee noted that statutory restrictions affecting the right to residence on a reserve of a person belonging to the minority concerned had to have both a reasonable and objective justification and be consistent with the other provisions of the Covenant read as a whole. This had not been the case. There was no place outside the reserve where her right to access to her native culture and language could be conducted in community with other members of the minority in question.¹³⁵

The Committee adopted a General Comment on article 27 in 1994 after much discussion and hesitation due to fears that such a comment might be perceived to constitute an encouragement to secession.¹³⁶ The General Comment pointed to the distinction between the rights of persons belonging to minorities on the one hand, and the right to self-determination and the right to equality and non-discrimination on the other. It was emphasised that the rights under article 27 did not prejudice the sovereignty and territorial integrity of states, although certain minority rights, in particular those pertaining to indigenous communities, might consist of a way of life closely associated with territory and the use of its resources, such as fishing, hunting and the right to live in reserves protected by law. The Committee, in an important part of the General Comment, underlined that persons belonging to a minority need not be nationals or permanent residents of the state concerned so that migrant workers or even visitors might be protected under article 27. Whether an ethnic, religious or linguistic minority exists was an

objective question, not dependent upon a decision of the state party. Although article 27 is negatively formulated, the Committee pointed out that positive measures of protection were required not only against the acts of the state party itself, but also against the acts of other persons within the state party. Positive measures may also be necessary to protect the identity of the minority concerned and legitimate differentiation was permitted so long as it was based on reasonable and objective criteria.

The UN General Assembly adopted a Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities in December 1992.¹³⁷ Article 1 provides that states ‘shall protect the existence and the national or ethnic, cultural, religious and linguistic identity of minorities within their respective territories’ and shall adopt appropriate legislative and other measures to achieve these ends. The Declaration states that persons belonging to minorities have the right to enjoy their own culture, practise and profess their own religion and use their own language in private and in public without hindrance. Such persons also have the right to participate effectively in cultural, social, economic and public life. The UN Sub-Commission has been considering the question of minorities for many years and in 1994 agreed to establish a five-person inter-sessional working group¹³⁸ to examine peaceful and constructive solutions to situations involving minorities and, in particular, to review the practical application of the Declaration, to provide recommendations to *inter alia* the Sub-Commission and the UN High Commissioner for Human Rights to protect minorities where there is a risk of violence and generally to promote dialogue between minority groups in society and between those groups and governments. In 2005, the Commission on Human Rights appointed an

Independent Expert on Minorities (termed Special Rapporteur as from 2011) with the mandate to promote the implementation of the Declaration; to identify best practices and possibilities for technical cooperation by the Office of the UN High Commissioner for Human Rights at the request of governments; and to cooperate closely with existing relevant UN bodies, while taking into account the views of non-governmental organisations and applying a gender perspective.¹³⁹ In 2012, for example, the UN Network on Racial Discrimination and Protection of Minorities was established bringing together a wide range of UN agencies, departments, programmes and funds.¹⁴⁰

As has been noted, the UN Human Rights Committee has pointed to the special position of indigenous peoples as minorities with a particular relationship to their traditional territory. It has been accepted that such communities form a specific category of minorities with special needs.¹⁴¹ The International Labour Organization adopted Convention No. 107 on Indigenous and Tribal Populations in 1957, an instrument with a predominantly assimilationist approach to the question of indigenous peoples. It was partially revised in Convention No. 169 on Indigenous and Tribal Peoples in Independent Countries 1989. The change in terminology from ‘populations’ to ‘peoples’ is instructive¹⁴² and the latter Convention focuses far more upon the protection of the social, cultural, religious and spiritual values and practices of indigenous peoples. Unlike the prevailing approach to the definition of minorities generally, which intermingles objective and subjective criteria, this Convention stipulates in article 1(2) that ‘self-identification as indigenous or tribal shall be regarded as a fundamental criterion’ for determining the groups to which the Convention applies. The

Sub-Commission recommended that a study of discrimination against indigenous populations should be made and this was completed in 1984.¹⁴³ A definition of indigenous populations was suggested and various suggestions made as to future action. In 1982, the Sub-Commission established a Working Group on Indigenous Populations¹⁴⁴ and a Declaration on the Rights of Indigenous Peoples was finally adopted in 2007.¹⁴⁵

The Declaration notes that indigenous peoples have the right to the full enjoyment, as a collective or as individuals, of all human rights and fundamental freedoms as recognised in the UN Charter, the Universal Declaration of Human Rights and international human rights law (article 1). They have the right to self-determination (article 3) and, in exercising their right to self-determination, have the right to autonomy or self-government in matters relating to their internal and local affairs, as well as ways and means for financing their autonomous functions (article 4). They further have the right to maintain and strengthen their distinctive political, economic, social and cultural characteristics, as well as their legal systems, while retaining the right to participate fully in the life of the state (article 5), the right to a nationality (article 6) and the collective right to live in freedom and security as distinct peoples free from any act of genocide or violence (article 7(2)).¹⁴⁶ An expert mechanism, consisting of five independent experts, on the rights of indigenous peoples was called for in Human Rights Council resolution 6/36, 2007, in order to provide the Council with thematic expertise.

The question of an American Declaration on Indigenous Peoples has also been under discussion within the Organization of American States.¹⁴⁷ The Inter-American Court of Human Rights discussed the issue of the rights of

indigenous peoples to ancestral lands and resources in *Mayagna (Sumo) Awas Tingni Community v. Nicaragua* in 2001.¹⁴⁸ The Court emphasised the communitarian tradition regarding a communal form of collective property of the land and consequential close ties of indigenous people with that land,¹⁴⁹ and noted that the customary law of such people had especially to be taken into account so that ‘possession of the land should suffice for indigenous communities lacking real title’.¹⁵⁰ In *Sawhoyamaxa Indigenous Community v. Paraguay*, the Court emphasised that the close ties of members of the indigenous communities with their traditional lands and the natural resources associated with their culture had to be secured under article 21 of the Inter-American Convention on Human Rights concerning the right to the use and enjoyment of property. The Court, in interpreting this provision, also took account of Convention No. 169 of the ILO, which required *inter alia* respect for the special importance for the cultural and spiritual values of the communities concerned of their relationship with their lands. The collective nature of property ownership was also noted.¹⁵¹

In addition, the African Commission on Human and Peoples’ Rights adopted a decision in the *Endorois* case, concerning the eviction of the Endorois people from their ancestral lands in Kenya in order to establish a game reserve. The Commission concluded that the traditional possession of land by indigenous people had the equivalent effect as that of a state-granted full property title and that traditional possession entitled indigenous people to demand official recognition and registration of property title.¹⁵² However, difficulties of implementation ensued.¹⁵³

The UN System – Implementation¹⁵⁴

The UN system has successfully generated a wide-ranging series of international instruments dealing with the establishment of standards and norms in the human rights field.¹⁵⁵ The question of implementation will now be briefly addressed.

Political Bodies

The General Assembly has power under article 13 of the Charter to initiate studies and make recommendations regarding *inter alia* human rights.

Human rights items on its agenda may originate in Economic and Social Council (ECOSOC) reports or decisions taken by the Assembly at earlier sessions to consider particular matters, or are proposed for inclusion by the UN organs, the Secretary-General or member states. Most items on human rights go to the Assembly's Third Committee (Social, Humanitarian and Cultural Committee), but others may be referred to other committees such as the Sixth Committee (Legal), the First Committee (Political and Security) or the Special Political Committee.¹⁵⁶ ECOSOC may, under article 62 of the Charter, make recommendations on human rights, draft conventions for the Assembly and call international conferences on human rights matters. It consists of fifty-four UN members elected by the General Assembly and hears annually the reports of a wide range of bodies, including the UN High Commissioner for Refugees,¹⁵⁷ the UN Children's Fund, the UN Conference on Trade and Development, the UN Environment Programme and the World Food Council. Of its subsidiary bodies, the Commission on Human Rights

and the Commission on the Status of Women have the most direct connection with human rights issues.¹⁵⁸ The Commission on Human Rights¹⁵⁹ was established in 1946 as a subsidiary organ of ECOSOC with extensive terms of reference, including making studies, preparing recommendations and drafting international instruments on human rights.¹⁶⁰ In 1967, having previously taken the view that it had no power to hear complaints about human rights violations, ECOSOC resolution 1235 (XLII) authorised the Commission and its Sub-Commission on Prevention of Discrimination and Protection of Minorities to examine information relevant to gross violations of human rights contained in communications, and to study such situations as revealed a consistent pattern of violations with a view to making recommendations to ECOSOC.¹⁶¹ This constituted the public debate function of the Commission relating to specific situations. The situations in question referred at first primarily to Southern Africa. The Commission also set up an ad hoc working group of experts on South Africa and then working groups on a variety of topics¹⁶² and appointed Special Rapporteurs to deal with situations in specific countries.¹⁶³ A series of informal working groups were created to prepare drafts of international instruments, such as the Declaration on Religious Intolerance, the Convention against Torture and instruments on minority rights and the rights of the child.¹⁶⁴ The Commission also established a Group of Three pursuant to article IX of the Apartheid Convention to consider states' reports under that Convention. In 1970, a new procedure for dealing with human rights complaints was introduced in ECOSOC resolution 1503 (XLVIII).¹⁶⁵ By virtue of this resolution as modified in 2000,¹⁶⁶ the Sub-Commission appointed annually a Working Group on Communications to meet to consider communications received and to pass on to the Sub-Commission those that appeared to reveal 'a consistent

pattern of gross and reliably attested violations of human rights’.¹⁶⁷ The procedure, which was confidential until the final stage, did not fulfil initial high expectations. The confidentiality requirement and the highly political nature of the Commission itself combined to frustrate hopes that had been raised.¹⁶⁸

Despite good work in the field of standard-setting and in drawing attention to abuses of human rights, albeit on rather less than a universalist basis, the Commission began to attract an increasing level of criticism, mainly concerning political selectivity and the failure to review objectively the situation in particular countries.¹⁶⁹ As a result, the Human Rights Council was created to replace the Commission by General Assembly resolution 60/251 on 3 April 2006.

The Council was established with a higher status in the UN hierarchy as a subsidiary organ of the General Assembly with forty-seven members,¹⁷⁰ elected by a majority of members of the Assembly for three years for up to two consecutive terms. The Commission’s special procedures function was retained and a new Universal Periodic Review mechanism established by which the human rights record of all countries would be examined. This was intended as a partial response to the criticisms of the Commission’s selectivity.¹⁷¹ The Council adopted resolution 5/1 on 18 June 2007 entitled ‘United Nations Human Rights Council: Institution-Building’, which ranged over a wide area and established the details of the Universal Periodic Review mechanism. The principles laid down for this mechanism include the universality of human rights, universal coverage and equal treatment of all states and the conduct of the review in an objective, transparent, non-

selective, constructive, non-confrontational and non-politicised manner. This resolution also laid down details for the conduct and review of the special procedures,¹⁷² provided for the creation of the Human Rights Council Advisory Committee, composed of eighteen experts serving in their personal capacity, intended to function as a think-tank for the Council and work at its direction, and provided for the establishment of a confidential complaints procedure based upon the mechanism created by ECOSOC resolution 1503 (1970).¹⁷³ The spectre of politicisation has not, however, vanished.¹⁷⁴

Expert Bodies Established by UN Organs

The Committee on Economic, Social and Cultural Rights¹⁷⁵

The International Covenant on Economic, Social and Cultural Rights was adopted in 1966 and entered into force in 1976. Article 2 provides that each state party undertakes to take steps to the maximum of its available resources ‘with a view to achieving progressively the full realisation of the rights recognised in the present Covenant’. In other words, an evolving programme is envisaged depending upon the goodwill and resources of states rather than an immediate binding legal obligation with regard to the rights in question. The rights included range from self-determination (article 1), the right to work (articles 6 and 7), the right to social security (article 9), and adequate standard of living (article 11) and education (article 13), to the right to take part in cultural life and enjoy the benefits of scientific progress and its applications (article 15).

Under the Covenant itself, states parties were obliged to send periodic reports to ECOSOC.¹⁷⁶ In 1978, a Sessional Working Group was set up, consisting of fifteen members elected by ECOSOC from among states parties for three-year renewable terms. The Group met annually and reported to the Council. It was not a success, however, and in 1985 it was decided to establish a new committee of eighteen members, this time composed of independent experts.¹⁷⁷ Accordingly in 1987 the new Committee on Economic, Social and Cultural Rights commenced operation.¹⁷⁸ But it is to be especially noted that unlike, for example, the Racial Discrimination Committee, the Human Rights Committee and the Torture Committee, the Economic Committee is not autonomous and it is responsible not to the states parties, but to a main organ of the United Nations.

The Committee initially met annually in Geneva for three-week sessions, though it now meets twice per year. Its primary task lies in examining states' reports, drawing upon a list of questions prepared by its pre-sessional working group. The problem of overdue reports from states parties applies here as it does with regard to other human rights implementation committees. The Committee adopted a decision at its sixth session, whereby it established a procedure allowing for the consideration of the situation of particular states where those states had not produced reports for a long time, thus creating a rather valuable means of exerting pressure upon recalcitrant states parties.¹⁷⁹ Additional information may also be requested from states parties where this is felt necessary.¹⁸⁰ The Committee also prepares 'General Comments', the second of which on international technical assistance measures was adopted at its fourth session in 1990.¹⁸¹ The third general comment, adopted in 1991, is of particular interest and underlines that although the Covenant itself

appears promotional and aspirational, nevertheless certain obligations of immediate effect are imposed upon states parties. These include the non-discrimination provisions and the undertaking to take steps which should be taken within a reasonably short time after the Covenant has entered into force for the state concerned and which should be ‘deliberate, concrete and targeted as clearly as possible towards meeting the obligations recognised in the Covenant’. The Committee also emphasised that international cooperation for development, and thus for the realisation of economic, social and cultural rights, was an obligation for all states.¹⁸² The Committee also holds general discussions on particular rights in the form of a ‘day of general discussion’.¹⁸³ In December 2008, the Optional Protocol to the Covenant was adopted by the UN General Assembly, under which the Committee was enabled to hear individual petitions, and was provided with an inter-state complaints competence with regard to states accepting this procedure.¹⁸⁴ Although the Committee was not as such established by treaty, it is now regarded as one of the (currently) ten UN human rights treaty bodies.

Expert Bodies Established under Particular Treaties¹⁸⁵

A number of expert committees have been established under particular treaties. They are not subsidiary organs of the United Nations, but autonomous, although in practice they are closely connected with it, being serviced, for example, by the UN Secretariat through the UN Centre for Human Rights in Geneva.¹⁸⁶ These committees are termed ‘UN Treaty Organs’.

The Committee on the Elimination of Racial

Discrimination¹⁸⁷

Under Part II of the Convention on the Elimination of All Forms of Racial Discrimination 1965, a Committee of eighteen experts was established consisting of persons serving in their personal capacity and elected by the states parties to the Convention.¹⁸⁸ States parties undertook to submit reports every two years regarding measures adopted to give effect to the provisions of the Convention to the Committee, which itself would report annually through the UN Secretary-General to the General Assembly. The Committee may make suggestions and general recommendations based on the examination of the reports and information received from the states parties, which are reported to the General Assembly together with any comments from states parties.¹⁸⁹ The Committee is also able to operate early warning measures and urgent procedures and action has been taken in relation to more than twenty states parties. The Committee has, for example, conducted field visits in connection with the procedure and has drawn the attention of the Secretary-General, the Security Council or other relevant bodies to relevant issues.¹⁹⁰

The Committee has also established a procedure to deal with states whose reports are most overdue. Under this procedure, the Committee proceeds to examine the situation in the state party concerned on the basis of the last report submitted.¹⁹¹

Under article 11, one state party may bring a complaint against another state party and the Committee will seek to resolve the complaint. Should the matter not be so settled, either party may refer it back to the Committee and

by article 12 an ad hoc Conciliation Commission may be established, which will report back to the Committee with any recommendation thought proper for the amicable solution of the dispute.¹⁹² The inter-state communications procedure has been used thus far in three cases: *Qatar v. Saudi Arabia*, *Qatar v. United Arab Emirates* and *Palestine v. Israel*, brought in March and April 2018. In the case of the two Qatari communications, the Committee concluded that it had jurisdiction and that the cases were admissible and, accordingly, decided to establish an ad hoc Conciliation Commission.¹⁹³ In the case of *Palestine v. Israel*, the Committee concluded that it had jurisdiction.¹⁹⁴

In addition to hearing states' reports and inter-state complaints, the Committee may also hear individual petitions under the article 14 procedure. This, however, is subject to the state complained of having made a declaration recognising the competence of the Committee to receive and consider such communications. If such a declaration has not been notified by a state, therefore, the Committee has no authority to hear a petition against the state.¹⁹⁵ Under this procedure, consideration of communications is confidential and the Committee may be assisted by a five-person working group making recommendations to the full Committee. The Committee began hearing individual communications in 1984 and a number of important cases have been completed.¹⁹⁶

The Committee regularly meets twice a year and has interpreted articles of the Convention, discussed reports submitted to it, adopted decisions¹⁹⁷ and general recommendations,¹⁹⁸ obtained further information from states parties and cooperated closely with the International Labour Organization and

UNESCO. Many states have enacted legislation as a consequence of the work of the Committee and its record of impartiality is very good.¹⁹⁹ The general article 9 reporting system appears to work well, with large numbers of reports submitted and examined, but some states have proved tardy in fulfilling their obligations.²⁰⁰ The Committee has published guidelines for states parties as to the structure of their reports.²⁰¹

The Committee, in order to speed up consideration of states' reports, has instituted the practice of appointing country rapporteurs, whose function it is to prepare analyses of reports of states parties.²⁰² The Committee has also called for additional technical assistance to be provided by the United Nations to help in the reporting process, while it has expressed serious concern that financial difficulties are beginning to affect its functioning.²⁰³

Article 22 of the Convention provides that the International Court of Justice would have jurisdiction with regard to a dispute between two or more states parties to the Convention, not settled by negotiation or Convention procedures, at the request of one of the parties. This procedure has been used in a number of cases. In *Georgia v. Russia* (Preliminary Objections),²⁰⁴ the Court upheld one of Russia's preliminary objections and concluded that it did not have jurisdiction as the procedural conditions laid down in article 22 had not been complied with, while in *Ukraine v. Russia* (Preliminary Objections),²⁰⁵ the Court rejected Russia's preliminary objections with regard to article 22 and so will proceed to the merits. In *Qatar v. United Arab Emirates*, a number of provisional measures were indicated by the Court,²⁰⁶ and the matter as of the date of writing is at the stage of preliminary objections to jurisdiction and admissibility.

The Human Rights Committee²⁰⁷

The International Covenant on Civil and Political Rights was adopted in 1966 and entered into force in 1976.²⁰⁸ By article 2, all states parties undertake to respect and to ensure to all individuals within their territory and subject to their jurisdiction the rights recognised in the Covenant. These rights are clearly intended as binding obligations. They include the right of peoples to self-determination (article 1), the right to life (article 6), prohibitions on torture and slavery (articles 7 and 8), the right to liberty and security of the person (article 9), due process (article 14), freedom of thought, conscience and religion (article 18), freedom of association (article 22) and the rights of persons belonging to minorities to enjoy their own culture (article 27).

A Human Rights Committee was established under Part IV of the Covenant. It consists of eighteen independent and expert members, elected by the states parties to the Covenant for four-year terms, with consideration given to the need for equitable geographical distribution and representation of the different forms of civilisation and of the principal legal systems.²⁰⁹ The Committee meets three times a year (in Geneva and New York) and operates by way of consensus.²¹⁰ The Covenant is primarily implemented by means of a reporting system, whereby states parties provide information on the measures adopted to give effect to the rights recognised in the Covenant. Initial reports are made within one year of the entry into force of the Covenant for the state in question and general guidelines have been issued.²¹¹ The Committee has decided that subsequent reports would be required every five years,²¹² and the first of the second periodic reports became due in 1983. The reports are discussed by the Committee with representatives of the state

concerned (following upon the precedent established by the Committee on the Elimination of Racial Discrimination).²¹³ Information may be received from many sources, including from named non-governmental organisations.²¹⁴ The Committee may also seek additional information from the state concerned.²¹⁵ The Committee has also noted that the peoples within a territory of a former state party to the Covenant remain entitled to the guarantees of the Covenant.²¹⁶ Where states parties have failed to report over several reporting cycles, or request a postponement of their scheduled appearance before the Committee at short notice, the Committee may continue to examine the situation in the particular state on the basis of material available to it.²¹⁷

Under article 40(4), the Committee is empowered to make such ‘general comments as it may deem appropriate’. ‘The aim of the Committee is to engage in a constructive dialogue with each reporting state. In 1992, the Committee decided that at the end of the consideration of each state party’s report, specific comments would be adopted referring to the country in question and such comments would express both the satisfaction and the concerns of the Committee as appropriate.’²¹⁸ These specific comments are in a common format and refer to ‘positive aspects’ of the report and ‘principal subjects for concern’, as well as ‘suggestions and recommendations’.²¹⁹ The Committee has also adopted the practice, where a due report has not been forthcoming, of considering the measures taken by the state party in question to give effect to rights in the Covenant in the absence of a report but in the presence of representatives of the state and of adopting provisional concluding observations.²²⁰

The Committee has also adopted a variety of General Comments.²²¹ These comments are generally non-controversial.²²² For example, in April 1989, the Committee adopted a General Comment on the rights of the child, as the process of adopting the Convention on the Rights of the Child neared its climax. It noted the importance of economic, social and cultural measures, such as the need to reduce infant mortality and prevent exploitation. Freedom of expression was referred to, as was the requirement that children be protected against discrimination on grounds such as race, sex, religion, national or social origin, property or birth. Responsibility for guaranteeing the necessary protection lies, it was stressed, with the family, society and the state, although it is primarily incumbent upon the family. Special attention needed to be paid to the right of every child to acquire a nationality.²²³

Under article 41 of the Covenant, states parties may recognise the competence of the Committee to hear inter-state complaints. Both the complainant and the object state must have made such declarations. The Committee will seek to resolve the issue and, if it is not successful, it may under article 42 appoint, with the consent of the parties, an ad hoc Conciliation Commission.²²⁴

The powers of the Human Rights Committee were extended by Optional Protocol I to the Civil and Political Rights Covenant with regard to ratifying states to include the competence to receive and consider individual communications alleging violations of the Covenant by a state party to the Protocol.²²⁵ The individual must have exhausted all available domestic remedies (unless unreasonably prolonged) and the same matter must not be in the process of examination under another international procedure.²²⁶ The

procedure under the Optional Protocol is divided into several stages. The gathering of basic information is done by the Secretary-General and laid before the Working Group on Communications of the Committee, which recommends whether, for example, further information is required from the applicant or the relevant state party and whether the communication should be declared inadmissible. The procedure before the Committee itself is divided into an admissibility and a merits stage. Interim decisions may be made by the Committee and ultimately a ‘final view’ communicated to the parties.²²⁷

An increasing workload, however, began to cause difficulties as the number of parties to the Optional Protocol increased. In order to deal with the growth in applications, the Committee decided at its thirty-fifth session to appoint a Special Rapporteur to process new communications as they were received (i.e. between sessions of the Committee), and this included requesting the state or individual concerned to provide additional written information or observations relevant to the question of the admissibility of the communication.²²⁸ The Committee has also authorised its five-member Working Group on Communications to adopt a decision declaring a communication admissible, providing there is unanimity.²²⁹ The Committee may also adopt interim measures of protection under Rule 92 of its Rules of Procedure 2005. This has been used primarily in connection with cases submitted by or on behalf of persons sentenced to death and awaiting execution.²³⁰ Where the state concerned has disregarded the Committee’s decisions under Rule 92, the Committee has found that the state party has violated its obligations under the Optional Protocol.²³¹

The Committee, however, is not a court with the power of binding decision on the merits of cases. Indeed, in instances of non-compliance with its final views, the Optional Protocol does not provide for an enforcement mechanism, nor indeed for sanctions, although follow-up techniques are being developed in order to address such problems.²³²

The first group of cases concerned complaints against Uruguay, in which the Committee found violations by that state of rights recognised in the Covenant.²³³ In the *Lovelace* case,²³⁴ the Committee found Canada in breach of article 27 of the Covenant protecting the rights of minorities since its law provided that an Indian woman, whose marriage to a non-Indian had broken down, was not permitted to return to her home on an Indian reservation. In the *Mauritian Women* case,²³⁵ a breach of Covenant rights was upheld where the foreign husbands of Mauritian women were liable to deportation, whereas the foreign wives of Mauritian men would not have been.²³⁶

The Committee has dealt with the death penalty issue in several cases²³⁷ and has noted, for example, that such a sentence may only be imposed in accordance with due process rights.²³⁸ The Committee has also taken the view that where the extradition of a person facing the death penalty may expose the person to violation of due process rights in the receiving state, the extraditing state may be in violation of the Covenant.²³⁹ The Committee has also noted that execution by gas asphyxiation would violate the prohibition in article 7 of cruel and inhuman treatment.²⁴⁰ In *Vuolanne v. Finland*,²⁴¹ the Committee decided that the right of a person deprived of liberty to have recourse to the courts was held to apply also to military disciplinary detention. One issue of growing importance concerns the question of the

extraterritorial application of human rights treaties, that is whether a state party to a particular human rights treaty is obliged to apply it outside its own territory where it is acting abroad either by way of its state agents or organs or because it is in control of an area beyond its border. The Committee has consistently taken the view that the Covenant does apply in such circumstances, whether it be with regard to state agents acting abroad²⁴² or with regard to the obligations of Israel within the occupied territories.²⁴³ In the *Yaker* and *Hebbadj* cases,²⁴⁴ the Committee concluded in 2018 that France's law banning the wearing of the niqab (full-face veil) in public places contravened the human rights of its citizens. Interestingly, the European Court of Human Rights had reached the opposite decision earlier.²⁴⁵

It is already apparent that the Committee has proved a success and is performing a very important role in the field of human rights protection.²⁴⁶

The Committee on the Elimination of Discrimination against Women

The Commission on the Status of Women was established in 1946 as one of the functional commissions of ECOSOC and has played a role both in standard-setting and in the elaboration of further relevant instruments.²⁴⁷ The Committee on the Elimination of All Forms of Discrimination against Women was established under article 22 of the 1979 Convention on the Elimination of All Forms of Discrimination against Women.²⁴⁸ This Convention is implemented by means of states' reports. It is composed of twenty-three experts serving in individual capacities for four-year terms. It held its first regular session in October 1982 and it reports annually to the UN

General Assembly through ECOSOC.²⁴⁹ The Committee has provided guidelines to states parties on reporting, whereby initial reports are intended to be detailed and comprehensive with subsequent reports being of an updating nature.²⁵⁰ Since 1990, subsequent reports are examined first by a pre-sessional working group. Following discussion of a report, the Committee provides concluding comments. The Committee, in addition to hearing states' reports, may make suggestions and general recommendations, which are included in the report.²⁵¹ General Recommendation No. 5, for example, called upon states parties to make more use of 'temporary special measures such as positive action, preferential treatment or quota systems to advance women's integration into education, the economy, politics and employment', while General Recommendation No. 8 provided that states parties should take further measures to ensure to women, on equal terms with men and without discrimination, the opportunity to represent their government at the international level.²⁵²

As from 1997, the Committee meets for two sessions a year.²⁵³ An Optional Protocol adopted in 1999 and in force as from December 2000 allows for the right of individual petition provided a number of conditions are met, including the requirement for the exhaustion of domestic remedies. In addition, the Protocol creates an inquiry procedure enabling the Committee to initiate inquiries into situations of grave or systematic violations of women's rights where it has received reliable information of grave or systematic violations by a state party of rights established in the Convention.²⁵⁴ In recent years, the importance of women's rights has received greater recognition.²⁵⁵ In addition, the General Assembly adopted a Declaration on the Elimination of Violence against Women in February 1994,²⁵⁶ and a Special Rapporteur

on Violence against Women, its Causes and Consequences was appointed in 1994.²⁵⁷ The Committee on the Rights of the Child has also discussed the issue of the ‘girl-child’ and the question of child prostitution.²⁵⁸

The Committee against Torture²⁵⁹

The prohibition of torture is contained in a wide variety of human rights²⁶⁰ and humanitarian law treaties,²⁶¹ and has become part of customary international law. Indeed, it is now established as a norm of *jus cogens*.²⁶² Issues concerning torture have come before a number of human rights organs, such as the Human Rights Committee,²⁶³ the European Court of Human Rights²⁶⁴ and the International Criminal Tribunal on the Former Yugoslavia.²⁶⁵

The Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment was signed on 10 December 1984 and entered into force in 1987.²⁶⁶

Torture is defined in article 1 of the Convention against Torture to mean:

Any act by which severe pain or suffering, whether physical or mental, is intentionally inflicted on a person for such purposes as obtaining from him or a third person information or a confession, punishing him for an act he or a third person has committed or is suspected of having committed, or intimidating or coercing him or a third person, or for any

reason based on discrimination of any kind,
when such pain or suffering is inflicted by or at
the instigation of or with the consent or the
acquiescence of a public official or other
person acting in an official capacity. It does not
include pain or suffering arising only from,
inherent in or incidental to lawful sanctions.

The states parties to the Convention are under duties *inter alia* to take measures to prevent such activities in territories under their jurisdiction (article 2), not to return a person to a country where he may be subjected to torture (article 3), to make torture a criminal offence and establish jurisdiction over it (articles 4 and 5),²⁶⁷ to prosecute or extradite persons charged with torture (article 7) and to provide a remedy for persons tortured (article 14).

The Committee against Torture was established under Part II of the Convention against Torture 1984 and commenced work in 1987. It consists of ten independent experts. In an interesting comment on the proliferation of international human rights committees and the dangers of inconsistencies developing, article 17(2) provides that, in nominating experts, states parties should ‘bear in mind the usefulness of nominating persons who are also members of the Human Rights Committee’.

The Committee receives states’ reports (article 19), has an inter-state complaint competence (article 21) and may hear individual communications (article 22). In both the latter cases, it is necessary that the state or states concerned should have made a declaration accepting the competence of the

Committee. Article 20 of the Convention provides that if the Committee receives ‘reliable evidence’ that torture is being systematically practised in the territory of a state party, it may invite the state in question to cooperate in examining the evidence. The Committee may designate one or more of its members to make a confidential inquiry. In doing so, it shall seek the cooperation of the state concerned and, with the latter’s agreement, such an inquiry may include a visit to its territory. The Committee will transmit the findings of the inquiry to the state, together with appropriate comments or suggestions. The proceedings up to this point are to be confidential, but the Committee may, after consulting the state, decide to include a summary account of the results in its annual report. This additional, if cautiously phrased, power may provide the Committee with a significant role.²⁶⁸ It should be noted that states parties have the ability to ‘opt out’ of this procedure if they so wish at the time of signature or ratification, or accession.²⁶⁹

The conduct of the reporting procedure bears much resemblance to the practice of the UN Human Rights Committee.²⁷⁰ Guidelines have been issued for states parties and the discussions with state representatives are held with a view to establishing a constructive dialogue. Many problems facing other treaty bodies also appear with regard to the Committee against Torture, for example, overdue reports and problems relating to implementation of the Convention generally. The Committee may also make comments on states’ reports in the form of concluding observations²⁷¹ and may issue general comments.²⁷² Interim measures of protection may also be granted under Rule 108(1) and this is monitored by the rapporteurs for new complaints and interim measures.²⁷³

The first three cases before the Committee under article 22 were admissibility decisions concerning Argentinian legislation exempting junior military officers from liability for acts of torture committed during the 1976–83 period and its compatibility with the Torture Convention.²⁷⁴ In May 2002, the Committee revised its rules of procedure and established the function of a Rapporteur for follow-up of decisions on complaints submitted under article 22.²⁷⁵ The Committee has held that where substantial grounds exist for believing that the applicant would be in danger of being subjected to torture, the expulsion or return of the applicant by the state party concerned to the state in which he might be tortured would constitute a violation of article 3 of the Convention.²⁷⁶ The Committee has also emphasised that the risk of torture must be assessed on grounds that go beyond mere theory or suspicion. The risk need not be highly probable, but it must be personal and present. While the Committee does give considerable weight to findings of fact made by the organs of the state party concerned, it is not bound by these and has the power of free assessment of the facts arising in the circumstances of each case. It has been particularly underlined that the prohibition enshrined in article 3 of the Convention was an absolute one.²⁷⁷ It has also been noted that where complaints of torture are made during court proceedings, it is desirable that they be elucidated by means of independent proceedings.²⁷⁸ A complaint must be submitted by the alleged victim, or by a close relative or a duly authorised representative, and must first be declared admissible. Requirements include that the matter must not be before another tribunal, that domestic remedies have been exhausted and that the complaint must reach a ‘basic level of substantiation’.²⁷⁹

An Optional Protocol to the Convention to enable the Committee through a new Subcommittee on Prevention to conduct regular visits to places of detention and make recommendations to states parties was adopted by the General Assembly in December 2002 and came into force in 2006. Under the Protocol, states parties must establish a ‘national preventive mechanism’ for the prevention of torture at the domestic level. Visits by the Subcommittee and the national preventive mechanism to any place under the state party’s jurisdiction and control where persons are, or may be, deprived of their liberty must be permitted by the state concerned.²⁸⁰

The Committee on the Rights of the Child²⁸¹

The Convention on the Rights of the Child was adopted by the General Assembly on 20 November 1989.²⁸² It provides that in all actions concerning children, the best interests of the child shall be a primary consideration. A variety of rights are stipulated, including the inherent right to life (article 6); the right to a name and to acquire a nationality (article 7); the right to freedom of expression (article 13); the right to freedom of thought, conscience and religion (article 14); the right not to be subjected to arbitrary or unlawful interference with privacy, family, home or correspondence (article 16); and the right to the enjoyment of the highest attainable standard of health (article 24).

States parties agree to take all appropriate measures to protect the child from all forms of physical and mental violence (article 19) and from economic exploitation (article 32) and the illicit use of drugs (article 33), and there are specific provisions relating to refugees and disabled children. In addition,

states parties agree to respect the rules of international humanitarian law applicable to armed conflicts relevant to children (article 38). This provision was one response to the use of children in the Iran–Iraq war.

Article 43 of the Convention on the Rights of the Child provides for the establishment of a Committee. This Committee, which was elected in 1991, is composed of eighteen independent experts and has the competence to hear states' reports (article 44). The Committee itself submits reports every two years to the General Assembly through ECOSOC. The Committee can recommend to the General Assembly that the Secretary-General be requested to undertake on its behalf studies on specific issues relating to the rights of the child, an innovation in the functions of such treaty bodies, and it can make suggestions and general recommendations (article 45). The Committee (like the Committee on Economic, Social and Cultural Rights) sets aside time for general discussions on particular topics in accordance with Rule 79 of its rules of procedure.²⁸³

As part of the general reporting process, the Committee adopted an urgent action procedure at its second session. Provided that the state concerned has ratified the Convention, that the situation is serious and there is a risk of further violations, the Committee may send a communication to the state 'in a spirit of dialogue' and may request the provision of additional information or suggest a visit.²⁸⁴ At its fourth session, the Committee established a working group to study ways and means whereby the urgent action procedure could be pursued effectively.²⁸⁵ The Committee has produced a set of guidelines concerning states' reports²⁸⁶ and a pre-sessional working group considers these reports and draws up a list of issues needing further clarification which

is sent to the state concerned.²⁸⁷ As is the case with other reporting mechanisms, the state whose report is being considered by the Committee is invited to send representatives to the appropriate meetings. After the process is completed, the Committee issues Concluding Observations in which both the positive aspects of the report considered and the problems identified are noted, together with suggestions and recommendations.²⁸⁸ Various follow-up measures to the consideration of reports exist, but usually they consist of the request for the provision of further information.²⁸⁹ The Committee also issues General Comments.²⁹⁰ An Optional Protocol on a Communications Procedure was adopted in 2011, providing for the Committee to hear petitions by individuals or groups of individuals alleging a breach of the Convention or its two earlier protocols and inter-state complaints and an inquiry mechanism was created for grave or systematic violations.²⁹¹

The Committee on the Protection of Migrant Workers²⁹²

The International Convention on the Protection of the Rights of All Migrant Workers and Members of Their Families was adopted by the General Assembly and opened for signature in December 1990 and came into force on 1 April 2003. The Convention defines a migrant worker as ‘a person who is to be engaged, is engaged, or has been engaged in a remunerated activity in a state of which he or she is not a national’ (article 2). This includes, for example, frontier and seasonal workers, workers on offshore installations and specified-employment workers, but excludes employees of international organisations or official state employees abroad, refugees, stateless persons, students and workers on offshore installations who have not been admitted to

take up residence and engage in a remunerated activity in the state of employment (article 3).

Migrant workers are entitled to equality of treatment with nationals in areas such as matters before courts and tribunals (article 18), terms of employment (article 25), freedom to join trade unions (article 26), medical treatment (article 28), access to education for their children (article 30) and respect for cultural identity (article 31). Migrant workers are protected from collective expulsion (article 22). Further provisions deal with additional rights for migrant workers and members of their families in a documented or regular situation (Part IV).

The Convention provided for the creation of a Committee of fourteen independent experts (Part VII). States parties are required to provide reports on measures taken to give effect to the provisions of the Convention (article 73). An inter-state complaints procedure is provided for in article 76, on the condition that the states concerned have made a declaration expressly recognising the competence of the Committee to hear such complaints, while under article 77 an individual complaints procedure can be used with regard to states that have made a declaration recognising the competence of the Committee in this regard.²⁹³

The Committee on the Rights of Persons with Disabilities²⁹⁴

The Convention on the Rights of Persons with Disabilities was adopted in December 2006 and came into force on 3 May 2008. The Convention

provides for the prohibition of discrimination against persons with disability and for equality of opportunity and accessibility. States parties are to undertake immediate, effective and appropriate measures to raise awareness and combat prejudices and harmful practices (articles 5–9). An eighteen-person Committee examines states' reports on measures taken to give effect to the obligations under the Convention (articles 34–36). States parties to the Optional Protocol, which also came into force on 3 May 2008, recognise the competence of the Committee to hear individual communications alleging a violation of the Convention against them. Further, where the Committee receives reliable information indicating grave or systematic violations by a state party of Convention rights, the Committee may invite the state to cooperate in the examination of the information and submit observations. The Committee may proceed to conduct an inquiry confidentially. A state party may, however, on signature or ratification of the Optional Protocol, declare that it does not accept the inquiry competence of the Committee. The Committee also issues General Comments.²⁹⁵

The Committee on Enforced Disappearances²⁹⁶

The Convention for the Protection of All Persons from Enforced Disappearance was adopted in December 2006 and entered into force on 23 December 2010. It requires states parties to make enforced disappearance, defined as the deprivation of liberty by agents of the state or persons acting with the support or acquiescence of the state coupled with the refusal to acknowledge the deprivation of liberty or concealment of the fate of the person in question (article 2), a criminal law offence (article 4). It is stated to be a crime against humanity (article 5). A ten-person Committee on Enforced

Disappearances is provided for to examine states' reports on measures taken to give effect to the obligations under the Convention (article 29), to hear inter-state complaints (article 32) and to hear individual communications concerning a state party which has accepted this competence of the Committee (article 31). The Committee may also, upon receiving a request for urgent action, transmit a request to the state party concerned to take interim measures to locate and protect the person in question (article 30). Article 32 provides for inter-state complaints. Where the Committee receives reliable information indicating a serious violation, it may seek, in consultation with the state party concerned, to organise a visit (article 33). Further, where the Committee receives information appearing to contain well-founded indications that enforced disappearance is being practised on a widespread or systematic basis in the territory under the jurisdiction of a state party, it may, after seeking information from the state, urgently bring the matter to the attention of the General Assembly through the Secretary-General (article 34).

Conclusions

Most international human rights conventions obligate states parties to take certain measures with regard to the provisions contained therein, whether by domestic legislation or otherwise.²⁹⁷ In addition, all nine of the treaty bodies (plus the Committee on Economic, Social and Cultural Rights) discussed above require states parties to make periodic reports.²⁹⁸ Nine have the competence to consider individual communications,²⁹⁹ seven may consider inter-state complaints,³⁰⁰ while six have the competence to inquire into allegations of grave or systematic violations.³⁰¹

The proliferation of committees raises problems concerned both with resources and with consistency.³⁰² The question of resources is a serious and ongoing difficulty. The Vienna Declaration and Programme of Action 1993 emphasised the necessity for a substantial increase in the resources for the human rights programme of the United Nations and particularly called for sufficient funding to be made available to the UN Centre for Human Rights, which *inter alia* provides the administrative support for the human rights organs and committees discussed in this chapter.³⁰³ The various human rights committees themselves have pointed to the resource problem.³⁰⁴ The Committee on the Elimination of Racial Discrimination and the Committee against Torture changed their financing system so that, since January 1994, they have been financed under the regular budget of the United Nations.³⁰⁵ The Committee on Economic, Social and Cultural Rights sought additional resources from the Economic and Social Council.³⁰⁶ Nevertheless, the fact remains that human rights activity within the UN system is seriously underfunded.

The question of consistency in view of the increasing number of human rights bodies within the UN system has been partially addressed by the establishment of an annual system of meetings between the chairpersons of the treaty bodies.³⁰⁷ Issues of concern have been discussed, ranging from the need to encourage states to ratify all human rights treaties, concern about reservations made to human rights treaties,³⁰⁸ attempts to establish that successor states are automatically bound by obligations under international human rights treaties from the date of independence irrespective of confirmation,³⁰⁹ the formulation of new norms and instruments and the promotion of human rights education, to consideration of the continuing

problem of overdue reports³¹⁰ and the role of non-governmental organisations.³¹¹ The development of early warning and preventive procedures by the committees is to be particularly noted.³¹² The Committee on the Elimination of Racial Discrimination, for example, under its urgent procedures may, since 1994, review the human rights situation in states parties that give rise for especial concern, while the Human Rights Committee is able to request states parties to submit special urgent reports.

A continuing process of seeking to strengthen the human rights treaty bodies is underway.³¹³

It is also to be noted that particular UN Specialised Agencies have human rights mechanisms, especially the International Labour Organization³¹⁴ and UNESCO (the UN Educational, Scientific and Cultural Organization).³¹⁵

The Regional Protection of Human Rights

Europe³¹⁶

The European Convention on Human Rights³¹⁷

The European Convention on Human Rights functions under the auspices of the Council of Europe, which was founded in 1949 as a European organisation for encouraging and developing intergovernmental and interparliamentary cooperation. Its aim as laid down in article 1 of the Statute is to achieve a greater unity between member states for the purpose of safeguarding and realising the ideals and principles which are their common heritage and facilitating their economic and social progress. The principles of

the Council of Europe as established in article 3 of the Statute include pluralist democracy, respect for human rights and the rule of law. Its principal organs are the Committee of Ministers, consisting of the Foreign Ministers of member states, and a Parliamentary Assembly, consisting of delegations of members of national parliaments, together with a Secretary-General and supporting secretariat. There are currently forty-seven members.³¹⁸ In 1999, the Council of Europe established the office of the Commissioner for Human Rights within the General Secretariat to promote education and awareness in the field of human rights.³¹⁹ The Commissioner may also issue opinions,³²⁰ make recommendations³²¹ and undertake visits.³²²

The European Convention on Human Rights was signed on 4 November 1950 and entered into force in September 1953.³²³ Together with the fifteen Protocols currently in force, it covers a wide variety of primarily civil and political rights.³²⁴ The preamble notes that the European states are like-minded and have a common heritage of political tradition, ideals, freedoms and the rule of law. The rights covered in the Convention itself include the right to life (article 2), prohibition of torture and slavery (articles 3 and 4), right to liberty and security of person (article 5), right to a fair and public hearing within a reasonable time by an independent and impartial tribunal established by law (article 6), prohibition of retroactive criminal legislation (article 7), right to respect for private and family life (article 8), freedom of thought, conscience and religion (article 9), freedom of expression (article 10), freedom of assembly and association (article 11), the right to marry and found a family (article 12), the right to an effective remedy before a national authority if one of the Convention rights or freedoms is violated (article 13) and a non-discrimination provision regarding the enjoyment of rights and

freedoms under the Convention (article 14). In addition, several protocols have been added to the substantive rights protected under the Convention. Protocol No. 1 protects the rights of property, education and free elections by secret ballots; Protocol No. 4 prohibits imprisonment for civil debt and protects *inter alia* the rights of free movement and choice of residence and the right to enter one's own country; and Protocol No. 6 provides for the abolition of the death penalty; while Protocol No. 7 provides *inter alia* that an alien lawfully resident in a state shall not be expelled therefrom except in pursuance of a decision reached in accordance with the law, that a person convicted of a criminal offence shall have the right to have that conviction or sentence reviewed by a higher tribunal and that no one may be tried or punished again in criminal proceedings for an offence for which he has already been finally acquitted or convicted. Protocol No. 12 prohibits discrimination, while Protocol No. 13 abolishes the death penalty. Protocol No. 14 is discussed below.³²⁵ Protocol No. 16, which came into force in 2018, allows the highest courts and tribunals of a state party to request the Court to give advisory opinions on questions of principle relating to the interpretation or application of the rights and freedoms defined in the Convention or the Protocols thereto.

Like other international treaties, the European Convention imposes obligations upon states parties to respect a variety of provisions. In this instance the Convention has also been incorporated into the domestic legislation of all current states parties,³²⁶ although the Convention does not provide as to how exactly the states parties are to implement internally the relevant obligations.³²⁷ It has been emphasised that,

unlike international treaties of the classic kind, the Convention comprises more than mere reciprocal engagements between contracting states. It creates, over and above a network of mutual and bilateral undertakings, objective obligations, which in the words of the preamble, benefit from a ‘collective enforcement’.³²⁸

In addition, a more teleological and flexible approach to the interpretation of the Convention has been adopted.³²⁹ The European Court of Human Rights has emphasised that the Convention is a living instrument to be interpreted in the light of present-day conditions and this approach applies not only to the substantive rights protected under the Convention, but also to those provisions which govern the operation of the Convention’s enforcement machinery.³³⁰ In addition, the Court has noted that the object and purpose of the Convention as an instrument for the protection of individuals requires that its provisions be interpreted and applied so as to make its safeguards practical and effective.³³¹ The Convention should also be interpreted as far as possible in harmony with other principles of international law.³³² It has been emphasised that the Convention constitutes a ‘constitutional instrument of European public order (“ordre public”)’.³³³

The Convention applies, of course, within the territory of contracting states,³³⁴ but the issue of its extraterritorial application has been addressed. The Court has interpreted the concept of ‘jurisdiction’ under article 1 to include the possibility of application to extradition or expulsion of a person

by a contracting state to the territory of a non-contracting state³³⁵ and the situation where acts of the authorities of contracting states, whether performed within or outside national boundaries, produce effects outside their own territory.³³⁶ Further, in a significant move, the Court in *Loizidou v. Turkey* emphasised that the responsibility of a contracting state may also arise when it exercises effective control or ‘effective overall control’ of an area outside its national territory, irrespective of the lawfulness of such control, whether by the state’s own agents and officials or by the acts of a subordinate local administration.³³⁷ This was underlined in *Banković v. Belgium*, where the Court stated that its recognition of the exercise of extraterritorial jurisdiction by a contracting state was exceptional and that the Convention’s notion of jurisdiction was essentially territorial.³³⁸ These principles were reaffirmed in *Ilaşcu v. Moldova and Russia*, where the Court, while emphasising that jurisdiction was primarily territorial, noted that in exceptional circumstances the state might not be responsible for Convention violations where it was prevented from exercising its authority in a part of its territory, whether as a result of military occupation by the armed forces of another state which effectively controls the territory concerned, acts of war or rebellion, or the acts of a foreign state supporting the installation of a separatist state within the territory of the state concerned.³³⁹ Further, a state’s responsibility will be engaged where, as a consequence of military action, whether lawful or unlawful, it exercises in practice effective control of an area situated outside its national territory. Overall control of an area would suffice and the responsibility of the state would extend not only to the acts of its own soldiers and officials, but also to acts of the local administration which survives there by virtue of its military and other support.³⁴⁰

In *Al-Skeini v. United Kingdom*,³⁴¹ building upon the *Issa* case,³⁴² the Court declared that extraterritorial jurisdiction (which remained as exceptional) flowed not only from effective control over foreign territory,³⁴³ but also from the activities of state officials and agents. It was noted that ‘the use of force by a State’s agents operating outside its territory may bring the individual thereby brought under the control of the State’s authorities into the State’s Article 1 jurisdiction’ and that ‘whenever the State through its agents exercises control and authority over an individual, and thus jurisdiction, the State is under an obligation under Article 1 to secure to that individual the rights and freedoms under Section 1 of the Convention that are relevant to the situation of that individual’.³⁴⁴ Accordingly, as the United Kingdom had assumed authority and responsibility for the maintenance of security in south-east Iraq, its soldiers engaged in security operations in Basrah at the relevant time ‘exercised authority and control over individuals killed in the course of such security operations, so as to establish a jurisdictional link between the deceased and the United Kingdom for the purposes of Article 1 of the Convention’.³⁴⁵ This approach has been reaffirmed in *Hassan v. United Kingdom*, which concerned earlier activities in Iraq.³⁴⁶

Linked with the territorial jurisdictional issue is the question whether the Court has jurisdiction over the states in question (or jurisdiction *ratione personae*) in the light of the involvement of other states or international organisations. In *Behrami v. France*, the Court, in an application against a number of states with regard to activities undertaken as part of the international presence in Kosovo (whether military, KFOR, or civil, UNMIK), had to decide whether the acts in question were attributable or imputable to the states concerned such as to found jurisdiction or whether the

acts were imputable rather to the United Nations. The Court concluded that KFOR was exercising lawfully delegated Chapter VII powers of the UN Security Council so that the impugned action was, in principle, ‘attributable’ to the United Nations and thus not to the states brought before the Court.³⁴⁷

In *Jaloud v. Netherlands*, the argument was that the respondent state was not responsible as its troops on the ground (in Iraq) were effectively subordinate to either the United Kingdom or the United States as the two occupying powers in Iraq at the time or the United Kingdom as the ‘lead nation’ with regard to south-east Iraq commanding the Dutch forces.³⁴⁸ The Court noted that ‘the fact of executing a decision or an order given by an authority of a foreign state is not in itself sufficient to relieve a Contracting State of the obligations which it has taken upon itself under the Convention’ and concluded that the Netherlands troops were not placed ‘at the disposal’ of any foreign power, whether it be Iraq or the United Kingdom or any other power, or that they were ‘under the exclusive direction or control’ of any other state. Accordingly, the Netherlands was responsible under article 1 of the Convention.

In *Al-Jedda v. United Kingdom*, the Court tackled the relationship between the Convention and binding resolutions of the UN Security Council in a situation where article 103 of the UN Charter states that obligations under the Charter have priority over obligations arising under any other international agreement. The Court declared that,

in interpreting its [Security Council]
resolutions, there must be a presumption that
the Security Council does not intend to impose

any obligation on Member States to breach fundamental principles of human rights. In the event of any ambiguity in the terms of a Security Council Resolution, the Court must therefore choose the interpretation which is most in harmony with the requirements of the Convention and which avoids any conflict of obligations. In the light of the United Nations' important role in promoting and encouraging respect for human rights, it is to be expected that clear and explicit language would be used were the Security Council to intend States to take particular measures which would conflict with their obligations under international human rights law.³⁴⁹

The Convention System

With the coming into force of Protocol No. 11 on 1 November 1998, a single permanent and full-time Court was established, so that the former Court and Commission ceased to exist. The system and procedure since the coming into force of Protocol No. 14 will be briefly described. The Court consists of a number of judges equal to that of the contracting parties to the Convention. Judges are elected by the Parliamentary Assembly of the Council of Europe for non-renewable nine-year terms.³⁵⁰ To consider cases before it, the Court may sit in single judges formation, in Committees of three judges, in Chambers of seven judges and in a Grand Chamber of seventeen judges.³⁵¹

The Rules of Court provide for the establishment of at least four Sections, the compositions of which are to be geographically and gender-balanced and reflective of the different legal systems among the contracting states.³⁵² The Chambers of seven judges provided for in the amended Convention are constituted from the Sections, as are the Committees of three judges.³⁵³ The plenary Court is responsible for the election of the President and Vice-Presidents of the Court, the appointment of the Presidents of the Chambers, constituting Chambers and adopting rules of procedure.³⁵⁴

A single judge may declare inadmissible or strike out of the Court's list of cases an individual application, where such a decision can be taken without further examination on the basis of the material supplied by the applicant. This decision shall be final. Where the single judge does not declare an application inadmissible or strike it out, that judge shall forward it to a committee or to a Chamber for further examination.³⁵⁵ A committee may, by a unanimous vote, declare an application inadmissible or strike it out of its list of cases, where such decision can be taken without further examination; or declare it admissible and render at the same time a judgment on the merits, if the underlying question in the case, concerning the interpretation or the application of the Convention or the Protocols thereto, is already the subject of well-established case-law of the Court.³⁵⁶ Where neither of these applies, a Chamber shall decide on the admissibility and merits of individual applications submitted under article 34. The decision on admissibility may be taken separately.³⁵⁷

In ascertaining whether an application is admissible in an inter-state case, the President of the Section to which it has been assigned will appoint a judge as

Judge Rapporteur to examine the application and submit a report.³⁵⁸ Once an application is declared admissible in an individual application, the Chamber may invite the parties to submit further evidence and written observations and a hearing on the merits may be held if the Chamber decides or one of the parties so requests.³⁵⁹ At this point, the respondent government is usually contacted for written observations.³⁶⁰ Where a serious question affecting the interpretation of the Convention or its Protocols is raised in a case, or where the resolution of a question might lead to a result inconsistent with earlier case-law, the Chamber may, unless one of the parties to the case objects, relinquish jurisdiction in favour of the Grand Chamber.³⁶¹ A pilot judgment procedure has also been introduced which enables the Court to identify structural problems underlying repetitive cases and imposing an obligation on states to address those problems. Where several applications with a common cause have been received, the Court can select one or more for priority treatment under the pilot procedure. In a pilot judgment, the Court's task is not only to decide whether a violation of the European Convention on Human Rights occurred in the specific case, but also to identify the systemic problem and to give the state in question clear indications of the type of remedial measures needed to resolve it.³⁶²

The Court may give advisory opinions, although in very restrictive circumstances.³⁶³ In all cases before a Chamber or the Grand Chamber, a contracting party, one of whose nationals is an applicant, shall have the right to submit written comments and to take part in hearings, while the President of the Court may, in the interest of the proper administration of justice, invite any contracting party which is not a party to the proceedings, or any person concerned who is not the applicant, to submit written comments or take part

in hearings.³⁶⁴ Once an application has been declared admissible, the Court will pursue the examination of the case and place itself at the disposal of the parties with a view to securing a friendly settlement.³⁶⁵ If a friendly settlement is reached, the Court will strike the case out of its list.³⁶⁶ Hearings before the Court will be in public unless the Court in exceptional circumstances decides otherwise. The Court will be able to afford just satisfaction to the injured party if necessary, where a violation is found and the domestic law of the contracting party concerned allows only partial reparation to be made.³⁶⁷ Under article 43, within a period of three months from the date of the judgment of the Chamber, any party to the case may, in exceptional cases, request that the case be referred to the Grand Chamber. A panel of five judges of the Grand Chamber will accept this request if the case raises a serious question affecting the interpretation or application of the Convention or Protocols, or a serious issue of general importance. If the panel does accept the request, the Grand Chamber will decide the case by means of a judgment. Judgments of the Grand Chamber will be final, as will those of a Chamber where the parties declare that they will not request that the case be referred to the Grand Chamber, or three months after the date of judgment if reference to the Grand Chamber has not been requested, or when the panel of the Grand Chamber rejects the request to refer. The final judgment will be published³⁶⁸ and is binding upon the parties,³⁶⁹ and it will be transmitted to the Committee of Ministers, which shall supervise its execution.³⁷⁰

The Convention provides for the right of both inter-state and individual application. Under article 33, any contracting state may institute a case against another contracting state. To date, applications have been lodged with

the Commission by states involving a variety of situations.³⁷¹ Such applications are a means of bringing to the fore an alleged breach of the European public order, so that, for example, it is irrelevant whether the applicant state has been recognised by the respondent state.³⁷² Article 34 provides for the right of individual petition to the Commission and this has proved to be a crucial provision.³⁷³ This right is now automatic.³⁷⁴ The Convention system does not contemplate an *actio popularis*.³⁷⁵ Individuals cannot raise abstract issues, but must be able to claim to be the victim of a violation of one or more of the Convention rights.³⁷⁶

The Court may only deal with a matter once all domestic remedies have been exhausted according to the generally accepted rules of international law and within a period of six months from the date on which the final decision was taken.³⁷⁷ Such remedies must be effective. Where there are no domestic remedies to exhaust, the act or decision complained against will itself normally be taken as the ‘final decision’ for the purposes of article 26.³⁷⁸ The need to exhaust domestic remedies applies also in the case of inter-state cases, as does the six-month rule.³⁷⁹ In addition, no petition may be dealt with which is anonymous or substantially the same as a matter already examined, and any petition which is incompatible with the Convention, manifestly ill-founded³⁸⁰ or an abuse of the right of petition is to be rendered inadmissible.³⁸¹ Further, an application shall be declared inadmissible where the applicant has not suffered a significant disadvantage, unless respect for human rights as defined in the Convention and the Protocols thereto requires an examination of the application on the merits and provided that no case may be rejected on this ground which has not been duly considered by a domestic tribunal.³⁸²

The Court, in an ever-increasing number of judgments,³⁸³ has developed a jurisprudence of considerable importance.³⁸⁴ It has operated on the basis of a number of evolving principles. In particular, the Court will allow states a degree of leeway in a system composed of obligations of contracting states and a European-level supervisory mechanism. The doctrine of ‘the margin of appreciation’ means that the Court will not interfere in certain domestic spheres while retaining a general overall supervision. For example, in *Brannigan and McBride v. United Kingdom*, the Court held that states benefit from a ‘wide margin of appreciation’ with regard to the process of determining the existence and scope of a public emergency permitting derogation from certain provisions of the Convention under article 15.³⁸⁵ This margin of appreciation will vary depending upon the content of the rights in question in substantive proceedings or on the balancing of rights in contention. It will be wider with regard to issues of personal morality,³⁸⁶ but narrower in other cases.³⁸⁷ The essential point is, as the Court noted in *Z v. United Kingdom*, that: ‘It is fundamental to the machinery of protection established by the Convention that the national systems themselves provide redress for breaches of its provision, the Court exercising its supervisory role subject to the principle of subsidiarity.’³⁸⁸ This also means that the Court is wary of undertaking fact-finding³⁸⁹ and similarly cautious about indicating which measures a state should take in order to comply with its obligations under the Convention.³⁹⁰

The Court has dealt with a number of critical issues. In *Ireland v. United Kingdom*,³⁹¹ for example, the Court found that the five interrogation techniques used by the UK Forces in Northern Ireland amounted to a practice of inhuman and degrading treatment, contrary to article 3, but not torture.³⁹²

In *McCann v. United Kingdom*,³⁹³ the Court narrowly held that the killing by members of the security forces of three members of an IRA unit suspected of involvement in a bombing mission in Gibraltar violated the right to life under article 2. In *Golder v. United Kingdom*,³⁹⁴ the Court inferred from article 6(1) a fundamental right of access to the courts, and the Court has emphasised the importance of fair trial mechanisms such as the principle of contempt of court.³⁹⁵ The Court has also developed a considerable jurisprudence in the field of due process³⁹⁶ that is having a significant impact upon domestic law, not least in the United Kingdom. A brief reference to some further examples will suffice. In the *Marckx* case,³⁹⁷ the Court emphasised that Belgian legislation discriminating against illegitimate children violated the Convention, while in the *Young, James and Webster* case,³⁹⁸ it was held that railway workers dismissed for refusing to join a trade union in the United Kingdom were entitled to compensation. In the *Brogan* case,³⁹⁹ the Court felt that periods of detention under anti-terrorist legislation in the United Kingdom before appearance before a judge or other judicial officer of at least four days violated the Convention. This decision, however, prompted a notice of derogation under article 15 of the Convention by the UK government.⁴⁰⁰

In the important *Soering* case,⁴⁰¹ the Court unanimously held that the extradition of a German national from the United Kingdom to the United States, where the applicant feared he would be sentenced to death on a charge of capital murder and be subjected to the ‘death row’ phenomenon, would constitute a breach of article 3 of the Convention prohibiting torture and inhuman and degrading treatment and punishment. Further, the Court has held that the deportation to Iran of a woman who in the circumstances would have been at risk of punishment by stoning would violate article 3.⁴⁰² The

Court has also emphasised that national security considerations had no application where article 3 violations were in question.⁴⁰³

The Court has approached its task in a generally evolving way. For example, it has deduced from a number of substantive provisions that circumstances may arise in which a state would have a positive obligation to conduct an inquiry or effective official investigation. This would arise, for instance, where individuals have been killed as a result of the use of force by agents of the state,⁴⁰⁴ or while in custody,⁴⁰⁵ or ‘upon proof of an arguable claim that an individual, who was last seen in the custody of agents of the state, subsequently disappeared in a context which may be considered life-threatening’.⁴⁰⁶ Similarly, the Court has held that the right to life under article 2 entails also the obligation upon states to take appropriate steps for the safeguarding of life within the jurisdiction.⁴⁰⁷ Linked with these provisions is article 13, which requires the state party to provide a remedy, effective in law and in practice, which is able both to deal with the substance of the applicant’s complaint and to provide an appropriate legal redress.⁴⁰⁸ The jurisprudence of the Court with regard to article 13 demonstrates that in an increasing number of cases that provision is understood as requiring states to undertake an effective investigation into arguable claims of the violation of Convention rights. This has included claims of violations of articles 2, 3, 5 and 6.⁴⁰⁹

Execution of Court decisions is the responsibility of the Committee of Ministers.⁴¹⁰ This is a political body, the executive organ of the Council of Europe,⁴¹¹ and consists of the Foreign Ministers, or their deputies, of all the member states.⁴¹²

Where the Court has found a violation, the matter will be placed on the agenda of the Committee of Ministers and will stay there until the respondent government has confirmed that any sum awarded in just satisfaction under article 41 has been paid and/or any required individual measure has been taken and/or any general measures have been adopted preventing new similar violations or putting an end to continuing violation.⁴¹³ Article 16 of Protocol No. 14 (amending article 46 of the Convention) provides for referral of a matter back to the Court by the Committee for a ruling on interpretation of a judgment where the judgment is ‘hindered by a problem of interpretation’ and where a state refuses to abide by a final judgment in a case to which it is a party.⁴¹⁴

The European Social Charter⁴¹⁵

The Charter⁴¹⁶ consists of a statement of long-term objectives coupled with a list of more restricted rights. The Charter covers labour rights and trade union rights,⁴¹⁷ the protection of specific groups such as children, women, disabled persons and migrant workers,⁴¹⁸ social security rights⁴¹⁹ and protection of the family.⁴²⁰ In an attempt to deal with economic disparities within Europe, the Charter provides for a system whereby only ten of the forty-five paragraphs (including five ‘key articles’⁴²¹) need to be accepted upon ratification. The Charter⁴²² is implemented by the European Committee of Social Rights, consisting of fifteen independent experts elected for a six-year period, renewable once. States parties submit annual reports on some of the provisions of the Charter. These provisions have been divided since 2007 into four thematic groups, each group being the subject of an annual review.⁴²³ These reports are examined by the Committee and its conclusions published.

If a state does not implement a Committee decision, the Committee of Ministers addresses a recommendation to the state to the same effect. A system of Collective Complaints was established by an Additional Protocol adopted in 1995. This provides that international organisations of employers and trade unions, other international non-governmental organisations with consultative status with the Council of Europe placed on a list for this purpose by the Governmental Committee, and representative national organisations of employers and trade unions within the jurisdiction of the contracting party against which they have lodged a complaint may submit complaints alleging unsatisfactory application of the Charter.⁴²⁴ Contracting parties may also make a declaration recognising the right of any other representative national non-governmental organisation within their jurisdiction which has particular competence in the matters governed by the Charter to lodge complaints against them.⁴²⁵ Such complaints are lodged with the European Committee of Social Rights, which makes a decision on both admissibility and on the merits. Its decision is sent to the parties concerned and to the Committee of Ministers, which adopts a resolution on the matter.

The European Convention for the Prevention of Torture and Inhuman and Degrading Treatment or Punishment⁴²⁶

This innovative Convention was signed in 1987 and came into force on 1 February 1989.⁴²⁷ The purpose of the Convention is to enable the supervision of persons deprived of their liberty and, in particular, to prevent the torture or other ill-treatment of such persons.⁴²⁸ The Committee for the Prevention of Torture was established under the Convention,⁴²⁹ placing, as it has noted, a ‘proactive non-judicial mechanism alongside the existing reactive judicial

mechanisms of the European Commission and European Court of Human Rights'.⁴³⁰ The Committee is given a fact-finding and reporting function. The Committee is empowered to carry out both visits of a periodic nature and ad hoc visits to places of detention in order to examine the treatment of persons deprived of their liberty with a view to strengthening, if necessary, the protection of such persons from torture and from inhuman or degrading treatment or punishment. Periodic visits are carried out to all contracting parties on a regular basis, while ad hoc visits are organised when they appear to the Committee to be required in the circumstances.⁴³¹ Thus, periodic visits are planned in advance.⁴³² The real innovation of the Convention, however, lies in the competence of the Committee to visit places of detention when the situation so warrants.⁴³³ When the Committee is not in session, the Bureau (i.e. the President and Vice-President of the Committee)⁴³⁴ may in cases of urgency decide, on the Committee's behalf, on the carrying out of such an ad hoc visit.⁴³⁵ States parties agree to permit visits to any place within their jurisdiction where persons are deprived of their liberty by a public authority,⁴³⁶ although in exceptional circumstances, the competent authorities of the state concerned may make representations to the Committee against a visit at the time or place proposed on grounds of national defence, public safety, serious disorder, the medical condition of a person or because an urgent interrogation relating to a serious crime is in progress.⁴³⁷ The Committee may interview in private persons deprived of their liberty and may communicate freely with any person whom it believes can supply relevant information.⁴³⁸

After each visit, the Committee draws up a report for transmission to the party concerned. That report will remain confidential⁴³⁹ unless and until the

state party concerned decides to make it public.⁴⁴⁰ Where a state refuses to cooperate or to improve matters in the light of recommendations made, the Committee may decide, after the state has had an opportunity to make known its views, by a two-thirds majority to issue a public statement.⁴⁴¹ The Committee makes an annual general report on its activities to the Committee of Ministers, which is transmitted to the Parliamentary Assembly and made public.⁴⁴² The relationship between the approach taken by the Committee as revealed in its published reports and the practice under the European Human Rights Convention is particularly interesting and appears to demonstrate that the Committee has adopted a more flexible attitude to issues relating to detention and ill-treatment.⁴⁴³

The Council of Europe Framework Convention for the Protection of National Minorities⁴⁴⁴

The question of minorities is addressed in the European Convention on Human Rights only in terms of one possible ground of prohibited discrimination stipulated in article 14. However, the Council of Europe has been dealing with the issue of minorities in a more vigorous manner in more recent years. Resolution 192 (1988) of the Standing Conference of Local and Regional Authorities of Europe proposed the text of a European Charter for Regional or Minority Languages, while Recommendation 1134 (1990) of the Parliamentary Assembly on the Rights of Minorities called for either a protocol to the European Convention or a special convention on this topic.⁴⁴⁵ The Committee of Ministers adopted on 22 June 1992 the European Charter for Regional or Minority Languages.⁴⁴⁶ Under this Charter, a variety of measures to promote the use of regional or minority languages is suggested,

for example, in the fields of education, court proceedings, public services, media, cultural facilities, economic and social life, and transfrontier exchanges. Implementation is by periodic reports to the Secretary-General of the Council of Europe in a form prescribed by the Committee of Ministers.⁴⁴⁷ The Secretary-General also makes a two-yearly detailed report to the Parliamentary Assembly on the application of the Charter.⁴⁴⁸ The Committee of Ministers may invite any non-member state of the Council of Europe to accede to the Charter.⁴⁴⁹

The Framework Convention for the Protection of National Minorities was adopted by the Committee of Ministers of the Council of Europe on 10 November 1994 and opened for signature on 1 February 1995.⁴⁵⁰ The Framework Convention underlines the right to equality before the law of persons belonging to national minorities and prohibits discrimination based on belonging to a national minority. Contracting parties to the Framework Convention undertake to adopt, where necessary, adequate measures to promote in all areas of economic, social, political and cultural life, full and effective equality between persons belonging to a national minority and to the majority.⁴⁵¹ The parties agree to promote the conditions necessary for persons belonging to minorities to develop their culture and to preserve the essential elements of their identity, namely their religion, language, traditions and cultural heritage.⁴⁵² The collective expression of individual human rights of persons belonging to national minorities is to be respected,⁴⁵³ while in areas inhabited by such persons traditionally or in substantial numbers, the parties shall endeavour to ensure as far as possible the condition which would make it possible to use the minority languages in relations between those persons and the administrative authorities.⁴⁵⁴ By article 15, the parties agree

to refrain from measures which alter the geographic proportions of the population in areas inhabited by persons belonging to national minorities.

The implementation of this Framework Convention is monitored by the Committee of Ministers of the Council of Europe⁴⁵⁵ with the assistance of an advisory committee of experts⁴⁵⁶ and on the basis of periodic reports from contracting states.⁴⁵⁷ The Committee of Ministers adopted rules on monitoring arrangements in 1997⁴⁵⁸ and the Advisory Committee started operating in June 1998. The Committee examines state reports, which are made public by the Council of Europe upon receipt from the state party, and prepares an opinion on the measures taken by that party.⁴⁵⁹ The Committee may request additional information from a state party or other sources, including individuals and NGOs, but cannot deal with individual complaints. Having received the opinion of the Advisory Committee, the Committee of Ministers will take the final decisions (called conclusions) concerning the adequacy of the measures taken by the state party. Where appropriate, it may also adopt recommendations in respect of the state party concerned. The conclusions and recommendations of the Committee of Ministers shall be made public upon their adoption, together with any comments the state party may have submitted in respect of the opinion delivered by the Advisory Committee. The opinion of the Advisory Committee is as a rule made public together with the conclusions of the Committee of Ministers. A first cycle of monitoring began in 1998 with thirty-four opinions adopted by the Advisory Committee and twenty-nine resolutions adopted by the Committee of Ministers. Such monitoring cycles take place every five years.

While the range of rights accorded to members of minorities is clearly greater than that envisaged in UN instruments,⁴⁶⁰ its ambit is narrower in being confined to ‘national minorities’. The Framework Convention itself provides no definition of that term since no consensus existed as to its meaning.⁴⁶¹ The issue of the protection of minority rights is the subject of continuing discussion as to both their nature and scope.⁴⁶²

The European Union⁴⁶³

The Treaty of Rome 1957 established the European Economic Community and is not of itself a human rights treaty. However, the European Court of Justice has held that subsumed within Community law are certain relevant unwritten general principles of law, emanating from several sources.⁴⁶⁴ The Court noted in the *Internationale Handelsgesellschaft* case⁴⁶⁵ that ‘respect for fundamental rights forms an integral part of the general principles of law protected by the Court of Justice’,⁴⁶⁶ while in *Nold v. EC Commission*,⁴⁶⁷ the Court emphasised that measures incompatible with fundamental rights recognised and protected by the constitutions of member states could not be upheld. It was also held that international treaties for the protection of human rights on which member states have collaborated, or of which they are signatories, could supply guidelines which should be followed within the framework of Community law.⁴⁶⁸ The European Convention on Human Rights is clearly the prime example of this and it has been referred to on several occasions by the Court.⁴⁶⁹ It is intended that the European Union will accede to the European Convention on Human Rights. The effect of this would be to subject the Union and its legal acts to the jurisdiction of the European Court of Human Rights.⁴⁷⁰

The Treaty on European Union (the Maastricht Treaty) 1992 amended the Treaty of Rome and established the European Union, founded on the European Communities supplemented by the policies and forms of cooperation established under the 1992 Treaty. Article F(2) of Title I noted that the Union ‘shall respect fundamental rights’, as guaranteed by the European Convention on Human Rights and as they result from common constitutional traditions, ‘as general principles of Community law’.⁴⁷¹ From the early 1990s, the European Communities began to include human rights references in their trade and aid policies, formalised in article 177(2), and from the mid-1990s, all trade and cooperation agreements contained provisions concerning respect for human rights.⁴⁷²

The Treaty of Amsterdam, which came into force on 1 May 1999, inserted a new article 6 into the Treaty on European Union (now the Consolidated Treaty on European Union since the coming into force of the Treaty of Lisbon in 2009), which stated that the European Union ‘is founded on the principles of liberty, democracy, respect for human rights and fundamental freedoms, and the rule of law, principles which are common to the Member States’, and provided that the Union ‘shall respect fundamental rights as guaranteed by’ the European Convention on Human Rights.⁴⁷³ Member states violating these principles in a ‘serious and persistent’ manner risk the suspension of certain of their rights deriving from the application of the Union Treaty.⁴⁷⁴ In addition, candidate countries have to respect these principles to join the Union.⁴⁷⁵ The European Union adopted the Charter of Fundamental Rights in December 2000,⁴⁷⁶ although its status at that time was uncertain. However, Advocates-General of the European Court of Justice began referring to the Charter with great frequency as part of a shared set of

values within the Union,⁴⁷⁷ as has the Court of First Instance⁴⁷⁸ and more recently the European Court of Justice.⁴⁷⁹ The Charter became binding with the coming into force of the Treaty of Lisbon in 2009.

The European Parliament is also active in consideration of human rights issues.⁴⁸⁰

The OSCE (Organization for Security and Co-operation in Europe)⁴⁸¹

What was initially termed the ‘Helsinki process’, and which more formally was referred to as the Conference on Security and Co-operation in Europe, developed out of the Final Act of the Helsinki meeting, which was signed on 1 August 1975 after two years of discussions by the representatives of the then thirty-five participating states.⁴⁸² The Final Act⁴⁸³ dealt primarily with questions of international security and state relations, and was seen as the method by which the post-war European territorial settlement would be finally accepted. In the Western view, the Final Act constituted a political statement and accordingly could not be regarded as a binding treaty.

Nonetheless, the impact of the Final Act on developments in Europe has far exceeded the impact of most legally binding treaties.

The Final Act set out in ‘Basket I’ a list of ten fundamental principles dealing with relations between participating states, principle 7 of which refers to ‘respect for human rights and fundamental freedoms, including freedom of thought, conscience, religion and belief’. ‘Basket III’ dealt with Co-operation

in Humanitarian and Other Fields and covered family reunification, free flow of information and cultural and educational cooperation.⁴⁸⁴

The Charter of Paris, adopted at the Summit of Heads of State and of Government in 1990,⁴⁸⁵ called for more regular consultations at ministerial and senior official level and marked an important stage in the institutionalisation of the process, with a Council of Foreign Ministers, a Committee of Senior Officials and a secretariat being established. The section on Human Rights, Democracy and Rule of Law consisted of a list of human rights, including the right to effective remedies, full respect for which constituted ‘the bedrock’ for the construction of ‘the new Europe’. The Moscow Human Dimension meeting of 1991⁴⁸⁶ described the Human Dimension mechanism as an essential achievement of the CSCE process and it was strengthened.⁴⁸⁷

By the time of the Helsinki Conference in 1992, the number of participating states had risen to fifty-two,⁴⁸⁸ the political climate in Europe having changed dramatically after the establishment of democratic regimes in Eastern Europe, the ending of the Soviet Union and the rise of tensions in Yugoslavia and other parts of Eastern Europe. At Helsinki, the CSCE was declared to be a regional arrangement in the sense of Chapter VIII of the UN Charter.⁴⁸⁹ The post of High Commissioner on National Minorities was established in order to provide early warning and early action where appropriate, concerning tensions relating to national minority issues that have the potential to develop into a conflict within the CSCE area affecting peace, stability or relations between participating states.⁴⁹⁰ The High Commissioner, who acts in confidence, was also mandated to collect relevant information

and make visits. Where the High Commissioner concludes that there is a *prima facie* risk of potential conflict in such situations, an early warning is to be issued, which will be promptly conveyed by the Chairman-in-Office of the CSCE to the Committee of Senior Officials. The High Commissioner is able to make recommendations to participating states regarding the treatment of national minorities. In addition, a number of general recommendations have been made with regard to Roma and other matters.⁴⁹¹

The next major step in the process took place at Budapest at the end of 1994.⁴⁹² The CSCE, in recognition of the institutional changes underway in recent years, changed its name to the OSCE (the Organization for Security and Co-operation in Europe) and took a number of steps in the field of security and conflict management. The Conference emphasised that human rights, the rule of law and democratic institutions represented a crucial contribution to conflict prevention and that the protection of human rights constituted an ‘essential foundation of democratic civil society’,⁴⁹³ and it was decided that Human Dimension issues would be regularly dealt with by the Permanent Council,⁴⁹⁴ with the Office of Democratic Institutions and Human Rights (based in Warsaw) acting as the main institution of the Human Dimension in an advisory capacity to the organisation, with enhanced roles in election monitoring and the dispatch of missions.⁴⁹⁵ States were encouraged to use the Human Dimension mechanism (now termed the Moscow Mechanism) and the Chairman-in-Office was encouraged to inform the Permanent Council of serious cases of alleged non-implementation of Human Dimension commitments. Further, an OSCE Representative on Freedom of the Media was appointed in 1997 and the role increased in 2004 to include

the task of combating the misuse of hate speech regulations in order to silence legitimate dissent and alternative opinion.⁴⁹⁶

Thus, step by step over recent years, the Helsinki process has transformed itself into an institutional structure with a particular interest in describing and requiring the implementation of human rights.⁴⁹⁷ The OSCE has also established a number of missions in order to help mitigate conflicts⁴⁹⁸ and adopted a Treaty on Open Skies and a Convention on Conciliation and Arbitration in 1992.⁴⁹⁹

The CIS Convention on Human Rights and Fundamental Freedoms⁵⁰⁰

The Commonwealth of Independent States, which links together the former republics of the Soviet Union (with the exception of the three Baltic states), adopted a Convention on Human Rights in May 1995. Under this Convention, a standard range of rights is included, ranging from the right to life, liberty and security of person, equality before the judicial system and respect for private and family life, to freedom of religion, expression, assembly and the right to marry. The right to work is included (article 14), as is the right to social security, the right to education and the right of every minor child to special protective measures (article 17). The right of persons belonging to national minorities to express and develop their ethnic, linguistic, religious and cultural identity is protected (article 21), while everyone has the right to take part in public affairs, including voting (article 29). It is intended that the implementation of the Convention be monitored by the Human Rights Commission of the CIS (article 34). Under Section II of

the Regulations of the Human Rights Commission, adopted in September 1993, states parties may raise human rights matters falling within the Convention with other states parties and, if no satisfactory response is received within six months, the matter may be referred to the Commission. Domestic remedies need to be exhausted. Under Section III of the Regulations, the Commission may examine individual and collective applications submitted by any person or non-governmental organisation. The Convention entered into force on 11 August 1998 upon the third ratification.⁵⁰¹

The Inter-American Convention on Human Rights⁵⁰²

The Inter-American Convention, which came into force in 1978, contains a range of rights to be protected by the states parties.⁵⁰³ The rights are fundamentally those protected by the European Convention, but with some interesting differences.⁵⁰⁴ For example, under article 4, the right to life is deemed to start in general as from conception,⁵⁰⁵ while the prohibition on torture and inhuman or degrading treatment is more extensively expressed and is in the context of the right to have one's physical, mental and moral integrity respected (article 5). In addition, articles 18 and 19 of the Inter-American Convention protect the right to a name and the specific rights of the child, article 23 provides for a general right to participation in the context of public affairs and article 26 provides for the progressive achievement of the economic, social and cultural rights contained in the Charter of the Organization of American States 1948, as amended by the Protocol of Buenos Aires 1967.⁵⁰⁶

The Inter-American Commission on Human Rights was created in 1959 and its first Statute approved by the OAS Council in 1960. In 1971, it was recognised as one of the principal organs of the OAS.⁵⁰⁷ Under its original Statute, it had wide powers to promote the awareness and study of human rights in America and to make recommendations to member states. In 1965, the Statute was revised and the Commission's powers expanded to include *inter alia* the examination of communications. With the entry into force of the 1969 Convention in 1978, the Commission's position was further strengthened. The Commission has powers regarding all member states of the

OAS, not just those that have ratified the Convention, and its Statute emphasises that the human rights protected include those enumerated in both the Convention and the American Declaration of the Rights and Duties of Man.⁵⁰⁸ Article 44 of the Convention provides that any person or group of persons or any non-governmental entity legally recognised in one or more of the OAS states may lodge petitions with the Commission alleging a violation of the Convention by a state party.⁵⁰⁹ Contrary to the European Convention prior to its reform in Protocol 11, this right is automatic, whereas the right of inter-state complaint, again contrary to the European Convention, is under article 45 subject to a prior declaration recognising the competence of the Commission in this regard. The admissibility requirements in articles 46 and 47 are very broadly similar to those in the European Convention, as is the procedure laid down in article 48 and the drawing-up of a report in cases in which a friendly settlement has been achieved.⁵¹⁰ The Commission has dealt with a number of issues in the individual application procedure. During 2019, for example, 733 petitions were opened for processing, and the number of petitions received reached 3,034, with 3,212 pending initial review (having dropped from 6,963 in 2018).⁵¹¹

The Commission has a wide-ranging competence to publicise human rights matters by way of reports, studies, lectures and so forth. It may also make recommendations to states on the adoption of progressive measures in favour of human rights and conduct on-site investigations with the consent of the state in question.⁵¹² It provides states generally with advisory services in the human rights field and submits an annual report to the OAS General Assembly. Many special reports have been published dealing with human rights in particular states, for example, Argentina, Bolivia, Chile, Colombia,

Cuba, Dominican Republic, El Salvador, Guatemala, Haiti, Nicaragua, Paraguay, Suriname and Uruguay.⁵¹³ The Commission has also devoted attention to certain themes, such as disappearances, torture, refugees and economic and social rights, and rights of lesbian, gay and transsexual persons.⁵¹⁴ Special Rapporteurs have been appointed, for example, on the rights of indigenous peoples, the rights of women and the rights of the child.⁵¹⁵ The Inter-American Court of Human Rights has declared that the Commission also has the authority to determine that any domestic law of a state party has violated the obligations assumed in ratifying or acceding to the Convention⁵¹⁶ and that the Commission may consequentially recommend that states repeal or amend the law that is in violation of the Convention. For the Commission to be able to do this, the law may have come to its attention by any means, regardless of whether or not that law is applied in any specific case before the Commission.⁵¹⁷

In 1985, the OAS General Assembly adopted the Inter-American Convention to Prevent and Punish Torture,⁵¹⁸ while in 1988 an Additional Protocol on Economic, Social and Cultural Rights was signed.⁵¹⁹

A Protocol on the Abolition of the Death Penalty was adopted on 8 June 1990⁵²⁰ and a Convention on Forced Disappearances of Persons was adopted on 9 June 1994.⁵²¹ Under article 13 of this Convention, states parties agree that the processing of petitions or communications presented to the Inter-American Commission alleging the forced disappearance of persons will be subject to the procedures established under the Inter-American Convention on Human Rights, the Statute and Regulations of the Commission and the Statute and Rules of the Court. Particular reference is made to precautionary

measures.⁵²² Under article 14, when the Commission receives a petition or communication alleging forced disappearance, its Executive Secretariat shall urgently and confidentially address the respective government and shall request that government to provide as soon as possible information as to the whereabouts of the allegedly disappeared person. The OAS also adopted the Inter-American Convention on the Prevention, Punishment and Eradication of Violence against Women in 1994, which entered into force in March the following year. Article 10 provides that states parties are to include in their national reports to the Inter-American Commission of Women information on measures taken in this area, while under article 11, both states parties and the Commission of Women may request of the Inter-American Court advisory opinions on the interpretations of this Convention. Article 12 provides a procedure whereby any person, group of persons or any non-governmental entity legally recognised in one or more member states of the OAS may lodge petitions with the Inter-American Commission on Human Rights alleging violations of the duties of states under article 7 to pursue without delay and by all appropriate means policies to prevent, punish and eradicate violence against women.⁵²³ The question of indigenous peoples has also been addressed and on 18 September 1995, the Inter-American Commission adopted a Draft Declaration on the Rights of Indigenous Peoples.⁵²⁴

The Commission itself consists of seven members elected in a personal capacity by the OAS General Assembly for four-year terms.⁵²⁵ The Commission may indicate precautionary measures as provided for in article 25 of the Commission's Rules of Procedure. This grants the Commission the power in serious and urgent cases, and whenever necessary according to the information available, either on its own initiative or upon request by a party,

to request that the state concerned adopt precautionary measures to prevent irreparable harm to persons. The Commission may also request information from the interested parties related to any aspect of the adoption and observance of the precautionary measures.⁵²⁶ Of particular interest has been the granting of precautionary measures in favour of individuals captured in connection with the US-led military operation against the former Taliban regime in Afghanistan and the Al-Qaida organisation and their detention at the US naval base at Guantanamo Bay, Cuba.⁵²⁷

Where, in the case of petitions received, a friendly settlement has not been achieved,⁵²⁸ then under article 50 a report will be drawn up, together with such proposals and recommendations as are seen fit, and transmitted to the parties. The Commission may, under article 46 of the Rules of Procedure, adopt the follow-up measures it deems appropriate, such as requesting information from the parties and holding hearings in order to verify compliance with friendly settlement agreements and its recommendations and report thereon. It also publishes a table indicating whether its recommendations have achieved total or partial compliance from the state concerned or whether compliance is pending.⁵²⁹

After its report, a three-month period is then available during which the Commission or the state concerned (but not the individual concerned) may go to the Inter-American Court of Human Rights.⁵³⁰ The Court consists of seven judges serving in an individual capacity and elected by an absolute majority of the states parties to the Convention in the OAS General Assembly for six-year terms.⁵³¹ The jurisdiction of the Court is subject to a prior declaration under article 62. Article 63(2) of the Convention provides that, in cases of

extreme gravity and urgency, and when necessary to avoid irreparable damage to persons, the Court, in matters not yet submitted to it, may adopt such provisional measures as it deems pertinent in matters under its consideration. Where a case has not yet been submitted to it, the Court may act at the request of the Commission. This power has been used on a number of occasions.⁵³²

Under article 64, the Court also possesses an advisory jurisdiction with regard to the interpretation of the Inter-American Convention and other conventions concerning the protection of human rights in the American states at the request of any member state of the OAS. The Court has dealt with a variety of important issues by way of advisory opinions.⁵³³ In *Definition of Other Treaties Subject to the Interpretation of the Inter-American Court*,⁵³⁴ the Court took the view that the object of the Convention was to integrate the regional and universal systems of human rights protection and that, therefore, any human rights treaty to which American states were parties could be the subject of an advisory opinion. In *Effect of Reservations on the Entry into Force of the American Convention on Human Rights*,⁵³⁵ the Court stressed that human rights treaties involve the establishment of legal orders within which obligations are created towards all individuals within their jurisdiction and concluded that an instrument of ratification of adherence containing a reservation compatible with the object and purpose of the Convention does not require acceptance by the other states parties and the instrument thus enters into force as of the moment of deposit.⁵³⁶ In a manner reminiscent of, and clearly influenced by, the European Court of Human Rights, the Inter-American Court stated that human rights treaties were different in nature from traditional multilateral treaties, since they focused not upon the

reciprocal exchange of rights for the mutual benefit of the contracting states, but rather upon the protection of the basic rights of individuals. The obligations were *erga omnes*, rather than with regard to particular other states.⁵³⁷

The Court has also addressed the issue of the relationship between itself and the American Declaration of the Rights and Duties of Man 1948 in the *Interpretation of the American Declaration* case.⁵³⁸ In an opinion likely to be of significance in view of the fact that, for example, the United States is not a party to the Convention, but, as a member of the OAS, has signed the Declaration, the Court stressed that in interpreting the Declaration regard had to be had to the current state of the Inter-American system and that, by a process of authoritative interpretation, the member states of the OAS have agreed that the Declaration contains and defines the human rights norms referred to in the OAS Charter.⁵³⁹ Since the Charter was a treaty, the Court could, therefore, interpret the Declaration under article 64.⁵⁴⁰ In the *Advisory Opinion on the Environment and Human Rights*, the Court held that in the case of large-scale transboundary infrastructure projects, states parties to the Convention could exercise extraterritorial jurisdiction and be responsible for the human rights of the people in the affected areas.⁵⁴¹

The exercise of the Court's contentious jurisdiction was, however, less immediately successful. In the *Gallardo* case,⁵⁴² the Court remitted the claim to the Commission declaring it inadmissible, noting that a state could not dispense with the processing of the case by the Commission, while in the *Velásquez Rodríguez*⁵⁴³ and *Godínez Cruz*⁵⁴⁴ cases, the Court in 'disappearance' situations found that Honduras had violated the

Convention.⁵⁴⁵ In the former case, it was emphasised that states had a legal responsibility to prevent human rights violations and to use the means at their disposal to investigate and punish such violations. Where this did not happen, the state concerned had failed in its duty to ensure the full and free exercise of these rights within the jurisdiction.⁵⁴⁶ In *Loayza Tamayo v. Peru* (Merits), the Court held Peru responsible for a number of breaches of the Convention concerned with the detention and torture of the applicant and for the absence of a fair trial.⁵⁴⁷ In *Chumbipuma Aguirre v. Peru*, the *Barrios Altos* case, the Court tackled the issue of domestic amnesty laws and held that the Peruvian amnesty laws in question were incompatible with the Inter-American Convention and thus void of any legal effect.⁵⁴⁸ The Court has also addressed the question of indigenous peoples in several cases, in which it has emphasised the close ties of such peoples with their traditional lands and the natural resources associated with their culture in the context particularly of the right to the use and enjoyment of property in article 21 of the Convention. It has concluded that the traditional possession of their lands by indigenous peoples has equivalent effects to those of a state-granted full property title; that traditional possession entitles indigenous peoples to demand official recognition and registration of property titles; that members of such peoples who have been obliged to leave their traditional lands maintain property rights thereto even though they lack legal title, unless the lands have been lawfully transferred to innocent third parties; and that, in the latter instance, such members are entitled to restitution thereof or to obtain other lands of equal extension and quality.⁵⁴⁹ It has also decided that a Chilean court was wrong to revoke custody of children on the basis of a woman's sexual orientation.⁵⁵⁰

The Banjul Charter on Human and Peoples' Rights⁵⁵¹

This Charter was adopted by the Organisation of African Unity in 1981 and came into force in 1986. All fifty-four members of the African Union (as the OAU was renamed in 2000) are parties.⁵⁵² The Charter contains a wide range of rights, including in addition to the traditional civil and political rights, economic, social and cultural rights and various peoples' rights. In this latter category are specifically mentioned the rights to self-determination, development and a generally satisfactory environment.⁵⁵³ The reference to the latter two concepts is unusual in human rights instruments and it remains to be seen both how they will be interpreted and how they will be implemented.

One question that is immediately posed with regard to the notion of 'peoples' rights' is to ascertain the definition of a people. If experience with the definition of self-determination in the context of the United Nations is any guide,⁵⁵⁴ and bearing in mind the extreme sensitivity which African states have manifested with regard to the stability of the existing colonial borders,⁵⁵⁵ then the principle is likely to be interpreted in the sense of independent states. This was confirmed in the *Katangese Peoples' Congress v. Zaire*,⁵⁵⁶ where the Commission declared that Katanga was obliged to exercise a variant of self-determination that was compatible with the sovereignty and territorial integrity of Zaire.

The African Charter is the first human rights convention that details the duties of the individual to the state, society and family.⁵⁵⁷ Included are the

duties to avoid compromising the security of the state and to preserve and strengthen social and national solidarity and independence. It remains to be seen whether this distinctive approach brings with it more problems than advantages.

The Charter set up the African Commission on Human and Peoples' Rights, consisting of eleven persons appointed by the Conference of the Heads of State and Government of the OAU for six-year renewable terms, to implement the Charter. The Secretary to the Commission is appointed by the Secretary-General of the Organisation of African Unity. The Commission has important educational and promotional responsibilities,⁵⁵⁸ including undertaking studies, organising conferences, disseminating information and making recommendations to governments. This is quite unlike the European Commission as it used to be prior to Protocol 11, but rather more similar to the Inter-American Commission. The African Commission has developed a range of special mechanisms, including the appointment of Special Rapporteurs (not being independent experts, but Commission members)⁵⁵⁹ and working groups;⁵⁶⁰ and the adoption of country and thematic resolutions.⁵⁶¹

The Commission may hear as of right inter-state complaints.⁵⁶² The first such complaint was brought in 1999 by the Democratic Republic of the Congo alleging *inter alia* that it had been the victim of aggression perpetrated by Burundi, Rwanda and Uganda. The Commission held that the respondent states had contravened the principle of the peaceful settlement of disputes and had violated article 23 of the African Charter concerning the right to peace. It concluded that the three states concerned had occupied parts of the Congo in

violation of the Charter and had committed a series of human rights violations as a consequence.⁵⁶³

Other, non-state, communications may also be sent to the Commission and the terminology used is far more flexible than is the case in the other regional human rights systems.⁵⁶⁴ Where it appears that one or more communications apparently relates to special cases which reveal the existence of a series of serious or massive violations of rights, the Commission will draw the attention of the Assembly of Heads of State and Government to these special cases. The Commission may then be asked to conduct an in-depth study of these cases and make a factual report, accompanied by its finding and recommendations.⁵⁶⁵ The Commission is able to suggest provisional measures where appropriate.⁵⁶⁶ The Commission adopted Rules of Procedure in 1988, which were amended in 1995 and again in 2010 and 2020.⁵⁶⁷ A number of important individual communications have been dealt with.⁵⁶⁸ In addition, there is an obligation upon states parties to produce reports every two years upon the measures taken to implement the rights under the Charter.⁵⁶⁹ The Commission was given authority by the OAU to study the reports and make observations upon them and has indeed adopted guidelines. However, to date, it is fair to conclude that the reporting procedure has encountered serious problems, not least in that many states have failed to submit reports or adequate reports,⁵⁷⁰ while the financial resources difficulties faced by the Commission have been significant.

No provision was made for a Court in the Charter, but a Protocol on the Establishment of an African Court of Human and Peoples' Rights was signed in 1998.⁵⁷¹ Under this Protocol, the Court has advisory, conciliatory and

contentious jurisdiction.⁵⁷² The African Commission, states parties and African intergovernmental organisations have automatic access to the Court,⁵⁷³ but not individuals or non-governmental organisations, whose access depends upon the state concerned having made a declaration accepting the jurisdiction of the Court to hear relevant applications.⁵⁷⁴ A Protocol to the Statute of the African Union was adopted in 2003 concerning establishing the AU Court of Justice. The AU decided to merge the two courts and the Protocol on the Statute of the African Court of Justice and Human Rights accomplishing this was adopted in 2008, replacing the 1998 and 2003 Protocols. This requires that the Constitutive Act of the AU be read in reference to the African Court of Justice and Human Rights. The new Court was to be divided into two Sections, a General Affairs Section and a Human Rights Section, each composed of eight judges. The former has the competence to hear all cases, except those concerning human and/or peoples' rights, which are reserved for the Human Rights Section. Each Section may decide to refer a case to the Full Court for consideration.⁵⁷⁵ A number of other regional courts exist in Africa,⁵⁷⁶ including with regard to Arab states,⁵⁷⁷ and elsewhere.⁵⁷⁸

Turkey* 2 DR 125 at 137–8 (first and second applications) and 13 DR 85, 150–3 (third application), although not with regard to legislative measures nor with regard to administrative actions

in certain circumstances: see e.g. the *Greek Case*, 12 *European Yearbook of Human Rights*, p. 196.

⁴¹ See e.g. article 46(1)(a) of the Inter-American Convention on Human Rights 1969 and article 37 of the Regulations of the Inter-American Commission on Human Rights. See also *Exceptions to the Exhaustion of Domestic Remedies in Cases of Indigency*, IACHR, Advisory Opinion, 1990, 12 HRLJ, 1991, p. 20; and *Annual Report of the Inter-American Commission on Human Rights 1993*, Washington, DC, 1994, pp. 148, 185, 266.

⁴² Article 15. See generally R. Higgins, ‘Derogations Under Human Rights Treaties’, 48 *BYIL*, 1976–77, p. 281.

⁴³ Articles 2, 3, 4(1) and 7.

⁴⁴ Article 27.

⁴⁵ Articles 3, 4, 5, 6, 9, 12, 17, 18, 19, 20 and 23.

⁴⁶ Articles 6, 7, 8(1) and (2), 11, 15, 16 and 18. Note that the Banjul Charter contains no specific derogations clause.

⁴⁷ The fact that a right may not be derogated from may constitute evidence that the right concerned is part of *jus cogens*.

⁴⁸ See e.g. articles 8–11 of the European Convention, articles 12–14, 15–16 and 21–22 of the Inter-American Convention and articles 12, 18, 19, 21 and 22 of the Civil and Political Rights Covenant. See also Higgins, ‘Derogations’.

⁴⁹ See e.g. the due process rights.

⁵⁰ See generally as to the range of human rights issues concerning COVID-19 issues e.g. the World Health Organization, ‘Addressing Human Rights as Key to the COVID-19 Response’ (21 April 2020), www.who.int/publications/i/item/addressing-human-rights-as-key-to-the-covid-19-response. As to the right to health generally, see e.g. J. Tobin, *Right to Health in International Law*, Oxford, 2012; and L. O. Gostin, *Global Health Law*, London, 2014. See also below pp. 737, 753 and 1100.

⁵¹ CCPR/C/128/2.

⁵² The Economic, Social and Cultural Rights Committee noted, E/C.12/2020/1 on 17 April 2020, in addition: ‘All states parties should, as a matter of urgency, adopt special, targeted measures, including through international cooperation, to protect and mitigate the impact of the pandemic on vulnerable groups such as older persons, persons with disabilities, refugees and conflict-affected populations, as well as communities and groups subject to structural discrimination and disadvantage. Such measures include, among others, providing water, soap and sanitizer to communities that lack them; implementing targeted programmes to protect the jobs, wages and benefits of all workers, including undocumented migrant workers; imposing a moratorium on evictions or mortgage bond foreclosures against people’s homes during the pandemic; providing social relief and income-support.’ See also the statements of the Committee on the Elimination of Discrimination against Women, the Committee on the Rights of the Child and the Committee on the Rights of Persons with Disabilities, www.ohchr.org/EN/HRBodies/Pages/COVID-19-and-TreatyBodies.aspx, and the wide-ranging guidance provided by the Office of the UN High Commissioner for Human Rights, www.ohchr.org/EN/NewsEvents/Pages/COVID19Guidance.aspx. See also Council of Europe, ‘Respecting Democracy, Rule of Law and Human Rights in the Framework of the COVID-19 Sanitary Crisis’, SG/Inf (2020) 11 (7 April 2020). As of 10 June 2020, ten states had notified the Council of Europe regarding derogations under article 15 of the European Convention on Human Rights, www.coe.int/en/web/conventions/full-list/-/conventions/webContent/62111354.

⁵³ See e.g. Tobin, *Right to Health*; and *Human Rights in Global Health* (ed. B. M. Meier and L. O. Gostin), Oxford, 2018.

⁵⁴ But see for earlier attempt to deal with international diseases, A. von Bogdandy and P. A. Villarreal, ‘International Law on Pandemic Response: A First Stocktaking in Light of the Coronavirus Crisis’, MPIL Research Paper Series, No. 2020-07.

⁵⁵ See also article 7(ii)(b) concerning the right to enjoy safe and healthy working conditions.

⁵⁶ See further below, p. 271, as to the Committee on Economic, Social and Cultural Rights.

⁵⁷ E/C.12/2000/4, adopted on 11 August 2000.

⁵⁸ See articles 7–13. Note also the role of the Universal Periodic Review process and the right to health, see e.g. J. B. de Mesquito, ‘The Universal Periodic Review: A Valuable New Procedure for the Right to Health’, *21 Health and Human Rights Journal*, 2019, p. 263. See also below, p. 270.

⁵⁹ See e.g. article 5(e)(iv), International Convention on the Elimination of Racial Discrimination 1965; articles 11(1)(f), 12 and 14(2)(b), Convention on the Elimination of Discrimination against Women 1979; article 24, Convention on the Rights of the Child 1989; articles 28, 43(e) and 45(c), International Convention on Migrant Workers 1990; and article 25, Convention on the Rights of Persons with Disabilities 2006.

⁶⁰ See e.g. articles 10 and 11, San Salvador Protocol to the Inter-American Convention on Human Rights 1988; and article 16, African Charter on Human and Peoples’ Rights 1981. See also European Court of Human Rights, *Thematic Report on Health-Related Issues in the Case-law of the European Court of Human Rights*, 2015.

⁸³ See e.g. D. Sanders, ‘Collective Rights’, 13 *HRQ*, 1991, p. 368; and N. Lerner, *Group Rights and Discrimination in International Law*, 2nd ed., The Hague, 2003.

⁸⁴ As to the prohibition of genocide, see below Chapter 7, p. 362.

⁸⁵ See e.g. Rehman, *International Human Rights Law*, chapter 12; W. Vandenhoe, *Non-discrimination and Equality in the View of the UN Human Rights Treaty Bodies*, Antwerp, 2005; Joseph and Castan, *International Covenant*, chapter 23; A. Bayefsky, ‘The Principle of Equality or Non-discrimination in International Law’, 11 *HRLJ*, 1990, p. 1; J. Greenberg, ‘Race, Sex and Religious Discrimination’, in Meron, *Human Rights in International Law*, p. 307; W. McKean, *Equality and Discrimination under International Law*, Oxford, 1983; and T. Meron, *Human Rights Law-Making in the United Nations*, Oxford, 1986, chapters 1–3.

⁸⁶ See e.g. P. Thornberry, *The International Convention on the Elimination of All Forms of Racial Discrimination: A Commentary*, Oxford, 2016; and N. Lerner, *The UN Convention on the Elimination of All Forms of Racial Discrimination*, 2nd ed., Dordrecht, 1980.

⁸⁷ See further below, p. 273. Note also the Convention on the Suppression and Punishment of the Crime of Apartheid 1973.

⁸⁸ See e.g. the Dissenting Opinion of Judge Tanaka in *South West Africa* (Second Phase), ICJ Reports, 1966, pp. 3, 293; 37 ILR, pp. 243, 455.

⁸⁹ See below, p. 275.

⁹⁰ See below, pp. 292 ff.

⁹¹ See e.g. the Declaration on the Elimination of All Forms of Intolerance and of Discrimination Based on Religion or Belief 1981, General Assembly resolution 36/55 and the appointment of a Special Rapporteur to examine situations inconsistent with the Declaration by the UN Commission on Human Rights, resolution 1986/20 of 10 March 1986. See also E. Odio Benito, *Elimination of All Forms of Intolerance and Discrimination Based on Religion or Belief*, New York, 1989; and Report on the Implementation of the Declaration on the Elimination of All Forms of Intolerance and of Discrimination Based on Religion or Belief, E/CN.4/1995/91, 1994. In 2000, the Commission on Human Rights changed the mandate title to ‘Special Rapporteur on freedom of religion or belief’: see ECOSOC decision 2000/261 and General Assembly resolution 55/97. The UN Human Rights Committee has produced a General Comment on article 18 concerning freedom of thought, conscience and religion: see General Comment No. 22, 1993, HRI/GEN/1/Rev.1, 1994; and Joseph and Castan, *International Covenant*, chapter 17. Note also S. Neff, ‘An Evolving International Legal Norm of Religious Freedom: Problems and Prospects’, 7 *California Western International Law Journal*, 1975, p. 543; A. Krishnaswami, *Study of Discrimination in the Matter of Religious Rights and Practices*, New York, 1960, E/CN.4/Sub.2/200/Rev.1; N. Lerner, ‘Towards a Draft Declaration against Religious Intolerance and Discrimination’, 11 *Israel Yearbook on Human Rights*, 1981, p. 82; and *The Changing Nature of Religious Rights under International Law* (ed. M. Evans, P. Petkoff and J. Rivers), Oxford, 2015.

⁹² See the Convention on the Elimination of All Forms of Discrimination against Women 1979, below, p. 280. Article 1 of the Convention provides that discrimination against women means any distinction, exclusion or restriction made on the basis of sex which has the effect or purpose of impairing or nullifying the recognition, enjoyment or exercise by women, irrespective of their marital status, on a basis of equality with men and women, of human rights and fundamental freedoms in the political, economic, social, cultural, civil or any other field. See e.g. McKean, *Equality*, chapter 10; Bayefsky, ‘Equality’; Meron, *Human Rights Law-Making*, chapter 2; R. Cook, ‘Women’s International Human Rights Law’, 15 *HRQ*, 1993, p. 230; and *Human Rights of Women* (ed. R. Cook), Philadelphia, 1994. Note also the UN General Assembly Declaration on Elimination of Violence against Women, 33 ILM, 1994, p. 1049; and the London Declaration of International Law Principles on Internally Displaced Persons adopted by the International Law Association, *Report of the Sixty-Ninth Conference*, London, 2000, p. 794.

⁹³ See also, for example, articles 2(2) and 3 of the International Covenant on Economic, Social and Cultural Rights 1966. See M. C. Craven, *The International Covenant on Economic, Social and Cultural Rights*, Oxford, 1995, chapter 4; and see further below, p. 271.

⁹⁴ Note that this provision constitutes an autonomous or free-standing principle, whereas article 2(1) of that Covenant and article 2 of the Universal Declaration of Human Rights, article 14 of the European Convention on Human Rights and article 2(1) of the Convention on the Rights of the Child prohibit discrimination in the context of specific rights and freedoms laid down in the instrument in question: see Bayefsky, 'Equality', pp. 3–4; and the Human Rights Committee's General Comment on Non-Discrimination, para. 12.

⁹⁵ See further below, p. 275.

⁹⁶ Adopted on 9 November 1989, CCPR/C/Rev.1/Add.1.

⁹⁷ PCIJ, Series A/B, No. 64, p. 19, 1935; 8 AD, pp. 386, 389–90.

⁹⁸ See also the Human Rights Committee's General Comment on Non-Discrimination, para. 8.

⁹⁹ See Judge Tanaka's Dissenting Opinion in *South West Africa* (Second Phase), ICJ Reports, 1966, pp. 3, 306; 37 ILR, pp. 243, 464.

¹⁰⁰ See e.g. *Belgian Linguistics*, ECtHR, Series A, No. 6, 1986, para. 10; 45 ILR, pp. 114, 165. See also *Amendments to the Naturalisation Provisions of the Constitution of Costa Rica*, IACHR, 1984, para. 56; 5 HRLJ, 1984, p. 172; and the Human Rights Committee's General Comment on Non-Discrimination, para. 13, which notes that 'not every differentiation of treatment will constitute discrimination, if the criteria for such differentiation are reasonable and objective and if the aim is to achieve a purpose which is legitimate under the Covenant'.

¹⁰¹ See the Human Rights Committee's General Comment on Non-Discrimination, para. 10, 1989. See also article 1(4) of the Convention on the Elimination of All Forms of Racial Discrimination 1965, article 4(1) of the Women's Discrimination Convention and article 27 of the International Covenant on Civil and Political Rights.

¹⁰² See e.g. A. Buchanan, *Justice, Legitimacy and Self-Determination*, Oxford, 2004; J. Summers, *Peoples and International Law*, The Hague, 2007; K. Knop, *Diversity and Self-Determination in International Law*, Cambridge, 2002; T. D. Musgrave, *Self-Determination and National Minorities*, Oxford, 1997; W. Ofuatey-Kodjoe, ‘Self-Determination’, in *United Nations Legal Order* (ed. O. Schachter and C. C. Joyner), Cambridge, 1995, vol. I, p. 349; J. Fisch, *The Right of Self-Determination of Peoples*, Cambridge, 2015; A. Cassese, *Self-Determination of Peoples*, Cambridge, 1995; *Modern Law of Self-Determination* (ed. C. Tomuschat), Dordrecht, 1993; Higgins, *Problems and Process*, chapter 7; T. Franck, *The Power of Legitimacy Among Nations*, Oxford, 1990, pp. 153 ff.; T. Franck, ‘Fairness in the International and Institutional System’, **240 HR**, 1993 III, pp. 13, 125 ff.; *The Rights of Peoples* (ed. J. Crawford), Oxford, 1988; *Peoples and Minorities in International Law* (ed. C. Brölmann, R. Lefeber and M. Zieck), Dordrecht, 1993; and P. Koskenniemi, ‘National Self-Determination Today: Problems of Legal Theory and Practice’, **43 ICLQ**, 1994, p. 241; G. Simpson, ‘The Diffusion of Sovereignty: Self-Determination in the Post-Colonial Age’, **32 Stanford Journal of International Law**, 1996, p. 255; and R. McCorquodale, ‘Self-Determination: A Human Rights Approach’, **43 ICLQ**, 1994, p. 857.

¹⁰³ See above, [Chapter 5](#), p. 228.

¹⁰⁴ See further below, p. 313.

¹⁰⁵ See further below, p. 323.

¹⁰⁶ General Assembly resolution 2625 (XXV).

¹⁰⁷ See, for an examination of state practice, e.g. Cassese, *Self-Determination*, pp. 90–9.

¹⁰⁸ *Yearbook of the ILC*, 1988, vol. II, Part 2, p. 64.

¹⁰⁹ General Assembly resolution 1514 (XV) 1960 (the Colonial Declaration) underlines that ‘any attempt at the partial or total disruption of the national unity and the territorial integrity of a country is incompatible with the purposes and principles of the Charter of the UN’, while resolution 2625 (XXV) 1970 (the Declaration on Principles of International Law Concerning Friendly Relations) emphasises that ‘nothing in the foregoing paragraphs

shall be construed as authorising or encouraging any action which would dismember or impair, totally or in part, the territorial integrity or political unity of sovereign or independent states'. See further below, [Chapter 9](#), p. 444.

110 See further below, [Chapter 9](#), p. 448. Note that the International Court in the *Chagos* Advisory Opinion, ICJ Reports, 2019, pp. 95, 134, referred to the 'customary law character of the right to territorial integrity of a non-self-governing territory as a corollary of the right to self-determination . . . and a key element of the exercise of the right to self-determination under international law'.

111 See e.g. General Assembly resolutions 1514 (XV) and 1541 (XV) and Organisation of African Unity resolution 16 (I) 1964.

112 ICJ Reports, 1986, pp. 554, 566–7; 80 ILR, pp. 440, 470–1.

113 92 ILR, pp. 167, 168. See further above, [Chapter 5](#), p. 191.

114 See above, [Chapter 5](#), p. 233 and below, [Chapter 9](#), p. 444.

115 Note Brownlie's view that the principle of self-determination has a core of reasonable certainty and this consists in 'the right of a community which has a distinct character to have this character reflected in the institutions of government under which it lives': 'The Rights of Peoples in International Law', in Crawford, *Rights of Peoples*, pp. 1, 5.

116 See in particular D. McGoldrick, *The Human Rights Committee*, Oxford, 1994, chapter 5; Cassese, *Self-Determination*, pp. 59 ff.; and M. Nowak, *UN Covenant on Civil and Political Rights*, *CCPR Commentary*, 2nd ed., Kehl, 2005, part 1.

117 General Comment No. 12.

118 See *Kitok*, Report of the Human Rights Committee, 1988, A/43/40, pp. 221, 228; 96 ILR, pp. 637, 645; *Lubicon Lake Band*, A/45/40, vol. II, pp. 1, 27; 96 ILR, pp. 667, 702; *EP v. Colombia*, A/45/40, vol. II, pp. 184, 187; and *RL v. Canada*, A/47/40, pp. 358, 365; 96 ILR, p. 706. However, in *Mahuika and Others v. New Zealand*, the Committee took the view that the provisions of article 1 may be relevant in the interpretation of other rights protected by the Covenant, in particular article 27 on the rights of persons belonging to

minorities, A/56/40, vol. II, annex X, A. See also *Diergaardt and Others v. Namibia*, A/55/40, vol. II, annex IX, sect. M, para. 10.3.

Problems in the Protection of Minorities: International Legal Developments’, 17 *HRQ*, 1995, p. 48; H. W. Wei, *A Dialogical Concept of Minority Rights*, The Hague, 2016; J. Rehman, *The Weakness in the International Protection of Minority Rights*, The Hague, 2000; Rehman, *International Human Rights Law*, chapters 13 and 14; T. D. Musgrave, *Self-Determination, and Minority and Group Rights in the New Millennium* (ed. D. Fottrell and B. Bowring), The Hague, 1999. See also the Capotorti Study on the Rights of Persons Belonging to Ethnic, Religious and Linguistic Minorities, E/CN.4/Sub.2/384/Rev.1, 1979 and www.ohchr.org/EN/Issues/Minorities/Pages/MinoritiesIndex.aspx.

127 The minorities regime of the League consisted of five special minorities treaties binding Poland, the Serbo-Croat-Slovene state, Romania, Greece and Czechoslovakia; special minorities clauses in the treaties of peace with Austria, Bulgaria, Hungary and Turkey; five general declarations made on admission to the League by Albania, Latvia, Lithuania, Estonia and Iraq; a special declaration by Finland regarding the Aaland Islands; and treaties relating to Danzig, Upper Silesia and Memel: see generally Thornberry, *International Law and Minorities*, pp. 38 ff.

128 In the early 1930s, several hundred petitions were received, but this dropped to virtually nil by 1939: see Thornberry, *International Law and Minorities*, pp. 434–6, and the Capotorti Report on the *Rights of Persons belonging to Ethnic, Religious and Linguistic Minorities*, 1979, E/CN.4/Sub.2/384/Rev.1, pp. 20–2. See also Macartney, *National States*, pp. 370 ff.; J. Stone, *International Guarantees of Minority Rights*, London, 1932; and M. Richard, *Le Droit de Petition*, Paris, 1932.

129 See e.g. Annex IV of the Treaty of Peace with Italy 1947; the Indian–Pakistan Treaty 1950; and article 7 of the Austrian State Treaty 1955. See also the provisions in the documents concerning the independence of Cyprus, Cmnd 1093, 1960.

130 See further below, p. 268.

131 Attempts to define minorities have invariably focused upon the numerically inferior numbers of minorities and their non-dominant position, the existence of certain objective features differentiating them from the majority population (e.g. ethnic, religious or linguistic) coupled with the subjective wish of the minority concerned to preserve those characteristics. See e.g. Shaw, ‘Definition of Minorities’; and the Capotorti Report, p. 96. See also Council of Europe Assembly Recommendation 1255 (1955), H/Inf (95) 3, p. 88. Note that the Human Rights Committee in the *Ballantyne* case held that English-speaking

citizens in Quebec did not constitute a minority since the term ‘minority’ applied to the whole state and not a part of it, 14 HRLJ, 1993, pp. 171, 176.

¹³² See e.g. comments upon Norway’s third periodic report, A/49/40, p. 23 and Japan’s third periodic report, *ibid.*, p. 25. See also Joseph and Castan, *International Covenant*, chapter 24.

¹³³ See e.g. with regard to the third periodic report of Romania, A/49/40, p. 29 and that of Mexico, *ibid.*, p. 35, and the fourth periodic report of Russia, CCPR/C/79/Add.54, p. 5 and that of Ukraine, CCPR/C/79/Add.52, p. 4. Note also the criticism of the Democratic Republic of the Congo for its marginalisation, discrimination and, at times, persecution of some of the country’s minorities, including pygmies, see CCPR/C/SR.2358, 2006, and of the situation in Kosovo, CCPR/C/SR.2394, 2006.

¹³⁴ Report of the Human Rights Committee 1981, A/36/40, p. 166; 68 ILR, p. 17.

¹³⁵ See also *Kitok*, A/43/40, p. 221; 96 ILR, p. 637, where the Committee took the view with regard to a petition by a member of the Sami community in Sweden that where the regulation of economic activity was an essential element in the culture of an economic community, its application to an individual could fall within article 27. It was emphasised that a restriction upon an individual member of a minority must be shown to have a reasonable and objective justification and to be necessary for the continued viability and welfare of the minority as a whole. In *Lubicon Lake Band*, A/45/40, vol. II, p. 1; 96 ILR, p. 667, the Committee upheld the complaint that the Canadian government, in allowing the Provincial Government of Alberta to expropriate the Band’s territory for the benefit of private corporate interests, violated article 27. It was held that the rights protected under article 27 included the right of persons in community with others to engage in economic and social activities which were part of the culture of the community to which they belonged. However, measures with only a limited impact on the way of life and livelihood of persons belonging to a minority would not necessarily violate article 27. See also the *Länsmann* cases against Finland, 511/92 and 671/95, 115 ILR, p. 300, and Report of the Human Rights Committee 2005, A/60/40, vol. II, pp. 90 ff.

¹³⁶ General Comment No. 23, HRI/GEN/1/Rev.1, p. 38.

¹³⁷ Resolution 47/135. See e.g. *The UN Minority Rights Declaration* (ed. A. Phillips and A. Rosas), London, 1993.

138 E/CN.4/Sub.2/1994/56. This was authorised by the Commission on Human Rights on 3 March 1995: see resolution 1995/24. See also E/CN.4/Sub.2/1995/51.

139 Resolution 2005/79. See also resolution 25/5, 2014. Attention has, for example, been drawn to the rights of women facing multiple forms of discrimination, exclusion and violence, such as women from minority communities, Press Release of 7 March 2006, and to problems faced by the Roma in Hungary, Press Release of 4 July 2006.

140 Policy Committee decision No. 2012/4 of 6 March 2012, www.ohchr.org/EN/Issues/Minorities/Pages/UNNetworkRacialDiscriminationProtectionMinorities.aspx. On 29 April 2020, the Network issued a statement on the COVID-19 pandemic crisis, warning of the increase in discrimination against minorities, www.ohchr.org/Documents/Issues/Minorities/UN_Network_Racial_Discrimination_Minorities_COVID.pdf.

Cançado Trindade, 'Co-existence and Co-ordination of Mechanisms of International Protection of Human Rights', *202 HR*, 1987, p. 9. See also the UN Human Rights Treaty System, Fact Sheet 30/Rev. 1, UN Office of the High Commissioner on Human Rights, 2012.

¹⁵⁵ See also e.g. the Slavery Convention 1926 and Protocol 1953; the Supplementary Convention on the Abolition of Slavery, the Slave Trade and Institutions and Practices Similar to Slavery 1956; the Convention for the Suppression of the Traffic in Persons and of the Exploitation of the Prostitution of Others 1949; the Convention relating to the Status of Refugees 1951 and Protocol 1967; the Convention relating to the Status of Stateless Persons 1954; and the Convention on the Reduction of Statelessness 1961.

¹⁵⁶ See *UN Action*, chapter 1. The Assembly has also established subsidiary organs under Rule 161, several of which deal with human rights issues, such as the Special Committee on Decolonisation, the UN Council for Namibia, the Special Committee against Apartheid, the Special Committee to Investigate Israeli Practices in the Occupied Territories and the Committee on the Exercise of the Inalienable Rights of the Palestine People. Note also the relevant roles of the other UN organs, the Security Council, Trusteeship Council, International Court and Secretariat, *ibid.*

¹⁵⁷ See as to refugees, J. C. Hathaway and M. Foster, *The Law of Refugee Status*, 2nd ed., Cambridge, 2014; and G. S. Goodwin-Gill and J. McAdam, *The Refugee in International Law*, 3rd ed., Oxford, 2007.

¹⁵⁸ *UN Action*, pp. 13 ff. See also Assembly resolutions 1991B (XVIII) and 2847 (XXVI).

¹⁵⁹ See e.g. N. Rodley and D. Weissbrodt, 'United Nations Non-Treaty Procedures for Dealing with Human Rights Violations', in Hannum, *Guide to International Human Rights Practice*, p. 65; Lauterpacht, *International Law*, chapter 11; Steiner *et al.*, *International Human Rights*, chapter 9; and T. Buergenthal and J. V. Torney, *International Human Rights and International Education*, Washington, DC, 1976, pp. 75 ff. See also *UN Action*, p. 20; and H. Tolley, 'The Concealed Crack in the Citadel', *6 HRQ*, 1984, p. 420. A Commission on the Status of Women was also created: see *UN Action*, p. 15, and below, p. 280.

¹⁶⁰ Originally consisting of forty-three representatives of UN member states selected by ECOSOC on the basis of equitable geographic distribution, ECOSOC resolutions 6 (I), 1946; 9 (II), 1946; 845 (XXXII), 1961; 1147 (XLI), 1966; and 1979/36, 1979, that number was increased to fifty-three by resolution 1990/48 in May 1990.

161 See e.g. Report of the First Session of the Commission, E/259, para. 22. See also Tolley, 'Concealed Crack', pp. 421 ff.; and ECOSOC resolution 728F.

162 E.g. on Chile: Situations revealing a Consistent Pattern of Gross Violations of Human Rights; Disappearances; the Right to Development and Structural Adjustment Programmes and Economic, Social and Cultural Rights.

163 Afghanistan, Cuba, El Salvador, Equatorial Guinea, Guatemala, Iran, Sudan, the Democratic Republic of the Congo and Iraq. Special Rapporteurs were also appointed to deal with particular thematic concerns such as summary executions, torture, mercenaries, religious intolerance and the sale of children. In an attempt to provide some coordination, the first meeting of Special Rapporteurs and other mechanisms of the special procedures of the Commission took place in 1994, see E/CN.4/1995/5. Note also the report of the Special Rapporteur on extrajudicial, summary or arbitrary executions with regard to the death of Saudi journalist, Jamal Kashoggi, A/HRC/41/36, 19 June 2019.

164 See e.g. *UN Action*, pp. 20–3.

165 See e.g. P. Alston, 'The Commission on Human Rights', in Alston, *United Nations and Human Rights*, pp. 126, 145 ff.; and M. Bossuyt, 'The Development of Special Procedures of the United Nations Commission on Human Rights', 6 *HRLJ*, 1985, p. 179.

166 ECOSOC resolution 2000/3.

167 See also Sub-Committee resolution 1 (XXIV), 1971. These were examined by the Working Group on Situations of the Sub-Commission which then determined whether or not to refer particular situations to the Commission. Those so transmitted were examined in two separate closed meetings by the Commission, which then decided whether or not to take further action, such as appointing an independent expert or discussing the matter under the resolution 1235 public procedure.

168 See e.g. T. Van Boven, 'Human Rights Fora at the United Nations', in *International Human Rights Law and Practice* (ed. J. C. Tuttle), Philadelphia, 1978, p. 83; H. Möller, 'Petitioning the United Nations', 1 *Universal Human Rights*, 1979, p. 57; N. Rodley, 'Monitoring Human Rights by the UN System and Non-governmental Organisations', in *Human Rights and American Foreign Policy* (D. P. Kommers and G. Loescher), Notre

Dame, 1979, p. 157; and Tolley, ‘Concealed Crack’, pp. 429 ff. Note that the Commission chairman began the practice of announcing the names of the countries subject to complaints under resolution 1503, although no further details were disclosed: see e.g. E/CN.4/1984/77, p. 151, naming Albania, Argentina, Benin, Haiti, Indonesia, Malaysia, Pakistan, Paraguay, the Philippines, Turkey and Uruguay.

169 See e.g. the Amnesty International Report, ‘Meeting the Challenge’, AI Index, IOR 40/008/2005. See also UN Secretary-General’s High Level Panel on Threats, Challenges and Change, Report on ‘A More Secure World: Our Shared Responsibility’, New York, 2004, para. 283. See also the Secretary-General’s Report, ‘In Larger Freedom: Towards Development, Security and Human Rights for All’, A/59/2005, para. 182. It was noted that the Commission had been ‘undermined by the politicisation of its sessions and the selectivity of its work’, A/59/2005/Add.1, para. 2.

170 Distributed regionally with thirteen seats for the African group; thirteen seats for the Asian group; six seats for the Eastern European group; eight seats for the Latin American and Caribbean group; and seven seats for the Western European and Other group. See e.g. R. Freedman, *The United Nations Human Rights Council: A Critique and Early Assessment*, London, 2015.

171 See General Assembly resolution 60/251 (2006) and for the period 2017–21, see www.ohchr.org/Documents/HRBodies/UPR/PPP_UPR_3rd_cycle_EN.pdf. See also F. J. Hampson, ‘An Overview of the Reform of the UN Human Rights Machinery’, 7 *Human Rights Law Review*, 2007, p. 7.

172 The Special Procedures are independent human rights experts with mandates to report and advise on human rights from a thematic or country-specific perspective. As of August 2017, there are forty-four thematic and twelve country mandates, see Annual Report for 2018, A/HRC/40/3 (2019) and www.ohchr.org/EN/HRBodies/SP/Pages/Welcomepage.aspx.

173 The Council also adopted at its first session in June 2006 the International Convention for the Protection of All Persons from Enforced Disappearances and the UN Declaration on the Rights of Indigenous Peoples. A Code of Conduct for Special Procedures Mandate-holders was adopted at the fifth session of the Council. See generally on the Council, www.ohchr.org/EN/HRBodies/HRC/Pages/HRCIndex.aspx. The Advisory Committee replaced the Sub-Commission on the Promotion and Protection of Human Rights, initially

entitled the Sub-Commission on Prevention of Discrimination and Protection of Minorities, established by the Commission in 1947. See resolutions E/259, 1947; E/1371, 1949; and 17 (XXXVII), 1981; and A. Eide, 'The Sub-Commission on Prevention of Discrimination and Protection of Minorities', in Alston, *United Nations and Human Rights*, p. 211.

¹⁷⁴ The US withdrew from the Human Rights Council on 19 June 2018, see **112 AJIL**, 2018, p. 745.

¹⁷⁵ See e.g. B. Saul and D. Kinley, *The International Covenant on Economic, Social and Cultural Rights: Commentary, Cases and Materials*, Oxford, 2014; M. Ssenyonjo, *Economic, Social and Cultural Rights in International Law*, 2nd ed., Oxford, 2016; B. Saul, *The International Covenant on Economic, Social and Cultural Rights: Travaux Préparatoires*, Oxford, 2016; Craven, *Covenant*; and Rehman, *International Human Rights Law*, chapter 6. See also M. Odello and F. Seatzu, *The UN Committee on Economic, Social and Cultural Rights: The Law, Process and Practice*, London, 2012; and *Economic, Social and Cultural Rights in International Law* (ed. E. Riedel, G. Giacca and C. Golay), Oxford, 2014.

¹⁷⁶ See articles 16–22 of the Covenant, and *UN Chronicle*, July 1982, pp. 68–70. See generally on implementation B. S. Ramcharan, 'Implementing the International Covenants on Human Rights', in Ramcharan, *Human Rights: Thirty Years*, p. 159; P. Alston, 'Out of the Abyss: The Challenge Confronting the New UN Committee on Economic, Social and Cultural Rights', **9 HRQ**, 1987, p. 332; P. Alston and G. Quinn, 'The Nature and Scope of States Parties' Obligations under the International Covenant on Economic, Social and Cultural Rights', **9 HRQ**, 1987, p. 156; P. Alston, 'The Committee on Economic, Social and Cultural Rights', in Alston, *United Nations and Human Rights*, p. 473; B. Simma, 'The Implementation of the International Covenant on Economic, Social and Cultural Rights', in *The Implementation of Economic, Social and Cultural Rights* (ed. F. Matscher), Kehl am Rhein, 1991, p. 75; and S. Leckie, 'The Committee on Economic, Social and Cultural Rights', in Alston and Crawford, *Future*, chapter 6.

¹⁷⁷ See ECOSOC resolution 1985/17.

¹⁷⁸ See P. Alston and B. Simma, 'First Session of the UN Committee on Economic, Social and Cultural Rights', *AJIL*, 1987, p. 747; P. Alston and B. Simma, 'Second Session of the UN Committee on Economic, Social and Cultural Rights', **82 AJIL**, 1988, p. 603. See generally www.ohchr.org/EN/HRBodies/CESCR/pages/cescrindex.aspx.

¹⁷⁹ See e.g. E/C.12/1994/20, p. 18.

¹⁸⁰ *Ibid.*, pp. 16–18.

¹⁸¹ See HRI/GEN/Rev.1, p. 45.

¹⁸² *Ibid.*, p. 48. Further general comments have discussed the right to adequate housing (General Comment No. 4, 1991); the rights of persons with disabilities (General Comment No. 5, 1994); the economic, social and cultural rights of older persons (General Comment No. 6, 1995); equal treatment of economic, social and cultural rights (General Comment No. 16, 2005); and the right to work and social security (General Comment No. 18, 2005 and No. 19, 2006). General Comment No. 21 (2009) discussed the right of everyone to take part in cultural rights, while General Comment No. 25 (2020) discussed science and technology in the context of economic, social and cultural rights. Note also the statement of 17 April 2020 on the COVID-19 pandemic and economic, social and cultural rights, E/C.12/2020/1, <https://undocs.org/E/C.12/2020/1>.

¹⁸³ At the ninth session, for example, in the autumn of 1993, the Committee discussed the right to health, E/1994/23, p. 56, while at the tenth session in May 1994 the role of social safety-nets as a means of protecting economic, social and cultural rights was discussed: see E/1995/22, p. 70. In 2010, the Committee discussed the right to sexual and reproductive health, E/C.12/2010/SR.49 and 50 and in 2019, the discussion focused on land and the International Covenant, E/C.12/2019/SR. 51 and 52, www.ohchr.org/EN/HRBodies/CESCR/Pages/DiscussionDays.aspx. See also generally C. Dommen, ‘Building from a Solid Basis: The Fourth Session of the Committee on Economic, Social and Cultural Rights’, 8 *NQHR*, 1990, p. 199; and C. Dommen and M. C. Craven, ‘Making Way for Substance: The Fifth Session of the Committee on Economic, Social and Cultural Rights’, 9 *NQHR*, 1991, p. 93.

¹⁸⁴ A/63/435. The Optional Protocol came into force on 5 May 2013.

¹⁸⁵ See e.g. Alston and Crawford, *Future*; and S. Lewis-Anthony and M. Scheinin, ‘Treaty-Based Procedures for Making Human Rights Complaints Within the UN System’, in Hannum, *Guide to International Human Rights Practice*, p. 43. See also M. O’Flaherty, *Human Rights and the UN: Practice Before the Treaty Bodies*, 2nd ed., The Hague, 2002.

186 This link with the Secretariat has been termed ambiguous, particularly in the light of the difficulties in performing the two functions carried out by the Secretariat (Charter-based political activities and expert activities): see e.g. T. Opsahl, ‘The Human Rights Committee’, in Alston, *United Nations and Human Rights*, pp. 367, 388.

187 See e.g. Thornberry, *International Convention*; M. Banton, ‘Decision-Taking in the Committee on the Elimination of Racial Discrimination’, in Alston and Crawford, *Future*, p. 55; K. J. Partsch, ‘The Committee on the Elimination of Racial Discrimination’, in Alston, *United Nations and Human Rights*, p. 339; Meron, *Human Rights Law-Making*, chapter 1; K. Das, ‘The International Convention on the Elimination of All Forms of Racial Discrimination’, in *The International Dimension of Human Rights* (ed. K. Vasak and P. Alston), Paris, 1982, p. 307; Lerner, *UN Convention*; N. Lerner, ‘Curbing Racial Discrimination – Fifteen Years CERD’, **13** *Israel Yearbook on Human Rights*, 1983, p. 170; M. R. Burrowes, ‘Implementing the UN Racial Convention – Some Procedural Aspects’, **7** *Australian YIL*, p. 236; T. Buergenthal, ‘Implementing the UN Racial Convention’, **12** *Texas International Law Journal*, 1977, p. 187; and www.ohchr.org/EN/HRBodies/CERD/Pages/CERDIndex.aspx.

188 Rules of Procedure have been adopted, see CERD/C/35/Rev. 3 (1986), and are revised from time to time: see e.g. A/48/18, p. 137.

189 Articles 8 and 9 of the Convention.

190 A/48/18, paras. 496–506. For example, in 1993, the Committee, concerned at events in the former Yugoslavia, sought additional information on the implementation of the Convention as a matter of urgency: see e.g. CERD/C/248/Add.1 (Federal Republic of Yugoslavia); CERD/C/249/Add.1 (Croatia); and CERD/C/247/Add.1 (Bosnia and Herzegovina). See also CERD/C/65/DEC.1 (Darfur, 2004); CERD/C/66/DAR/Dec.2 (Darfur, 2005); CERD/C/DEC/1 (US, 2006); and CERD/C/DEC/SUR/5 (Suriname, 2006). Revised Guidelines were adopted in 2007, see A/62/18, Annexes, Chapter III. See also A/69/18, paras. 14 ff.

191 See e.g. A/48/18, p. 20. At its forty-ninth session, the Committee further decided that states parties whose initial reports were excessively overdue by five years or more would also be scheduled for a review of implementation of the provisions of the Convention. See also A/69/18, paras. 46 ff.

¹⁹² Article 13.

¹⁹³ See CERD/C/99/3 and CERD/C/99/4, UN Committee on the Elimination of Racial Discrimination, Judgment of 30 August 2019; CERD/C/99/5 and CERD/C/99/6, UN Committee on the Elimination of Racial Discrimination, Judgment of 30 August 2019.

¹⁹⁴ CERD/C/100/3, CERD/C/100/4 and CERD/C/100/5, Judgment of 12 December 2019. The large number of dissenting opinions is to be noted.

¹⁹⁵ The provision entered into force on 31 December 1982 upon the tenth declaration.

¹⁹⁶ See e.g. the Report of the Committee for its forty-eighth session, A/48/18, 1994, pp. 105, 130, and for the sixtieth and sixty-first sessions, A/57/18, p. 128. Note e.g. *Durmic v. Serbia and Montenegro* concerning discrimination against Roma in Serbia, CERD/C/68/D/29/2003, 2006.

¹⁹⁷ E.g. the decision adopted on 19 March 1993 requesting the governments of the Federal Republic of Yugoslavia (Serbia and Montenegro) and Croatia to submit further information concerning implementation of the Convention: see A/48/18, p. 112.

¹⁹⁸ See e.g. General Recommendation XII (42) encouraging successor states to declare that ‘they continue to be bound’ by the obligations of the Convention if predecessor states were parties to it; General Recommendation XIV (42) concerning non-discrimination, A/48/18, pp. 113 ff.; and General Recommendation XXIX concerning discrimination based upon descent, A/57/18, p. 111.

¹⁹⁹ See e.g. Lerner, *UN Convention*.

²⁰⁰ See e.g. A/38/18, pp. 14–24. Note e.g. that by late 1983 fifteen reminders had been sent to Swaziland requesting it to submit its fourth, fifth, sixth and seventh overdue periodic reports, *ibid.*, p. 21. See also A/44/18, pp. 10–16 and A/69/18, paras. 46 ff.

²⁰¹ See CERD/C/70/Rev.1, 6 December 1983.

²⁰² See e.g. A/44/18, 1990, p. 7 and A/48/18, 1994, p. 149.

203 A/44/18, p. 91.

204 ICJ Reports, 2011, p. 70.

205 ICJ Reports, 2019.

206 ICJ Reports, 2018.

207 See e.g. Rehman, *International Human Rights Law*, chapter 5; Joseph and Castan, *International Covenant*; Nowak, *UN Covenant*; Steiner *et al.*, *International Human Rights*, pp. 844 ff.; P. M. Taylor, *A Commentary on the International Covenant on Civil and Political Rights: The UN Human Rights Committee's Monitoring of ICCPR Rights*, Cambridge, 2020; McGoldrick, *Human Rights Committee*; Opsahl, 'Human Rights Committee', p. 367; D. Fischer, 'Reporting under the Convention on Civil and Political Rights: The First Five Years of the Human Rights Committee', **76 AJIL**, 1982, p. 142; Ramcharan, 'Implementing the International Covenants'; E. Schwelb, 'The International Measures of Implementation of the International Covenant on Civil and Political Rights and of the Optional Protocol', **12 Texas International Law Review**, 1977, p. 141; M. Nowak, 'The Effectiveness of the International Covenant on Civil and Political Rights – Stock-taking after the First Eleven Sessions of the UN Human Rights Committee', **2 HRLJ**, 1981, p. 168 and **5 HRLJ**, 1984, p. **199**. See also M. Bossuyt, *Guide to the Travaux Préparatoires of the International Covenant on Civil and Political Rights*, The Hague, 1987; and P. R. Gandhi, 'The Human Rights Committee and the Right of Individual Communication', **57 BYIL**, 1986, p. 201. See also generally www.ohchr.org/EN/HRBodies/CCPR/Pages/CCPRIndex.aspx.

208 See Rehman, *International Human Rights Law*, p. 83.

209 See articles 28–32 of the Covenant.

210 See e.g. Nowak, 'Effectiveness', p. 169, **3 HRLJ**, 1982, p. 209 and 1984, p. 202. See also A/36/40, annex VII, Introduction; CCPR/C/21/Rev.1 and A/44/40, p. 173.

211 See article 40 and CCPR/C/5. Supplementary reports may be requested: see Rule 70(2) of the provisional rules of procedure, CCPR/C/3/Rev.1. See now the Rules of Procedure 2012, CCPR/C/3/Rev.10.

²¹² See CCPR/C/18; CCPR/C/19 and CCPR/C/19/Rev.1. See also CCPR/C/20 regarding guidelines. Several states have been lax about producing reports, e.g. Zaire and the Dominican Republic, while the initial report of Guinea was so short as to be held by the Committee as not providing sufficient information: see Nowak, 'Effectiveness', 1984, p. 200.

²¹³ See Buergenthal, 'Implementing', pp. 199–201; and Fischer, 'Reporting', p. 145. Note that in 2009, the Committee adopted a new reporting procedure whereby it would send states parties a list of issues prior to reporting and consider their written replies in lieu of a periodic report. The state party's answer would constitute the report for the purposes of article 40 of the Covenant: see CCPR/C/99/4, 2010 and for a recent example, CCPR/C/ARG/QPR/5, 2014, concerning Argentina. The Committee adopted in July 2018 a simplified reporting procedure as a permanent feature of its reporting procedures and decided to strive to limit the number of questions in each list of issues to twenty-five questions, see www.ohchr.org/EN/HRBodies/CCPR/Pages/PredictableReviewCycle.aspx.

²¹⁴ Such documents may now be officially distributed, rather than being informally made available to Committee members individually: see McGoldrick, *Human Rights Committee*, p. liii.

²¹⁵ E.g. in October 1992, the Committee adopted a decision requesting the governments of the Federal Republic of Yugoslavia (Serbia and Montenegro), Croatia and Bosnia-Herzegovina to submit a short report concerning measures to prevent *inter alia* ethnic cleansing and arbitrary killings, CCPR/C/SR/1178/Add.1. The Committee thereafter adopted an amendment to its rules of procedure permitting it to call for reports at any time deemed appropriate, New Rule 66(2), see CCPR/C/SR/1205/Add.1. In the case of an exceptional situation when the Committee is not in session, a request may be made through the Chairperson, acting in consultation with the members of the Committee: *ibid*. See also S. Joseph, 'New Procedures Concerning the Human Rights Committee's Examination of State Reports', 13 *NQHR*, 1995, p. 5.

²¹⁶ See, with regard to former Yugoslavia, CCPR/C/SR.1178/Add.1, pp. 2–3 and CCPR/C/79/Add.14–16. See, with regard to the successor states of the Soviet Union, CCPR/C/79/Add.38 (Azerbaijan). See also I. Boerefijn, 'Towards a Strong System of Supervision', 17 *HRQ*, 1995, p. 766.

²¹⁷ See e.g. A/56/40, vol. I, p. 25.

²¹⁸ See A/47/40, p. 4.

²¹⁹ See e.g. the comments concerning Colombia in September 1992, CCPR/C/79/Add.2; Guinea in April 1993, CCPR/C/79/Add.20; Norway in November 1993, CCPR/C/79/Add.27; Morocco in November 1994, CCPR/C/79/Add.44; the Russian Federation in July 1995, CCPR/C/79/Add.54; Estonia in November 1995, CCPR/C/79/Add.59; and the UK in July 1995, CCPR/C/79/Add.55; and, relating to Hong Kong in November 1995, CCPR/C/79/Add.57. Note that in September 1995, Mexico responded to the Committee's Concluding Comments upon its report by issuing Observations, CCPR/C/108.

²²⁰ See Rule 70 of its Rules of Procedure 2012. The procedures are described e.g. in the 2005–06 Report of the Committee, A/61/40, paras. 49 ff. (2006).

²²¹ See e.g. T. Opsahl, 'The General Comments of the Human Rights Committee', in *Festschrift für Karl Josef Partsch zum 75.*, Berlin, 1989, p. 273.

²²² Note, however, that in a General Comment on article 6 (the right to life), the Committee emphasised its view that 'the designing, testing, manufacture, possession and development of nuclear weapons are among the greatest threats to the right to life', and that the 'production, testing, possession and deployment and use of nuclear weapons should be prohibited and recognised as crimes against humanity', CCPR/C/21/Add.4, 14 November 1984. The ICJ gave an Advisory Opinion on 8 July 1996 at the request of the UN General Assembly concerning the *Legality of the Threat or Use of Nuclear Weapons*, in which it was noted that the right not to be arbitrarily deprived of one's life applied also in hostilities. Whether a particular loss of life was arbitrary within the terms of article 6 would depend on the situation and would be decided by reference to the law applicable in armed conflict and not deduced from the terms of the Covenant itself: ICJ Reports, 1996, p. 226, 240; 110 ILR, pp. 163, 190. The Committee adopted an extensive new General Comment on the right to life in October 2019, CCPR/C/GC/36, noting *inter alia* that the threat or use of weapons of mass destruction (in particular nuclear weapons) was incompatible with the right to life and may amount to a crime under international law, *ibid.*, para. 66.

²²³ A/44/40, pp. 173–5. See also the General Comments adopted in 1989 on non-discrimination, CCPR/C/21/Rev.1/Add.1, pp. 3, 4; and on Minorities, HRI/GEN/1/Rev.1, 1995 and Reservations, CCPR/C/21/Rev.1/Add.6.

²²⁴ The inter-state procedure has not been used to date.

²²⁵ Signed in 1966 and in force as from 23 March 1976. See e.g. H. Steiner, ‘Individual Claims in a World of Massive Violations: What Role for the Human Rights Committee?’, in Alston and Crawford, *Future*, p. 15; P. R. Ghandi, *The Human Rights Committee and the Right of Individual Communication: Law and Practice*, Aldershot, 1998; A. de Zayas, H. Möller and T. Opsahl, ‘Application of the International Covenant on Civil and Political Rights under the Optional Protocol by the Human Rights Committee’, *28 German YIL*, 1985, p. 9; and *Selected Decisions of the Human Rights Committee under the Optional Protocol*, New York, vol. I, 1985, vol. II, 1990. Two states (Jamaica and Trinidad and Tobago) have denounced the Protocol.

²²⁶ Article 5, Optional Protocol.

²²⁷ See Nowak, ‘Effectiveness’, 1980, pp. 153 ff.; and 1981 Report of Human Rights Committee, A/36/40, pp. 85–91.

²²⁸ A/44/40, pp. 139–40. See also Rule 95(3) of the Rules of Procedure, 2012.

²²⁹ Rules 95(1) and 97 of the Rules of Procedure, 2012.

²³⁰ See, in particular, *Canepa v. Canada*, A/52/40, vol. II, annex VI, sect. K. See also *Ruzmetov v. Uzbekistan*, A/61/40, vol. II, p. 31 (2006); and *Boucherf v. Algeria*, *ibid.*, p. 312. Such a request was made e.g. to Trinidad and Tobago in the *Ashby* case pending examination of the communication, but to no avail. After the individual was executed, the Committee adopted a decision expressing its indignation at the failure of the state party to comply with the request for interim measures and deciding to continue consideration of the case, A/49/40, pp. 70–1.

²³¹ See *Piandiong and Others v. Philippines*, A/54/40, para. 420(b).

²³² Note that in October 1990, the Committee appointed a Special Rapporteur to follow up cases, CCPR/C/SR.1002, p. 8. See Rule 101 of the Rules of Procedure 2012. In 1994, the Committee decided that every form of publicity would be given to follow-up activities, including separate sections in annual reports, the issuing of annual press communiqués and the institution of such practices in a new rule of procedure (Rule 99) emphasising that follow-up activities were not confidential: A/49/40, pp. 84–6. See also A/56/40, vol. I, p. 131.

²³³ These cases are reported in 1 *HRLJ*, 1980, pp. 209 ff. See, for other cases, 2 *HRLJ*, 1981, pp. 130 ff.; *ibid.*, pp. 340 ff.; 3 *HRLJ*, 1982, p. 188; 4 *HRLJ*, 1983, pp. 185 ff.; and 5 *HRLJ*, 1984, pp. 191 ff. See also Annual Reports of the Human Rights Committee, 1981 to date.

²³⁴ Report of the Human Rights Committee 1981, A/36/40, p. 166.

²³⁵ *Ibid.*, p. 134.

²³⁶ See e.g. *Waksman*, 1 *HRLJ*, 1980, p. 220; and *Lichtensztejn*, 5 *HRLJ*, 1984, p. 207. In *Robinson*, A/44/40, p. 241 (1989), the Committee emphasised that it was axiomatic that legal assistance be available in capital cases and decided that the absence of counsel constituted unfair trial.

²³⁷ See e.g. *Thompson v. St Vincent and the Grenadines*, A/56/40, vol. II, annex X, sect. H, para. 8.2.

²³⁸ See e.g. the *Berry, Hamilton, Grant, Currie and Champagnie* cases against Jamaica, A/49/40, vol. II, pp. 20, 37, 50, 73, 136.

²³⁹ See the *Ng* case, concerning extradition from Canada to the US. The Committee found that there was no evidence of such a risk, A/49/40, vol. II, p. 189.

²⁴⁰ *Ibid.*

²⁴¹ *Ibid.*, p. 249.

²⁴² See e.g. *López Burgos v. Uruguay*, Case No. 52/79, 68 ILR, p. 29; or *Lilian Celiberti de Casariego v. Uruguay*, Case No. 56/79, 68 ILR, p. 41, concerning the activities of Uruguayan agents in Brazil and Argentina respectively.

²⁴³ See e.g. CCPR/C/79/Add.93, para. 10 and CCPR/C0/78/1SR, para. 11 (concluding observations on Israel's reports). This approach was affirmed by the ICJ in *Construction of a Wall*, ICJ Reports, 2004, pp. 136, 178–9; 129 ILR, pp. 37, 97–8.

²⁴⁴ 58 ILM, 2019, p. 195.

²⁴⁵ *SAS v. France*, Judgment of 1 July 2014.

²⁴⁶ The Second Optional Protocol aimed at the abolition of the death penalty was adopted in 1990, while the desirability of a third optional protocol to the Covenant, concerning the right to a fair trial and a remedy, was considered by the Commission on Human Rights: see E/CN.4/Sub.2.1994/24, Sub-Commission resolution 1994/35 and Commission resolution 1994/107.

²⁴⁷ See ECOSOC resolutions 1/5 (1946), 2/11 (1946) and 48 (IV) (1947). See also L. Reanda, 'The Commission on the Status of Women', in Alston, *United Nations and Human Rights*, p. 265. The mandate of the Commission was revised by ECOSOC resolutions 1987/22 and 1996/6. There is also an individual petition procedure by which complaints are considered by a Working Group on Communications which then reports to the Commission. The Commission in turn reports to ECOSOC.

²⁴⁸ This came into force in 1981. See *Women's Human Rights: CEDAW in International, Regional and National Law* (ed. A. Hellum and H. S. Aasen), Cambridge, 2015; Rehman, *International Human Rights Law*, chapter 15; R. Jacobson, 'The Committee on the Elimination of Discrimination against Women', in Alston, *United Nations and Human Rights*, p. 444; A. Byrnes, 'The "Other" Human Rights Body: The Work of the Committee on the Elimination of Discrimination Against Women', 14 *Yale Journal of International Law*, 1989, p. 1; Cook, 'Women's International Human Rights Law', p. 230; *Human Rights of Women* (ed. R. Cook), Philadelphia, 1994; M. Freeman and A. Fraser, 'Women's Human Rights', in Henkin and Hargrove, *Human Rights*, p. 103; Steiner *et al.*, *International Human Rights*, pp. 175, 541; J. Morsink, 'Women's Rights in the Universal Declaration', 13 *HRQ*, 1991, p. 229; H. Charlesworth and C. Chinkin, *The Boundaries of International*

Law: A Feminist Analysis, Manchester, 2000; and M. Bustelo, ‘The Committee on the Elimination of Discrimination against Women at the Crossroads’, in Alston and Crawford, *Future*, p. 79. See also www.ohchr.org/en/hrbodies/cedaw/pages/cedawindex.aspx.

249 See articles 17–21 of the Convention and the first Report of the Committee, A/38/45.

250 See CEDAW/C/7Rev.3. In 2014, the Committee introduced on a pilot basis a simplified reporting procedure for the submission of overdue periodic reports provided using an updated common core document, www.ohchr.org/EN/HRBodies/CEDAW/Pages/ReportingProcedures.aspx, HRI/MC/2006/3 and Corr. 1.

251 Article 21. Since 1997, the process of adopting a general recommendation is preceded by an open dialogue between the Committee, non-governmental organisations and others regarding the topic of the general recommendation and a discussion of a draft prepared by a Committee member.

252 HRI/GEN/1/Rev.1, 1994, pp. 72 ff. Other examples include General Recommendation No. 12 calling upon states parties to include in their reports information on measures taken to deal with violence against women; General Recommendation No. 14 calling for measures to be taken to eradicate the practice of female circumcision; General Recommendation No. 19 (1992) concerning the problem of violence against women; General Recommendation No. 21 concerning equality in marriage and family relations; General Recommendation No. 29 dealing with the economic consequences of marriage, family relations and dissolution; General Recommendation No. 32 concerning gender-related dimensions of refugee status, asylum, nationality and statelessness of women; and General Recommendation No. 37 concerning climate change, www.ohchr.org/EN/HRBodies/CEDAW/Pages/Recommendations.aspx.

253 Although the Committee met exceptionally for three sessions during 2002 to deal with backlog reports. However, see General Assembly resolution 60/230 concerning the extension of meeting time in 2005 and 2006.

254 Article 8 of the Optional Protocol. See e.g. for an earlier view, R. Cook, ‘The Elimination of Sexual Apartheid: Prospects for the Fourth World Conference on Women’, *ASIL Issue Papers on World Conferences*, Washington, DC, 1995, pp. 48 ff.

²⁵⁵ The Vienna Declaration and Programme of Action adopted in 1993 emphasised that the human rights of women should be brought into the mainstream of UN system-wide activity and that women's rights should be regularly and systematically addressed throughout the UN bodies and mechanisms, see Part II, Section 3, 32 ILM, 1993, p. 1678. See also the Beijing Conference 1995; Cook, 'Elimination of Sexual Apartheid'; and the Beijing plus 5 process, see General Assembly resolution 55/71.

²⁵⁶ Resolution 48/104, see 33 ILM, 1994, p. 1049. Note also the adoption of the Inter-American Convention on the Prevention, Punishment and Eradication of Violence against Women in June 1994, *ibid.*, p. 1534; and the March 2002 Joint Declaration by the Special Rapporteur on women's rights of the Inter-American Commission on Human Rights, the Special Rapporteur on Violence against Women, its Causes and its Consequences of the UN Commission on Human Rights, and the Special Rapporteur on the Rights of Women in Africa of the African Commission on Human and Peoples' Rights, which called for the elimination of violence and discrimination against women: see www.cidh.org/declaration.women.htm.

²⁵⁷ See E/CN.4/2003/75.

²⁵⁸ See further below, p. 285.

²⁵⁹ See e.g. M. Nowak and E. McArthur, *The UN Convention Against Torture: A Commentary*, Oxford, 2008; A. Byrnes, 'The Committee Against Torture', in Alston, *United Nations and Human Rights*, p. 509; R. Bank, 'Country-Oriented Procedures under the Convention against Torture: Towards a New Dynamism', in Alston and Crawford, *Future*, p. 145; Rehman, *International Human Rights Law*, chapter 22; N. Rodley and M. Pollard, *The Treatment of Prisoners under International Law*, 3rd ed., Oxford, 2009; A. Boulesbaa, *The UN Convention on Torture and Prospects for Enforcement*, The Hague, 1999; M. Evans, 'Getting to Grips with Torture', 51 ICLQ, 2002, p. 365; J. Burgers and H. Danelius, *The United Nations Convention against Torture*, Boston, 1988; Meron, *Human Rights in International Law*, pp. 126–30, 165–6, 511–15; Z. Haquani, 'La Convention des Nations Unies Contre la Torture', 90 RGDIP, 1986, p. 127; N. Lerner, 'The UN Convention on Torture', 16 Israel Yearbook on Human Rights, 1986, p. 126; and R. St J. Macdonald, 'International Prohibitions against Torture and other Forms of Similar Treatment or Punishment', in *International Law at a Time of Perplexity* (ed. Y. Dinstein),

Dordrecht, 1987, p. 385. See also generally www.ohchr.org/EN/HRBodies/CAT/Pages/CATIndex.aspx.

260 See e.g. article 5 of the Universal Declaration; article 7 of the Civil and Political Rights Covenant; article 3 of the European Convention on Human Rights; article 5 of the Inter-American Convention on Human Rights; article 5 of the African Charter on Human and Peoples' Rights; the UN Convention against Torture 1984; the European Convention on the Prevention of Torture 1987; and the Inter-American Convention to Prevent and Punish Torture 1985.

261 See e.g. the four Geneva Red Cross Conventions 1949 and the two Additional Protocols of 1977.

262 See *Belgium v. Senegal*, ICJ Reports, 2012, para. 99. See also *Ex parte Pinochet (No. 3)* [2000] 1 AC 147, 198; 119 ILR, p. 135; *Furundžija*, 121 ILR, pp. 213, 260–2; and *Al-Adsani v. UK*, ECtHR, Judgment of 21 November 2001, para. 61; 123 ILR, pp. 24, 41–2. See also above, [Chapter 3](#), p. 104.

263 See e.g. *Vuolanne v. Finland*, Case No. 265/87, 96 ILR, p. 649; and generally Joseph and Castan, *International Covenant*, chapter 9.

264 See e.g. *Selmouni v. France*, ECtHR, Judgment of 28 July 1999.

265 See e.g. *Delalić*, Case No. IT-96-21, ICTY, Judgment of 16 November 1998.

266 The Convention built particularly upon the Declaration on the Protection of All Persons from being subjected to Torture and Other Cruel, Inhuman and Degrading Treatment or Punishment adopted by the General Assembly in 1975, see General Assembly resolution 3452 (XXX). Other relevant instruments preceding the Convention were the Standard Minimum Rules for the Treatment of Prisoners 1955; the Code of Conduct for Law Enforcement Officers, 1979 (article 5); the Principles of Medical Ethics 1982 (Principles 1 and 2); and the Principles on the Protection of Persons under Detention or Imprisonment adopted by the General Assembly in 1989.

267 See, as far as the UK is concerned, sections 134 and 135 of the Criminal Justice Act 1988.

²⁶⁸ Note e.g. the report of the Committee on Sri Lanka in this context, A/57/44, p. 59 (2002). See also E. Zoller, ‘Second Session of the UN Commission against Torture’, 7 *NQHR*, 1989, p. 250.

²⁶⁹ Article 28(1). See e.g. A/57/44, p. 81.

²⁷⁰ As at 17 May 2019, the Committee had received a total of 448 reports and had examined 426; twenty-six states parties had overdue initial reports and thirty-nine states had overdue periodic reports: see A/74/44, p. 5 (2019).

²⁷¹ See e.g. A/61/44, pp. 6 ff. (2006).

²⁷² As of the date of writing, four have been issued, see https://tbinternet.ohchr.org/_layouts/15/treatybodyexternal/TBSearch.aspx?Lang=en&TreatyID=1&DocTypeID=11.

²⁷³ *Ibid.*, pp. 82–3. See also A/57/44, p. 219.

²⁷⁴ *OR, MM and MS v. Argentina*, Communication Nos. 1–3/1988, UN Committee against Torture, Decisions of 23 November 1989. See 5 *Interights Bulletin*, 1990, p. 12. The Committee noted that there existed a general rule of international law obliging all states to take effective measures to prevent and punish acts of torture. However, the Convention took effect only from its date of entry (26 June 1987) and could not be applied retroactively to cover the enactment of legislation prior to that date. Therefore, the communications were inadmissible: see e.g. *AA v. Azerbaijan*, A/61/44, pp. 255, 259 (2006). Note also *Belgium v. Senegal*, ICJ Reports, 2012, pp. 422, 457–8.

²⁷⁵ See e.g. A/61/44, p. 86 (2006).

²⁷⁶ *Khan v. Canada*, Case No. CAT/C/13/D/15/1994.

²⁷⁷ See *Dadar v. Canada*, A/61/44, pp. 233 ff. (2006).

²⁷⁸ *Parot v. Spain*, CAT/C/14/D/6/1990.

279 *RT v. Switzerland*, A/61/44, pp. 249, 253 (2006). See also article 22 of the Convention and Rule 107(b) of the Rules of Procedure.

280 See General Assembly resolution 57/199. Note that in 1985, the UN Commission on Human Rights appointed a Special Rapporteur on Torture to examine questions relevant to torture and to seek and receive credible and reliable information on such questions and to respond to that information without delay: resolution 1985/33. The work of the rapporteur includes the sending of urgent appeals and an increasing number of country visits. He is directed to cooperate closely with the Committee against Torture, see e.g. E. Zoller, ‘46th Session of the United Nations Commission on Human Rights’, **8 NQHR**, 1990, pp. 140, 166.

281 See e.g. *Litigating the Rights of the Child: The UN Convention on the Rights of the Child in Domestic and International Jurisprudence* (ed. T. Liefarrrd and J. E. Doek), Heidelberg, 2014; *The Rights of the Child in a Changing World: 25 Years after the UN Convention on the Rights of the Child* (ed. O. C. Jančič), Heidelberg, 2015; T. Buck, *International Child Law*, 3rd ed., Abingdon, 2014; G. Lansdown, ‘The Reporting Procedures under the Convention on the Rights of the Child’, in Alston and Crawford, *Future*, p. 113; Rehman, *International Human Rights Law*, chapter 16; *Revisiting Children’s Rights: 10 Years of the UN Convention on the Rights of the Child* (ed. D. Fottrell), The Hague, 2000; D. M. Santos Pais, ‘The Convention on the Rights of the Child and the Work of the Committee’, **26 Israel Law Review**, 1992, p. 16; and Santos Pais, ‘Rights of Children and the Family’, in Henkin and Hargrove, *Human Rights*, p. 183. See also G. Van Bueren, *The International Law on the Rights of the Child*, Dordrecht, 1995; and *The United Nations Convention on the Rights of the Child* (ed. S. Detrick), Dordrecht, 1992. See generally www.ohchr.org/EN/HRBodies/CRC/Pages/CRCIndex.aspx.

282 The Convention came into force on 2 September 1990. Note also the Declaration on the Rights of the Child adopted by the General Assembly in resolution 1386 (XIV), 1959 and the proclamation of 1979 as the International Year of the Child in resolution 31/169.

283 CRC/C/4/Rev.4, 2015. For example, at its second session in 1992, the Committee discussed the question of children in armed conflicts, A/49/41, pp. 94 ff. This led to a recommendation to the General Assembly to request the Secretary-General to undertake a special study on the means to protect children in armed conflicts: see CRC/C/SR.72, p. 2 and resolution 48/157, which in turn led to the adoption of the Optional Protocol on the

Involvement of Children in Armed Conflict, General Assembly resolution 54/263, 25 May 2000, which entered into force on 12 February 2002. Note that the question of the protection of children in armed conflicts was referred to in the Vienna Declaration and Programme of Action 1993, Part II, B, 4: see 32 ILM, 1993, p. 1680. See also G. Van Bueren, 'The International Legal Protection of Children in Armed Conflicts', 43 *ICLQ*, 1994, p. 809; and M. Happold, *Child Soldiers in International Law*, Manchester, 2005. At its fourth session, the problem of the economic exploitation of children was discussed, A/49/41, pp. 99 ff.; at its eighth session, a discussion on the 'girl-child' was held, CRC/C/38, p. 47. This led to the adoption of the Optional Protocol on the Question of the Sale of Children, Child Prostitution and Child Pornography: see General Assembly resolution 54/263 of 25 May 2000, which entered into force on 18 January 2002. In 2016, the topic chosen was children's rights and the environment, www.ohchr.org/EN/HRBodies/CRC/Pages/Discussion2016.aspx.

²⁸⁴ See CRC/C/SR.42, p. 2 and A/49/41, pp. 69–71.

²⁸⁵ *Ibid.*

²⁸⁶ See CRC/C/5.

²⁸⁷ See e.g. CRC/C/121, 2002.

²⁸⁸ See e.g. A/49/41, pp. 20 ff.; CRC/C/38, pp. 10 ff.; and CRC/C/43, pp. 10 ff. See also CRC/C/121, 2002, pp. 8 ff.

²⁸⁹ See e.g. CRC/C/27/Rev.3, 1995 detailing such measures up to mid-1995.

²⁹⁰ *Ibid.*, p. 159 (on 'The role of national human rights institutions in promoting and protecting children's rights'). In 2007, the Committee adopted General Comment No. 10 on the rights of children in juvenile justice and in 2014 a joint general recommendation/general comment no. 31 of the Committee with CEDAW was adopted on harmful practices, CRC/C/GC/14, http://tbinternet.ohchr.org/_layouts/treatybodyexternal/TBSearch.aspx?Lang=en&TreatyID=5&DocTypeID=11. In 2019, General Comment No. 24 was adopted on children's rights in the civil justice system, see CRC/C/GC/24.

²⁹¹ This came into force in April 2014. The first decision concerned the determination of age within proceedings to grant special protection to a child deprived of his family environment, but was declared inadmissible, CRC/C/69/D/I/2014. See further, <https://juris.ohchr.org/en/search/results?Bodies=5&sortOrder=Date>.

²⁹² See e.g. *Migration and Human Rights: The United Nations Convention on Migrant Workers' Rights* (ed. P. de Guchteneire, A. Pecoud and R. Cholewinski), Cambridge, 2009; Rehman, *International Human Rights Law*, chapter 19; K. Samson, 'Human Rights Co-ordination within the UN System', in Alston, *United Nations and Human Rights*, pp. 620, 641 ff.; S. Hune and J. Niessen, 'Ratifying the UN Migrant Workers Convention: Current Difficulties and Prospects', 12 *NQHR*, 1994, p. 393; and S. Hune and J. Niessen, 'The First UN Convention on Migrant Workers', 9 *NQHR*, 1991, p. 133. See generally www.ohchr.org/EN/HRBodies/CMW/Pages/CMWIndex.aspx.

²⁹³ See e.g. the Reports of the Committee for 2006–07, A/62/48 (2007) and 2014–15, A/70/48. The article 77 procedure is not yet in force.

²⁹⁴ See e.g. *The UN Convention on the Rights of Persons with Disabilities* (ed. I. Bantekas, M. A. Stein and D. Anastasiou), Oxford, 2018; *The United Nations Convention on the Rights of Persons with Disabilities* (ed. V. Della Fina, R. Cera and G. Palmisano), Heidelberg, 2016; E. Flynn, *From Rhetoric to Action: Implementing the UN Convention on the Rights of Persons with Disabilities*, Cambridge, 2013; Rehman, *International Human Rights Law*, chapter 17; and A. Lawson, 'The United Nations Convention on the Rights of Persons with Disabilities', 34 *Syracuse Journal of International Law and Commerce*, 2007, p. 563. See also generally www.ohchr.org/EN/HRBodies/CRPD/Pages/CRPDIndex.aspx. This Convention is the first human rights treaty to be ratified by a regional integration organisation, the EU, *ibid.*

²⁹⁵ See www.ohchr.org/EN/HRBodies/CRPD/Pages/GC.aspx.

²⁹⁶ See M. L. Vermeulen, *Enforced Disappearance: Determining State Responsibility under the International Convention for the Protection of All Persons from Enforced Disappearance*, Intersentia, 2012; T. Scovazzi and G. Citroni, *The Struggle against Enforced Disappearance and the 2007 United Nations Convention*, The Hague, 2007; Rehman, *International Human Rights Law*, chapter 23; and S. McCrory, 'The International Convention for the Protection of All Persons from Enforced Disappearance', 7 *Human*

Rights Law Review, 2007, p. 545. See also the report of its first two sessions, A/67/56, and its 2014–15 report, A/70/56. See generally www.ohchr.org/EN/HRBodies/CED/Pages/CEDIndex.aspx.

297 See e.g. article 2 of the Civil and Political Rights Covenant 1966; article 1 of the European Convention on Human Rights 1950; articles 1 and 2 of the Inter-American Convention on Human Rights 1969; article V of the Genocide Convention 1948; article 4 of the Convention on the Suppression and Punishment of the Crime of Apartheid 1973; and article 3 of the Slavery Convention 1926.

298 See also article 7 of the Apartheid Convention 1973. Several conventions provide for the communication of information to the UN Secretary-General: see e.g. article 33 of the Convention Relating to the Status of Stateless Persons 1954; and articles 35 and 36 of the Convention Relating to the Status of Refugees 1951.

299 Although neither the Optional Protocol on Communications of the Convention on the Rights of the Child nor article 77 of the Migrant Workers Convention is yet in force.

300 The Human Rights Committee, the Committee on the Elimination of Racial Discrimination, the Committee on Migrant Workers, the Committee against Torture, the Committee on Economic, Social and Cultural Rights, the Committee on Enforced Disappearances and the Committee on the Rights of the Child (although this provision is not yet in force).

301 The Committee against Torture, the Committee on the Elimination of Discrimination against Women, the Committee on the Rights of Persons with Disabilities, the Committee on Enforced Disappearance, the Committee on Economic, Social and Cultural Rights and the Committee on the Rights of the Child (although this provision is not yet in force). Note the competence to visit under the Convention on Enforced Disappearance.

302 See e.g. E. Tistounet, ‘The Problem of Overlapping among Different Treaty Bodies’, in Alston and Crawford, *Future*, p. 383.

303 See Part II, Section A of the Vienna Declaration and Programme of Action, 32 ILM, 1993, pp. 1674–5.

304 See e.g. the Human Rights Committee, A/49/44, and the Committee against Torture, A/50/44. See also the Report of the Secretary-General to the sixth meeting of chairpersons of treaty bodies, HRI/MC/1995/2, p. 13.

305 See General Assembly resolution 47/111 and HRI/MC/1995/2, p. 14.

306 *Ibid.*, p. 15.

307 See General Assembly resolution 49/178, 1994, which endorsed the recommendation of the chairpersons that the meetings be held annually. The first meeting of the chairpersons of treaty bodies was held in 1984, A/39/484 and the second in 1988, A/44/98. See also e.g. A/62/224 (2007). Note also that the first inter-committee meeting of the human rights treaty bodies took place in September 2002, HRI/ICM/2002/3. A working group on the harmonisation of working methods of the treaty bodies has been established: see e.g. HRI/MC/2006/3 and HRI/MC/2007/2.

308 See further below, [Chapter 15](#), p. 804.

309 See further below, [Chapter 16](#), p. 855.

310 For example, the Committee on the Elimination of Racial Discrimination and the Committee on Economic, Social and Cultural Rights have established procedures enabling them to examine the situation in the state concerned: see above, pp. 271 and 274. Other Committees have sought to hold meetings with the officials of the states concerned in order to encourage submission of overdue reports, HRI/MC/1995/2, p. 7.

311 See e.g. HRI/MC/1995.

312 The role of the treaty bodies in seeking to prevent human rights violations has been emphasised: see e.g. A/47/628, para. 44.

313 The UN Secretary-General in his report entitled ‘In Larger Freedom’ emphasised the need for streamlining procedures and called for the implementation of harmonised guidelines on reporting, A/59/2005 and A/59/2005/Add.3. The UN High Commissioner for Human Rights proposed at one stage for a unified standing treaty body: Concept Paper on the Proposal for a Unified Standing Treaty Body, HRI/MC/2006/2, 2006. However, this

was not accepted. In June 2012, the High Commissioner produced a report on the strengthening of the treaty body system: N. Pillay, *Strengthening the United Nations Human Rights Treaty Body System*, Office for the UN High Commissioner of Human Rights, A/66/860, 2012. In 2012, an intergovernmental process was launched to strengthen and enhance the effective functioning of the treaty body system and the Ambassadors of Iceland and Indonesia appointed as Co-facilitators by the President of the General Assembly. Note also General Assembly resolution 68/268 (2014) and the three biennial reports by the UN Secretary General on the status of the treaty body system, A/71/118 (2016); A/73/309 (2018); and A/74/643 (2020), see www.ohchr.org/EN/HRBodies/HRTD/Pages/TBStrengthening.aspx.

318 See M. Bond, *The Council of Europe*, London, 2013; and see generally www.coe.int/en/web/portal/home.

319 Committee of Ministers resolution (99) 50. The Commissioner cannot consider individual petitions and exercises functions other than those of the supervisory bodies of Council of Europe human rights instruments. No general reporting system exists in this framework. See www.coe.int/en/web/commissioner.

320 See e.g. CommDH(2002)7, Opinion 1/2002 on certain aspects of the UK 2001 derogation from article 5(1) of the European Convention on Human Rights.

321 See e.g. Recommendations CommDH/Rec(2001)1 concerning the rights of aliens wishing to enter a Council of Europe member state and the enforcement of expulsion orders, and CommDH/Rec(2002)1 concerning certain rights that must be guaranteed during the arrest and detention of persons following ‘cleansing’ operations in the Chechen Republic of the Russian Federation.

322 See e.g. the visit to Russia including Chechnya, Press Release 072a (2003).

323 All forty-seven member states of the Council of Europe have ratified the Convention.

324 Note that Protocol No. 15, which is not yet in force, introduces a reference to the principle of subsidiarity and the doctrine of the margin of appreciation. It also reduces from six to four months the time limit within which an application may be made to the Court following the date of a final domestic decision. Economic and social rights are covered in the European Social Charter 1961.

325 See below, p. 297.

326 The UK incorporated the Convention in the Human Rights Act 1998. See e.g. J. Polakiewicz and V. Jacob-Foltzer, ‘The European Human Rights Convention in Domestic Law’, **12 HRLJ**, 1991, pp. 65, 125.

333 *Loizidou v. Turkey*, ECtHR, Series A, No. 310, 1995, pp. 24, 27; 103 ILR, p. 622.

334 Note jurisdiction is presumed to be exercised normally throughout a state's territory, see *Al Nashiri v. Romania*, ECtHR, Judgment of 31 May 2018, para. 592.

335 See e.g. *Soering v. UK*, ECtHR, Series A, No. 161, 1989, pp. 35–6. See also M. Milanovic, *Extraterritorial Application of Human Rights Treaties: Law, Principles, and Policy*, Oxford, 2013.

336 See e.g. *Drozd and Janousek v. France and Spain*, ECtHR, Series A, No. 240, 1992, p. 29. See also *Issa v. Turkey* (Admissibility), ECtHR, Judgment of 30 May 2000; and *Öcalan v. Turkey*, ECtHR, Judgment of 14 December 2000.

337 ECtHR, Series A, No. 310, 1995, p. 20; 103 ILR, p. 622. See also *Cyprus v. Turkey*, ECtHR, Judgment of 10 May 2001, paras. 75 ff.; 120 ILR, p. 10.

338 ECtHR, Judgment of 12 December 2001, paras. 63, 67, 71; 123 ILR, pp. 110, 111, 113. The Court noted that ‘the Convention is a multi-lateral treaty operating . . . in an essentially regional context and notably in the legal space (*espace juridique*) of the contracting states’, *ibid.*, para. 80. See also *Issa v. Turkey* (Merits), ECtHR, Judgment of 16 November 2004, paras. 65 ff., where the Court held that the degree of control exercised by Turkish troops during a large-scale incursion into northern Iraq did not amount to overall control, and *Assanidze v. Georgia*, ECtHR, Judgment of 8 April 2004.

339 Judgment of 8 July 2004, paras. 312–13.

³⁴⁰ *Ibid.*, paras. 314–19. Note that this did not absolve the legitimate state deprived of control from all responsibility, *ibid.*, para. 331. See also *Catan v. Moldova and Russia*, ECtHR, Judgment of 19 October 2012, paras. 103 ff.; *Chiragov v. Armenia* (Merits), ECtHR, Judgment of 16 June 2015, paras. 168 ff.; and *Sandu v. Moldova and Russia*, Judgment of 17 July 2018.

³⁴¹ ECtHR, Judgment of 7 July 2011.

³⁴² Judgment of 16 November 2004. See also *Pad v. Turkey*, ECtHR, Judgment of 28 June 2007.

³⁴³ See also *Medvedyev v. France*, ECtHR, Judgment of 29 March 2010, with regard to France’s control over a Cambodian vessel; and *Al-Saadoon and Mufdhi v. UK*, ECtHR, Judgment of 3 July 2009 with regard to UK control over a prison.

³⁴⁴ Judgment of 7 July 2011, paras. 136–7. See also *Jaloud v. Netherlands*, European Court of Human Rights, Judgment of 20 November 2014, para. 139.

³⁴⁵ This was accepted and applied by the UK Supreme Court in *Smith v. MOD* [2013] UKSC 41. See also *Al-Saadoon v. Secretary of State for Defence* [2016] EWCA Civ 811.

³⁴⁶ Judgment of 16 September 2014, paras. 74 ff. Note the Court’s rejection of the government’s argument that jurisdiction arising out of physical power and control did not apply in the active hostilities phase of an international armed conflict. The Convention and international humanitarian law could apply concurrently, *ibid.*, para. 77. The Court interpreted article 5 on the right to liberty and security of the person as permitting detention (in addition to the grounds listed in the article itself) in the case of the taking of prisoners of war and the detention of civilians who pose a risk to security under the Third and Fourth Geneva Conventions of 1949: *ibid.*, para. 104. However, see now *Georgia v. Russia (II)*, Judgment of 21 January 2021, paras. 125 ff., accepting that jurisdiction based on effective control as above did indeed not apply in the active hostilities phase of an international armed conflict.

³⁴⁷ Judgment of 2 May 2007, paras. 141 ff.; similarly with regard to those activities falling within the framework of the UNMIK, deemed to be a subsidiary organ of the Security Council, para. 143. But see *Bosphorus Airways v. Ireland*, ECtHR, Judgment of 30 June

2005. Cf. G. Gaja, *Seventh Report on Responsibility of International Organizations*, A/CN.4/610, 2009, pp. 10–12. See also *Kontic v. Ministry of Defence* [2016] EWHC 2034 (QB) applying *Behrami*.

348 ECtHR, Judgment of 20 November 2014, para. 143.

349 Judgment of 7 July 2011, para. 102.

350 Articles 22 and 23. Note that there will no longer be a prohibition on two judges having the same nationality. The terms of office of the judges will end at the age of seventy.

351 Article 26.

352 Rule 25, European Court of Human Rights, Rules of Court, January 2020. There are now five Sections.

353 Rules 26 and 27.

354 Article 25 and Rule 8.

355 Article 27 and Rules 27A, 49 and 52A.

356 Article 28.

357 Article 29.

358 Rule 48.

359 Rule 59.

360 In the case of inter-state cases, the respondent government will be automatically contacted: see Rule 51.

361 Article 30. Note that the provision ‘unless one of the parties objects’ will be removed once Protocol No. 15 is in force. While there is no specific power in the Convention under which the Court may order interim measures of protection with binding effect, Rule 39 of

the Rules of Court provides that the Chamber or, where appropriate, the President of the Section or a duty judge may, at the request of a party or of any other person concerned, or of its own motion, indicate to the parties any interim measure which it considers should be adopted in the interests of the parties or of the proper conduct of the proceedings before it. The Court in *Mamatkulov and Abdurasulovic v. Turkey*, ECtHR, Judgment of 6 February 2003, referring to the practice of other international organs including the ICJ and the Inter-American Court and Commission of Human Rights, held that article 34 of the Convention requires that applicants are entitled to exercise their right to individual application effectively, while article 3, relevant in the context of expulsion, also necessitated an effective examination of the issues in question. The Court noting that Rule 39 indications ‘permit it to carry out an effective examination of the application and to ensure that the protection afforded by the Convention is effective’, concluded that ‘any state party to the Convention to which interim measures have been indicated in order to avoid irreparable harm being caused to the victim of an alleged violation must comply with those measures and refrain from any act or omission that will undermine the authority and effectiveness of the final judgment’, paras. 107–10. See also the Court’s Practice Direction on Interim Measures, last amended in 2011, www.echr.coe.int/Documents/PD_interim_measures_ENG.pdf, and the interim measures granted on 13 March 2014 in the Ukraine–Russia inter-state application calling on both Ukraine and Russia to refrain from taking any measures, in particular military actions, which might entail breaches of the rights of civilians under the European Convention on Human Rights, <http://hudoc.echr.coe.int/sites/eng-press/pages/search.aspx?i=003-4699472-5703982>. Note the interim measures granted on 29 September 2020 in *Armenia v. Azerbaijan* and extended on 6 October 2020 in *Armenia v. Turkey*, to ‘all states directly or indirectly involved in the conflict, including Turkey’, ECHR 264 (2020) and ECHR 276 (2020).

³⁶² See the initial case, *Broniowski v. Poland*, ECtHR, Judgment of 22 June 2004; and see now Rule 61 of the Rules of Court, 2016 (introduced in 2011). See e.g. *Kurić v. Slovenia*, ECtHR, Judgment of 26 June 2012.

³⁶³ Article 47. Only the Committee of Ministers can make such a request and advisory opinions cannot deal with any question relating to the content or scope of the rights and freedoms laid down in Section 1 of the Convention and its Protocols or with any question which the Court or Committee of Ministers might have to consider during proceedings instituted in accordance with the Convention. The first request for an advisory opinion concerned the co-existence of the Convention on Human Rights of the Commonwealth of

Independent States and the European Convention on Human Rights, but on 2 June 2004 the Court concluded unanimously that the request did not come within its advisory competence. The first Advisory Opinion was given on 12 February 2008, where the Court unanimously concluded that it was not compatible with the European Convention on Human Rights for a list of candidates for election to the post of judge at the Court to be rejected on the sole ground that there was no woman included in the proposed list and called for exceptions to the principle that lists must contain a candidate of the under-represented sex to be defined as soon as possible. See now Protocol No. 16, which came into force on 1 August 2018 and allows for the ‘highest courts and tribunals’ of contracting states to seek an advisory opinion from the Grand Chamber, but only in the context of a case before such requesting court or tribunal. The government of the state of the requesting court or tribunal and the Commissioner of Human Rights would have the right to participate, while the Court has expressed the view that it would, as a matter of course, invite the parties to the domestic proceedings before the requesting court or tribunal to take part in the procedure before the European Court: see Opinion of the Court of 6 May 2013, http://echr.coe.int/Pages/home.aspx?p=basictexts&c=#n13739062744461326038770_pointer.

364 Article 36.

365 Articles 38 and 39. Proceedings in the latter case will be confidential.

366 Article 39.

367 Article 41 and Rule 60. See for an example of non-pecuniary damage in an inter-state case, *Georgia v. Russia (I)*, ECtHR, Judgment of 31 January 2019; and *Chiragov v. Armenia* (Just Satisfaction) and *Sargsyan v. Azerbaijan*, ECtHR, Judgments of 12 December 2017 concerning pecuniary and non-pecuniary damage in individual application cases where full reparation was impossible due to the ongoing conflict.

368 Article 44.

369 Article 46(1).

370 Article 46(2). If the Committee of Ministers considers that the supervision of the execution of a final judgment is hindered by a problem of interpretation of the judgment, it may refer the matter to the Court for a ruling on the question of interpretation. A referral

decision requires a majority vote of two-thirds of the representatives entitled to sit on the committee. If the Committee of Ministers considers that a High Contracting Party refuses to abide by a final judgment in a case to which it is a party, it may, after serving formal notice on that Party and by decision adopted by a majority vote of two-thirds of the representatives entitled to sit on the committee, refer to the Court the question whether that Party has failed to fulfil its obligation under para. 1. If the Court finds a violation of para. 1, it shall refer the case to the Committee of Ministers for consideration of the measures to be taken. If the Court finds no violation of article 46(1), it shall refer the case to the Committee of Ministers, which shall close its examination of the case: article 46(3)–(5).

371 *Cyprus case (Greece v. UK)*, 1956 and 1957, two applications; *Austria v. Italy*, 4 *European Yearbook of Human Rights*, 1960; five applications against Greece, 1967–70; *Ireland v. UK*, 1971; *Cyprus v. Turkey*, 1974–94, four applications, and five applications against Turkey, 1982 brought by Denmark and four other states; application brought by Denmark against Turkey, 1997; *Georgia v. Russia*, three applications brought by Georgia, 2007 (Admissibility Decision of 30 June 2009), 2008, 2009 (struck out) and 2018; application brought by Slovenia against Croatia in 2016 and a number of applications brought by Ukraine against Russia in 2014, 2016 and 2018, with applications brought by Latvia against Denmark, the Netherlands against Russia, Liechtenstein against the Czech Republic, Armenia against Azerbaijan and Armenia against Turkey in 2020, www.echr.coe.int/Documents/InterState_applications_ENG.pdf (6 October 2020).

372 *Cyprus v. Turkey (Third Application)* 13 DR 85 (1978).

373 The total number of applications allocated to a judicial formation in 2019 was 44,500. 29,800 of these were identified as Single-Judge cases likely to be declared inadmissible (an increase of 2 per cent in relation to 2018). Single-judge applications continue to be processed as soon as they are identified as qualifying for such a procedure. 14,700 applications were identified as probable Chamber or Committee cases: see https://echr.coe.int/Documents/Stats_analysis_2019_ENG.pdf.

374 Note that the issue of reservations to former articles 25 and 46 (concerning the jurisdiction of the Court prior to Protocol XI) was discussed in the case-law. The Court noted that while temporal reservations could be valid, reservations beyond this were not: see *Loizidou v. Turkey* (Preliminary Objections), ECtHR, Series A, No. 310, 1995; 103 ILR, p. 622. The Court, in dismissing the territorial limitations upon the Turkish declarations under articles 25 and 46, held that such declarations therefore took effect as

valid declarations without such limitations: Series A, No. 310, pp. 27–9. Not to adopt this approach would, the Court noted, have entailed a weakening of the Convention system for the protection of human rights, which constituted a European constitutional public order: *ibid.* See also the Commission Report in *Chrysostomos v. Turkey* 68 DR 216.

³⁷⁵ See e.g. *X v. Austria* 7 DR 87 (1976) concerning legislation on abortion.

³⁷⁶ See e.g. *Pine Valley v. Ireland*, ECtHR, Series A, No. 222, 1991; *Johnston v. Ireland*, Series A, No. 112, 1986; *Marckx v. Belgium*, Series A, No. 31, 1979; *Campbell and Cosans v. UK*, Series A, No. 48, 1982; *Eckle v. Germany*, Series A, No. 51, 1982; and *Vijayanathan and Pusparajah v. France*, ECtHR, Series A, No. 241-B, 1992. An individual may, under certain conditions, claim to be the victim of a violation occasioned by the mere existence of secret measures or of legislation permitting secret measures, without having to allege that such measures were in fact applied to him; see e.g. *Klass*, ECtHR, Series A, No. 28, 1979, pp. 17–18; 58 ILR, pp. 423, 442. See also e.g. *Marckx*, Series A, No. 31, 1979, pp. 12–14; 58 ILR, pp. 561, 576; *Dudgeon*, ECtHR, Series A, No. 45, 1982, p. 18; 67 ILR, pp. 395, 410; *Belgian Linguistics*, ECtHR, Series A, No. 6, 1968; 45 ILR, p. 136; and *Norris v. Ireland*, ECtHR, Series A, No. 142, 1988; 89 ILR, p. 243. A near relative of the victim, for example, could also raise an issue where the violation alleged was personally prejudicial or where there existed a valid personal interest; see e.g. Application 100/55, *X v. FRG*, 1 *Yearbook of the ECHR*, 1955–57, p. 162 and Application 1478/62; *Y v. Belgium*, *Yearbook of the ECHR*, 1963, p. 590. See also *Cyprus v. Turkey*, Judgment of 10 May 2001; 120 ILR, p. 10.

³⁷⁷ Article 35. See *Akdivar v. Turkey*, Judgment of 16 September 1996. Note that the six-month time limit will be reduced to four months once Protocol No. 15 is in force. As to the meaning of domestic or local remedies in international law, see below, p. 712.

³⁷⁸ See e.g. *X v. UK*, 8 DR, pp. 211, 212–13; and *Cyprus v. Turkey*, *Yearbook of the ECHR*, 1978, pp. 240–2. Where, however, there is a permanent state of affairs which is still continuing, the question of the six-month rule can only arise after the state of affairs has ceased to exist: see e.g. *De Becker v. Belgium*, 2 *Yearbook of the ECHR*, 1958, pp. 214, 244. The rule is strict and cannot be waived by the state concerned: see *Walker v. UK*, ECtHR, Judgment of 25 January 2000.

³⁷⁹ See *Cyprus v. Turkey*, Judgment of 10 May 2001, paras. 82 ff. Note that the Court suggested that the remedies provided by the ‘Turkish Republic of Northern Cyprus’ had to

be taken into account in this situation, *ibid*.

380 See e.g. *Boyle and Rice v. UK*, PCIJ, Series A, No. 131, 1988. This does not apply to inter-state cases.

381 Article 35. See e.g. *Vagrancy*, ECtHR, Series A, No. 12, 1971; 56 ILR, p. 351.

382 Article 35(3)(b). See e.g. N. Vogiatzis, ‘The Admissibility Criterion under Article 35(3)(b) ECHR: A “Significant Disadvantage” to Human Rights Protection?’, 65 *ICLQ*, 2016, p. 185. The phrase ‘and provided that no case may be rejected on this ground which has not been duly considered by a domestic tribunal’ is to be deleted once Protocol No. 15 is in force.

383 One judgment was delivered in its first year of operation in 1960; six in 1976; seventeen in 1986; 126 in 1996; 844 in 2002; 1,678 in 2012; and 2,187 in 2019: see *Analysis of Statistics 2019*, https://echr.coe.int/Documents/Stats_analysis_2019_ENG.pdf.

384 See e.g. P. Mahoney, ‘Judicial Activism and Judicial Self-Restraint in the European Court of Human Rights: Two Sides of the Same Coin’, 11 *HRLJ*, 1990, p. 57.

385 Series A, No. 258-B, 1994, para. 43.

386 See e.g. *Handyside v. UK*, ECtHR, Series A, No. 24, 1981; 58 ILR, p. 150.

387 E.g. fair trial and due process questions: see e.g. *Sunday Times v. UK*, ECtHR, Series A, No. 30, 1979; 58 ILR, p. 491.

388 ECtHR, Judgment of 10 May 2001, para. 103. Note that once Protocol No. 15 is in force, the phrase ‘Affirming that the High Contracting Parties, in accordance with the principle of subsidiarity, have the primary responsibility to secure the rights and freedoms defined in this Convention and the Protocols thereto, and that in doing so they enjoy a margin of appreciation, subject to the supervisory jurisdiction of the European Court of Human Rights established by this Convention’ will be inserted at the end of the preamble to the Convention.

389 See e.g. *Tanli v. Turkey*, ECtHR, Judgment of 10 April 2001.

390 *Vgt Verein gegen Tierfabriken*, Judgment of 28 June 2001, para. 78.

391 ECtHR, Series A, No. 25, 1978; 58 ILR, p. 188.

392 The Court turned down a request to revise this judgment under Rule 80(1) (‘discovery of a fact which might by its nature have a decisive influence and which, when a judgment was delivered, was unknown to the Court and could not reasonably have been known to that party’) so as to designate these practices as torture, *Ireland v. UK*, Judgment of 20 March 2018. See also *Cyprus v. Turkey*, where the Court held that the discriminatory treatment of the Greek Cypriots in the Turkish occupied north of Cyprus amounted to degrading treatment, Judgment of 10 May 2001, paras. 302–11; 120 ILR, p. 10.

393 ECtHR, Series A, No. 324, 1995.

394 ECtHR, Series A, No. 18, 1975; 57 ILR, p. 200.

395 See e.g. *Handyside v. UK*, ECtHR, Series A, No. 24, 1981; 58 ILR, p. 150; *Dudgeon*, ECtHR, Series A, No. 45, 1982; 67 ILR, p. 395; and *Sunday Times*, ECtHR, Series A, No. 30, 1979; 58 ILR, p. 491.

396 See e.g. S. Trechsel, ‘Liberty and Security of Person’, in Macdonald *et al.*, *European System*, p. 277; P. Van Dijk, ‘Access to Court’, *ibid.*, p. 345; and O. Jacot-Guillarmod, ‘Rights Related to Good Administration (Article 6)’, *ibid.*, p. 381.

397 Series A, No. 31, 1979; 58 ILR, p. 561.

398 ECtHR, Series A, No. 44, 1981; 62 ILR, p. 359.

399 Series A, No. 145, 1988.

400 For the text, see e.g. 7 NQHR, 1989, p. 255. See also *Brannigan and McBride v. UK*, Series A, No. 258-B, 1993.

401 ECtHR, Series A, No. 161, 1989. See also *Mamatkulov and Abdurasulovic v. Turkey*, ECtHR, Judgment of 6 February 2003, paras. 66 ff.; and *El-Masri v. Former Yugoslav Republic of Macedonia*, ECtHR, Judgment of 13 December 2012.

402 *Jabari v. Turkey*, ECtHR, Judgment of 11 July 2000.

403 *Chahal v. UK*, ECtHR, Judgment of 15 November 1996.

404 See e.g. *McCann v. UK*, ECtHR, Series A, No. 324, 1995.

405 E.g. *Tanli v. Turkey*, ECtHR, Judgment of 10 April 2001, para. 152.

406 *Cyprus v. Turkey*, Judgment of 10 May 2001, para. 132; 120 ILR, p. 10.

407 *LCB v. UK*, ECtHR, Judgment of 9 June 1998.

408 *Soering v. UK*, Judgment of 7 July 1989, para. 120. See also *Aksoy v. Turkey*, ECtHR, Judgment of 18 December 1996, para. 95, and *Akdeniz v. Turkey*, ECtHR, Judgment of 31 May 2005, para. 138.

409 E.g. *Kaya v. Turkey*, ECtHR, Judgment of 19 February 1998, para. 107; *Ilhan v. Turkey*, ECtHR, Judgment of 27 June 2000, para. 97; *Kurt v. Turkey*, ECtHR, Judgment of 25 May 1998, para. 140; and *Kudla v. Poland*, ECtHR, Judgment of 26 October 2000, paras. 146–9. The Court has noted that ‘the requirements of Article 13 are broader than a Contracting State’s obligation under Article 2 to conduct an effective investigation into the disappearance of a person last seen in the hands of the authorities’: *Akdeniz v. Turkey*, ECtHR, Judgment of 31 May 2005, para. 139; and *Estamirov and Others v. Russia*, ECtHR, Judgment of 12 October 2006, para. 118.

410 Article 46(2).

411 Article 13 of the CoE Statute.

412 Article 14 of the CoE Statute.

413 Rules 3 and 4 of the Rules of Procedure of the Committee of Ministers. Note that where the Court finds a systemic defect in the national legal order, which has or is likely to produce a large number of applications, a remedy may be required of the state that would apply to the class of individuals in the same category: see *Broniowski v. Poland*, ECtHR, Judgment of 22 June 2004. See also *Burmych v. Ukraine*, ECtHR, Judgment of 12 October

2017, where the Court decided to strike out a number of applications from the Court's list following the pilot judgment in *Ivanov v. Ukraine*, ECtHR, Judgment of 15 October 2009, and transmit them to the Committee of Ministers for implementation. See generally V. Colandrea, 'On the Power of the European Court of Human Rights to Order Specific Non-monetary Measures', 7 *Human Rights Law Review*, 2007, p. 396.

414 The first example of such infringement proceedings took place with regard to *Mammadov v. Azerbaijan*, Judgment of 22 May 2014, see Interim Resolution CM/RESDH (2017) 429, 57 ILM, 2018, p. 358; and *Proceedings under Article 46(4) in the Case of Mammadov v. Azerbaijan*, ECtHR, Judgment of 29 May 2019, concluding that Azerbaijan was in breach of article 46(1) for failing to abide by the judgment of 22 May 2014.

415 See e.g. D. J. Harris, *The European Social Charter*, 2nd ed., Charlottesville, 2000; D. J. Harris, 'A Fresh Impetus for the European Charter', 41 *ICLQ*, 1992, p. 659; D. J. Harris, 'The System of Supervision of the European Social Charter – Problems and Options for the Future', in *The Future of European Social Policy* (ed. L. Betten), 2nd ed., Deventer, 1991, p. 1; *25 Years of the European Social Charter* (ed. A. P. C. M. Jaspers and L. Betten), 1988; Rehman, *International Human Rights Law*, pp. 233 ff.; H. Wiebringhaus, 'La Charte Sociale Européenne: 20 Ans Après la Conclusion du Traité', *AFDI*, 1982, p. 934; O. Kahn-Freund, 'The European Social Charter', in *European Law and the Individual* (ed. F. G. Jacobs), London, 1976; O. Kahn-Freund, 'La Charte Sociale Européenne et la Convention Européenne des Droits de l'Homme', 8 *HRJ*, 1975, p. 527; F. M. Van Asbeck, 'La Charte Sociale Européenne', in *Mélanges Rolin*, Paris, 1964, p. 427; and T. Novitz, 'Remedies for Violation of Social Rights Within the Council of Europe', in *The Future of Remedies in Europe* (ed. C. Kilpatrick, T. Novitz and P. Skidmore), London, 2000, p. 230. See also www.coe.int/en/web/turin-european-social-charter/home.

416 As at 21 March 2019, there were forty-three states parties to the Charter.

417 Articles 1–6, 9–10.

418 Articles 7–8, 15, 18–19.

419 Articles 11–14.

420 Articles 16–17. An Additional Protocol was signed in 1988 which added four more economic and social rights, guaranteeing: the rights to equal opportunities in employment

without discrimination based on sex; information and consultation of workers within the undertaking; participation in the determination and improvement of working conditions; and social protection of elderly persons. The Protocol entered into force on 4 September 1992.

421 Out of the following seven rights: the right to work, organise, bargain collectively, social security, social and medical assistance, and the rights of the family to special protection, and of migrant workers and their families to protection and assistance: see article 20.

422 As amended by the Turin Protocol 1991 and as revised in 1996. The revised Charter came into force in 1999 and gathered together the rights contained in the 1961 instrument as amended and the 1988 Protocol and added new rights, such as the right to protection against poverty and social exclusion, the right to housing, the right to protection in cases of termination of employment, and the right to protection against sexual harassment in the workplace.

423 These groups are employment, training and equal opportunities; health, social security and social protection; labour rights; and children, families and migrants respectively.

424 Article 1.

425 Article 2.

426 See e.g. M. Evans and R. Morgan, *Combating Torture in Europe – the Work and Standards of the European Committee for the Prevention of Torture*, Strasbourg, 2001; J. Murdoch, ‘The Work of the Council of Europe’s Torture Committee’, 5 *EJIL*, 1994, p. 220; M. Evans and R. Morgan, ‘The European Torture Committee: Membership Issues’, 5 *EJIL*, 1994, p. 249; A. Cassese, ‘A New Approach to Human Rights: The European Convention for the Prevention of Torture’, 83 *AJIL*, 1989, p. 128; A. Cassese, ‘Une Nouvelle Approche des Droits de l’Homme: La Convention Européenne pour la Prévention de la Torture’, 93 *RGDIP*, 1989, p. 6; M. Evans and R. Morgan, ‘The European Convention on the Prevention of Torture: Operational Practice’, 41 *ICLQ*, 1992, p. 590; and C. Jenkins, ‘An Appraisal of the Role and Work of the European Committee for the Prevention of Torture and Inhuman or Degrading Treatment or Punishment’, SOAS Working Paper No. 11, 1996. See also www.cpt.coe.int/en/.

⁴²⁷ All forty-seven members of the Council of Europe are parties. By Protocol No. 1 non-member states of the Council of Europe are allowed to accede to the Convention at the invitation of the Committee of Ministers, CPT/Inf (93) 17. This came into force in March 2002.

⁴²⁸ The Committee established under the Convention described its function in terms of strengthening ‘the *cordon sanitaire* that separates acceptable and unacceptable treatment or behaviour’: see First General Report, CPT (91) 3, para. 3.

⁴²⁹ See Resolution DH (89) 26 of the Committee of Ministers adopted on 19 September 1989 for the election of the members of the Committee. Note that under Protocol 2 to the Convention, the members of the Committee may be re-elected twice (rather than once as specified in article 5). The Protocol came into force in March 2002.

⁴³⁰ See Fifth General Report, CPT/Inf (95) 10, 1995, p. 3.

⁴³¹ See articles 1 and 7. See also the Rules of Procedure of the Committee, 1989, CPT/Inf (89) 2, especially Rules 29–35. The Rules have been amended on a number of occasions, the most recent being in 2008: see <https://rm.coe.int/16806db824>.

⁴³² Note that 265 periodic visits had been made as of April 2019: see www.cpt.coe.int/en/about.htm.

⁴³³ As of April 2019, ad hoc visits had been made on 191 occasions: see www.cpt.coe.int/en/about.htm. See also Murdoch, ‘Work of the CoE’s Torture Committee’, p. 227.

⁴³⁴ Rule 9 of the Rules of Procedure 2008.

⁴³⁵ *Ibid.*, Rule 30.

⁴³⁶ Article 2.

⁴³⁷ Article 9(1).

⁴³⁸ Article 8.

439 As does the information gathered by the Committee in relation to a visit and its consultations with the contracting state concerned: article 11(1).

440 See Rule 39. Most reports have been published together with the comments of contracting states upon them, see 28th Annual General Report for 2018, <https://rm.coe.int/16809420e3>.

441 Article 10(2). See e.g. the public statements concerning police detention conditions in Turkey: CPT/Inf (93) 1, paras. 21, 37. The situation concerning Chechnya, Russia, has also led to public statements being made in 2001, 2003 and 2007: see e.g. CPT/Inf (2002) 15, Appendix 6 and CPT/Inf (2007), Appendix 9. A public statement was made concerning Bulgaria in 2015: see www.cpt.coe.int/en/annual/CPT-Report-2015.pdf, p. 7.

442 Article 12. This is subject to the rules of confidentiality in article 11.

443 See e.g. Murdoch, ‘Work of the CoE’s Torture Committee’, pp. 238 ff.

444 See generally *Minorities, their Rights and the Monitoring of the European Framework Convention for the Protection of National Minorities* (ed. T. H. Malloy and U. Caruso), The Hague, 2013; *The Rights of Minorities: A Commentary on the European Framework Convention for the Protection of National Minorities* (ed. M. Weller), Oxford, 2006; *The European Convention for the Protection of National Minorities* (ed. P. Lemmens, A. Alen, B. de Witte and A. Verstichel), Strasbourg, 2008; P. Thornberry and M. Estebanez, *The Council of Europe and Minorities*, Strasbourg, 1994; and G. Pentasuglia, *Minorities in International Law*, Strasbourg, 2002. See also www.coe.int/en/web/minorities/home.

445 See also Recommendations 1177 (1992) and 1201 (1993).

446 It came into force in March 1998. See www.coe.int/t/dg4/education/minlang/.

447 Article 15. See e.g. the reports by Germany, MIN-LANG (2013) PR 02, by the UK, MIN-LANG (2013) PR 01 and by Poland, MIN-LANG (2015) PR 03. Such reports are examined by a committee of experts, composed of one member per contracting party, nominated by the party concerned, appointed for a period of six years and eligible for re-appointment (articles 16 and 17). Bodies or associations legally established in a party may draw the attention of the committee of experts to matters relating to the undertakings

entered into by that party and, on the basis of states' reports, the committee will itself report to the Committee of Ministers. The committee of experts' report may be accompanied by the comments which the parties have been requested to make and may also contain the proposals of the committee of experts to the Committee of Ministers for the preparation of such recommendations of the latter body to one or more of the parties as may be required: see e.g. the Committee of Ministers Recommendations to the UK, CM/RecChL (2014) 3; and Germany, CM/RecChL (2014) 5.

448 Article 16. See the first biennial report in 2000, Doc. 8879, and the second in 2002, Doc. 9540.

449 Article 20.

450 The Convention came into force on 1 February 1998. See also the Explanatory Report to the Framework Convention for the Protection of National Minorities 1995. An ad hoc Committee for the Protection of National Minorities (CAHMIN) was established. Note that in January 1996, it was decided to suspend the work of the Committee on the drafting of an Additional Protocol: see CAHMIN (95) 22 Addendum, 1996.

451 Article 4.

452 Article 5. The parties also agree to refrain from assimilation policies and practices where this is against the will of persons belonging to national minorities.

453 E.g. the freedoms of peaceful assembly, association, expression and thought, conscience and religion: article 7. See also articles 8 and 9.

454 Upon request and where such a request corresponds to a real need, article 10(2). Similarly, with regard to the display of traditional local names, street names and other topographical indications intended for the public in the minority language, article 11(3), and with regard to adequate opportunities for being taught the minority language or for receiving instruction in that language, article 14(2).

455 Article 24. Note that parties which are not members of the Council of Europe shall participate in the implementation mechanism according to modalities to be determined. Accordingly, the Federal Republic of Yugoslavia became a party to the Convention on 11 May 2001 and its first report became due on 1 September 2002.

⁴⁵⁶ Article 26.

⁴⁵⁷ Article 25. The first reports became due on 1 February 1999.

⁴⁵⁸ Resolution (97) 10 and see H(1998)005 rev.11.

⁴⁵⁹ See, for a list of opinions, www.coe.int/en/web/minorities/compilation-of-opinions.

⁴⁶⁰ See above, p. 261.

⁴⁶¹ See the Explanatory Report to the Convention, which states: ‘It was decided to adopt a pragmatic approach, based on the recognition that at this stage, it is impossible to arrive at a definition capable of mustering general support of all Council of Europe member States’, H(1995)010, para. 12. The European Court of Human Rights has also referred to the problem of defining national minorities: see *Gorzelik v. Poland*, ECtHR, Judgment of 20 December 2001, para. 62. Recommendations 1201 (1993) and 1255 (1995) suggest that it refers to persons who: reside on the territory of the state concerned and are citizens of it; maintain long-standing, firm and lasting ties with that state; display distinctive ethnic, cultural, religious or linguistic characteristics; are sufficiently representative, although smaller in numbers than the rest of the population of that state or of a region of that state; and are motivated by a concern to preserve together that which constitutes their common identity, including their culture, their traditions, their religion or their language.

⁴⁶² See e.g. Parliamentary Assembly Recommendation Rec. 1492 (2001) and the response of the Advisory Committee dated 14 September 2001. The Council of Europe has adopted measures with regard to other areas of human rights activities of some relevance to the above issues: see e.g. the European Charter of Local Self-Government 1985; the European Convention on the Participation of Foreigners in Public Life at Local Level 1992; the European Outline Convention on Transfrontier Co-operation between Territorial Communities or Authorities 1980; the European Convention on the Legal Status of Migrant Workers 1977; and the European Convention on the Exercise of Children’s Rights 1995.

⁴⁶³ See e.g. D. Chalmers, G. Davies and G. Monti, *European Union Law: Cases and Materials*, 4th ed., Cambridge, 2019; *The European Union and Human Rights: Law and Policy* (ed. J. Wouters, M. Nowak, A.-L. Chané and N. Hachez), Oxford, 2020; Rehman, *International Human Rights Law*, pp. 243 ff.; *The European Union and Human Rights* (ed.

⁴⁶⁷ [1974] ECR 491, 507.

⁴⁶⁸ See e.g. *Hauer v. Land Rheinland-Pfalz* [1979] ECR 3727; and *SPUC v. Grogan* [1991] ECR I-4685.

⁴⁶⁹ See e.g. *Rutili v. Ministry of Interior of French Republic* [1975] ECR 1219; *Valsabbia v. Commission* [1980] ECR 907; *Kirk* [1984] ECR 2689; *Dow Chemical Ibérica v. Commission* [1989] ECR 3165; *ERT* [1991] ECR I-2925; and *X v. Commission* [1992] ECR II-2195; 16 *HRLJ*, 1995, p. 54.

⁴⁷⁰ See article 6(2) of the Consolidated Treaty of European Union, OJ, 2012, C326/15 and article 59(2) of the European Convention on Human Rights. A draft accession agreement of the EU to the Convention was prepared, www.europarl.europa.eu/legislative-train/theme-

[area-of-justice-and-fundamental-rights/file-completion-of-eu-accession-to-the-echr](#), but the EU Court of Justice in Luxembourg rejected the draft agreement in December 2014 in Opinion 2/13, <http://curia.europa.eu/jcms/upload/docs/application/pdf/2014-12/cp140180en.pdf>. See as to continuing efforts to achieve this, www.europarl.europa.eu/legislative-train/theme-area-of-justice-and-fundamental-rights/file-completion-of-eu-accession-to-the-echr.

⁴⁷¹ Under article K.1 of Title VI, the member states agreed that asylum, immigration, drug, fraud, civil and criminal judicial cooperation, customs cooperation and certain forms of police cooperation would be regarded as ‘matters of common interest’, which under article K.2 would be dealt with in compliance with the European Convention on Human Rights and the Convention relating to the Status of Refugees 1951.

⁴⁷² See e.g. E. Riedel and M. Will, ‘Human Rights Clauses in External Agreements’, in Alston, *The EU and Human Rights*, p. 723.

⁴⁷³ See the discussion by the ECJ of these principles in the context of *European Arrest Warrant*, *Advocaten voor de Wereld*, Case No. C-303/05, Judgment of 3 May 2007. See A. Hinarejos, ‘Recent Human Rights Developments in the EU Courts’, 7 *Human Rights Law Review*, 2007, p. 793.

⁴⁷⁴ Article 7 of the Consolidated Treaty.

⁴⁷⁵ Article 49 of the Consolidated Treaty. See also the Copenhagen Criteria 1993, including stable institutions guaranteeing democracy, the rule of law, human rights and the protection of minorities: EC Bulletin 6-1993, I.13.

⁴⁷⁶ This provided for a wide range of rights, including the principle of equality before the law (article 20) and the prohibition of discrimination (article 21). See e.g. *The EU Charter of Fundamental Rights* (ed. S. Peers, T. Hervey, J. Kenner and A. Ward), Oxford, 2014.

⁴⁷⁷ See e.g. *BECTU* [2001] ECR I-4881; and *Netherlands v. Parliament and Council* [2001] ECR I-7079.

⁴⁷⁸ See e.g. *Jégo-Quéré v. Commission* [2002] ECR II-2365.

⁴⁷⁹ See e.g. *European Parliament v. Council* [2006] ECR I-5769; and *Salzgitter Mannesmann v. Commission*, Case No. C-411/04 P, ECJ, Judgment of 25 January 2007. See also Peers *et al.*, EU Charter of Fundamental Rights; and *A, B and C v. Staatssecretaris van Veiligheid en Justitie*, Joined Case Nos. C-148–150/13, CJEU, Judgment of 2 December 2014.

⁴⁸⁰ See e.g. the Annual Reports of the Parliament on Respect for Human Rights in the European Community,
www.europarl.europa.eu/aboutparliament/en/20150201PVL00015/Human-rights.

⁴⁸¹ See e.g. Rehman, *International Human Rights Law*, pp. 267 ff.; A. Bloed, ‘Monitoring the CSCE Human Dimension: In Search of its Effectiveness’, in *Monitoring Human Rights in Europe: Comparing International Procedures and Mechanisms* (ed. A. Bloed, L. Leicht, M. Nowak and A. Rosas), Dordrecht, 1993, p. 45; *The CSCE* (ed. A. Bloed), Dordrecht, 1993; *Human Rights, International Law and the Helsinki Accord* (ed. T. Buergenthal), Montclair, 1977; T. Buergenthal, ‘The Helsinki Process: Birth of a Human Rights System’, in *Human Rights in the World Community* (ed. R. Claude and B. Weston), 2nd ed., Philadelphia, 1992, p. 256; *Essays on Human Rights in the Helsinki Process* (ed. A. Bloed and P. Van Dijk), Dordrecht, 1985; A. Bloed and P. Van Dijk, *The Human Dimension of the Helsinki Process*, Dordrecht, 1991; D. McGoldrick, ‘Human Rights Developments in the Helsinki Process’, **39 ICLQ**, 1990, p. 923; and D. McGoldrick, ‘The Development of the Conference on Security and Co-operation in Europe – from Process to Institution’, in *Legal Visions of the New Europe* (ed. B. S. Jackson and D. McGoldrick), London, 1993, p. 135. See also www.osce.org/what/human-rights.

⁴⁸² I.e. all the states of Western and Eastern Europe, except Albania, plus the US and Canada.

⁴⁸³ For the text, see e.g. 14 ILM, 1975, p. 1292.

⁴⁸⁴ ‘Basket II’ covered cooperation in the fields of economics, science, technology and the environment. This was built upon at the third follow-up meeting in Vienna in 1989; in particular the part entitled ‘Questions Relating to Security in Europe’ contained a Principles section, in which *inter alia* the parties confirmed their respect for human rights and their determination to guarantee their effective exercise. Paragraphs 13–27 contain in a detailed and concrete manner a list of human rights principles to be respected, ranging from

due process rights to equality and non-discrimination and the rights of religious communities, and from the rights of minorities to the rights of refugees; see the text of the Concluding Document in 10 HRLJ, 1989, p. 270. The Vienna Concluding Document also contained a part entitled ‘Human Dimension of the CSCE’ in which some implementation measures were provided for; see Bloed and Van Dijk, *Human Dimension*, p. 79; and McGoldrick, ‘Development of the CSCE’, p. 139. See also H. Tretter, ‘Human Rights in the Concluding Document of the Vienna Follow-up Meeting of the Conference on Security and Co-operation in Europe of January 15, 1989’, 10 HRLJ, 1989, p. 257.

485 See 30 ILM, 1991, p. 190.

486 See 30 ILM, 1991, p. 1670 and Cm 1771 (1991).

487 See generally *OSCE Handbook*, Vienna, 2007.

488 There are currently fifty-seven participating states. Note also the report entitled ‘Common Purposes: Towards a More Effective OSCE’ produced by a Panel of Eminent Persons in 2005 and the new OSCE Rules of Procedure adopted in 2006: see *OSCE Handbook*.

489 See further below, p. 892.

490 See Section II of the Helsinki Decisions. Note that the High Commissioner deals with situations and not with individual complaints. See also *Quiet Diplomacy in Action: The OSCE High Commissioner on National Minorities* (ed. W. A. Kemp), The Hague, 2001; K. Drzewicki, ‘The OSCE High Commissioner on National Minorities – Confronting Traditional and Emerging Challenges’, in *OSCE and Minorities: Assessment and Priorities* (ed. S. Parzymies), Warsaw, 2007; and J. Packer, ‘The OSCE High Commissioner on National Minorities: Pyrometer, Prophylactic, Pyrovestis’, in *Minorities, Peoples and Self-Determination* (ed. N. Ghanea and A. Xanthaki), Leiden, 2005, p. 249.

491 See e.g. the Hague Recommendation on Education Rights of National Minorities 1996; the Oslo Recommendations on Linguistic Rights of National Minorities 1998; the Lund Recommendations on Effective Participation of National Minorities in Public Life 1999; the Guidelines on the Use of Minority Languages in the Broadcast Media 2003; and the Recommendations on Policing in Multi-Ethnic Societies 2006: see www.osce.org/hcnm.

⁴⁹² See 5 *HRLJ*, 1994, p. 449.

⁴⁹³ Section VIII of the Budapest Decisions.

⁴⁹⁴ This group is responsible for the day-to-day operations of the OSCE and its members are the permanent representatives of the member states meeting weekly. It is based in Vienna.

⁴⁹⁵ Note also that the Monitoring Section within the ODIHR analyses human rights developments and compliance with Human Dimension commitments by participating states and alerts the Chairman-in-Office to serious deteriorations in respect for human rights.

⁴⁹⁶ See *OSCE Handbook*, p. 34; and the Sofia Decision 12, para. 16, 2004.

⁴⁹⁷ An OSCE Advisory Panel for the Prevention of Torture was established in 1998: see e.g. the Final Report of the Supplementary Human Dimension Meeting on Human Rights and Inhuman Treatment and Punishment 2000; and a restructured Advisory Panel of Experts on Freedom of Religion or Belief was established in 2000. Note that as a consequence of the Dayton Peace Agreement on Bosnia 1995, it was agreed that the OSCE would supervise elections in that country, closely monitor human rights throughout Bosnia and appoint an international human rights Ombudsman: see MC (5) Dec/1, 1995. The OSCE also has a role in Kosovo: see *OSCE Handbook*, p. 46.

⁴⁹⁸ See *OSCE Handbook*, pp. 39 ff. Of particular importance, perhaps, is the Minsk Process, dealing with the Nagorno-Karabakh conflict, *ibid.*, p. 76.

⁴⁹⁹ This established a Court: see generally www.osce.org/cca.

⁵⁰⁰ See H/INF (95) 3, pp. 195 ff. See also the essays contained in 17 *HRLJ*, 1996 concerning the CIS and human rights.

⁵⁰¹ Resolution 1249 (2001). See also recommendation 1519 (2001) stating that recourse to the CIS Commission should not be regarded as another procedure of international settlement within the meaning of article 35(2)(b) of the European Convention. Note that the Parliamentary Assembly of the Council of Europe adopted a resolution in 2001 calling

upon member or applicant states which are also members of the CIS not to sign or ratify the CIS Convention due to concerns over the level of protection afforded.

⁵⁰² See generally C. Medina, *The Inter-American Convention on Human Rights*, Intersentia, 2014; T. M. Antkowiak and A. Gonza, *The American Convention on Human Rights*, Oxford, 2017; J. M. Pasqualucci, *The Practice and Procedure of the Inter-American Court of Human Rights*, 2nd ed., Cambridge, 2013; L. Burgorgue-Larsen and A. U. de Torres, *The Inter-American Court of Human Rights*, Oxford, 2011; Rehman, *International Human Rights Law*, chapter 9; H. J. Steiner, P. Alston and R. Goodman, *International Human Rights in Context*, 3rd ed., Oxford, 2008, pp. 1020 ff.; *The Inter-American System of Human Rights* (ed. D. J. Harris and S. Livingstone), Oxford, 1998; *The Inter-American Human Rights System* (ed. P. Engstrom and C. Hillebrecht), London, 2019; L. Cavallero, C. Vargas, C. Sandoval and B. Duhaime, *Doctrine, Practice and Advocacy in the Inter-American Human Rights System*, Oxford, 2019; D. Shelton, 'The Inter-American Human Rights System', in Hannum, *Guide to International Human Rights Practice*, p. 127; T. Buergenthal and R. Norris, *The Inter-American System*, Dobbs Ferry, 5 vols., 1983–84; S. Davidson, 'Remedies for Violations of the American Convention on Human Rights', 44 *ICLQ*, 1995, p. 405; and C. Grossman, 'Proposals to Strengthen the Inter-American System of Protection of Human Rights', 32 *German YIL*, 1990, p. 264.

⁵⁰³ The Convention currently has twenty-five parties: see www.oas.org/dil/treaties_B-32_American_Convention_on_Human_Rights_sign.htm.

⁵⁰⁴ See e.g. J. Frowein, 'The European and the American Conventions on Human Rights – a Comparison', 1 *HRLJ*, 1980, p. 44. See also the American Declaration of the Rights and Duties of Man 1948.

⁵⁰⁵ See e.g. 10 DR, 1977, p. 100.

⁵⁰⁶ The Charter of the OAS has also been amended by the Protocols of Cartagena de Indias 1985; Washington, DC 1992; and Managua 1993. But note Venezuela's denunciation of the Inter-American Convention in September 2012, effective a year later; see Kunz, 'Judging International Judgments Anew', p. 1130.

⁵⁰⁷ See e.g. C. Medina, 'The Inter-American Commission on Human Rights and the Inter-American Court of Human Rights: Reflections on a Joint Venture', 12 *HRQ*, 1990, p. 439.

508 See generally the *Basic Documents Pertaining to Human Rights in the Inter-American System*, Washington, DC, 1992. The competence of the Commission to hear petitions relates to the rights in the Convention for states parties and to rights in the American Declaration for states not parties to the Convention. See also www.oas.org/en/iachr/.

509 Note that this is far broader than the equivalent article 34 of the European Convention, which requires that the applicant be a victim.

510 Articles 49–51. The Secretary-General of the OAS has played the role assigned in the European Convention to the Committee of Ministers.

511 See www.oas.org/en/iachr/multimedia/statistics/statistics.html.

512 In 1994 e.g. with regard to Guatemala, Haiti, the Bahamas, Ecuador and Jamaica, see *Annual Report 1994*, pp. 21 ff., while in 2006 on-site visits were made to Haiti, Colombia, Bolivia, Dominican Republic, Brazil, Argentina and Peru, *Annual Report 2006*, chapter II C, paras. 34 ff. In 2015, an on-site visit was made to Mexico and by October 2015, a total of ninety-five such visits had been made, www.oas.org/en/iachr/activities/countries_all.asp. See also the Rules of Procedure 2009, 49 ILM, 2010, p. 597.

513 See *Annual Report 1994*, chapter IV, with regard to Colombia, Cuba, El Salvador and Guatemala, and *Annual Report 2006*, chapter IV, with regard to Colombia, Cuba, Haiti and Venezuela. See also www.oas.org/en/iachr/reports/country.asp.

514 See e.g. *Annual Report 1992–3*, pp. 539 ff.; and *Annual Report 2015*, chapter III. See also e.g. AG/Res.443, 1979; AG/Res.666, 1983; AG/Res.547, 1981; AG/Res.624, 1982; and AG/Res.644, 1983 (torture).

515 *Annual Report 2006*, chapter II D, paras. 49 ff. See as to the Special Rapporteur for Freedom of Expression, *Annual Report 2006*, vol. II. See also *Annual Report 2015*, chapter III.

516 *Some Powers of the Inter-American Commission on Human Rights*, Advisory Opinion OC-13/93 of 16 July 1993, Series A, No. 13, para. 26.

517 *International Responsibility for Issuing and Applying Laws in Violation of the Convention*, IACHR, Advisory Opinion OC-14/94 of 9 December 1994, Series A, No. 14, para. 39. In the light of this, the Commission in 1994, for example, made a thorough study of the contempt laws (*leyes de desacato*), and concluded that many of these do not meet international human rights standards. The Commission recommended that all member states of the OAS that have such laws should repeal or amend them to bring them into line with international instruments, and with the obligations acquired under those instruments, so as to harmonise their laws with human rights treaties: *Annual Report 1994*, pp. 199 ff.

518 This entered into force in February 1987. Under the Convention, states parties agree to inform the Inter-American Commission of measures taken in application of the Convention, and the Commission ‘will endeavour in its annual report to analyse the existing situation in the member states of the Organization of American States in regard to the prevention and elimination of torture’: article 17.

519 This came into force in November 1999. Eleven states parties were required for the Additional Protocol to come into force. See also L. Le Blanc, ‘The Economic, Social and Cultural Rights Protocol to the American Convention and its Background’, *10 NQHR*, 1992, 130. Under article 19 of this instrument, states parties agreed to provide periodic reports on the progressive measures undertaken to ensure respect for the rights set forth therein. Such reports go to the Secretary-General of the OAS, who sends them to the Inter-American Economic and Social Council and the Inter-American Council for Education, Science and Culture, with a copy to both the Inter-American Commission on Human Rights and the specialised agencies of the inter-American system. Violations by a state party of the rights to organise and join trades unions (article 8(a)) and to education (article 13) ‘may give rise’ to application of the system of individual or inter-state petition under the Inter-American Convention on Human Rights.

520 This entered into force the following year. It currently has thirteen parties. See e.g. C. Cerna, ‘US Death Penalty Tested Before the Inter-American Commission on Human Rights’, *10 NQHR*, 1992, p. 155.

521 This entered into force in March 1996.

522 Article 63(2) of the Convention states that in cases of extreme gravity and urgency, and when necessary to avoid irreparable damage to persons, the Court shall adopt such

provisional measures as it deems pertinent in matters it has under consideration. With regard to a case not yet submitted to the Court, it may act at the request of the Commission. Article 19(c) of the Statute of the Commission provides that the Commission has the power to request the Court to take such provisional measures as it considers appropriate in serious and urgent cases which have not yet been submitted to it for consideration, whenever this becomes necessary to prevent irreparable injury to persons. Under article 29 of the Regulations of the Commission, the Commission may on its own initiative or at the request of a party take any action it considers necessary for the discharge of its functions. In particular, in urgent cases, when it becomes necessary to avoid irreparable damage to persons, the Commission may request that provisional measures be taken to avoid irreparable damage in cases where the denounced facts are true. Article 24 of the Rules of Procedure of the Inter-American Court provides that at any stage of the proceeding involving cases of extreme gravity and urgency and when necessary to avoid irreparable damage to persons, the Court may, at the request of a party or on its own motion, order whatever provisional measures it deems appropriate, pursuant to article 63(2) of the Convention.

523 Note also the Inter-American Convention on the Elimination of All Forms of Discrimination against Persons with Disabilities 1999. This came into force in September 2001. The Inter-American Convention against Racism, Racial Discrimination and Related Forms of Intolerance was signed in June 2013.

524 See above, p. 266.

525 See articles 34–38 of the Inter-American Convention on Human Rights.

526 See e.g. *Annual Report 2019*, chapter II.

527 See *Annual Report 2006*, chapter III E and see also 45 ILM, 2006, pp. 669 ff. Such measures were first granted on 12 March 2002 and requested that the US take the ‘urgent measures necessary to have the legal status of the detainees at Guantanamo determined by a competent tribunal’. Such measures were repeated on a number of separate occasions. As these measures were not complied with – the US arguing that the Commission lacked jurisdiction – the Commission adopted resolution no. 2/06 on 28 July 2006, noting that the failure of the US to give effect to the Commission’s precautionary measures had resulted in irreparable prejudice to the fundamental rights of the detainees at Guantanamo Bay, including their rights to liberty and to humane treatment, and urging the US to close the

Guantanamo Bay facility without delay; see also www.oas.org/en/iachr/pdl/decisions/Guantanamo.asp.

528 See, for examples of friendly settlement procedures, *Annual Report 2001*, chapter III C.4.

529 See e.g. *Annual Report 2006*, chapter III D; and *Annual Report 2015*, chapter II.

530 Article 51 of the Inter-American Convention on Human Rights. If this does not happen and the matter is not settled with the state concerned, the Commission by a majority vote may set forth its own opinion and conclusions on the matter, which may be published. See e.g. *Annual Report 1983–4*, pp. 23–75. See also www.corteidh.or.cr/.

531 Articles 52–54. See also L. L. Burgogue-Larsen, A. A. Ubeda de Torres and R. R. Greenstein, *The Inter-American Court of Human Rights: Case-Law and Commentary*, Oxford, 2011; J. S. Davidson, *The Inter-American Court of Human Rights*, Aldershot, 1992; C. Cerna, ‘The Structure and Functioning of the Inter-American Court of Human Rights (1979–1992)’, **63 BYIL**, 1992, p. 135; and L. E. Frost, ‘The Evolution of the Inter-American Court of Human Rights’, **14 HRQ**, 1992, p. 171.

532 The first time was in January 1988, against Honduras, following the killing of a person due to testify before it and concerns expressed about the safety of other witnesses, H/Inf. (88) 1, p. 64. See also the provisional measures adopted by the Court against Peru, in similar circumstances, in August 1990, 11 *HRLJ*, 1990, p. 257; and *Alemán Lacayo v. Nicaragua*, Series E, Order of 2 February 1996; *Álvarez and Others v. Colombia*, Series E, Order of 22 July 1997; and *Constitutional Court*, Series E, Order of 14 August 2000. See also *Hilaire and Others v. Trinidad and Tobago*, IACHR, Judgment of 21 June 2002. The Court also granted provisional measures e.g. to protect the lives and personal integrity of witnesses in the *Mapiripán Massacre* case against Colombia, see *Annual Report of the Inter-American Court of Human Rights 2005*, p. 39, and in the case of the *Children and Adolescents Deprived of Liberty in the ‘Complexo do Tatuapé’ of FEBEM v. Brazil*, *ibid.*, p. 41.

533 Of the twenty-five Advisory Opinions issued between 1959 and 2019, seventeen concerned the interpretation of the Convention, five concerned the interpretation of other treaties and three concerned the compatibility between domestic laws and international

instruments: see

www.corteidh.or.cr/cf/Jurisprudencia2/busqueda_opiniones_consultivas.cfm?lang=en.

534 22 ILM, 1983, p. 51; 67 ILR, p. 594.

535 22 ILM, 1983, p.33; 67 ILR, p. 559.

536 Paragraph 37. See article 74 of the Convention.

537 *Ibid.*, para. 29. In the *Licensing of Journalists* case, the Court advised that the compulsory licensing of journalists was incompatible with article 13, the freedom of expression provision in the Convention, if it denied any person access to the full use of the media as a means of expressing opinions. The Court emphasised that freedom of expression could only be restricted on the basis of ‘compelling governmental interest’ and that the restriction must be ‘closely tailored to the accomplishment of the legitimate governmental objective necessitating it’, 7 *HRLJ*, 1986, p. 74; 75 ILR, p. 31. See also *Sunday Times*, ECtHR, Series A, No. 30, 1979. In the *Habeas Corpus* case, the Court declared that the writ of habeas corpus was a non-suspendable ‘judicial guarantee’ for the protection of rights from which no derogation was permitted under the Convention under article 27. Reference was made to the ‘inseparable bond between the principle of legality, democratic institutions and the rule of law’. The Court also emphasised that only democratic governments could avail themselves of the right to declare a state of emergency and then only under closely circumscribed conditions, 9 *HRLJ*, 1988, p. 94; 96 ILR, p. 392.

538 28 ILM, 1989, p. 378; 96 ILR, p. 416.

539 *Ibid.*, pp. 388–9. See also T. Buergenthal, ‘The Revised OAS Charter and the Protection of Human Rights’, 69 *AJIL*, 1975, p. 828.

540 The problem was that the Declaration clearly was not a treaty and article 64 provides for advisory opinions regarding the Convention itself and ‘other treaties’. Note, in addition, that in the *Right to Information on Consular Assistance* opinion requested by Mexico the Court declared that article 36 of the Vienna Convention on Consular Relations 1963, providing for the right to consular assistance of detained foreign nationals was part of international human rights law and that the state must comply with its duty to inform the detainee of the rights that the article confers upon him at the time of his arrest or at least before he makes his first statement before the authorities: IACHR, Series A, No. 16, OC-

16/99, 1999; and see [Chapter 12](#), p. 672. Note also the Advisory Opinions on the rights and guarantees of children in the context of migration and/or in need of international protection, Series A, No. 21, 2014, and on the entitlement of legal entities to held rights under the Inter-American Convention, Series A, No. 22, 2016.

⁵⁴¹ IACHR, OC-23/17, 15 November 2017; 112 *AJIL*, 2018, p. 460. In *Gender Identity and Non-Discrimination of Same Sex Couples*, 112 *AJIL*, 2018, p. 480, the Court, based on the principles of dignity and autonomy, inferred the rights of ‘individual self-determination’, which included *inter alia* the right to identity incorporating the equal protection of same-sex couples. See by way of contrast the ECtHR judgment in *Schalk and Kopf v. Austria*, Judgment of 24 June 2010, which held that the question of same-sex marriage fell within the margin of appreciation and was thus a matter within the jurisdiction of states parties.

⁵⁴² 20 ILM, 1981, p. 1424; 67 ILR, p. 578.

Vans, T. Ige and R. Murray, 'The Reporting Mechanism of the African Charter on Human and Peoples' Rights', in *The African Charter on Human and Peoples' Rights* (ed. M. Evans and R. Murray), Cambridge, 2002, p. 36. Thirty-one states have not submitted any reports, while twelve are late by three or more reports: see www.achpr.org/states/.

⁵⁷¹ This came into force on 25 January 2004. Judges were first elected in 2006. See e.g. D. Padilla, ‘An African Human Rights Court: Reflections from the Perspective of the Inter-American System’, *2 African Human Rights Law Journal*, 2002, p. 185; R. W. Eno, ‘The Jurisdiction of the African Court on Human and Peoples’ Rights’, *2 African Human Rights Law Journal*, 2002, p. 223; and R. Murray, ‘A Comparison Between the African and European Courts of Human Rights’, *2 African Human Rights Law Journal*, 2002, p. 195. To date, thirty states are parties to the Protocol, [https://en.african-court.org/images/Basic%20Documents/Ratification and Deposit of the Declaration final-May-2020.pdf](https://en.african-court.org/images/Basic%20Documents/Ratification%20and%20Deposit%20of%20the%20Declaration%20final-May-2020.pdf). See generally www.african-court.org/en/.

⁵⁷² See e.g. *Anudo v. Tanzania* 58 ILM, 2018, p. 603, in which the Court held that there had been a violation of the right not to be arbitrarily deprived of nationality; *APDF v. Mali*, Judgment of 11 May 2018, in which the Court noted that human rights obligations applied regardless of religious concerns; and *Ingabire Victoire Umuhoza v. Rwanda*, ACHPR, Judgment of 24 November 2017, in which the Court discussed the rights of freedom of expression and fair trial in the context of Rwanda’s law prohibiting the minimising of genocide and noted that it could only order release as a remedy in exceptional and compelling circumstances.

⁵⁷³ Article 5. See also Rule 33 of the Rules of Procedure 2010.

⁵⁷⁴ Articles 5(3) and 34(6). Ten states made the necessary declaration. However, by April 2020, three of these states (Tanzania, Benin and Côte d’Ivoire) had withdrawn their declarations, see www.ejiltalk.org/another-one-bites-the-dust-cote-divoire-to-end-individual-and-ngo-access-to-the-african-court/. By April 2020, 272 applications had been made to the Court, and eighty cases decided. The Court delivered its first judgment in 2009 following an application dated 11 August 2008 by Michelot Yogogombaye against the Republic of Senegal; see 49 ILM, 2010, p. 850.

⁵⁷⁵ See 48 ILM, 2009, p. 334. Fifteen ratifications are required for the Protocol to come into force. As of April 2020, there were only seven ratifications; see <https://au.int/en/treaties/protocol-statute-african-court-justice-and-human-rights>.

⁵⁷⁶ See e.g. the ECOWAS (Economic Community of West African States) Community Court of Justice, following the ECOWAS Treaty of 1975 and the Protocol establishing the Court in 1991. Since the Supplemental Protocol of 2005, the Court has been able to hear

communications alleging breaches of human rights: see www.courtecowas.org/site2012/index.php?lang=en. See also 'Court for West Africa: The ECOWAS Community Court of Justice', **107 AJIL**, 2013, p. 737. Note also the SADC (Southern African Development Community) Tribunal established by a Protocol adopted in 2000 and operative since 2005. After several judgments holding Zimbabwe in breach of human rights (see e.g. *Campbell v. Zimbabwe* 48 ILM, 2009, p. 530), the Tribunal was *de facto* suspended at the 2010 SADC Summit. On 17 August 2012, in Maputo, Mozambique, the SADC Summit decided that a new tribunal should be negotiated and that its mandate should be confined to interpretation of the SADC Treaty and Protocols relating to disputes between Member States: see www.sadc.int/about-sadc/sadc-institutions/tribun/. Note also the existence of the East African Court of Justice, created by the Treaty for the Establishment of the East African Community in 1999 and as amended in 2006 and 2007. This has under article 27(2) 'such other original, appellate, human rights and other jurisdiction as will be determined by the Council [of Ministers of the Community]'. This apparently has yet to be determined: see generally <http://eacj.org/?page>. See also K. J. Alter, J. T. Gathii and L. R. Helfer, 'Backlash against International Courts in West, East and Southern Africa: Causes and Consequences', **27 EJIL**, 2016, p. 293.

⁵⁷⁷ An Arab Charter on Human Rights was adopted by the Council of the League of Arab States on 15 September 1994 and a revised version was adopted by the League of Arab States in May 2004. It affirms the principles contained in the UN Charter, the Universal Declaration of Human Rights, the International Covenants on Human Rights and the Cairo Declaration on Human Rights in Islam. A number of traditional human rights are also provided for, including the right to liberty and security of persons, equality of persons before the law, fair trial, protection of persons from torture, the right to own private property, freedom to practise religious observance and freedom of peaceful assembly and association. The right to self-determination is also noted. See e.g. M. Rishmawi, 'The Revised Arab Charter on Human Rights: A Step Forward?', **5 Human Rights Law Review**, 2005, p. 361; M. Rishmawi, 'The Arab Charter on Human Rights and the League of Arab States: An Update', **10 Human Rights Law Review**, 2010, p. 169; Rehman, *International Human Rights Law*, pp. 377 ff.; R. K. M. Smith, *Textbook on International Human Rights*, Oxford, 2002, p. 87; and A. A. A. Naim, 'Human Rights in the Arab World: A Legal Perspective', **23 HRQ**, 2001, p. 70. The Charter also provides for the election of a seven-person Arab Human Rights Committee to consider states' reports and came into force on 24 January 2008. Note, however, the statement by the UN High Commissioner for Human Rights expressing concern with regard to the incompatibility of some of the provisions of the Arab Charter with international norms and standards. These concerns included the

approach to the death penalty for children and the rights of women and non-citizens. The High Commissioner also noted that, in equating Zionism with racism, the Arab Charter was ‘not in conformity with General Assembly resolution 46/86, which rejects that Zionism is a form of racism and racial discrimination’: see statement of 30 January 2008, www.un.org/apps/news/story.asp?NewsID=25447#.V6tgE5MrJjR.

⁵⁷⁸ Note also the ASEAN (Association of South-East Asian Nations) Intergovernmental Commission on Human Rights established in 2009, which has various functions, including research and promotional activity, and which drafted the ASEAN Human Rights Declaration 2012. It is stated to be a consultative body and there is no competence to hear communications, see <http://aichr.org/>. See also Tae-Ung Baik, *Emerging Regional Human Rights Systems in Asia*, Cambridge, 2012. See also N. Doyle, ‘The ASEAN Human Rights Declaration’, 63 *ICLQ*, 2014, p. 67.

Individual Criminal Responsibility in International Law¹

The rise of individual criminal responsibility directly under international law marks the coming together of elements of traditional international law with more modern approaches to human rights law and humanitarian law, and involves consideration of domestic as well as international enforcement mechanisms. Although the rights of individuals in international law have evolved significantly in the post-1945 era, the placing of obligations directly upon persons as opposed to states has a distinct, if narrow, pedigree.² Those committing piracy or slave trading³ have long been regarded as guilty of crimes against international society bearing direct responsibility, for which they may be punished by international tribunals or by any state at all.

Jurisdiction to hear the offence is not confined to, for example, the state on whose territory the act took place, or the national state of the offender or the victim. This universal jurisdiction over piracy constitutes a long-established principle of the world community.⁴ All states may both arrest and punish pirates, provided of course that they have been apprehended on the high seas⁵ or within the territory of the state concerned. The punishment of the offenders takes place whatever their nationality and wherever they happened to carry out their criminal activities.

Piracy under international law (or piracy *jure gentium*) must be distinguished from piracy under municipal law. Offences that may be characterised as piratical under municipal laws do not necessarily fall within the definition of piracy in international law, and thus are not susceptible to universal jurisdiction (depending of course upon the content and form of international conventions). Piracy *jure gentium* was defined in article 15 of the High Seas Convention 1958 (and reaffirmed in article 101 of the 1982 Convention on the Law of the Sea) as illegal acts of violence, detention or depredation committed for private ends by the crew or passengers of a private ship or private aircraft and directed against another ship or aircraft (or persons or property therein) on the high seas or *terra nullius*.⁶ Attempts to commit such acts are sufficient to constitute piracy and it is not essential for the attempt to have been successful.⁷

However, the range of offences under international law for which individuals bore international responsibility was narrow indeed.⁸ It is doubtful whether it had extended beyond piracy and slave trading by the turn of the twentieth century. Even then, jurisdiction was exercisable in practice only by domestic courts. It is a modern phenomenon to establish international courts or tribunals to exercise jurisdiction directly over individuals with regard to specified crimes. As will be seen in Chapter 11, domestic courts are indeed exercising a greater jurisdiction with regard to offences with international elements, for example, with regard to torture or war crimes committed outside the territory of the state concerned provided that the alleged offender is within the territory of the state, but this is only where an international treaty authorises states to exercise such jurisdiction and this has been brought into effect internally.⁹ However, the focus of this chapter is upon courts

established internationally or with an international element in order to prosecute individuals directly accused of international offences.

International Criminal Courts and Tribunals¹⁰

After the conclusion of the First World War, a commission set up by the Allied Powers recommended that as the defeated powers had violated the laws of war, high officials, including the Kaiser, be prosecuted for ordering such crimes and on the basis of command responsibility. It was also suggested that an Allied High Tribunal be established to try violations of the laws and customs of war and the laws of humanity.¹¹ Accordingly, the Treaty of Versailles 1919 noted that the German government recognised the right of the Allied and Associated Powers to bring individuals accused of crimes against the laws and customs of war before military tribunals (article 228) and established the individual responsibility of the Kaiser (article 227). In the event, the Netherlands refused to hand over the Kaiser and only a few trials were held before German courts in Leipzig with, at best, mixed results.¹²

The Charter annexed to the Agreement for the Prosecution and Punishment of the Major War Criminals 1945 provided specifically for individual responsibility for crimes against peace, war crimes and crimes against humanity. There was also a conspiracy charge.¹³ The Nuremberg Tribunal, composed of four principal judges (from the United States, the United Kingdom, the Soviet Union and France) and four alternates, was the first international criminal tribunal and marks the true starting-point for international criminal law. It affirmed in ringing and lasting terms that ‘international law imposes duties and liabilities upon individuals as well as

upon states' as 'crimes against international law are committed by men, not by abstract entities, and only by punishing individuals who commit such crimes can the provisions of international law be enforced'. Included in the relevant category for which individual responsibility was posited were crimes against peace, war crimes and crimes against humanity.¹⁴ In addition, a number of war crimes trials were instituted within Allied-occupied Germany under the authority of Control Council Law No. 10.¹⁵ The International Military Tribunal for the Far East was established in January 1946 to deal with Japanese war crimes.¹⁶ This Tribunal was composed of judges from eleven states¹⁷ and it essentially reaffirmed the Nuremberg Tribunal's legal findings as to, for example, the criminality of aggressive war and the rejection of the absolute defence of superior orders.¹⁸ The Charter of the International Military Tribunal for the Far East (or Tokyo Charter) also provided for individual responsibility with regard to certain crimes.¹⁹

The provisions of the Nuremberg Charter can now be regarded as part of international law, particularly since the General Assembly in 1946 affirmed the principles of this Charter and the decision of the Tribunal.²⁰ The Assembly also stated that genocide was a crime under international law bearing individual responsibility.²¹ This was reaffirmed in the Genocide Convention of 1948, which also called for prosecutions by either domestic courts or 'an international penal tribunal'.²² The International Law Commission produced a Draft Code of Offences against the Peace and Security of Mankind in 1954, article 1 of which provided that 'offences against the peace and security of mankind, as defined in this Code, are crimes under international law, for which the responsible individuals shall be punishable'.²³

Individual responsibility has also been confirmed with regard to grave breaches of the four 1949 Geneva Red Cross Conventions and 1977 Additional Protocols I and II dealing with armed conflicts. It is provided specifically that the High Contracting Parties undertake to enact any legislation necessary to provide effective penal sanctions for persons committing or ordering to be committed any of a series of grave breaches.²⁴ Such grave breaches include wilful killing, torture or inhuman treatment, extensive destruction and appropriation of property not justified by military necessity and carried out unlawfully and wantonly, unlawful deportation or transfer of protected persons and the taking of hostages.²⁵ Additional Protocol I of 1977 extends the list to include, for example, making the civilian population the object of attack and launching an attack against works or installations containing dangerous forces in the knowledge that such attack will cause excessive loss of life or damage to civilians or their property when committed wilfully and causing death or serious injury; other activities such as transferring civilian population from the territory of an occupying power to that of an occupied area or deporting from an occupied area, apartheid and racial discrimination, and attacking clearly recognised historic monuments, works of art or places of worship, may also constitute grave breaches when committed wilfully.²⁶

Any individual, regardless of rank or governmental status, would be personally liable for any war crimes or grave breaches committed, while the principle of command (or superior) responsibility means that any person in a position of authority ordering the commission of a war crime or grave breach would be as accountable as the subordinate committing it.²⁷ The International Law Commission in 1991 provisionally adopted a Draft Code of Crimes

Against the Peace and Security of Mankind,²⁸ which was revised in 1996.²⁹ The 1996 Draft Code provides for individual criminal responsibility³⁰ with regard to aggression,³¹ genocide,³² a crime against humanity,³³ a crime against UN and associated personnel,³⁴ and war crimes.³⁵ The fact that an individual may be responsible for the crimes in question is deemed not to affect the issue of state responsibility.³⁶ The Security Council in two resolutions on the Somali situation in the early 1990s unanimously condemned breaches of humanitarian law and stated that the authors of such breaches or those who had ordered their commission would be held ‘individually responsible’ for them,³⁷ while Security Council resolution 674 (1990) concerning Iraq’s occupation of Kuwait, reaffirming Iraq’s liability under the Fourth Geneva Convention 1949 dealing with civilian populations of occupied areas, noted that such responsibility for grave breaches extended to ‘individuals who commit or order the commission of grave breaches’.³⁸

The International Criminal Tribunal for the Former Yugoslavia (ICTY)³⁹

It was, however, the events in the former Yugoslavia that impelled a renewal of interest in the establishment of an international criminal court, which had long been under consideration, but in a desultory fashion.⁴⁰ The Yugoslav experience, and the Rwanda massacres of 1994, led to the establishment of two specific war crimes tribunals by the use of the authority of the UN Security Council to adopt decisions binding upon all member states of the organisation under Chapter VII of the Charter, rather than by an international conference as was to be the case with the International Criminal Court. This method was used in order both to enable the tribunal in question to come into operation as quickly as possible and to ensure that the parties most closely associated with the subject-matter of the war crimes alleged should be bound in a manner not dependent upon their consent (as would be necessary in the case of a court established by international agreement). The establishment of the Tribunal was preceded by a series of steps. In Security Council resolutions 764 (1992), 771 (1992) and 820 (1993), grave concern was expressed with regard to breaches of international humanitarian law and the responsibilities of the parties were reaffirmed. In particular, individual responsibility for the commission of grave breaches of the 1949 Conventions was emphasised. Under resolution 780 (1992), the Security Council established an impartial Commission of Experts to examine and analyse information concerning evidence of grave breaches of the Geneva Conventions and other violations of international humanitarian law committed in the territory of the former Yugoslavia.⁴¹

The Security Council then adopted resolution 808 (1993) calling for the establishment of an international tribunal to prosecute ‘persons responsible for serious violations of international humanitarian law committed in the territory of the former Yugoslavia since 1991’. The UN Secretary-General produced a report incorporating a draft statute and commentary,⁴² which was adopted by the Security Council in resolution 827 (1993) acting under Chapter VII of the UN Charter.⁴³

The Tribunal had the power to prosecute persons responsible for serious violations of international humanitarian law committed in the territory of the former Yugoslavia since 1991 (articles 1 and 8 of the Statute) and the absence of a closing date meant that the later conflict in Kosovo could be the subject of prosecutions.⁴⁴ The Tribunal, which operated from 1993 to the end of 2017, consisted of three main organs: the Registry, the office of the Prosecutor and the Chambers.⁴⁵ The Registry was the administrative body,⁴⁶ while the Office of the Prosecutor is responsible for investigations, issuing of indictments and bringing matters to trial. There were three Trial Chambers, each consisting of a presiding judge and two other judges, and an Appeals Chamber, consisting of seven members but sitting in a panel of five, headed by a President. Of the seven, five came from the ICTY and two from the International Criminal Tribunal for Rwanda.⁴⁷ The Chambers had a maximum of sixteen permanent judges and a maximum of twelve *ad litem* judges drawn from a pool of twenty-seven such judges elected by the General Assembly for four-year renewable terms.⁴⁸

Articles 2 to 5 of the Statute lay down the crimes with regard to which the Tribunal could exercise jurisdiction. These were: grave breaches of the

Geneva Conventions of 1949, violation of the laws or customs of war, genocide and crimes against humanity.⁴⁹

Article 7 established that persons who ‘planned, instigated, ordered, committed or otherwise aided and abetted in the planning, preparation or execution’ of crimes listed in articles 2 to 5 shall be individually responsible for the crime. This article also provided that the official position of any accused person was not to relieve a person of criminal responsibility nor mitigate punishment, while the fact that a subordinate committed the crime was not to relieve a superior of responsibility if the latter knew or had reason to know that the subordinate was about to or had committed the crime and the superior failed to take the necessary and reasonable measures to prevent the acts or to punish the perpetrators thereof. The fact that an accused person acted pursuant to an order of a government or of a superior was not to relieve him or her of criminal responsibility, although this could constitute a mitigating factor if the Tribunal determined that justice so requires. The Appeals Chamber of the Tribunal in the *Tadić* case confirmed that customary international law had imposed criminal responsibility for serious violations of humanitarian law governing internal as well as international armed conflicts.⁵⁰

The Tribunal and national courts had concurrent jurisdiction with regard to the prosecution of relevant accused persons, but the Tribunal had primacy over national courts, so that the former was able to request the latter to defer to its competence.⁵¹ States were obliged to cooperate with the International Tribunal in the investigation and prosecution of persons accused of committing serious violations of international humanitarian law and had to

comply without undue delay with any request for assistance or an order issued by a Trial Chamber, including the identification and location of persons; the taking of testimony and the production of evidence; the arrest or detention of persons; and the surrender or the transfer of the accused to the International Tribunal.⁵² No person could be tried by a national court for acts constituting serious violations of international humanitarian law under the Statute, for which he or she had already been tried by the International Tribunal, but the Tribunal was able to try a person for relevant acts after trial by a national court where the act for which he or she was tried was characterised as an ordinary crime; or where the national court proceedings were not impartial or independent, were designed to shield the accused from international criminal responsibility, or the case was not diligently prosecuted.⁵³

Investigations into alleged offences under the Statute were initiated by the Prosecutor either *ex officio* or on the basis of information obtained from any source, particularly from governments, UN organs, and intergovernmental and non-governmental organisations. Information received was assessed by the Prosecutor, who then decided whether there was a sufficient basis to proceed. The Prosecutor could question suspects, victims and witnesses, collect evidence and conduct on-site investigations. Where it was determined that a *prima facie* case existed, the Prosecutor was to prepare an indictment containing a concise statement of the facts and the crime or crimes with which the accused was charged, and this indictment was then transmitted to a judge of the Trial Chamber for review. If satisfied that a *prima facie* case had been established by the Prosecutor, the judge would confirm the indictment. If not so satisfied, the indictment was to be dismissed. Upon confirmation of

an indictment, the judge could, at the request of the Prosecutor, issue such orders and warrants for the arrest, detention, surrender or transfer of persons, and any other orders as may be required for the conduct of the trial. It was then for the Trial Chambers to ensure that the trial was fair and expeditious and that proceedings were conducted in accordance with the rules of procedure and evidence, with full respect for the rights of the accused and due regard for the protection of victims and witnesses.⁵⁴ Judgment was then be reached by the Trial Chamber concerned and punishment, limited to imprisonment, imposed upon conviction.⁵⁵ Appeal was to the Appeals Chamber on the grounds either of an error of law invalidating the decision or of an error of fact occasioning a miscarriage of justice. The Appeals Chamber could affirm, reverse or revise the decisions taken by the Trial Chambers.⁵⁶

The Tribunal dealt with a number of significant issues.⁵⁷ In an early case, the Appeal Chamber held that it had the power to review the question of the legality of the establishment of the Tribunal and noted that the Security Council had adopted a decision under Chapter VII of the UN Charter binding on all member states to create the Tribunal in the framework of the restoration of international peace and security.⁵⁸

By the end of 2017, the Tribunal had issued 161 indictments, with regard to which ninety individuals had been sentenced, nineteen acquitted, thirty-seven indictments withdrawn (including where the accused had died) and thirteen persons transferred to national jurisdictions. Two individuals were sent for retrial before the Mechanism for International Criminal Tribunals.⁵⁹ The UN Security Council had confirmed a completion strategy, under which the Tribunal concentrated on the prosecution and trial of the most senior leaders

while referring other cases involving intermediate and lower-rank accused to national courts.⁶⁰ Cases began to be transferred to the national courts of successor states to the former Yugoslavia, particularly Bosnia and Croatia, in 2005.⁶¹ The Tribunal ceased operation on 31 December 2017.⁶²

The International Criminal Tribunal for Rwanda (ICTR)⁶³

Following events in Rwanda during 1994 and the mass slaughter that took place, the Security Council decided in resolution 955 (1994) to establish an International Criminal Tribunal for Rwanda, with the power to prosecute persons responsible for serious violations of international humanitarian law. The Statute of this Tribunal was annexed to the body of the Security Council resolution and bears many similarities to the Statute of the Yugoslav Tribunal.

The Rwanda Tribunal consisted of three Trial Chambers, an Office of the Prosecutor and a Registry with the same functions as those of the Yugoslav Tribunal.⁶⁴ The Chambers were composed of sixteen permanent independent judges, no two of whom could be nationals of the same state, and a maximum at any one time of nine *ad litem* independent judges. The ICTR and the ICTY shared a joint Appeals Chamber, two members of whom were members of the Rwanda Tribunal.⁶⁵

Articles 2 to 4 of the Statute stipulated the crimes over which the Tribunal had jurisdiction. Article 2 dealt with genocide; article 3 with crimes against humanity, being the crimes of (a) murder; (b) extermination; (c) enslavement; (d) deportation; (e) imprisonment; (f) torture; (g) rape; (h) persecutions on political, racial and religious grounds; and (i) other inhumane acts, when committed as part of a widespread or systematic attack against any civilian population on national, political, ethnic, racial or religious grounds; and

article 4 dealt with violations of article 3 common to the Geneva Conventions and of Additional Protocol II.⁶⁶ Article 6 provided for individual criminal responsibility with regard to persons planning, ordering, committing or aiding the crimes listed, while provisions similar to the Statute of the Yugoslav Tribunal with regard to the absence of immunity for persons holding official positions, command responsibility and superior orders applied.

The Tribunal had jurisdiction with regard to serious violations of international humanitarian law committed in the territory of Rwanda and Rwandan citizens responsible for such violations committed in the territory of neighbouring states between 1 January 1994 and 31 December 1994.⁶⁷ As in the case of the ICTY, the ICTR had concurrent jurisdiction with national courts and had primacy over national courts of all states, while at any stage of the procedure, the Tribunal could formally request national courts to defer to its competence.⁶⁸ Similarly, no person may be tried before a national court for acts constituting serious violations of international humanitarian law under the present Statute, for which he or she had already been tried by the International Criminal Tribunal for Rwanda, while a person who had been tried before a national court for acts constituting serious violations of international humanitarian law could be subsequently tried by the Tribunal only if either the act for which he or she was tried was characterised as an ordinary crime; or the national court proceedings were not impartial or independent, were designed to shield the accused from international criminal responsibility, or the case was not diligently prosecuted.⁶⁹

After several difficult early years, during which problems of mismanagement with regard to the Office of the Prosecutor and the Registry predominated,⁷⁰

the Tribunal began to produce some significant decisions. These commenced with the *Kambanda* case,⁷¹ which was the first time that a former head of government was convicted for the crime of genocide (after having pleaded guilty), and the *Akayesu* case,⁷² in which for the first time an international tribunal was called upon to interpret the definition of genocide in the Genocide Convention 1948 and to define the crime of rape in international law. However, the rate of progress was disappointing and tensions with Rwanda have surfaced from time to time.

As in the case of the ICTY, the Rwanda Tribunal formulated a completion strategy, affirmed by Security Council resolutions 1503 (2003) and 1534 (2004), although it had in 2002 adopted Rule 11 *bis* of the Rules of Procedure permitting the transfer of cases to national jurisdictions, as had the ICTY.⁷³ The Security Council, as with the ICTY, increased the number of *ad litem* judges and various other management decisions were taken. A separate Prosecutor for the ICTR was appointed in 2003. Attention was focused upon the prosecution of individuals who allegedly were in positions of leadership, and those who allegedly bore the greatest responsibility for the genocide, while the Prosecutor held discussions with states, including Rwanda, regarding the referral of cases to national jurisdictions for trial, in particular with regard to accused persons who were investigated but not indicted by his office. Considerations of fair trial in the state concerned were also a relevant factor, as well as the alleged status and extent of participation of the individual during the genocide, the alleged connection that the individual may have had with other cases, the need to cover the major geographical areas of Rwanda, the availability of evidence with regard to the individual concerned and the availability of investigative material for transmission to a

state for national prosecution. The ICTR delivered its final trial judgment on 20 December 2012⁷⁴ and its final appeal judgment on 14 December 2015.⁷⁵ On 31 December 2015, the Tribunal came to a close, handing over its functions to the Mechanism for International Criminal Tribunals.⁷⁶

The Mechanism for International Criminal Tribunals

An international residual mechanism for the international criminal tribunals to carry out a number of essential functions of the ICYT and ICTR after the closure of the Tribunals, including the trial of fugitives who were among the most senior leaders suspected of being most responsible for crimes, was established in 2010.⁷⁷ The Mechanism was intended to be a small, temporary and efficient structure. In accordance with its statute, the Mechanism has a President, a Prosecutor and a Registrar, who together have responsibility over two branches, one in Arusha and the other in The Hague. The Mechanism is planned to operate for an initial period of four years and then for subsequent periods of two years following reviews of its progress, unless the Security Council decides otherwise. The Mechanism commenced operations at its Arusha branch on 1 July 2012, covering functions inherited from the ICTR and the branch in The Hague commenced on 1 July 2013 with regard to functions inherited from the ICTY. Its functions include attending to judicial matters such as the trial of fugitives indicted by the ICTR,⁷⁸ providing for witness protection, supervising the enforcement of sentences and managing archives. As of May 2020, eight persons indicted by the ICTR remained at large, of whom three were expected to be tried by the Mechanism, and the cases of the remaining five to be transferred to Rwanda for trial.⁷⁹

The International Criminal Court (ICC)⁸⁰

Article VI of the Genocide Convention 1948 provided for persons charged with genocide to be tried either by a court in the territory where the act had been committed or by an ‘international penal tribunal’ to be established. The International Law Commission was asked to study the possibility of the establishment of such an international court and a report was produced.⁸¹ The matter was then transmitted to the General Assembly, which produced a draft statute.⁸² However, the question was postponed until a definition of aggression had been achieved and the draft Code of Offences completed. Due primarily to political reasons, no further progress was made until Trinidad and Tobago proposed the creation of a permanent international criminal court to deal with drug trafficking in 1989. Given additional urgency by the developing Yugoslav situation in the early 1990s, the International Law Commission adopted a Draft Statute for an International Criminal Court in 1994.⁸³ This draft statute proposed that an international criminal court be established with jurisdiction not only over genocide, war crimes, crimes against humanity and aggression, but also over certain ‘treaty crimes’ such as terrorism and drugs offences found in UN conventions. The draft statute was also less expansive than the International Criminal Court Statute proved to be in a number of ways, including not providing for the Prosecutor to initiate investigations on his or her own authority. However, the ILC draft proved very influential and a Preparatory Committee was convened in December 1995.⁸⁴ The work of this Committee⁸⁵ led to the Rome Conference in 1998, which produced after some effort the Rome Statute on the International Criminal Court on 17 July 1998. Sixty states were needed to ratify the Rome

Statute in order for it to come into force and this duly happened on 1 July 2002. Unlike the two international criminal tribunals (for the former Yugoslavia and for Rwanda), the ICC is the product not of a binding Security Council resolution, but of an international treaty. This was essentially because states, while being prepared to accept the creation of geographically limited (the Former Yugoslavia) and temporally constrained (in Rwanda's case) tribunals by Security Council action, were not willing to be so bound by the establishment of a permanent international criminal court with much more extensive jurisdiction without express consent. Secondly, it is to be noted that the range and content of the Rome Statute is far greater than those of the two international criminal tribunals. The Rome Statute contains 128 articles, while the ICTY Statute contains thirty-four articles and the ICTR Statute thirty-two articles.

The Statute provides that the jurisdiction of the International Criminal Court is limited to the 'most serious crimes of concern to the international community as a whole', being genocide, crimes against humanity, war crimes and aggression,⁸⁶ and that a person who commits a crime within the jurisdiction of the Court 'shall be individually responsible and liable for punishment' in accordance with the Statute.⁸⁷ The ICC only has jurisdiction with regard to crimes committed after the Statute came into force and with regard to states which have become parties to the Statute.⁸⁸ Further, jurisdiction may only be exercised provided either the state on the territory of which the conduct in question occurred (or if the crime was committed on board a vessel or aircraft, the state of registration of that vessel or aircraft) or the state of which the person accused of the crime is a national is a party to the Statute.⁸⁹ This means that the jurisdiction of the ICC is not universal, but

territorial or personal in nature. It also means that the national of a state which is not a party to the Statute may be prosecuted where the crime is committed in the territory of a state which is a party. However, the Court may also have jurisdiction where a situation has been referred to the Prosecutor by the Security Council acting under Chapter VII of the Charter, which is thereby binding and in which case it is unnecessary that a relevant state be a party to the Statute.⁹⁰ This has happened with regard to the situation in Darfur, Sudan, which was referred to the Prosecutor on 31 March 2005 by the Security Council in resolution 1593. After a preliminary examination of the situation, an investigation was opened on 1 June 2005 and after a twenty-month investigation into crimes allegedly committed in Darfur since 1 July 2002, the Prosecutor presented evidence to the judges and a summons to two named Sudanese individuals, one being a government minister and the other a military officer, to appear was issued with regard to charges alleging the commission of war crimes and crimes against humanity.⁹¹ Warrants of arrest were issued on 27 April 2007 against the two individuals by Pre-Trial Chamber I.⁹² Two warrants of arrest were subsequently issued against President Al-Bashir.⁹³ On 26 February 2011, the situation in Libya was referred to the Prosecutor by the Security Council in resolution 1970 (2011). This resulted in warrants of arrest being issued by Pre-Trial Chamber I for Muammar Gaddafi (the then leader of Libya), Saif Al-Islam Gaddafi and Abdualla Al-Senussi.⁹⁴

In addition to the Security Council referral, the ICC is also able to exercise its jurisdiction with regard to one or more of the crimes in question where the situation in which one or more of these crimes appears to have been committed has been referred to the Prosecutor by a state party to the

Statute,⁹⁵ or where the Prosecutor has himself or herself initiated an investigation.⁹⁶ In the latter case, where the Prosecutor concludes, after having analysed the seriousness of the information received, that there is a reasonable basis to proceed to an investigation, a request for authorisation of an investigation, together with any supporting material collected, will be submitted to the Pre-Trial Chamber. Victims may also make representations to the Pre-Trial Chamber, in accordance with the Rules of Procedure and Evidence. Where the Pre-Trial Chamber, upon examination of the request and the supporting material, considers that there is a reasonable basis to proceed with an investigation, and that the case appears to fall within the jurisdiction of the Court, it shall authorise the commencement of the investigation, without prejudice to subsequent determinations by the Court with regard to the jurisdiction and admissibility of a case.⁹⁷

There have been five examples to date of referral by a state party. In December 2003, Uganda referred to the Prosecutor the situation with regard to the Lord's Resistance Army;⁹⁸ in April 2004, the Democratic Republic of the Congo referred to the Prosecutor the situation of crimes committed in its territory;⁹⁹ in December 2004, the Central African Republic referred the situation in its country during the armed conflict of 2002–03 to the Prosecutor.¹⁰⁰ In May 2014, the government made a further referral concerning alleged war crimes and crimes against humanity committed in the context of renewed violence as from 2012 in that country.¹⁰¹ In July 2012, the government of Mali referred the situation in its country to the Prosecutor.¹⁰² The Prosecutor may also initiate an investigation under article 13 *proprio motu* on the basis of information on crimes within the jurisdiction of the Court received from individuals or organisations. For example, Pre-

Trial Chamber II granted the Prosecution authorisation to open an investigation *proprio motu* in the situation of Kenya on 31 March 2010.¹⁰³ In addition, on 3 October 2011, Pre-Trial Chamber III granted the Prosecutor's request for authorisation to open investigations *proprio motu* into the situation in Côte d'Ivoire.¹⁰⁴ In January 2016, the Prosecutor was authorised to open a *proprio motu* investigation concerning alleged war crimes and crimes against humanity committed during the armed conflict in Georgia between July and October 2008,¹⁰⁵ while a *proprio motu* investigation was authorised concerning Burundi in October 2017.¹⁰⁶ In addition, on 14 November 2019, the Prosecutor was authorised to proceed with an investigation with regard to alleged crimes within the Court's jurisdiction in Bangladesh/Myanmar,¹⁰⁷ and Afghanistan.¹⁰⁸

At the time of writing, the Prosecutor is conducting preliminary examinations¹⁰⁹ concerning alleged crimes committed on the territories of Guinea, Colombia, Iraq (with regard to alleged crimes committed by the United Kingdom), Nigeria, the Philippines, Ukraine, Venezuela and with regard to vessels registered in Comoros, Greece and Cambodia.¹¹⁰ As regards Palestine, the Prosecutor decided on 20 December 2019 that the preliminary examination had concluded and the conditions for an investigation had been met, but that a jurisdictional ruling on the scope of the territorial jurisdiction of the International Criminal Court under article 12(2)(a) of the Rome Statute in Palestine would be sought.¹¹¹

In a concession to obtain the support of states to the ICC, article 16 provides that no investigation or prosecution may be commenced or proceeded with for a period of twelve months after the Security Council, in a resolution

adopted under Chapter VII of the Charter, has so requested the Court. Such request may be renewed by the Council under the same conditions.¹¹² Article 98(2) provides that the Court may not proceed with a request for surrender which would require the requested state to act inconsistently with its obligations under international agreements pursuant to which the consent of a sending state is required to surrender a person of that state to the Court, unless the Court can first obtain the cooperation of the sending state for the giving of consent for the surrender. The provision, which was intended to deal with conflicting obligations, such as the position of soldiers stationed overseas under Status of Forces agreements which allow the sending state to exercise elements of criminal jurisdiction with regard to its soldiers, has been used by the United States for a much broader purpose. The United States has signed a number of bilateral agreements with states, some parties to the Rome Statute and some not, which provide that no nationals, current or former officials, or military personnel of either party may be surrendered or transferred by the other state to the ICC for any purpose. This tactic was widely criticised.¹¹³ Also of great concern is the difficult relations between the African Union and the Court. The African Union has adopted a number of resolutions critical of the Court with allegations of double standards in view of the large number of cases involving African states. However, this reflects the fact that a significant number of African states are parties to the Rome Statute, while many such states are subject to political instability and conflict.¹¹⁴

A key feature of the ICC, and one that distinguished it from the two international criminal tribunals, is that it is founded upon the concept of complementarity, which means essentially that the national courts have

priority. A case will be inadmissible and the Court will be unable to exercise jurisdiction in a number of situations.¹¹⁵ These are: first, where the case is being investigated or prosecuted by a state which has jurisdiction over it, unless the state is unwilling or unable genuinely to carry out the investigation or prosecution; secondly, where the case is being investigated or prosecuted by a state which has jurisdiction over it and the state has decided not to prosecute the person concerned, unless the decision resulted from the unwillingness¹¹⁶ or inability¹¹⁷ of the state genuinely to prosecute; and, thirdly, where the person concerned has already been tried for conduct which is the subject of the complaint, unless the proceedings before the court other than the ICC were for the purpose of shielding the person concerned from criminal responsibility for crimes within the jurisdiction of the ICC or where those proceedings were not conducted independently or impartially.¹¹⁸ Case-law has, however, revealed a variety of problems. While it is clear that the same person must be actively investigated by the domestic court as the Prosecutor,¹¹⁹ it is far from clear what kinds of investigations by the domestic courts would suffice for the purposes of article 17. In the *Simone Gbagbo* case, the Appeals Chamber reaffirmed that the state in question bears the burden of proof to show that the case is inadmissible and that ‘a genuine investigation or prosecution’ is being conducted. It must provide the Court with ‘evidence of a sufficient degree of specificity and probative value’ that demonstrates that it is indeed investigating the case with evidence of ‘concrete and progressive investigative steps’.¹²⁰ Similarly, it is unclear to what extent the conduct in question being investigated by both the ICC and the domestic system has to be the same. In the *Kenyatta* case, the Appeals Chamber held that it was sufficient if the domestic proceedings involved ‘substantially the same conduct’ as the ICC case.¹²¹ In the *Gaddafi* case, the

Appeals Chamber noted that the real issue was the degree of overlap required between the ICC and domestic investigations ‘with the focus being upon whether the conduct is *substantially* the same . . . this will depend upon the facts of the individual case’.¹²²

A case will be inadmissible if it is ‘not of sufficient gravity to justify further action by the Court’.¹²³ It has been noted: ‘Gravity includes an assessment of the scale, nature, manner of commission of the crimes, and their impact, bearing in mind the potential cases that would likely arise from an investigation of the situation.’ Also of relevance will be the persons or groups of persons deemed most responsible for the alleged crimes committed.¹²⁴

A countervailing consideration is constituted by the ‘interests of justice’. The Prosecutor must assess whether, taking into account the gravity of the crime and the interests of victims, there are nonetheless substantial reasons to believe that an investigation would not serve the interests of justice.¹²⁵

The Court consists of four organs. These are, respectively: the Presidency; an Appeals Division, a Trial Division and a Pre-Trial Division; the Office of the Prosecutor; and the Registry.¹²⁶ The eighteen judges elected must be independent and serve on a full-time basis,¹²⁷ have competence in criminal law or in relevant areas of international law, and must represent the principal legal systems in the world, as well as reflect equitable geographical representation and the need for a fair representation of male and female judges. The judges are elected by the Assembly of States Parties using rather complicated voting rules.¹²⁸ The Presidency, consisting of the President and the First and Second Vice-Presidents, is responsible for the proper

administration of the Court (apart from the Office of the Prosecutor),¹²⁹ while the Registry is responsible for the non-judicial aspects of the administration and servicing of the Court.¹³⁰ The Office of the Prosecutor acts independently as a separate organ of the Court. It is responsible for receiving referrals and any substantiated information on crimes within the jurisdiction of the Court, for examining them and for conducting investigations and prosecutions before the Court.¹³¹ The Office is headed by the Prosecutor, who is elected by secret ballot by members of the Assembly of States Parties and assisted by one or more Deputy Prosecutors.¹³²

The Pre-Trial Division is composed of judges with predominantly criminal trial experience, who serve in the Division for a period of three years. The Pre-Trial Chamber is composed either of a single judge or of a bench of three judges¹³³ and confirms or rejects the authorisation to commence an investigation and makes a preliminary determination that the case falls within the jurisdiction of the Court, without prejudice to subsequent determinations by the Court with regard to the jurisdiction and admissibility of a case. The Pre-Trial Chamber may also review a decision of the Prosecutor not to proceed with an investigation either on its own initiative, or at the request of the state making a referral under article 14, or the UN Security Council under article 13(b),¹³⁴ and can issue warrants of arrests and summons to appear before the Court at the request of the Prosecutor, issue orders to grant the rights of the parties in the proceeding and, where necessary, provide for the protection and privacy of victims and witnesses, the preservation of evidence, the protection of persons who have been arrested or appeared in response to a summons, and the protection of national security information. Within a reasonable time after the person's surrender or voluntary appearance before

the Court, the Pre-Trial Chamber holds a hearing in the presence of the Prosecutor, the person charged and his or her counsel to confirm or reject the charges. Once the Pre-Trial Chamber has confirmed the charges and committed the person for trial by the Trial Chamber, the Presidency will establish a Trial Chamber to conduct subsequent proceedings.

The Trial Division is also predominantly composed of judges with criminal trial experience who serve for a period of three years. Three judges of the Division carry out the judicial functions of the Trial Chamber.¹³⁵ The primary function of the Trial Chamber is to ensure that a trial is fair and expeditious, and is conducted with full respect for the rights of the accused with regard for the protection of victims and witnesses.¹³⁶ The Trial Chamber will determine whether the accused is innocent or guilty. In the latter case, imprisonment for a specified number of years, which may not exceed a maximum of thirty years or a term of life imprisonment, may be imposed. Financial penalties may also be imposed¹³⁷ and the Trial Chamber can also order a convicted person to pay money for compensation, restitution or rehabilitation for victims.¹³⁸ The trial must be held in public unless special circumstances require that certain proceedings be in closed session to protect confidential or sensitive information to be given in evidence, or to protect victims and witnesses.¹³⁹

The Appeals Division is composed of judges with established competence in relevant areas of international law and the Appeals Chamber is composed of all the judges assigned to the Appeals Division.¹⁴⁰ The Prosecutor or the convicted person can appeal against the decisions of the Pre-Trial and Trial Chambers to the Appeals Chamber. A sentence may be appealed on the

ground of procedural error, error of fact, error of law, or any other ground that affects the fairness or reliability of the proceedings or decision. Further, a sentence may be appealed on the ground of disproportion between the crime and the sentence.¹⁴¹ The Appeals Chamber may decide to reverse or amend the decision, judgment or sentence, or order a new trial before a different Trial Chamber.¹⁴²

Hybrid Courts and Other Internationalised Domestic Courts and Tribunals¹⁴³

In addition to the temporary and geographically limited international criminal tribunals and the permanent International Criminal Court, a new style of judicial institution has made an appearance recently in which both international and national elements co-exist in varying combinations. Such institutions, which may for convenience be termed hybrid courts, exist primarily to enhance legitimacy and increase acceptability both locally and internationally, invariably in difficult post-conflict situations where reliance upon purely domestic mechanisms carries significant political risks or costs. However, as will be seen, there are a number of models adopted which differ as to formal legal origin, constitutional status, applicable law and structure. Some of these mechanisms may more correctly be termed internationalised courts or tribunals¹⁴⁴ as the balance between the international and the domestic tips far to the latter. They are essentially domestic courts applying domestic law, but with a heightened international element in terms, for example, of their function or origins, the basis of their applicable law or the use of international experts. Some courts are difficult to place along the spectrum, but together this category marks an extension of international concern and involvement in issues focusing upon individual criminal responsibility for what are international crimes, even if subsequently incorporated into domestic law.

The Special Court for Sierra Leone

The Special Court for Sierra Leone was established, following a particularly violent civil war, by virtue of an agreement between the United Nations and Sierra Leone dated 16 January 2002, pursuant to Security Council resolution 1315 (2000), in order to prosecute persons bearing ‘the greatest responsibility for serious violations of international humanitarian law and Sierra Leonean law committed in the territory of Sierra Leone since 30 November 1996’ on the basis of individual criminal responsibility.¹⁴⁵ However, it is stipulated that any transgressions by peacekeepers and related personnel present in the country by virtue of agreements with the United Nations or other governments or regional organisations or otherwise with the consent of the Sierra Leonean government were within the ‘primary jurisdiction’ of the sending state.¹⁴⁶

The Special Court consisted of the Chambers (two Trial Chambers and an Appeals Chamber), the Prosecutor and the Registry. Three judges served in each Trial Chamber, of whom one was appointed by the Sierra Leonean government and two appointed by the UN Secretary-General.¹⁴⁷ Five judges sat in the Appeals Chamber, of whom two were appointed by the government and three by the UN Secretary-General.¹⁴⁸ The Appeals Chamber heard appeals from persons convicted by the Trial Chamber or from the Prosecutor on the grounds of procedural error, an error on a question of law invalidating the decision or an error of fact which has occasioned a miscarriage of justice. The Appeals Chamber could affirm, reverse or revise the decisions taken by the Trial Chamber. In so acting, the judges of the Appeals Chamber of the Special Court were to be guided by the decisions of the Appeals Chamber of the International Tribunals for the former Yugoslavia and for Rwanda. In the

interpretation and application of the laws of Sierra Leone, they were to be guided by the decisions of the Supreme Court of Sierra Leone.¹⁴⁹

The Prosecutor, who was appointed by the UN Secretary-General for a three-year term and acted independently as a separate organ of the Special Court, was responsible for the investigation and prosecution of persons who bear the greatest responsibility for serious violations of international humanitarian law and crimes under Sierra Leonean law committed in the territory of Sierra Leone since 30 November 1996. The Office of the Prosecutor had the power to question suspects, victims and witnesses, to collect evidence and to conduct on-site investigations. The Prosecutor was assisted by a Sierra Leonean Deputy Prosecutor, and by a mixture of Sierra Leonean and international staff.¹⁵⁰ The Registry was responsible for the administration and servicing of the Special Court and was appointed by the UN Secretary-General after consultation with the President of the Special Court.¹⁵¹

The jurisdiction of the Special Court mirrored the hybrid nature of its creation and staffing. The Court had jurisdiction with regard to crimes against humanity; violations of article 3 common to the Geneva Conventions and of Additional Protocol II; other serious violations of international humanitarian law¹⁵² and certain crimes under Sierra Leonean law.¹⁵³ Article 8 of the Statute provided that the Special Court and the national courts of Sierra Leone had concurrent jurisdiction, but that the Special Court had primacy over the national courts and that at any stage of the procedure it could formally request a national court to defer to its competence. The Annual Report of the Special Court for 2006–07 noted that thirteen persons were indicted, all between March and September 2003. Of these, nine were in

custody, one dead and one still at large, while two indictments were withdrawn. Trials of the nine in custody began in 2004 and 2005 in three joint trials. Of particular interest has been the Charles Taylor case. He was the former President of Liberia. His claim to immunity was rejected by the Appeals Chamber in May 2004¹⁵⁴ and he stood trial in The Hague at the premises of the ICC. He was convicted on all counts on 26 April 2012 and sentenced to fifty years' imprisonment.¹⁵⁵ Judgment in the *AFRC* trial was handed down on 20 June 2007 and the three accused convicted of offences. Sentencing took place on 19 July 2007 and the appeal against sentencing was dismissed on 22 February 2008.¹⁵⁶ On 2 August 2007, Trial Chamber I reached a decision in the trial of three persons accused of being leaders of the so-called 'Civil Defence Forces', of whom one died prior to pronouncement of judgment, in which the two remaining accused were convicted.¹⁵⁷ The Special Court adopted a completion strategy under which proceedings were due to be completed in 2007.¹⁵⁸ However, this date could not be met and the Residual Special Court for Sierra Leone was created in order to oversee the continuing legal obligations of the Special Court after its closure in 2013, including witness protection, supervision of prison sentences and management of archives.¹⁵⁹ The Residual Special Court has a roster of national and international judges and the Prosecutor and Registrar are appointed by the UN Secretary-General.¹⁶⁰

Extraordinary Chambers in the Courts of Cambodia

The Khmer Rouge regime under Pol Pot took power in Cambodia in 1975 following a civil war and proceeded to commit widescale atrocities which are believed to have resulted in the death of well over 1 million people. The

regime was ousted by a Vietnamese invasion in 1979. In 1997, the Cambodian government requested the United Nations to assist in establishing a trial process in order to prosecute the senior leaders of the Khmer Rouge. In 2001, the Cambodian National Assembly passed a law to create a court to try serious crimes committed during the Khmer Rouge regime. On 13 May 2003, after a long period of negotiation, the UN General Assembly approved a Draft Agreement between the United Nations and Cambodia providing for Extraordinary Chambers in the courts of Cambodia, with the aim of bringing to trial senior leaders of Democratic Kampuchea and those who were most responsible for the crimes and serious violations of Cambodian penal law, international humanitarian law and custom, and international conventions recognised by Cambodia, that were committed during the period from 17 April 1975 to 6 January 1979.¹⁶¹ The Agreement was ratified by Cambodia on 19 October 2004.

Article 2 of the Agreement provided that the Extraordinary Chambers were to have subject-matter jurisdiction consistent with that laid down in the Cambodian Law (of 2001) and that the Agreement was to be implemented via that law. However, it is provided also that the Vienna Convention on the Law of Treaties 1969 is to apply to the Agreement. Accordingly, the Agreement must be seen as an international treaty, although one closely linked with the relevant domestic law. The Chambers are composed of a Trial Chamber, consisting of three Cambodian judges and two international judges, and a Supreme Court Chamber, serving as both appellate chamber and final instance and consisting of four Cambodian judges and three international judges. The UN Secretary-General was to nominate seven judges and the Cambodian Supreme Council of Magistracy, the highest domestic judicial

body, was to choose five of these to serve in the Chambers.¹⁶² The Agreement also provided for independent co-investigation judges, one Cambodian and one international, who are responsible for the conduct of investigations,¹⁶³ and two independent co-prosecutors, one Cambodian and one international, competent to appear in both Chambers, who are responsible for the conduct of the prosecutions.¹⁶⁴

The jurisdiction of the Extraordinary Chambers covers the crime of genocide as defined in the Genocide Convention 1948, crimes against humanity as defined in the 1998 Rome Statute of the International Criminal Court and grave breaches of the 1949 Geneva Conventions and such other crimes as are defined in Chapter II of the Cambodian Law of 2001 with regard to senior leaders of Democratic Kampuchea.¹⁶⁵ The procedure of the Chambers is to be in accordance with Cambodian law, but where Cambodian law does not deal with a particular matter, or where there is uncertainty regarding the interpretation or application of a relevant rule of Cambodian law, or where there is a question regarding the consistency of such a rule with international standards, guidance may also be sought in procedural rules established at the international level. It is also provided that the Extraordinary Chambers are to exercise their jurisdiction in accordance with international standards of justice, fairness and due process of law, as set out in Articles 14 and 15 of the 1966 International Covenant on Civil and Political Rights, to which Cambodia is a party.¹⁶⁶

A list of five suspects was submitted by the prosecutors on 19 July 2007 to the Chambers with a request that they be indicted and, on 31 July 2007, the first suspect (Khang Khék Ieu, known as ‘Duch’) was indicted.¹⁶⁷ He was

convicted on 26 July 2010 of crimes against humanity and grave breaches of the 1949 Geneva Conventions. The decision was affirmed by the Supreme Court on 3 February 2012.¹⁶⁸ Two further persons were convicted and appeals are pending, proceedings were terminated against three persons and dismissed against another person. Three persons have been charged by the International Co-Investigating Judge.¹⁶⁹

Kosovo Specialist Chambers and Specialist Prosecutor's Office¹⁷⁰

Following the conflict between the Federal Republic of Yugoslavia (as it then was, today Serbia) and NATO in 1999, the Security Council adopted resolution 1244, which *inter alia* called for the establishment of an 'international civil presence' in Kosovo. The international civil presence was granted responsibilities, including: promoting 'the establishment, pending a final settlement, of substantial autonomy and self-government'; performing basic civilian administrative functions; organising the development of provisional institutions for democratic and autonomous self-government pending a political settlement; and protecting and promoting human rights.¹⁷¹ The competence of the international civil presence carried out by the UN Interim Administration Mission in Kosovo (UNMIK) was extensive. Section 1.1 of the first regulation issued by UNMIK in 1999 stated that '[a]ll legislative and executive authority with respect to Kosovo, including the administration of the judiciary, is vested in UNMIK and is exercised by the Special Representative of the Secretary General',¹⁷² while section 1.2 provided that the Special Representative could appoint any person to perform

functions in the civil administration in Kosovo, including the judiciary, or remove such person in accordance with the applicable law.¹⁷³

Following a series of disturbances in 2000, UNMIK Regulation 2000/6 was adopted, providing for the appointment of international judges and prosecutors,¹⁷⁴ and UNMIK Regulation 2000/64 was adopted, providing for UNMIK to create panels (known as Regulation 64 panels) of three judges, including at least two international judges, at the request of the accused, defence counsel or prosecutor. Such international judges functioned as regular court judges in Kosovo with powers derived from domestic legislation, but their involvement in a case was under either their own control or at the behest of the UN Secretary-General's Special Representative in Kosovo. The applicable law was stated to be regulations promulgated by the Special Representative and subsidiary instruments issued thereunder and the law in force in Kosovo on 22 March 1989.¹⁷⁵ However, problems surfaced, particularly with regard to the high rate of national judge convictions overturned by retrials by international judges and lack of systematic publication of case decisions and the brevity of such decisions.¹⁷⁶ Kosovo declared independence in early 2008.¹⁷⁷ Subsequently, the Panels were replaced by a system involving EULEX (European Union Rule of Law Mission in Kosovo) judges up until 15 April 2014, thereafter criminal investigations and new criminal trials were to be conducted by Kosovo authorities, with judicial panels composed of Kosovo judges. However, and only in extraordinary circumstances, a case could be assigned to a EULEX Prosecutor or a panel be composed of a majority of EULEX judges.¹⁷⁸

On 3 August 2015, the Kosovo Assembly adopted article 162 of the Kosovo Constitution allowing for the establishment of the Specialist Chambers and Specialist Prosecutor's Office, following an Exchange of Letters between the President of Kosovo and the High Representative of the European Union for Foreign Affairs and Security Policy in 2014. This followed a Council of Europe Parliamentary Assembly report in 2011 alleging serious violations of international law, including illicit trafficking in human organs.¹⁷⁹ The Specialist Chambers are attached to each level of the court system in Kosovo and are to operate under Kosovo law as well as customary international law and international human rights law. Their jurisdiction is limited to certain crimes against humanity allegedly committed between 1 January 1998 and 31 December 2000. The Specialist Chambers consists of Chambers and a Registry with a Specialist Prosecutor's Office as an independent office for the investigation and prosecution of the crimes within the jurisdiction of the Chambers. Both the Specialist Chambers and the Specialist Prosecutor's Office are staffed with international judges, prosecutors and officers and have a seat in The Hague, the Netherlands. Rules of Procedure and Evidence before the Special Chambers were adopted in 2017.¹⁸⁰ On 24 June 2020, a ten-count indictment filed on 24 April 2020 by the Specialist Prosecutor's Office with the Specialist Chambers was published. This charged Hashim Thaçi, the President of Kosovo, and others, with a range of crimes against humanity and war crimes, including murder, enforced disappearance of persons, persecution and torture.¹⁸¹

East Timor Special Panels for Serious Crimes¹⁸²

Following a period of violence in East Timor instigated by pro-Indonesian militia after the ending of the long Indonesian occupation, the Security Council established the UN Transitional Administration in East Timor (UNTAET) with a wide-ranging mandate to administer the territory.¹⁸³ By Regulation No. 1 adopted on 27 November 1999, all legislative and executive authority with respect to East Timor, including the administration of the judiciary, was vested in UNTAET and exercised by the Transitional Administrator. This administrator was given the competence further to appoint any person to perform functions in the civil administration in the territory, including the judiciary, or remove such person and to issue regulations and directives. UNTAET created a new courts system,¹⁸⁴ including the establishment of special panels to deal with serious crimes within the District Court of Dili and in the Court of Appeal.¹⁸⁵ These serious crimes were defined as genocide, war crimes, crimes against humanity, murder, sexual offences and torture,¹⁸⁶ for which there was individual criminal responsibility.¹⁸⁷ The applicable law was the law of East Timor as promulgated by sections 2 and 3 of UNTAET Regulation No. 1999/1 and any subsequent UNTAET regulations and directives; and, where appropriate, applicable treaties and recognised principles and norms of international law, including the established principles of the international law of armed conflict.

The Panels in the District Court of Dili were to be composed of two international judges and one East Timorese judge, as were the Panels in the Court of Appeal in Dili. In cases of special importance or gravity, a panel of five judges composed of three international and two East Timorese judges could be established.¹⁸⁸ However, the system had barely started before 2003 and in the *Armando Dos Santos* case, the Court of Appeal held, in a decision

much criticised,¹⁸⁹ that since the Indonesian occupation was illegal, Indonesian law was never validly in force so that domestic law was Portuguese law, and, further, Regulation 2000/15 could not be applied retroactively so that only Portuguese law could be applied to crimes committed before 6 June 2000.¹⁹⁰ On 20 May 2002, the United Nations handed over its authority to the new institutions of East Timor and UNTAET was replaced by the UN Mission of Support in East Timor (UNMISSET), although UNTAET regulations continued in force. In May 2005, UNMISSET came to an end and the Serious Crimes Unit closed. Partly no doubt as a consequence, the Special Panels suspended operations indefinitely. By this time, fifty-five trials, most involving relatively low-level defendants, had taken place, eighty-four individuals had been convicted and three acquitted.¹⁹¹

The Bosnia War Crimes Chamber¹⁹²

In January 2003, the Office of the High Representative in Bosnia¹⁹³ and the International Criminal Tribunal for the Former Yugoslavia issued a set of joint conclusions recommending the creation of a specialised chamber within the State Court of Bosnia and Herzegovina to try war crimes cases.¹⁹⁴ This was supported by the UN Security Council.¹⁹⁵ The Chamber came into being in 2005 with jurisdiction concerning cases referred to it by the ICTY pursuant to Rule 11 *bis* of the ICTY Rules of Procedure and Evidence with regard to lower- to mid-level accused persons. As such, this procedure forms part of the completion strategy of the ICTY.¹⁹⁶ In addition, the Chamber has jurisdiction with regard to cases submitted to it by the Office of the Prosecutor of the ICTY where investigations have not been completed, and

the first case was referred to the Chamber on 1 September 2005.¹⁹⁷ Further, the Chamber also has jurisdiction over what have been termed ‘Rules of the Road’ cases. The ‘Rules of the Road’ procedure was first established in response to the widespread fear of arbitrary arrest and detention immediately after the conflict in Bosnia. Originally, the Bosnian authorities were obliged to submit every war crimes case proposed for prosecution in Bosnia to the Office of the Prosecutor of the ICTY to determine whether the evidence was sufficient by international standards before proceeding to arrest. This review function was subsequently assumed by the Special Department for War Crimes within the Office of the Prosecutor of the State Court of Bosnia in October 2004. Where the case has not yet led to a confirmed indictment and where the prosecutor determines that the case is ‘highly sensitive’, it will be passed to the Chamber, otherwise it will be tried before the relevant cantonal or district court. If, however, the indictment has been confirmed, the case will remain with the relevant cantonal or district court.

The Chamber has both trial and appeals chambers. The Office of the Prosecutor of the State Court includes a Special Department for War Crimes and there were five international Prosecutors and one international acting prosecutor, as well as eight local prosecutors, including the Deputy Prosecutor.¹⁹⁸ The Registry managed the process of appointing and engaging international judges and prosecutors. The international judges were appointed by the High Representative after a joint recommendation of the President of the State Court and the President of the High Judicial and Prosecutorial Council, while the international prosecutors were appointed by the High Representative following a joint recommendation from the Bosnian Chief

Prosecutor, the President of the High Judicial and Prosecutorial Council and the Registry.¹⁹⁹

As of the tenth anniversary of the Chamber in 2015, the Chamber had dealt with a total of 130 war crimes cases, including six cases transferred to it by the ICTY.²⁰⁰ The applicable law is that of Bosnia, including criminal and criminal procedure codes introduced by the High Representative in 2003. However, the European Court of Human Rights held in *Maktouf-Damjanović v. Bosnia-Herzegovina* that the Chamber had violated article 7 of the European Convention on Human Rights as the applicants had been convicted on the basis of the retroactive application of criminal legislation in their war crimes cases.²⁰¹

The Special Tribunal for Lebanon²⁰²

Following the assassination of Rafiq Hariri, the former Prime Minister of Lebanon, in February 2005, the Security Council established an International Independent Investigation Commission to aid the Lebanese authorities in their investigation. As a result of its report and the request of the Lebanese government to establish ‘a tribunal of an international character’ to try those persons accused of the assassination,²⁰³ the Security Council adopted resolution 1664 (2006) calling upon the UN Secretary-General to negotiate an agreement with the government of Lebanon aimed at establishing a tribunal of an international character based on the highest international standards of criminal justice. The Secretary-General’s report²⁰⁴ was accepted by the Council in resolution 1757 (2007). Acting under Chapter VII of the Charter, the Council established the Special Tribunal for Lebanon by virtue

of an agreement with the government of Lebanon, annexed to the resolution. The Statute of the Tribunal is attached to the agreement.

The Tribunal has jurisdiction not only with regard to those responsible for the assassination of Rafiq Hariri, but also with regard to those responsible for other attacks that occurred in Lebanon between 1 October 2004 and 12 December 2005, or any later date decided by the parties and with the consent of the Security Council, that are seen as connected in accordance with the principles of criminal justice and are of a nature and gravity similar to the attack of 14 February 2005.²⁰⁵ The Tribunal was inaugurated on 1 March 2009 and is composed of four organs: the Chambers, the Office of the Prosecutor, the Registry and the Defence Office. The Chambers is composed of eleven independent judges, divided into a Pre-Trial Judge, a Trial Chamber and an Appeals Chamber. A single international judge serves as Pre-Trial Judge, while three judges serve in the Trial Chamber, being one Lebanese judge and two international judges. Five judges serve in the Appeals Chamber, of whom two are Lebanese and three international judges.²⁰⁶ The Prosecutor and the Registrar were appointed by the UN Secretary-General after consultation with the Lebanese government, while the Head of the Defence Office was appointed by the Secretary-General after consultation with the President of the Tribunal.²⁰⁷ The applicable law is Lebanese criminal law and the Tribunal has concurrent jurisdiction with Lebanese courts and possesses primacy over them.²⁰⁸ A number of cases are currently before the Tribunal and a decision has been taken, for example, to hold a trial in absentia.²⁰⁹ In an important interlocutory decision, the Appeals Chamber held that customary international law now recognises a distinct crime of terrorism, applicable to individuals, in peacetime.²¹⁰ In a judgment on 15 July

2016, the Contempt Judge of the Special Tribunal convicted a corporation of contempt – the first time, it is believed, that such a decision has been taken by an international criminal tribunal, albeit relying upon domestic law.²¹¹

The Iraqi High Tribunal²¹²

The Governing Council of Iraq was authorised by the Coalition Provisional Authority on 10 December 2003 to establish the Iraqi Special Tribunal to hear crimes alleged against the former regime of Saddam Hussein.²¹³ A revised Statute was enacted in 2005 and the Tribunal renamed the Iraqi High Tribunal. The Tribunal has jurisdiction over genocide, crimes against humanity and war crimes, the definitions of which are based upon the provisions of the Rome Statute and newly incorporated into Iraqi law, committed between 16 July 1968 and 1 May 2003²¹⁴ by Iraqi nationals or residents.²¹⁵ Persons accused of committing crimes within the jurisdiction of the Tribunal bear individual criminal responsibility.²¹⁶ The Tribunal has concurrent jurisdiction with national courts, but primacy over them. Article 6(b) of the Statute provides that the President of the Tribunal shall be required to appoint non-Iraqi nationals to act in advisory capacities or as observers to the Trial Chambers and to the Appeals Chamber. The role of the non-Iraqi nationals is stated to be to provide assistance to the judges with regard to international law and the experience of similar tribunals (whether international or otherwise), and to monitor the protection by the Tribunal of general due process of law standards. In appointing such non-Iraqi experts, the President of the Tribunal is entitled to request assistance from the international community, including the United Nations. However, the judges and prosecutors of the Tribunal are all Iraqi nationals. Criticisms have been

made of the Tribunal, including the fact that it can impose the death penalty, as for example with regard to Saddam Hussein upon his conviction in the *Dujail* case.²¹⁷

The Serbian War Crimes Departments

On 1 July 2003, the Serbian National Assembly adopted a law establishing a specialised War Crimes Chamber within the Belgrade District Court to prosecute and investigate crimes against humanity and serious violations of international humanitarian law as defined in Serbian law. A War Crimes Prosecutor's Office was established in Belgrade. The Departments (originally a Chamber) consist of two panels of three judges each selected from the Belgrade District Court or seconded from other courts, and two investigative judges.²¹⁸ The International Criminal Tribunal for the Former Yugoslavia has referred some cases to this Chamber, both where no indictment was issued and under rule 11 *bis*.²¹⁹ It is, however, essentially a national court.²²⁰

Of course, not all situations of egregious violations of international law have been rendered subject to international judicial action, still less domestic legal processes. In an increasing number of cases in more recent years, impunity remains the norm, the most serious examples being Syria, Libya and Yemen.²²¹

International Crimes²²²

A brief survey of some of the main features of international crimes for which individual criminal responsibility now exists will follow, noting that issues concerning the jurisdiction of purely domestic courts for those international crimes that have been incorporated into domestic legislation are covered in Chapter 11, while state responsibility for such offences is covered in Chapter 13.

Genocide²²³

Prohibition of Genocide

The Convention on the Prevention and Punishment of the Crime of Genocide signed in 1948 reaffirmed that genocide, whether committed in time of war or peace, was a crime under international law. Genocide was defined as any of the following acts committed ‘with intent to destroy, in whole or in part, a national, ethnical, racial or religious group as such’:

(a) killing members of the group; (b) causing serious bodily or mental harm to members of the group; (c) deliberately inflicting on the group conditions of life calculated to bring about its physical destruction in whole or in part; (d) imposing measures intended to prevent births within the group; (e) forcibly transferring children of the group to another group.

The Convention, which does not have an implementational system,²²⁴ provides that persons charged with genocide shall be tried by a competent tribunal of the state in the territory of which the act was committed or by an international penal tribunal. Several points should be noted. First, the question of intent is such that states may deny genocidal activity by noting that the relevant intent to destroy in whole or in part was in fact absent.²²⁵ Secondly, the groups protected do not include political groups.²²⁶ Thirdly, the

concept of cultural genocide is not included.²²⁷ Fourthly, there is virtually no mention of means to prevent the crime (although the obligation is stated).

In the 1990s, the issue of genocide unfortunately ceased to be an item of primarily historical concern. Events in the former Yugoslavia and in Rwanda stimulated increasing anxiety in this context. The Statutes of both the International Criminal Tribunal for the Former Yugoslavia and the International Criminal Tribunal for Rwanda provide for the prosecution of individuals for the crime of genocide and a significant case-law has now developed through these tribunals. In addition, the question of state responsibility for the crime of genocide has been raised.²²⁸ The International Court of Justice in *Application of the Genocide Convention* reaffirmed in its Order of 8 April 1993 on provisional measures²²⁹ the view expressed in the Advisory Opinion on *Reservations to the Genocide Convention* that the crime of genocide ‘shocks the conscience of mankind, results in great losses to humanity . . . and is contrary to moral law and to the spirit and aims of the United Nations’.²³⁰ The Court called upon both parties not to take any action that might aggravate or extend the dispute over the prevention or punishment of the crime of genocide.²³¹

On 11 July 1996, the Court rejected the preliminary objections raised by Yugoslavia.²³² In particular, the Court emphasised that it followed from the object and purpose of the Genocide Convention that the rights and obligations contained therein were rights and obligations *erga omnes* and that the obligation upon each state to prevent and punish the crime of genocide was not dependent upon the type of conflict involved in the particular situation (whether international or domestic) and was not territorially limited

by the Convention.²³³ The type of state responsibility envisaged under article IX of the Convention did not exclude any form of state responsibility.²³⁴ In addition, the Court observed that the Convention did not contain any clause the object or effect of which was to limit the scope of its jurisdiction *ratione temporis* so as to exclude events prior to a particular date.²³⁵ On 26 February 2007, the Court rendered its judgment on the merits. The Court affirmed that the effect of the categorisation of genocide as a ‘crime under international law’, coupled with the obligation to prevent genocide contained in the Genocide Convention, is to prohibit states from committing genocide through the actions of their organs or persons or groups whose acts are attributable to them.²³⁶ The Court also held that state responsibility could arise under the Convention for genocide and complicity, without an individual being convicted of the crime or an associated one,²³⁷ and that such responsibility for genocide applied to a state wherever it may be acting.²³⁸ It was noted that the essence of the intent, at the heart of the definition of genocide, is to destroy the protected group, in whole or in part, as such. It is a group which must have particular positive characteristics – national, ethnical, racial or religious – and not the lack of them. The intent must also relate to the group ‘as such’. That means that the crime requires an intent to destroy a collection of people who have a particular group identity²³⁹ and such intent refers to the intent to destroy at least a substantial part of the particular group and this may apply to a geographically limited area (such as Srebrenica).²⁴⁰ The Court, however, was not convinced, on the basis of the evidence before it, that it had been conclusively established that the massive killings of members of the protected group were committed with the specific intent (*dolus specialis*) on the part of the perpetrators to destroy, in whole or in part, the group as such,²⁴¹ nor that deportations and expulsions of the protected group

amounted to genocide for the same reason, nor indeed the imposition of terrible conditions on camp detainees and other allegations.²⁴² The exception to this was with regard to Srebrenica, where the Court found that the necessary intent had been established to the required standard of proof.²⁴³ The Court emphasised that claims against a state involving charges of exceptional gravity, such as genocide, must be proved by evidence that is fully conclusive.²⁴⁴

However, the Court emphasised that the Convention established a separate and distinct duty to prevent genocide, which was both ‘normative and compelling’²⁴⁵ and an obligation of conduct, not of result,²⁴⁶ provided that the offence was actually committed.²⁴⁷ Such obligation arose at the instant that the state learned of, or should normally have learned of, the existence of a serious risk that genocide would be committed.²⁴⁸ It was also held that Serbia was in violation of its duty to punish genocide.²⁴⁹

The prohibition of genocide also appears in the relevant instruments in the sphere of international criminal law.²⁵⁰ Article 4 of the ICTY Statute, by way of example, provides that:

2. Genocide means any of the following acts committed with intent to destroy, in whole or in part, a national, ethnical, racial or religious group, as such: (a) killing members of the group; (b) causing serious bodily or mental harm to members of the group; (c) deliberately inflicting on the group conditions of life

calculated to bring about its physical destruction in whole or in part; (d) imposing measures intended to prevent births within the group; (e) forcibly transferring children of the group to another group

and that the following acts shall be punishable:

(a) genocide; (b) conspiracy to commit genocide; (c) direct and public incitement to commit genocide; (d) attempt to commit genocide; (e) complicity in genocide.²⁵¹

Genocide has been regarded as an international crime since the Second World War and the Genocide Convention 1948 was a critical step in that process. The crime of genocide has also been included in the operative provisions of the statutes of most of the courts and tribunals discussed in the previous section. Case-law before the two international criminal tribunals (ICTY and ICTR) has, however, helped clarify many of the relevant principles. For example, perhaps the distinctive feature of the crime is the importance of establishing the specific intent to destroy the group in question in whole or in part, for genocide is more than the act of killing. This was emphasised by the ICTY in the *Jelisić* case, which noted that ‘it is in fact the *mens rea* [i.e. the intention as distinct from the actual act] which gives genocide its speciality and distinguishes it from an ordinary crime and other crimes against international humanitarian law’.²⁵² This was reaffirmed by the ICTR in the

Akayesu case,²⁵³ which defined the specific intent necessary as ‘the specific intention, required as a constitutive element of the crime, which demands that the perpetrator clearly seeks to produce the act charged’. The Trial Chamber underlined the difficulties in establishing the critical intent requirement and held that recourse may be had in the absence of confessions to inferences from facts.²⁵⁴ In the *Ruggiu* case, the ICTR held that a person who incites others to commit genocide must himself have a specific intent to commit genocide.²⁵⁵ However, in the *Jelisić* case, the ICTY pointed to the difficulty in practice of proving the genocidal intention of an individual if the crimes committed were not widespread or backed up by an organisation or a system.²⁵⁶ This may be distinguished from the *Ruggiu* case, where a systematic scheme to destroy the Tutsis was not in doubt.

The element of intention was further discussed by the ICTY in the *Krstić* case, where it was noted that the intent to eradicate a group within a limited geographical area, such as a region of a country or even a municipality, could be characterised as genocide,²⁵⁷ while ‘the intent to destroy a group, even if only in part, means seeking to destroy a distinct part of the group as opposed to an accumulation of isolated individuals within it’. The part of the group sought to be destroyed had to constitute a distinct element.²⁵⁸ In the Decision of the Appeal Chamber in this case, it was emphasised that it was well established that

where a conviction for genocide relies on the intent to destroy a protected group ‘in part’, the part must be a substantial part of that group. The aim of the Genocide Convention is to

prevent the intentional destruction of entire human groups, and the part targeted must be significant enough to have an impact on the group as a whole.²⁵⁹

It was concluded that the intent requirement of genocide under article 4 of the Statute was satisfied where evidence shows that the alleged perpetrator

intended to destroy at least a substantial part of the protected group. The determination of when the targeted part is substantial enough to meet this requirement may involve a number of considerations. The numeric size of the targeted part of the group is the necessary and important starting point, though not in all cases the ending point of the inquiry. The number of individuals targeted should be evaluated not only in absolute terms, but also in relation to the overall size of the entire group. In addition to the numeric size of the targeted portion, its prominence within the group can be a useful consideration. If a specific part of the group is emblematic of the overall group, or is essential to its survival, that may support a finding that the part qualifies as substantial within the meaning of Article 4.²⁶⁰

It was also emphasised that each perpetrator must possess the necessary specific intent.²⁶¹

The intention to ‘destroy’ means the physical or biological destruction of all or part of the group and not, for example, attacks upon the cultural or sociological characteristics of a group in order to remove its separate identity.²⁶² The sometimes difficult question of the definition of membership of the groups specifically referred to in the relevant instruments has also been analysed. In *Akayesu*,²⁶³ the Trial Chamber of the Rwanda Tribunal leaned towards the objective definition of membership of groups,²⁶⁴ but this has been mitigated by other cases emphasising the importance of subjective elements as part of the relevant framework.²⁶⁵

In so far as the material elements of the crime are concerned, killing is clearly the key conduct involved and it has been held that the act in question must be intentional, if not necessarily premeditated.²⁶⁶ Forced migration (or ‘ethnic cleansing’) as such does not constitute genocide,²⁶⁷ but may amount to a pattern of conduct demonstrating genocidal intent.²⁶⁸ The *Akayesu* case has also been important in emphasising that rape and sexual violence may amount to genocide when committed with the necessary specific intent to commit genocide. The Trial Chamber concluded: ‘Sexual violence was an integral part of the process of destruction, specifically targeting Tutsi women and specifically contributing to their destruction and to the destruction of the Tutsi group as a whole.’²⁶⁹ Further, where it is intended to prevent births within the group whether by impelling the child born of rape to be part of another group or where the woman raped refuses subsequently to procreate,

this may amount to genocide.²⁷⁰ The Rwanda Tribunal has also held that genocide may be committed by omission as well as by acts.²⁷¹

As far as the International Criminal Court is concerned, the first person charged with the crime of genocide was President Al Bashir of Sudan in the context of the Darfur situation and following a referral by the Security Council in resolution 1593 (2005). Arrest warrants were issued on 4 March 2009 and on 12 July 2010.²⁷²

The International Court of Justice has also addressed the question of the relationship between the Genocide Convention and international humanitarian law, in *Croatia v. Serbia*,²⁷³ where it was emphasised that these two sources were two distinct bodies of rules with different aims. While the Convention seeks to prevent and punish genocide as a crime under international law, humanitarian law governs the actual conduct of hostilities in an armed conflict, protecting diverse categories of persons and objects. In so far as both of these bodies of rules may be applicable in the context of a particular armed conflict, the Court noted that the rules of international humanitarian law could be relevant in order to decide whether the acts alleged by the Parties constituted genocide within the meaning of the Convention.

War Crimes²⁷⁴

War crimes are essentially serious violations of the rules of customary and treaty law concerning international humanitarian law, otherwise known as the law governing armed conflicts.²⁷⁵ Article 2 of the ICTY Statute, by way of example, provides for jurisdiction with regard to:

grave breaches of the Geneva Conventions of 12 August 1949, namely the following acts against persons or property protected under the provisions of the relevant Geneva Convention: (a) wilful killing; (b) torture or inhuman treatment, including biological experiments; (c) wilfully causing great suffering or serious injury to body or health; (d) extensive destruction and appropriation of property, not justified by military necessity and carried out unlawfully and wantonly; (e) compelling a prisoner of war or a civilian to serve in the forces of a hostile power; (f) wilfully depriving a prisoner of war or a civilian of the rights of fair and regular trial; (g) unlawful deportation or transfer or unlawful confinement of a civilian; (h) taking civilians as hostages.

Article 3 provides for jurisdiction for violation of the laws or customs of war. Such violations include, but are not be limited to:

(a) employment of poisonous weapons or other weapons calculated to cause unnecessary suffering; (b) wanton destruction of cities, towns or villages, or devastation not justified by military necessity; (c) attack, or bombardment, by whatever means, of undefended towns, villages, dwellings, or buildings; (d) seizure of, destruction or wilful damage done to institutions dedicated to religion, charity and education, the arts and sciences, historic monuments and works of art and science; (e) plunder of public or private property.²⁷⁶

Accordingly, war crimes are a discrete part of the principles of international humanitarian law, being those which have become accepted as criminal offences for which there is individual responsibility (in addition to state responsibility). Essentially, war crimes law applies to individuals and international humanitarian law to states. There is a long history of provision for individual responsibility for war crimes,²⁷⁷ and article 6(b) of the Nuremberg Charter included war crimes within the jurisdiction of the Tribunal, while the concept of grave breaches of the Geneva Conventions of 1949 recognised certain violations as crimes subject to universal jurisdiction. Traditionally, international humanitarian law has distinguished between

international and non-international armed conflicts, with legal provision being relatively modest with regard to the latter. However, common article 3 to the Geneva Conventions laid down certain minimum standards which were elaborated in Additional Protocol II of 1977.²⁷⁸ In addition, since the conflict in Rwanda was clearly an internal one, the ICTR Statute necessarily provided for individual responsibility for violations of the principles concerning non-international armed conflicts, in effect recognising that common article 3 and Additional Protocol II formed the basis of criminal liability.

The key modern decision has been the *Tadić* case before the ICTY. The Appeals Chamber in the jurisdictional phase of the case noted that an armed conflict existed whenever there was a resort to armed force between states or protracted armed violence between governmental authorities and organised armed groups or between such groups within a state. International humanitarian law applied from the initiation of such armed conflicts and extended beyond the cessation of hostilities until a general conclusion of peace was reached; or, in the case of internal conflicts, a peaceful settlement achieved. Until that moment, international humanitarian law continued to apply in the whole territory of the warring states or, in the case of internal conflicts, the whole territory under the control of a party, whether or not actual combat takes place there.²⁷⁹ The distinction between international and non-international armed conflicts was thus minimised. Although it was noted that international law did not regulate internal conflict in all aspects, it was held to ‘cover such areas as protection of civilians from hostilities, in particular from indiscriminate attacks, protection of civilian objects, in particular cultural property, protection of all those who do not (or no longer) take active part in hostilities, as well as prohibition of means of warfare

proscribed in international armed conflicts and ban of certain methods of conducting hostilities'.²⁸⁰ Further, it was held that individual criminal responsibility existed with regard to violations laid down in customary and treaty law, irrespective of whether the conflict was an international or an internal one.²⁸¹ It was concluded that in order for article 3 of the ICTY Statute to be applicable, the violation had to be 'serious', which meant that it had to constitute a breach of a rule protecting important values, and the breach must involve grave consequences for the victim. In addition, the violation of the rule must entail, under customary or conventional law, the individual criminal responsibility of the person breaching the rule.²⁸²

This *Tadić* judgment can now be taken as reflecting international law and it is to be noted that a significant number of provisions dealing with international conflicts now apply to internal conflicts as laid down in the ICC Statute.²⁸³

The International Criminal Court's first conviction for sexual slavery was in the *Bosco Ntaganda* case, where it was determined that sexual slavery constituted both a crime against humanity and a war crime.²⁸⁴

Crimes against Humanity²⁸⁵

Article 6(c) of the Nuremberg Charter included ‘crimes against humanity’ within the jurisdiction of the Tribunal and these were defined as ‘murder, extermination, enslavement, deportation and other inhumane acts committed against any civilian population, before or during the war, or persecutions on political, racial or religious grounds in execution of or in connection with any crime within the jurisdiction of the Tribunal, whether or not in violation of the law of the country where perpetrated’.²⁸⁶

Article 5 of the ICTY Statute provided for jurisdiction with regard to the following crimes when committed in armed conflict, whether international or internal in character, and directed against any civilian population: ‘(a) murder; (b) extermination; (c) enslavement; (d) deportation; (e) imprisonment; (f) torture; (g) rape; (h) persecutions on political, racial and religious grounds; (i) other inhumane acts’. Article 3 of the ICTR Statute is in similar form, other than that it is specified that the crimes in question (which are the same as those specified in the ICTY Statute) must have been committed as part of a widespread or systematic attack against any civilian population on national, political, ethnic, racial or religious grounds. Article 7 of the ICC Statute notes that the crimes in question (enforced disappearance and apartheid are added to the list appearing in the Statutes of the two international criminal tribunals) have to be committed as part of a widespread or systematic attack directed against any civilian population, with knowledge of the attack.²⁸⁷

Although article 5 of the ICTY Statute did not specifically refer, unlike the other instruments, to the necessity of a widespread or systematic attack as the required framework for the commission of acts amounting to crimes against humanity, this was incorporated into the jurisprudence through the *Tadić* trial Decision of 7 May 1997. This interpreted the phrase ‘directed against any civilian population’ as meaning ‘that the acts must occur on a widespread or systematic basis, that there must be some form of a governmental, organizational or group policy to commit these acts and that the perpetrator must know of the context within which his actions are taken’.²⁸⁸

The requirement of ‘widespread or systematic’ was examined in *Akayesu*, where the Trial Chamber declared that the concept of widespread could be defined as ‘massive, frequent, large scale action, carried out collectively with considerable seriousness and directed against a multiplicity of victims’, while ‘systematic’ could be defined as ‘thoroughly organised and following a regular pattern on the basis of a common policy involving substantial public or private resources’. It was noted that there was no requirement that this policy must be adopted formally as the policy of a state, although there had to be some kind of preconceived plan or policy.²⁸⁹ In *Blaškić*, the ICTY Trial Chamber defined ‘systematic’ in terms of

the existence of a political objective, a plan pursuant to which the attack is perpetrated or an ideology, in the broad sense of the word, that is, to destroy, persecute or weaken a community; the perpetration of a criminal act on a very large scale against a group of

civilians or the repeated and continuous commission of inhumane acts linked to one another; the preparation and use of significant public or private resources, whether military or other, and the implication of high-level political and/or military authorities in the definition and establishment of the methodical plan. The plan, however, need not necessarily be declared expressly or even stated clearly and precisely. It may be surmised from the occurrence of a series of events.²⁹⁰

In *Kunarac*, the ICTY Appeals Chamber held that while proof that the attack was directed against a civilian population and proof that it was widespread or systematic were legal elements of the crime, it was not necessary to show that they were the result of the existence of a policy or plan. The existence of a policy or plan could be evidentially relevant, but it was not a legal element of the crime.²⁹¹ In *Mudacumura*, the ICC Pre-Trial Chamber II held that it must be demonstrated that a state or organisational policy existed which had a civilian population as the *primary object* of the attack.²⁹² As to the nature of the organisation in question, the Chamber emphasised the elements of hierarchical structure and well-defined decision-making processes.²⁹³

Many of the same acts may constitute both war crimes and crimes against humanity, but what is distinctive about the latter is that they do not need to take place during an armed conflict. However, to constitute crimes against humanity the acts in question have to be committed as part of a widespread or

systematic activity, and to be committed against any civilian population, thus any reference to nationality is irrelevant. However, it is important to maintain a clear distinction between civilian and non-civilian in this context. The Trial Chamber in the *Martić* case noted that one could not allow the term ‘civilian’ for the purposes of a crime against humanity to include all persons who were not actively participating in combat, including those who were *hors de combat*, at the time of the crimes, as this would blur the necessary distinction between combatants and non-combatants.²⁹⁴

Of course, any act of genocide by definition will constitute also a crime against humanity, although the reverse is clearly not the case. What is required for crimes against humanity is an ‘attack’ and this has been broadly defined. In the *Akayesu* case, for example, this term was defined as an

unlawful act of the kind enumerated in Article 3(a) to (i) of the Statute, like murder, extermination, enslavement etc. An attack may also be non-violent in nature, like imposing a system of apartheid, which is declared a crime against humanity in Article 1 of the Apartheid Convention of 1973, or exerting pressure on the population to act in a particular manner, may come under the purview of an attack, if orchestrated on a massive scale or in a systematic manner.²⁹⁵

It is also necessary for the alleged perpetrator to be aware that his act was part of a broader attack. The Appeals Chamber in its jurisdiction decision in *Tadić* concluded that to convict an accused of crimes against humanity, it had to be proved that the crimes were related to the attack on a civilian population and that the accused knew that his crimes were so related.²⁹⁶ This is so even if he does not identify with the aims of the attack and his act was committed for personal reasons.²⁹⁷

Aggression²⁹⁸

Aggression is recognised as a crime in customary international law. Article 6 of the Nuremberg Charter defined its jurisdiction as including ‘(a) Crimes against peace. Namely, planning, preparation, initiation, or waging of a war of aggression or a war in violation of international treaties, agreements or assurances, or participation in a common plan or conspiracy for the accomplishment of any of the foregoing’ and a number of defendants were convicted of offences under this head. General Assembly resolution 95(1) affirmed the principles recognised by the Nuremberg Charter and its judgment. Aggression was termed the ‘supreme international crime’ in one of the judgments.²⁹⁹ The Tokyo Charter included the same principle, as did Allied Control Council Law No. 10. General Assembly resolution 3314 (XXIX) of 14 December 1974 contained a definition of aggression in contravention of the Charter.³⁰⁰ The crime of aggression is referred to in article 5 of the ICC Statute, but in no other such instrument. Indeed, article 5(2) provides that the Court cannot exercise jurisdiction over the crime of aggression until a provision is adopted defining the crime and setting out the conditions under which the Court may exercise jurisdiction with regard to it. The delay in achieving this has been caused by several problems. The first is that, unlike the other substantive international crimes, aggression is a crime of ‘leadership’ and necessarily requires that it be determined as an initial point that the state, of whom the accused is a ‘leader’ in some capacity, has committed aggression. This is a wholly different proposition from asserting the responsibility of individuals for genocide, war crimes or crimes against humanity. It is also unclear what differences may exist between the state’s act

of aggression and the individual's crime of aggression. Secondly, article 5(2) of the ICC Statute provides that the conditions for the exercise of the Court's jurisdiction must be consistent with the relevant provisions of the UN Charter. The Security Council has the competence under Chapter VII of the Charter to determine whether an act of aggression has taken place and it has been argued that a prior determination by the Council is necessary before the Court may exercise jurisdiction with regard to individual responsibility for aggression. This has been contested.³⁰¹ At the ICC Review Conference held in Kampala in 2010, amendments to the Statute were adopted,³⁰² which defined the crime of aggression in a new article 8 bis,³⁰³ and laid down jurisdictional conditions.³⁰⁴

⁸⁵ See A/51/22 and A/CONF.183/13 (III), p. 5.

⁸⁶ Article 5. These provisions are further defined in detail in articles 6–8 and see below, p. 362. In addition, article 9 provides for the preparation of Elements of Crimes to assist the Court in the interpretation and application of articles 6, 7 and 8. This was adopted on 9 September 2002 by the Assembly of States Parties, together with the Rules of Procedure and Evidence. However, jurisdiction could not be exercised with regard to the crime of aggression until the Statute had been amended by its definition and the acceptance of conditions for jurisdiction. A review conference was held in Kampala in 2010 and a definition of the crime of aggression agreed, resulting in the insertion of new article 8 *bis* into the Rome Statute. Under new article 15 *ter*, the Court was to have jurisdiction over the crime of aggression one year after the amendment had entered into force for thirty states parties. This jurisdiction was activated on 17 July 2018: see ICC Assembly of States Parties, resolution 5 (14 December 2017) and www.icc-cpi.int/Pages/search-results.aspx?k=aggression. See e.g. D. Akande and A. Tzanakopoulos, ‘Treaty Law and ICC Jurisdiction over the Crime of Aggression’, 29 *EJIL*, 2018, p. 939; T. Dannenbaum, *The Crime of Aggression, Humanity, and the Soldier*, Cambridge, 2018; Y. Dinstein, *War, Aggression and Self-Defence*, 6th ed., 2017, Cambridge, chapter 5; and see further below, p. 374.

⁸⁷ Article 25.

⁸⁸ Article 11. Note, however, that a state may make a declaration under article 12(3) to permit the Court to exercise jurisdiction in the particular case as from 1 July 2002. Note also that under article 124, a state may, upon ratification, decide not to accept the jurisdiction of the ICC over war crimes with regard to its nationals or to crimes committed on its territory for a period of seven years. In fact, only France and Colombia have taken advantage of this provision. In November 2014, the Assembly of States Parties to the Rome Statute adopted an amendment for the deletion of article 124, Res. ICC-ASP/14/Res.2, Assembly of States Parties to the Rome Statute of the International Criminal Court, 14th Session, ICC-ASP/14/20/vol. I, 18–26 November 2015, at 26. See also A. Zimmermann, ‘Finally . . . Or Would Rather Less Have Been More’, 14 *Journal of International Criminal Justice*, 2016, p. 505. As of May 2020, the amendment has been ratified by only fourteen states and is not yet in force, https://treaties.un.org/Pages/ViewDetails.aspx?src=TREATY&mtdsg_no=XVIII-10-c&chapter=18&clang=en.

⁸⁹ Article 12(2).

⁹⁰ Article 13(b).

⁹¹ See www.icc-cpi.int/darfur.

⁹² See ICC-02/05-01/07-2 01-05-2007 1/16 CB PT and ICC-02/05-01/07-3 01-05-2007 1/17 CB PT. The Prosecutor applied for a warrant of arrest against the President of Sudan on 14 July 2008 alleging genocide, war crimes and crimes against humanity, ICC-OTP-20080714-PR341-ENG.

⁹³ On 4 March 2009 and 12 July 2010, see 23rd Report of the Prosecutor to the Security Council Pursuant to Security Council Resolution 1593 (2005), 2016; see www.icc-cpi.int/iccdocs/otp/23-otp-rep-UNSC-darfur_ENG.pdf. President Al-Bashir was overthrown in April 2019 and it has been reported that Sudan's new rulers have agreed to hand him over to the ICC, www.bbc.co.uk/news/world-africa-51462613.

⁹⁴ See www.icc-cpi.int/libya. The warrant against Muammar Gaddafi was terminated upon his death in November 2011. On 9 March 2020, the Appeals Chamber confirmed the admissibility of the case against Saif Gaddafi and stated that Libya was under an obligation to arrest him and surrender him to the Court: see Prosecutor's 19th Report to the Security Council Pursuant to Security Council Resolution 1970 (2011), 2020, www.icc-cpi.int/itemsDocuments/19th-report-icc-otp-UNSC-libya-ENG.pdf.

⁹⁵ Articles 13(a) and 14.

⁹⁶ Article 13(c).

⁹⁷ Article 15. The refusal of the Pre-Trial Chamber to authorise the investigation will not preclude the presentation of a subsequent request by the Prosecutor based on new facts or evidence regarding the same situation. If, after the preliminary examination referred to in paras. 1 and 2, the Prosecutor concludes that the information provided does not constitute a reasonable basis for an investigation, he or she shall inform those who provided the information. This shall not preclude the Prosecutor from considering further information submitted to him or her regarding the same situation in the light of new facts or evidence.

⁹⁸ In July 2004, an investigation was opened by the Prosecutor, and on 8 July 2005, warrants of arrest for crimes against humanity and war crimes against five senior

commanders (one of whom died in 2006) of the Lord's Resistance Army were issued under seal by Pre-Trial Chamber II. One member of the LRA surrendered himself in January 2015 and his trial is at the time of writing ongoing; see www.icc-cpi.int/uganda.

99 See ICC-OTP-20040419-50-En. An investigation was opened in June 2004, the first such investigation by the Prosecutor: see ICC-OTP-20040623-59-En. An arrest warrant was issued in early 2006 against Thomas Lubanga Dyilo, who was convicted on 14 March 2012 and sentenced to fourteen years. The verdict and sentence were confirmed on appeal on 1 December 2014. Reparations proceedings are continuing; see www.icc-cpi.int/drc. An arrest warrant was issued against Germain Katanga and Mathieu Ngudjolo Chui in July 2007 and, upon trial, the charges were severed and the latter acquitted (the verdict being upheld on appeal on 27 February 2015), while the former was convicted on 7 March 2014 (the appeal was withdrawn). A further accused (Mbarushimana) was released, while on 8 July 2019, Bosco Ntaganda was found guilty by the Trial Chamber; see www.icc-cpi.int/drc.

100 An investigation was opened by the Prosecutor in May 2007 and an arrest warrant issued. Jean-Pierre Bemba Gombo was convicted on 21 March 2016, but acquitted on 8 June 2018 of charges of war crimes and crimes against humanity. However, he (and others) were convicted in 2016–17 of charges against the administration of justice and sentenced in 2018; see www.icc-cpi.int/car.

101 Two persons were transferred to the Court and proceedings are underway; see www.icc-cpi.int/carII.

102 Ahmad Al Faqi Al Mahdi was convicted and sentenced, while Al Hassan is facing trial; see www.icc-cpi.int/mali.

103 Charges against a number of individuals (including Uhuru Kenyatta, the current President of Kenya) were withdrawn in 2011 or were not confirmed in 2012, arrest warrants have been issued in other cases, but they are not in the Court's custody so cannot be tried; see www.icc-cpi.int/kenya.

104 Côte d'Ivoire had accepted the jurisdiction of the ICC under article 12(3) of the Statute on 18 April 2003 (reconfirmed in December 2010 and in May 2011) even though it only became a party to the Rome Statute on 15 February 2011. Pre-Trial Chamber III granted on 3 October 2011 the Prosecutor's request for authorisation to open investigations *proprio*

motu into alleged crimes committed in that country as from November 2010. The following year, the investigation was extended to cover alleged crimes committed between September 2002 and November 2010. A warrant of arrest was issued against Laurent Gbagbo, who was transferred to the Court in November 2011 and he and another person were acquitted on 15 January 2019. A warrant of arrest has been issued against Simone Gbagbo, who is not currently in the Court's custody: see www.icc-cpi.int/cdi.

¹⁰⁵ See www.icc-cpi.int/georgia.

¹⁰⁶ See www.icc-cpi.int/burundi.

¹⁰⁷ The investigation concerns alleged crimes under the jurisdiction of the Court 'in which at least one element occurred on the territory' of Bangladesh, a state party to the Rome Statute; www.icc-cpi.int/bangladesh-myanmar. This, of course, raises interesting questions as to jurisdiction and the applicable place of commission of the alleged crimes since Myanmar is not a state party to the Statute.

¹⁰⁸ The Appeals Chamber on 5 March 2020 overturned a decision of the Pre-Trial Chamber and found that the Prosecutor was authorised to investigate crimes alleged to have been committed on the territory of Afghanistan since 1 May 2003, as well as other alleged crimes that have a nexus to the armed conflict in Afghanistan and are sufficiently linked to the situation in Afghanistan and were committed on the territory of other states parties to the Rome Statute since 1 July 2002; see www.icc-cpi.int/afghanistan.

¹⁰⁹ See www.icc-cpi.int/pages/pe.aspx.

¹¹⁰ On 6 November 2013, the Prosecutor held that the requirements for opening an investigation into the situation had not been met. On 16 July 2015, following a request for review by the government of the Comoros, Pre-Trial Chamber I requested the Prosecutor to reconsider her decision. On 6 November 2015, the Appeals Chamber of the Court decided by majority to dismiss without discussing its merits, the Prosecutor's appeal against the Decision of the Pre-Trial Chamber. On 29 November 2017, the Prosecutor notified the Chamber of her 'final decision', as required by rule 108(3), which was that the information available did not provide a reasonable basis to proceed with an investigation; see www.icc-cpi.int/comoros/Pages/default.aspx.

¹¹¹ As to Palestine, whose statehood is internationally controversial, see further [Chapter 5](#), p. 215. There were a considerable number of *amicus curiae* interventions on this point; see generally www.icc-cpi.int/palestine.

¹¹² See Security Council resolution 1422 (2002) calling for the ICC to defer any exercise of jurisdiction for twelve months if a case arises involving current or former officials or personnel from a contributing state not a party to the Rome Statute over acts or omissions relating to a UN established or authorised operation. This was renewed for a further twelve months in resolution 1487 (2003), but not subsequently: see e.g. D. McGoldrick, ‘Political and Legal Responses to the ICC’, in McGoldrick *et al.*, *Permanent International Criminal Court*, p. 415. However, resolutions 1497 (2003) and 1593 (2005) provide that personnel from a state not a party to the Rome Statute will be subject to the exclusive jurisdiction of that state for all acts related to the multinational force or UN force in Liberia and Darfur respectively. See also C. C. Jalloh, D. Akande and M. du Plessis, ‘Assessing the African Union Concerns about Article 16 of the Rome Statute of the International Criminal Court’, 4 *African Journal of Legal Studies*, 2011, p. 5.

¹¹³ See e.g. Cryer *et al.*, *Introduction to International Criminal Law*, pp. 165–7; M. Benzing, ‘US Bilateral Non-Surrender Agreements and Article 98 of the Statute of the International Criminal Court’, 8 *Max Planck Yearbook of United Nations Law*, 2004, p. 182; and Schabas, *International Criminal Court*, pp. 1349 ff.

¹¹⁴ See e.g. *The International Criminal Court and Africa* (ed. C. C. Jalloh and I. Bantekas), Oxford, 2017; and Cryer *et al.*, *Introduction to International Criminal Law*, pp. 167–9. Burundi withdrew from the Court in 2017. The Gambia subsequently withdrew its initial withdrawal, see C.N. 62.2017.TREATIES – XVIII.10 (depositary notification) and South Africa’s withdrawal was ended, at least temporarily by a constitutional problem; see *Democratic Alliance v. Minister of International Relations and Cooperation and Others*, Case No. 83145/2016, High Court of South Africa, Judgment of 22 February 2017. Note also that the Philippines withdrew as from 19 March 2019, www.icc-cpi.int/Pages/item.aspx?name=pr1371, and Malaysia announced its withdrawal from the Statute shortly after acceding to it, www.coalitionfortheicc.org/news/20190412/malaysia-backtracks-accession-rome-statute.

¹¹⁵ Article 17; and see https://asp.icc-cpi.int/en_menus/asp/complementarity/List-of-Actors/Pages/default.aspx. See also *Thomas Lubanga Dyilo*, Case No. ICC-01/04-01/06,

Decision on the Prosecutor's Application for a Warrant of Arrest, 10 February 2006; and Schabas, *International Criminal Court*, pp. 453 ff. Note also K. J. Heller, 'Radical Complementarity', **14** *Journal of International Criminal Justice*, 2016, p. 637; C. Stahn, 'Libya, the International Criminal Court and Complementarity', **10** *Journal of International Criminal Justice*, 2012, p. 325; P. Seils, 'Putting Complementarity in Its Place', in Stahn, *Law and Practice of the ICC*, p. 305; S. M. Nouwen, *Complementarity in the Line of Fire: The Catalysing Effect of the International Criminal Court in Uganda and Sudan*, Cambridge, 2013; M. Tedeschi, 'Complementarity in Practice: The ICC's Inconsistent Approach in the *Gaddafi* and *Al-Senussi* Admissibility Decisions', **7** *Amsterdam Law Forum*, 2015, p. 76.

116 In order to determine this, the Court must consider whether the proceedings were being undertaken or the decision made in order to shield the person concerned from criminal responsibility for crimes within the jurisdiction of the ICC; whether there has been an unjustified delay in the proceedings, and whether the proceedings have been conducted independently or impartially: article 17(2)(a)–(c).

117 In order to determine this, the Court must consider whether, due to a total or substantial collapse or unavailability of its national judicial system, the state is unable to obtain the accused or the necessary evidence and testimony or is otherwise unable to carry out its proceedings: article 17(3).

118 Article 20(3).

119 See Appeals Chamber judgment in *Kenyatta*, Case No. ICC-01/09-02/11 OA, ICC, Judgment of 30 August 2011, para. 40.

120 Case No. ICC-02/11-01/12 OA, Appeals Chamber, Judgment of 27 May 2015, paras. 128, 122. The Appeals Chamber also confirmed that the expression 'the case is being investigated' in article 17(1)(a) required the 'taking of steps' directed at ascertaining whether the person is responsible for the alleged conduct. These may include 'interviewing witnesses or suspects, collecting documentary evidence, or carrying out forensic analyses', paras. 27–8. See also Heller, 'Radical Complementarity'.

121 Case No. ICC-01/09-02/11 OA, ICC, Judgment of 30 August 2011, para. 39.

¹²² Case No. ICC-01/11-01/11 OA 4, ICC, Judgment of 21 May 2014, paras. 71–2. Emphasis in the original. See also the *Al-Senussi* admissibility case, Case No. ICC-01/11-01/11, ICC, Appeals Chamber, Judgment of 11 October 2013, paras. 74–5.

¹²³ Articles 17(1)(d) and 53(1)(c). See also e.g. Cryer *et al.*, *Introduction to International Criminal Law*, pp. 161–2.

¹²⁴ Office of the Prosecutor, Report on Preliminary Examination Activities, 2019, paras. 7, 171, and, giving the example of the Rohingya in Bangladesh/Myanmar (‘in view of the scale of the alleged crimes and the number of approximately 600,000 to one million Rohingya victims allegedly forcibly displaced from Myanmar to Bangladesh’), para. 299.

¹²⁵ Office of the Prosecutor, Report on Preliminary Examination Activities, 2019, para. 8. Note that Pre-Trial Chamber I concluded, in the context of the Bangladesh/Myanmar situation, that the ICC has objective international personality, although this did not imply *erga omnes* jurisdiction; *Decision on the Prosecution’s Request for a Ruling on Jurisdiction under Article 19(3) of the Statute*, Case No. ICC-RoC46(3)-01/18, Judgment of 6 September 2018, paras. 34 ff.

¹²⁶ Article 34.

¹²⁷ Article 40. Note that a plenary of the judges decided that the position of ambassador was not incompatible with the requirements of judicial independence in the case of a judge wishing to move from a full-time to a non-full-time status, ICC-01/04-02/06, 19 March 2019.

146 Article 1(2) of the Statute of the Special Court for Sierra Leone.

147 Note that with the conclusion of the Charles Taylor trial, the functions of Trial Chamber II came to an end: see Ninth Annual Report of the Special Court for Sierra Leone, 2011–12.

148 Article 12(1). Eight judges were appointed in July 2002: see UN Press Release SG/A/813.

149 Article 20. Under article 21, the convicted person or the Prosecutor may apply to the Appeals Chamber for review where a new fact has been discovered which was not known at the time of the proceedings before the Trial Chamber or Appeals Chamber and which could have been a decisive factor in reaching the decision. The Appeals Chamber may reject the application, reconvene the Trial Chamber or retain jurisdiction over the matter.

150 Article 15.

151 Article 16.

152 Articles 2–4 of the Statute.

153 Article 5 of the Statute. These crimes relate to offences relating to the abuse of girls under the Prevention of Cruelty to Children Act 1926 and offences relating to the wanton destruction of property under the Malicious Damages Act 1861. However, the Special Court has no jurisdiction with regard to any person under the age of 15 at the time of the alleged commission of the crime. No person may be tried before a national court of Sierra Leone for acts for which he or she has already been tried by the Special Court. But a person who has been tried by a national court for the acts referred to in articles 2–4 of the Statute may be subsequently tried by the Special Court if either the act for which he or she was tried was characterised as an ordinary crime; or the national court proceedings were not impartial or independent, or were designed to shield the accused from international criminal responsibility or the case was not diligently prosecuted: see article 9.

154 See www.rscsl.org/Taylor.html.

155 *Ibid.*

156 See www.rscsl.org/AFRC.html.

157 See www.rscsl.org/CDF_Trial_Chamber_Decisions.html. See also S. M. Meisenberg, ‘Legality of Amnesties in International Humanitarian Law: The Lomé Decision of the Special Court for Sierra Leone’, **86** *International Review of the Red Cross*, 2004, p. 837.

158 See A/59/816 – S/2005/350.

159 In December 2011, the Sierra Leone Parliament passed the Residual Special Court for Sierra Leone Agreement (Ratification) Act, ratifying an agreement between the UN and Sierra Leone, dated 11 August 2010, on the establishment of the Residual Special Court to continue the work of the Special Court. It became law on 1 February 2012. Annexed to this is the Statute of the Residual Special Court: see www.rscsl.org/Documents/RSCSL-Act.pdf.

160 Articles 13–16 of the Statute of the Residual Special Court.

161 See General Assembly resolutions 57/228A and 57/228B and A/57/806. See also J. D. Ciorciari and A. Jørgensen, *The Elgar Companion to the Extraordinary Chambers in the Courts of Cambodia*, Cheltenham, 2018; R. Williams, ‘The Cambodian Extraordinary Chambers: A Dangerous Precedent for International Justice?’, **53 ICLQ**, 2004, p. 227; G. Acquaviva, ‘New Paths in International Criminal Justice? The Internal Rules of the Cambodian Extraordinary Chambers’, **6 Journal of International Criminal Justice**, 2008, p. 129; C. Etcheson, ‘The Politics of Genocide Justice in Cambodia’ and E. E. Meijer, ‘The Extraordinary Chambers in the Courts of Cambodia for Prosecuting Crimes Committed by the Khmer Rouge: Jurisdiction, Organization and Procedure of an Internationalized Tribunal’, in Romano *et al.*, *Internationalized Criminal Courts*, pp. 181, 207 respectively; Cryer *et al.*, *Introduction to International Criminal Law*, p. 185; and B. N. McGonigle, ‘Two for the Price of One’, **22 Leiden Journal of International Law**, 2009, p. 127. See also www.eccc.gov.kh/en.

162 Article 3 of the Agreement. The Secretary-General nominated seven judges in March 2006 and the Supreme Council of Magistracy approved a list of thirty Cambodian and international judges in May that year to be followed by appointment by Royal Decree. The judges were duly sworn in in July 2006 and Internal Rules were adopted in June 2007 and revised, most recently on 16 January 2015.

163 Article 5.

164 Article 6. In the case of both the co-investigating judges and co-prosecutors, the UN Secretary-General was to make two nominations out of which the Supreme Council of Magistracy was to choose one international investigating judge and one international prosecutor. Any differences between the two co-investigating judges and the two co-prosecutors are to be settled by a Pre-Trial Chamber of five judges, three appointed by the Supreme Council of the Magistracy, with one as President, and two appointed by the Supreme Council of the Magistracy upon nomination by the Secretary-General: see article 7.

165 Article 9.

166 Article 12.

¹⁶⁷ Case File No. 001/18-07-2007-ECCC/OCIJ. See also Annual Report 2007, p. 11.

¹⁶⁸ See www.eccc.gov.kh/en/featured/kaing-guek-eav-alias-duch-sentenced-life-imprisonment-supreme-court-chamber. Note that the Supreme Court partially confirmed and amended the Trial Chamber Judgment as well as overturning the decision on sentencing. Subsequently, he has been found guilty pursuant to Articles 5, 6 and 29 (new) of the ECCC Law of a number of crimes against humanity and grave breaches of the Geneva Conventions, *ibid*.

¹⁶⁹ See www.eccc.gov.kh/en/who-has-been-prosecuted. See also e.g. Cryer *et al.*, *Introduction to International Criminal Law*, pp. 179–83, detailing various criticisms of the Court.

213 Order No. 48.

214 The dates reflect the commencement of the Ba’ath party control of Iraq and the end of the Saddam Hussein regime.

215 Articles 1 and 11–14 of the Statute of the Tribunal.

216 Article 15.

217 See e.g. J. Trahan, ‘A Critical Guide to the Iraqi High Tribunal’s Anfal Judgment’, 30 *Michigan Journal of International Law*, 2009, p. 305; N. Bhuta, ‘Fatal Errors: The Trial and Appeal Judgments in the *Dujail* Case’, 6 *Journal of International Criminal Justice*, 2008, p. 39; M. P. Scharf and M. A. Newton, ‘The Iraq High Tribunal’s *Dujail* Trial Opinion’, *ASIL Insight*, 18 December 2006; and Human Rights Watch report on the *Dujail* trial, www.hrw.org/reports/iraq1106webwcover.pdf <http://hrw.org/english/docs/2007/06/22/iraq16230.htm>.

²¹⁸ The War Crimes Chamber's first trial, the *Ovcara* case, began on 9 March 2004. As of 2006, three trials had been completed and three others were ongoing: see Human Rights Watch, *Unfinished Business: Serbia's War Crimes Chamber*, 2007, pp. 1 ff. See also Cryer *et al.*, *Introduction to International Criminal Law*, pp. 194–5; M. Ellis, 'Coming to Terms with its Past: Serbia's New Court for the Prosecution of War Crimes', 22 *Berkeley Journal of International Law*, 2004, p. 165. See also www.icty.org/en/outreach/capacity-building/development-local-judiciaries.

²¹⁹ Cryer *et al.*, *Introduction to International Criminal Law*, p. 195; see e.g. Vladimir Kovačević, ICTY Referral Bench, 2006.

²²⁰ See also the Special Criminal Court in the Central African Republic, established in 2015, and staffed by national and international prosecutors and judges, with logistical and technical support from the [UN peacekeeping mission](#) in that country. It is a national court with primacy over other domestic courts with regard to grave violations of human rights and international humanitarian law. The inaugural session took place in October 2018; see P. Labuda, 'Open for Business', EJIL: Talk!, 8 February 2019; and Cryer *et al.*, *Introduction to International Criminal Law*, pp. 197–8. See also the African Court of Justice and Human Rights, which has a criminal jurisdiction, above, p. 326.

²²¹ However, note the case brought by The Gambia against Myanmar before the ICJ, Provisional Measures, Order of 23 January 2020, alleging violations of the Genocide Convention; and see General Assembly resolution 71/248 adopted on 21 December 2016 establishing the International, Impartial and Independent Mechanism to assist in the investigation and prosecution of persons responsible for the most serious crimes under International Law committed in the Syrian Arab Republic since March 2011. Its mandate is to 'collect, consolidate, preserve and analyse evidence of violations of international humanitarian law and human rights violations and abuses and to prepare files in order to facilitate and expedite fair and independent criminal proceedings, in accordance with international law standards, in national, regional or international courts or tribunals that have or may in the future have jurisdiction over these crimes, in accordance with international law', see <https://iiim.un.org/>.

²²² See e.g. Ambos, *Treatise on International Criminal Law*, vol. II. Note, among a number of relevant issues that cannot be covered in this work, the principle of command responsibility, whereby a superior is criminally responsible for acts committed by subordinates that he knew or had reason to know had been or were about to be committed

and no action was taken: see e.g. G. Mettraux, *The Law of Command Responsibility*, Oxford, 2009; Green, *Armed Conflict*, pp. 303–4; I. Bantekas, ‘The Contemporary Law of Superior Responsibility’, **93** *AJIL*, 1999, p. 573; Cryer *et al.*, *Introduction to International Criminal Law and Practice*, p. 384; and O’ Keefe, *International Criminal Law*, p. 201. See also article 87 of Additional Protocol I 1977; article 7(3) of the ICTY Statute 1993; article 6(3) of the ICTR Statute 1994; and article 28 of the ICC Statute 1998. Note *Čelebići Camp*, Case No. IT-96-21, ICTY, Trial Chamber, Judgment of 16 November 1998, paras. 370 ff.; *Krnjela*, Case No. IT-97-25-A, ICTY, Judgment of 17 September 2003; and *Blagojević*, Case No. IT-02-60-A, 2007. Further, military necessity may not be pleaded as a defence, see e.g. *Re Lewinski (called von Manstein)* 16 AD, p. 509, and the claim of superior orders will not provide a defence, although it may be taken in mitigation depending upon the circumstances: see e.g. Green, *Armed Conflict*, pp. 305–7; Green, *Superior Orders in National and International Law*, Leiden, 1976; Cryer *et al.*, *Introduction to International Criminal Law and Practice*, p. 411; and Y. Dinstein, *The Defence of ‘Obedience to Superior Orders’ in International Law*, Leiden, 1965. See also article 8 of the Nuremberg Charter, 39 *AJIL*, 1945, Supp., p. 259; Principle IV of the International Law Commission’s Report on the Principles of the Nuremberg Tribunal 1950, *Yearbook of the ILC*, 1950, vol. **II**, p. 195; article 7(4) of the ICTY Statute 1993; article 6(4) of the ICTR Statute 1994; and article 33 of the ICC Statute.

²²³ See e.g. W. Schabas, *Genocide in International Law*, 2nd ed., Cambridge, 2009; P. Akhavan, *Reducing Genocide to Law: Definition, Meaning and the Ultimate Crime*, Cambridge, 2015; N. Robinson, *The Genocide Convention*, London, 1960; R. Lemkin, *Axis Rule in Occupied Europe*, London, 1944; *The UN Genocide Convention: A Commentary* (ed. P. Kreß, ‘The ICC’s First Encounter with Crime of Genocide’, in Stahn, *Law and Practice of the ICC*, p. 669; and G. Verdirame, ‘The Genocide Definition in the Jurisprudence of the *Ad Hoc* Tribunals’, **49 ICLQ**, 2000, p. 578.

224 But see Sub-Commission resolution 1994/11.

225 See Kuper, *Genocide*, pp. 32–5; and N. Lewis, ‘The Camp at Cecilio Baez’, in *Genocide in Paraguay* (ed. R. Arens), Philadelphia, 1976, p. 58. See also Ruhashyankiko, *Study*, p. 25.

226 See e.g. Kuper, *Genocide*, pp. 25–30; and Ruhashyankiko, *Study*, p. 21. See also Robinson, *Genocide Convention*, p. 59.

227 See e.g. Kuper, *Genocide*, p. 31; Robinson, *Genocide Convention*, p. 64; and Ruhashyankiko, *Study*, pp. 21 ff.

228 See further generally below, [Chapter 13](#).

229 ICJ Reports, 1993, pp. 3, 16, 23; 95 ILR, pp. 1, 31. See also R. Maison, ‘Les Ordonnances de la CIJ dans l’Affaire Relative à l’Application de la Convention sur la Prévention et la Répression du Crime du Génocide’, **5 EJIL**, 1994, p. 381.

230 ICJ Reports, 1951, pp. 15, 23; 18 ILR, pp. 364, 370, quoting the terms of General Assembly resolution 96(I) of 11 December 1946.

231 The government of Yugoslavia (Serbia and Montenegro) was requested to take all measures within its power to prevent commission of the crime of genocide, and was specifically called upon to ensure that ‘any military, paramilitary or irregular armed units which may be directed or supported by it, as well as any organisations and persons which may be subject to its control, direction or influence, do not commit any acts of genocide’, ICJ Reports, 1993, pp. 3, 24; 95 ILR, pp. 1, 39. These provisional measures were reaffirmed by the Court in its Order on Provisional Measures of 13 September 1993 as measures which should be ‘immediately and effectively implemented’, ICJ Reports, 1993, pp. 325, 350; 95 ILR, pp. 43, 68. See also the Separate Opinion of Judge Lauterpacht, ICJ Reports, 1993, pp. 407, 431–2; 95 ILR, pp. 125, 149–50. Yugoslavia introduced an application in April 2001 for revision of the 1996 judgment on the basis that a ‘new fact’

had appeared since that state had become a new member of the UN during 2000. This was rejected by the Court, ICJ Reports, 2003, p. 7. See further below, [Chapter 18](#), p. 957.

²³² Now so called, rather than the former Yugoslavia (Serbia and Montenegro), as from, and in consequence of, the Dayton Peace Agreement initialled at Dayton, US, on 11 November 1995 and signed in Paris on 14 December 1995.

²³³ ICJ Reports, 1996, pp. 595, 615; 115 ILR, p. 1.

²³⁴ ICJ Reports, 1996, p. 616.

²³⁵ *Ibid.*, p. 617. See also the *Legality of the Threat or Use of Nuclear Weapons*, ICJ Reports, 1996, pp. 226, 240; 110 ILR, p. 163. Yugoslavia subsequently withdrew the counter-claims it had introduced against Bosnia: ICJ, Order of 10 September 2001.

²³⁶ ICJ Reports, 2007, paras. 161–7. See also *Congo v. Rwanda*, ICJ Reports, 2006, pp. 6, 31–2, where the Court noted that the rights and obligations in the Genocide Convention were rights and obligations *erga omnes* and stated that the prohibition of genocide was ‘assuredly’ a norm of *jus cogens*.

²³⁷ ICJ Reports, 2007, pp. 43, 119–20. See also *Croatia v. Serbia*, ICJ Reports, 2015, pp. 3, 61.

²³⁸ *Application of the Genocide Convention*, p. 120.

²³⁹ *Ibid.*, pp. 124–5. The Court noted in *Croatia v. Serbia*, ICJ Reports, 2015, pp. 3, 64: ‘Since it is the group, in whole or in part, which is the object of the genocidal intent, the Court is of the view that it is difficult to establish such intent on the basis of isolated acts. It considers that, in the absence of direct proof, there must be evidence of acts on a scale that establishes an intent not only to target certain individuals because of their membership of a particular group, but also to destroy the group itself in whole or in part.’

²⁴⁰ *Ibid.*, pp. 126–7. The Court in *Croatia v. Serbia*, ICJ Reports, 2015, pp. 3, 65, reaffirmed this, but noted that ‘[a]ccount must also be taken of the prominence of the allegedly targeted part within the group as a whole. With respect to this criterion, the ICTY Appeals Chamber specified in its Judgment rendered in the *Krstić* case that “[i]f a specific part of the group is emblematic of the overall group, or is essential to its survival, that may

support a finding that the part qualifies as substantial within the meaning of Article 4 [of the ICTY Statute, paragraph 2 of which essentially reproduces Article II of the Convention]” (Case No. IT-98-33-A, Judgment of 19 April 2004, para. 12)’.

²⁴¹ *Application of the Genocide Convention (Bosnia and Herzegovina v. Serbia and Montenegro)* (Merits), ICJ Reports, 2007, p. 155. The Court accepted the possibility that genocidal intent could be established indirectly by reference, *ibid.*, pp. 196–7, and in *Croatia v. Serbia*, it noted that this meant that ‘in order to infer the existence of *dolus specialis* from a pattern of conduct, it is necessary and sufficient that this is the only inference that could reasonably be drawn from the acts in question’, pp. 3, 67.

²⁴² *Application of the Genocide Convention (Bosnia and Herzegovina v. Serbia and Montenegro)* (Merits), ICJ Reports, 2007, pp. 181–2, 190, 194–5, 198.

²⁴³ *Ibid.*, pp. 15–66.

²⁴⁴ *Ibid.*, pp. 128–9 and see also p. 175.

²⁴⁵ *Ibid.*, pp. 219–20.

²⁴⁶ *Ibid.*, p. 221.

²⁴⁷ *Ibid.*, pp. 221–2.

²⁴⁸ *Ibid.*

²⁴⁹ *Ibid.*, p. 229. Note the appointment of the UN Special Adviser on the Prevention of Genocide commencing in 2004, www.un.org/en/preventgenocide/adviser/.

²⁵⁰ See e.g. Cryer *et al.*, *Introduction to International Criminal Law*, chapter 10; Werle and Jeßberger, *Principles of International Criminal Law*, part 3; and Cassese’s *International Criminal Law* (ed. A. Cassese and P. Gaeta), 3rd ed., Oxford, 2013, chapter 6. See also Human Rights Watch, *Genocide, War Crimes and Crimes Against Humanity: A Digest of the Case Law of the International Criminal Tribunal for Rwanda*, 2010, chapter 1. Note also *Vasiliauskas v. Lithuania*, ECtHR, Judgment of 20 October 2015, paras. 170 ff., reaffirming the definition of genocide as contained in the 1948 Convention, particularly noting the absence of political groups among the list of target groups and concluding in

para. 175 that ‘there is no sufficiently strong basis for finding that customary international law as it stood in 1953 included “political groups” among those falling within the definition of genocide’. See now *Drélingas v. Lithuania*, ECtHR, Judgment of 12 March 2019, paras. 96 ff. Note also the Report of the Independent Fact-Finding Mission on Myanmar, A/HRC/39/64, 12 September 2018 and the resolution of the Human Rights Council, A/HRC/39/L.22, 25 September 2018, establishing an ongoing independent mechanism to collect, preserve and analyse evidence of the most serious international crimes committed in Myanmar since 2011.

²⁵¹ See also article 2 of the ICTR Statute and article 6 of the ICC Statute, which repeats article 4(2). See also ICC Elements of Crimes, 2011, which adds a further material element so that with regard to each prohibited act, the element requires that ‘[t]he conduct takes place in the context of a manifest pattern of similar conduct directed against that group or was conduct that could itself effect such destruction’.

²⁵² Case No. IT-95-10, para. 66.

²⁵³ Case No. ICTR-96-4-T, 1998, para. 498.

²⁵⁴ *Ibid.*, para. 523. See also *Kayishema and Ruzindana*, Case No. ICTR-95-1-T, 1999, paras. 7 ff.; and *Musema*, Case No. ICTR-96-13-T, 2000, paras. 884 ff.

²⁵⁵ Case No. ICTR-97-32-I, 2000, para. 14.

²⁵⁶ Case No. IT-95-10, paras. 100–1.

²⁵⁷ Case No. IT-98-33-T, 2001, para. 589. See also *Croatia v. Serbia*, ICJ Reports, 2015, p3, 65.

²⁵⁸ *Krstić*, para. 590.

²⁵⁹ Case No. IT-98-33-A, 2004, para. 8.

²⁶⁰ *Ibid.*, para. 12. In *Vasiliauskas v. Lithuania*, ECtHR, Judgment of 20 October 2015, the Court reaffirmed subsequent case-law that ‘the intentional destruction of a “distinct” part of the protected group could be considered as genocide of the entire protected group, provided that the “distinct” part was substantial because of the very large number of its members.

Furthermore, in addition to the numerical size of the targeted part, judicial interpretation confirmed that its “prominence” within the protected group could also be a useful consideration’, para. 177.

²⁶¹ *Krstić*, para. 134. See also *Mladić*, Case No. IT-09-92-T, ICTY, Judgment of 22 November 2017, paras. 3432 ff. In particular, it was held that where only a part of a group was targeted, that part must be a substantial part of that group such that it is significant enough to have an impact on the group as a whole. In determining substantiality, considerations may include: the relative numerical size of the targeted part, the prominence of that part of the group within the larger whole, and the area of the perpetrators’ activity and control, *ibid.*, para. 3437.

²⁶² *Krstić*, para. 25.

²⁶³ Case No. ICTR-96-4-T, 1998, paras. 511 ff.

²⁶⁴ In *Kayishema and Ruzindana*, Case No. ICTR-95-1-T, 1999, paras. 522 ff., the Trial Chamber emphasised the importance of the designation contained in identity cards.

²⁶⁵ See *Rutaganda*, Case No. ICTR-96-3-T, 1999, paras. 55 ff. See also *Bagilishima*, Case No. ICTR-95-1A-T, 2001, para. 65, where the Trial Chamber concluded that ‘if a victim was perceived by a perpetrator as belonging to a protected group, the victim could be considered by the Chamber as a member of the protected group, for the purposes of genocide’. See also the Report of the UN Commission of Inquiry on Darfur, S/2005/60, paras. 500 ff.

²⁶⁶ See e.g. *Stakić*, Case No. IT-97-24-T, 2003, para. 515.

²⁶⁷ See e.g. *Eichmann* 36 ILR, p. 5; and *Brdjanin*, Case No. IT-99-36-T, 2004, para. 118. See also the *Blagojević* case, where, in addition, the ICTY Appeals Chamber held that awareness of facts related to the forcible transfer operation was insufficient to prove complicity in genocide in the absence of knowledge of mass killings at Srebrenica, Case No. IT-02-60-A, 2007, paras. 119 ff.

²⁶⁸ See e.g. *Review of the Indictments Concerning Karadžić and Mladić Pursuant to Rule 61 of the Rules of Procedure and Evidence*, ICTY, Case Nos. IT-95-5-R61 and IT-95-18-R61, Judgment of 11 July 1996, para. 94, 108 ILR, pp. 134–5. See also ad hoc Judge

Lauterpacht's Separate Opinion in *Application of the Genocide Convention*, ICJ Reports, 1993, pp. 325, 431–2, and the ICC Elements of Crimes, article 6(c), footnote 4, UN Doc. PCNICC/2000/1/Add.2 (2000).

²⁶⁹ Case No. ICTR-96-4-T, para. 731.

²⁷⁰ *Ibid.*, paras. 507–8.

²⁷¹ *Kambanda*, Case No. ICTR-97-23-S, 1998, paras. 39–40.

²⁷² President Al-Bashir was overthrown in April 2019 and it has been reported that Sudan's new rulers have agreed to hand him over to the ICC; see www.bbc.co.uk/news/world-africa-51462613 and generally www.icc-cpi.int/darfur. See also *Popović*, Case No. IT-05-88-A, Appeals Chamber, Judgment of 30 January 2015, particularly paras. 1065 ff. concerning the complex joint criminal enterprise doctrine in this context.

²⁷³ ICJ Reports, 2015, pp. 3, 68. See also [Chapter 20](#).

²⁷⁴ See e.g. Cryer *et al.*, *Introduction to International Criminal Law*, chapter 12; O'Keefe, *International Criminal Law*, chapter 4(III); M. A. Newton, 'Charging War Crimes: Policy and Prognosis from a Military Perspective', in Stahn, *Law and Practice of the ICC*, p. 732; and Cassese's *International Criminal Law*, chapter 4. See also Human Rights Watch, *Genocide, War Crimes and Crimes Against Humanity: A Digest of the Case Law of the International Criminal Tribunal for Rwanda*, 2010, chapter 3.

²⁷⁵ See further as to international humanitarian law, below, [Chapter 20](#).

²⁷⁶ See article 8 of the ICC Statute, which is exhaustive rather than illustrative in its exposition of fifty offences and is divided into sections dealing with: grave breaches of the Geneva Conventions of 12 August 1949; other serious violations of the laws and customs applicable in international armed conflict, within the established framework of international law; in the case of an armed conflict not of an international character, serious violations of article 3 common to the four Geneva Conventions of 12 August 1949 and other serious violations of the laws and customs applicable in armed conflicts not of an international character, within the established framework of international law. Note in particular article 8(2)(b)(xxii): rape, sexual slavery, enforced prostitution and any other

form of sexual violence were deemed to constitute grave breaches of the Geneva Convention and thus war crimes. In addition, article 8(2)(b)(viii) differs from article 49 of Geneva Convention IV in that it adds a key phrase to the definition, so that the former provision reads: ‘The transfer, directly *or indirectly*, by the Occupying Power of parts of its own civilian population into the territory it occupies, or the deportation or transfer of all or parts of the population of the occupied territory within or outside this territory’ (the added phrase is emphasised; to this extent it cannot be regarded as reflective of customary international law). Note also the ICC Elements of Crimes. See also article 4 of the ICTR Statute concerning violations of article 3 common to the Geneva Conventions 1949 and of Additional Protocol II 1977; article 3 of the Statute of the Special Court for Sierra Leone and article 14 of the Statute of the Iraqi High Tribunal.

302 See e.g. A. Zimmermann, ‘Amending the Amendment Provisions of the Rome Statute: The Kampala Compromise on the Crime of Aggression and the Law of Treaties’, **10** *Journal of International Criminal Justice*, 2012, p. 209.

303 This states that: ‘1. For the purpose of this Statute, “crime of aggression” means the planning, preparation, initiation or execution, by a person in a position effectively to exercise control over or to direct the political or military action of a State, of an act of aggression which, by its character, gravity and scale, constitutes a manifest violation of the Charter of the United Nations.

2. For the purpose of paragraph 1, “act of aggression” means the use of armed force by a State against the sovereignty, territorial integrity or political independence of another State, or in any other manner inconsistent with the Charter of the United Nations. Any of the following acts, regardless of a declaration of war, shall, in accordance with United Nations General Assembly resolution 3314 (XXIX) of 14 December 1974, qualify as an act of aggression:

The invasion or attack by the armed forces of a State of the territory of another State, or any military occupation, however temporary, resulting from such invasion or attack, or any annexation by the use of force of the territory of another State or part thereof;

Bombardment by the armed forces of a State against the territory of another State or the use of any weapons by a State against the territory of another State;

The blockade of the ports or coasts of a State by the armed forces of another State;

An attack by the armed forces of a State on the land, sea or air forces, or marine and air fleets of another State;

The use of armed forces of one State which are within the territory of another State with the agreement of the receiving State, in contravention of the conditions provided for in the agreement or any extension of their presence in such territory beyond the termination of the agreement;

The action of a State in allowing its territory, which it has placed at the disposal of another State, to be used by that other State for perpetrating an act of aggression against a third State;

The sending by or on behalf of a State of armed bands, groups, irregulars or mercenaries, which carry out acts of armed force against another State of such gravity as to amount to the acts listed above, or its substantial involvement therein.’ See Resolution 6, https://asp.icc-cpi.int/iccdocs/asp_docs/Resolutions/ICC-ASP-8-Res.6-ENG.pdf.

³⁰⁴ See article 15 *bis* and *ter*. This jurisdiction was activated on 17 July 2018; see ICC Assembly of States Parties, resolution 5 (14 December 2017) and www.icc-cpi.int/Pages/search-results.aspx?k=aggression.

8

Recognition

International society is not an unchanging entity, but is subject to the ebb and flow of political life.¹ New states are created and old units fall away. New governments come into being within states in a manner contrary to declared constitutions whether or not accompanied by force. Insurgencies occur and belligerent administrations are established in areas of territory hitherto controlled by the legitimate government. Each of these events creates new facts and the question that recognition is concerned with revolves around the extent to which legal effects should flow from such occurrences. Each state will have to decide whether or not to recognise the particular eventuality and the kind of legal entity it should be accepted as.

Recognition involves consequences both on the international plane and within municipal law. If an entity is recognised as a state in, for example, the United Kingdom, it will entail the consideration of rights and duties that would not otherwise be relevant. There are privileges permitted to a foreign state before the municipal courts that would not be allowed to other institutions or persons.

It is stating the obvious to point to the very strong political influences that bear upon this topic.² In more cases than not, the decision whether or not to recognise will depend more upon political considerations than exclusively

legal factors. Recognition is not merely applying the relevant legal consequences to a factual situation, for sometimes a state will not want such consequences to follow, either internationally or domestically.

To give one example, the United States refused for many years to recognise either the People's Republic of China or North Korea, not because it did not accept the obvious fact that these authorities exercised effective control over their respective territories, but rather because it did not wish the legal effects of recognition to come into operation.³ It is purely a political judgment, although it has been clothed in legal terminology. In addition, there are a variety of options open as to what an entity may be recognised as. Such an entity may, for example, be recognised as a full sovereign state, or as the effective authority within a specific area or as a subordinate authority to another state.⁴ It is a matter of fact in all cases what precisely is being sought and granted and recognition may in certain circumstances constitute a significant political gesture without any legal consequences being intended, such as recognition as 'representative of the people'. More usually, recognition is a statement by an international legal person as to the status in international law of another real or alleged international legal person or of the validity of a particular factual situation. Once recognition has occurred, the new situation is deemed opposable to the recognising state, that is the pertinent legal consequences will flow. As such, recognition constitutes participation in the international legal process generally while also being important within the context of bilateral relations and, of course, domestically.

Recognition of States

There are basically two theories as to the nature of recognition. The constitutive theory maintains that it is the act of recognition by other states that creates a new state and endows it with legal personality and not the process by which it actually obtained independence. Thus, new states are established in the international community as fully fledged subjects of international law by virtue of the will and consent of already existing states.⁵ The disadvantage of this approach is that an unrecognised 'state' may not be subject to the obligations imposed by international law and may accordingly be free from such restraints as, for instance, the prohibition on aggression. A further complication would arise if a 'state' were recognised by some but not other states. Could one talk then of, for example, partial personality?

The second theory, the declaratory theory, adopts the opposite approach and is a little more in accord with practical realities.⁶ It maintains that recognition is merely an acceptance by states of an already existing situation. A new state will acquire capacity in international law not by virtue of the consent of others, but by virtue of a particular factual situation. It will be legally constituted by its own efforts and circumstances and will not have to await the procedure of recognition by other states. This doctrine owes much to traditional positivist thought on the supremacy of the state and the concomitant weakness or non-existence of any central guidance in the international community.

For the constitutive theorist, the heart of the matter is that fundamentally an unrecognised 'state' can have no rights or obligations in international law. The opposite stance is adopted by the declaratory approach that emphasises

the factual situation and minimises the power of states to confer legal personality.

Actual practice leads to a middle position between these two perceptions. The act of recognition by one state of another indicates that the former regards the latter as having conformed with the basic requirements of international law as to the creation of a state. Of course, recognition is highly political and is given in a number of cases for purely political reasons. This point of view was emphasised by the American representative on the Security Council during discussions on the Middle East in May 1948. He said that it would be:

highly improper for one to admit that any country on earth can question the sovereignty of the United States of America in the exercise of the high political act of recognition of the *de facto* status of a state.

Indeed, he added that there was no authority that could determine the legality or validity of that act of the United States.⁷ This American view that recognition is to be used as a kind of mark of approval was in evidence with regard to the attitude adopted towards communist China for a generation.⁸

The United Kingdom, on the other hand, has often tended to extend recognition once it is satisfied that the authorities of the state in question have complied with the minimum requirements of international law, and have effective control which seems likely to continue over the country.⁹

Recognition is constitutive in a political sense, for it marks the new entity out

as a state within the international community and is evidence of acceptance of its new political status by the society of nations. This does not imply that the act of recognition is legally constitutive, because rights and duties do not arise as a result of the recognition.

Practice over the last century or so is not unambiguous, but does point to the declaratory approach as the better of the two theories. States which for particular reasons have refused to recognise other states, such as in the Arab world and Israel and the United States and certain communist nations,¹⁰ rarely contend that the other party is devoid of powers and obligations before international law and exists in a legal vacuum. The stance is rather that rights and duties are binding upon them, and that recognition has not been accorded for primarily political reasons. If the constitutive theory were accepted, it would mean, for example, in the context of the former Arab non-recognition of Israel, that the latter was not bound by international law rules of non-aggression and non-intervention. This has not been adopted in any of the stances of non-recognition of 'states'.¹¹

Of course, if an entity, while meeting the conditions of international law as to statehood, went totally unrecognised, this would undoubtedly hamper the exercise of its rights and duties, especially in view of the absence of diplomatic relations, but it would not seem in law to amount to a decisive argument against statehood itself.¹² For example, the Charter of the Organization of American States adopted at Bogotá in 1948 notes in its survey of the fundamental rights and duties of states that:

the political existence of the state is independent of recognition by other states. Even before being recognised the state has the right to defend its integrity and independence.¹³

And the Institut de Droit International emphasised in its resolution on recognition of new states and governments in 1936 that the

existence of the new state with all the legal effects connected with that existence is not affected by the refusal of one or more states to recognise.¹⁴

In the period following the end of the First World War, the courts of the new states of Eastern and Central Europe regarded their states as coming into being upon the actual declaration of independence and not simply as a result of the Peace Treaties. The tribunal in one case pointed out that the recognition of Poland in the Treaty of Versailles was only declaratory of the state which existed 'par lui-même'.¹⁵ In addition, the Arbitration Commission established by the International Conference on Yugoslavia in 1991 stated in its Opinion No. 1 that 'the existence or disappearance of the state is a question of fact' and that 'the effects of recognition by other states are purely declaratory'.¹⁶

On the other hand, the constitutive theory is not totally devoid of all support in state practice. In some cases, the creation of a new state, or the

establishment of a new government by unconstitutional means, or the occupation of a territory that is legally claimed will proceed uneventfully and be clearly accomplished for all to see and with little significant opposition. However, in many instances, the new entity or government will be insecure and it is in this context that recognition plays a vital role. In any event, and particularly where the facts are unclear and open to different interpretations, recognition by a state will amount to a declaration by that state of how it understands the situation, and such an evaluation will be binding upon it. It will not be able to deny later the factual position it has recognised, unless, of course, circumstances radically alter in the meantime. In this sense, recognition can be constitutive. Indeed, the Yugoslav Arbitration Commission noted in Opinion No. 8 that ‘while recognition of a state by other states has only declarative value, such recognition, along with membership of international organisations, bears witness to these states’ conviction that the political entity so recognised is a reality and confers on it certain rights and obligations under international law’.¹⁷ By way of contrast, the fact of non-recognition of a ‘new state’ by a vast majority of existing states will constitute tangible evidence for the view that such an entity has not established its conformity with the required criteria of statehood.¹⁸

Another factor which leans towards the constitutive interpretation of recognition is the practice in many states whereby an unrecognised state or government cannot claim the rights available to a recognised state or government before the municipal courts. This means that the act of recognition itself entails a distinct legal effect and that after recognition a state or government would have enforceable rights within the domestic jurisdiction that it would not have had prior to the recognition.¹⁹

This theoretical controversy is of value in that it reveals the functions of recognition and emphasises the impact of states upon the development of international law. It points to the essential character of international law, poised as it is between the state and the international community. The declaratory theory veers towards the former and the constitutive doctrine towards the latter.

There have been a number of attempts to adapt the constitutive theory.²⁰ Lauterpacht maintained, for example, that once the conditions prescribed by international law for statehood have been complied with, there is a duty on the part of existing states to grant recognition. This is because, in the absence of a central authority in international law to assess and accord legal personality, it is the states that have to perform this function on behalf, as it were, of the international community and international law.²¹

This operation is both declaratory, in that it is based upon certain definite facts (i.e. the entity fulfils the requirements of statehood) and constitutive, in that it is the acceptance by the recognising state of the particular community as an entity possessing all the rights and obligations that are inherent in statehood. Before the act of recognition, the community that is hoping to be admitted as a state will only have such rights and duties as have been expressly permitted to it, if any.

The Lauterpacht doctrine is an ingenious bid to reconcile the legal elements in a coherent theory. It accepts the realities of new creations of states and governments by practical (and occasionally illegal) means, and attempts to assimilate this to the supremacy of international law as Lauterpacht saw it.

However, in so doing it ignores the political aspects and functions of recognition, that is, its use as a method of demonstrating or withholding support from a particular government or new community. The reality is that in many cases recognition is applied to demonstrate political approval or disapproval. Indeed, if there is a duty to grant recognition, would the entity involved have a right to demand this where a particular state (or states) is proving recalcitrant? If this were so, one would appear to be faced with the possibility of a non-state with as yet no rights or duties enforcing rights against non-recognising states.

Nevertheless, state practice reveals that Lauterpacht's theory has not been adopted.²² The fact is that few states accept that they are obliged in every instance to accord recognition. In most cases, they will grant recognition, but that does not mean that they have to, as history with regard to some communist nations and with regard to Israel illustrates. This position was supported in Opinion No. 10 of the Yugoslav Arbitration Commission in July 1992, which emphasised that recognition was 'a discretionary act that other states may perform when they choose and in a manner of their own choosing, subject only to compliance with the imperatives of general international law'.²³

The approach of the United States was emphasised in 1976. The Department of State noted:

In the view of the United States, international law does not require a state to recognise another entity as a state; it is a matter for the

judgment of each state whether an entity merits recognition as a state. In reaching this judgment, the United States has traditionally looked to the establishment of certain facts. These facts include effective control over a clearly defined territory and population; an organised governmental administration of that territory and a capacity to act effectively to conduct foreign relations and to fulfil international obligations. The United States has also taken into account whether the entity in question has attracted the recognition of the international community of states.²⁴

The view of the UK government was expressed as follows:

The normal criteria which the government apply for recognition as a state are that it should have, and seem likely to continue to have, a clearly defined territory with a population, a government who are able of themselves to exercise effective control of that territory, and independence in their external relations. Other factors, including some United Nations resolutions, may also be relevant.²⁵

Recent practice suggests that ‘other factors’ may, in the light of the particular circumstances, include human rights and other matters. The European Community adopted a Declaration on 16 December 1991 entitled ‘Guidelines on the Recognition of New States in Eastern Europe and in the Soviet Union’ in which a common position on the process of recognition of the new states was adopted. It was noted in particular that recognition required:

- respect for the provisions of the Charter of the United Nations and the commitments subscribed to in the Final Act of Helsinki and in the Charter of Paris,²⁶ especially with regard to the rule of law, democracy and human rights;

- guarantees for the rights of ethnic and national groups and minorities in accordance with the commitments subscribed to in the framework of the CSCE;²⁷

- respect for the inviolability of all frontiers which can only be changed by peaceful means and by common agreement;

- acceptance of all relevant commitments with regard to disarmament and nuclear non-proliferation as well as to security and regional stability;

- commitment to settle by agreement, including where appropriate by recourse to arbitration, all questions concerning state succession and regional disputes.²⁸

On the same day that the Guidelines were adopted, the European Community also adopted a Declaration on Yugoslavia,²⁹ in which the Community and its

member states agreed to recognise the Yugoslav republics fulfilling certain conditions. These were that such republics wished to be recognised as independent; that the commitments in the Guidelines were accepted; that provisions laid down in a draft convention under consideration by the Conference on Yugoslavia were accepted, particularly those dealing with human rights and the rights of national or ethnic groups; and that support would be given to the efforts of the UN Secretary-General and the Security Council and the Conference on Yugoslavia. The Community and its member states also required that the particular Yugoslav republic seeking recognition would commit itself prior to recognition to adopting constitutional and political guarantees ensuring that it had no territorial claims towards a neighbouring Community state. The United States took a rather less robust position, but still noted the relevance of commitments and assurances given by the new states of Eastern Europe and the former Soviet Union with regard to nuclear safety, democracy and free markets within the process of both recognition and the establishment of diplomatic relations.³⁰

Following a period of UN administration authorised by Security Council resolution 1244 (1999),³¹ the Yugoslav (later Serbian) province of Kosovo declared independence on 17 February 2008. This was preceded by the Comprehensive Proposal for the Kosovo Status Settlement formulated by Martti Ahtisaari which had in March 2007 called for independence for Kosovo with international supervision.³² This was rejected by Serbia. The international community was divided as to the question of recognition of Kosovo's independence. It was recognised swiftly by the United States, the United Kingdom, Germany, the majority of EU states, Japan and others. Russia and Serbia, on the other hand, made it clear that they opposed

recognition, as did Spain and Greece. Accordingly, in the current circumstances, while many countries recognise Kosovo, many do not and entry into the United Nations is not possible until, for example, Russia is prepared to lift its opposition in view of its veto power.³³ For those states that have recognised Kosovo, the latter will be entitled to all the privileges and responsibilities of statehood in the international community and within the legal systems of the recognising states. However, for those that have not, the state and diplomatic agents of Kosovo will not be entitled to, for example, diplomatic and state immunities, while the international status of Kosovo will be controversial and disputed.³⁴ While recognition may cure difficulties in complying with the criteria of statehood, a situation where the international community is divided upon recognition will, especially in the absence of UN membership, ensure the continuation of uncertainty.

There are many different ways in which recognition can occur and it may apply in more than one kind of situation. It is not a single, constant idea, but a category comprising a number of factors. There are indeed different entities which may be recognised, ranging from new states, to new governments, belligerent rights possessed by a particular group and territorial changes. Not only are there various objects of the process of recognition, but recognition may itself be *de facto* or *de jure* and it may arise in a variety of manners.

Recognition is an active process and should be distinguished from cognition, or the mere possession of knowledge, for example, that the entity involved complies with the basic international legal stipulations as to statehood. Recognition implies both cognition of the necessary facts and an intention that, so far as the acting state is concerned, it is willing that the legal

consequences attendant upon recognition should operate. For example, the rules as to diplomatic and sovereign immunities should apply as far as the envoys of the entity to be recognised are concerned. It is not enough for the recognising state simply to be aware of the facts: it must desire the coming into effect of the legal and political results of recognition. This is inevitable by virtue of the discretionary nature of the act of recognition, and is illustrated in practice by the lapse in time that often takes place between the events establishing a new state or government and the actual recognition by other states. Once given, courts have generally regarded recognition as retroactive so that the statehood of the entity recognised is accepted as of the date of statehood (which is a question of fact), not from the date of recognition.³⁵

Recognition of Governments³⁶

The recognition of a new government is quite different from the recognition of a new state. As far as statehood is concerned, the factual situation will be examined in terms of the accepted criteria.³⁷ Different considerations apply where it is the government which changes. Recognition will only really be relevant where the change in government is unconstitutional. In addition, recognition of governments as a category tends to minimise the fact that the precise capacity or status of the entity so recognised may be characterised in different ways. Recognition may be of a *de facto*³⁸ government or administration or of a government or administration in effective control of only part of the territory of the state in question. Recognition constitutes acceptance of a particular situation by the recognising state both in terms of the relevant factual criteria and in terms of the consequential legal

repercussions, so that, for example, recognition of an entity as the government of a state implies not only that this government is deemed to have satisfied the required conditions, but also that the recognising state will deal with the government as the governing authority of the state and accept the usual legal consequences of such status in terms of privileges and immunities within the domestic legal order.

Political considerations have usually played a large role in the decision whether or not to grant recognition. However, certain criteria have emerged to cover recognition of illegal changes in government. Such criteria amounted to an acceptance of the realities of the transfer of power and suggested that once a new government effectively controlled the country and that this seemed likely to continue, recognition should not be withheld. The United Kingdom on a number of occasions adopted this approach.³⁹ It was declared by the Under-Secretary of State for Foreign Affairs in 1970 that the test employed was whether or not the new government enjoyed, ‘with a reasonable prospect of permanence, the obedience of the mass of the population . . . effective control of much of the greater part of the territory of the state concerned’.⁴⁰

It is this attitude which prompted such policies as the recognition of the communist government of China and the Russian-installed government of Hungary in 1956 after the failure of the uprising. However, this general approach cannot be regarded as an absolute principle in view of the British refusal over many years to recognise as states North Vietnam, North Korea and the German Democratic Republic.⁴¹ The effective control of a new government over the territory of the state is thus an important guideline to the

problem of whether to extend recognition or not, providing such control appears well established and likely to continue. But it was no more than that and in many cases appeared to yield to political considerations.

The *Tinoco* arbitration⁴² constitutes an interesting example of the ‘effective control’ concept. In 1919, the government of Tinoco in Costa Rica was overthrown and the new authorities repudiated certain obligations entered into by Tinoco with regard to British nationals. Chief Justice Taft, the sole arbitrator, referred to the problems of recognition or non-recognition as relating to the Tinoco administration. He decided that since the administration was in effective control of the country, it was the valid government irrespective of the fact that a number of states, including the United Kingdom, had not recognised it. This was so despite his opinion that:

the non-recognition by other nations of a government claiming to be a national personality, is usually appropriate evidence that it has not attained the independence and control entitling it by international law to be classed as such.⁴³

Where recognition has been refused because of the illegitimacy or irregularity of origin of the government in question, rather than because of the lack of effectiveness of its control in the country, such non-recognition loses some of its evidential weight. In other words, where the degree of authority asserted by the new administration is uncertain, recognition by other states will be a vital factor. But where the new government is firmly established, non-

recognition will not affect the legal character of the new government. The doctrine of effective control is an indication of the importance of the factual nature of any situation. But in those cases where recognition is refused upon the basis of the improper origins of the new government, it will have less of an impact than if recognition is refused because of the absence of effective control. Taft's view of the nature of recognition is an interesting amalgam of the declaratory and constitutive theories, in that recognition can become constitutive where the factual conditions (i.e. the presence or absence of effective control) are in dispute, but otherwise is purely declaratory or evidential.

A change in government, however accomplished, does not affect the identity of the state itself. The state does not cease to be an international legal person because its government is overthrown. That is not at issue. The recognition or non-recognition of a new administration is irrelevant to the legal character of the country. Accordingly, one can see that two separate recognitions are involved and they must not be confused. Recognition of a state will affect its legal personality, whether by creating or acknowledging it, while recognition of a government affects the status of the administrative authority, not the state.

It is possible, however, for recognition of state and government to occur together in certain circumstances. This can take place upon the creation of a new state. Israel, to take one example, was recognised by the United States and the United Kingdom by the expedient of having its government recognised *de facto*.⁴⁴ Recognition of the government implies recognition of the state, but it does not work the other way.

It should be noted that recognition of a government has no relevance to the establishment of new persons in international law. Where it is significant is in the realm of diplomatic relations. If a government is unrecognised, there is no exchange of diplomatic envoys and thus problems can arise as to the enforcement of international rights and obligations.

Although the effective control doctrine is probably accepted as the most reliable guide to recognition of governments, there have been other theories put forward, the most prominent among them being the Tobar doctrine or the so-called doctrine of legitimacy. This suggested that governments which came into power by extra-constitutional means should not be recognised, at least until the change had been accepted by the people.⁴⁵ This policy was applied particularly by the United States in relation to Central America and was designed to protect stability in that delicate area adjacent to the Panama Canal. Logically, of course, the concept amounts to the promotion of non-recognition in all revolutionary situations and it is, and was, difficult to reconcile with reality and political consideration. In American eyes it became transmuted into the Wilson policy of democratic legitimacy. Where the revolution was supported by the people, it would be recognised. Where it was not, there would be no grant of recognition. It was elaborated with regard to the Soviet Union until 1933, but gradually declined until it can now be properly accepted merely as a political qualification for recognition to be considered by the recognising state.⁴⁶

A doctrine advocating the exact opposite, the automatic recognition of governments in all circumstances, was put forward by Estrada, the Mexican Secretary of Foreign Relations.⁴⁷ But this suffers from the same disadvantage

as the legitimacy doctrine. It attempts to lay down a clear test for recognition in all instances excluding political considerations and exigencies of state and is thus unrealistic, particularly where there are competing governments.⁴⁸ It has also been criticised as minimising the distinction between recognition and maintenance of diplomatic relations.⁴⁹

The problem, of course, was that recognition of a new government that has come to power in a non-constitutional fashion was taken to imply approval. Allied with the other factors sometimes taken into account in such recognition situations,⁵⁰ an unnecessarily complicated process had resulted. Accordingly, in 1977, the United States declared that:

US practice has been to de-emphasise and avoid the use of recognition in cases of changes of governments and to concern ourselves with the question of whether we wish to have diplomatic relations with the new governments . . . The Administration's policy is that establishment of relations does not involve approval or disapproval but merely demonstrates a willingness on our part to conduct our affairs with other governments directly.⁵¹

In 1980, the UK government announced that it would no longer accord recognition to governments as distinct from states.⁵² This was stated to be primarily due to the perception that recognition meant approval, a perception

that was often embarrassing, for example, in the case of regimes violating human rights. There were, therefore, practical advantages in not according recognition as such to governments. This change to a policy of not formally recognising governments had in fact taken place in certain civil law countries rather earlier. Belgium⁵³ and France⁵⁴ appear, for example, to have adopted this approach in 1965. By the late 1980s, this approach was also adopted by both Australia⁵⁵ and Canada,⁵⁶ and indeed by other countries.⁵⁷

The change, however, did not remove all problems, but rather shifted the focus from formal recognition to informal ‘dealings’. The United Kingdom announced that it would continue to decide the nature of dealings with unconstitutional regimes:

in the light of [an] assessment of whether they
are able of themselves to exercise effective
control of the territory of the state concerned,
and seem likely to continue to do so.⁵⁸

The change, therefore, is that recognition of governments is abolished in principle, but that the criterion for dealing with such regimes is essentially the same as the former test for the recognition of governments.⁵⁹ In that context, regard should also be had to the phrase ‘of themselves’.⁶⁰

However, this change of policy should not be taken as meaning that no significant comments as to a change of government would be made in controversial circumstances and it did not preclude the exceptional recognition of governments as such. For example, following the elections in

the Côte d'Ivoire in November 2010 and the acceptance by ECOWAS and the African Union of the election of Mr Ouattara (and the hostility of the sitting president), the United Kingdom recognised Mr Ouattara as the democratically elected president of the country.⁶¹ Further, the United Kingdom decided on 27 July 2011 to recognise and deal with the Libyan National Transitional Council, which was engaged in an armed conflict with the Gaddafi government in that country, 'as the sole governmental authority in Libya'.⁶² This recognition of the Council as the government of Libya was affirmed in an executive certificate dated 24 August 2011 in *British Arab Commercial Bank v. The National Transitional Council of the State of Libya*.⁶³ The United States took the step of recognising Juan Guaidó as the interim President of Venezuela on 23 January 2019 instead of the incumbent President Maduro, following an election in May 2018 widely seen as unfair.⁶⁴ Fifteen member states of the European Union followed on 1 February⁶⁵ and the United Kingdom on 4 February 2019.⁶⁶ Such actions may well have significant consequences within the recognising countries (see the section on 'The Legal Effects of Recognition' later in this chapter), but internationally the absence of effective control by the claimant authority is a significant limitation and the matter will remain controversial.⁶⁷

*De Facto and de Jure Recognition*⁶⁸

In addition to the fact that there are different entities to be recognised, recognition itself may take different forms. It may be either *de facto* or *de jure*. A more correct way of putting this might be to say that a government (or other entity or situation) may be recognised *de facto* or *de jure*.

Recognition *de facto* implies that there is some doubt as to the long-term viability of the government in question. Recognition *de jure* usually follows where the recognising state accepts that the effective control displayed by the government is permanent and firmly rooted and that there are no legal reasons detracting from this, such as constitutional subservience to a foreign power. *De facto* recognition involves a hesitant assessment of the situation, an attitude of wait and see, to be succeeded by *de jure* recognition when the doubts are sufficiently overcome to extend formal acceptance. To take one instance, the United Kingdom recognised the Soviet government *de facto* in 1921 and *de jure* in 1924.⁶⁹ A slightly different approach is adopted in cases of civil war where the distinction between *de jure* and *de facto* recognition is sometimes used to illustrate the variance between legal and factual sovereignty. For example, during the 1936–39 Spanish Civil War, the United Kingdom, while recognising the Republican government as the *de jure* government, extended *de facto* recognition to the forces under General Franco as they gradually took over the country. Similarly, the government of the Italian conquering forces in Ethiopia was recognised *de facto* by the United Kingdom in 1936, and *de jure* two years later.⁷⁰

By this method a recognising state could act in accordance with political reality and its own interests while reserving judgment on the permanence of the change in government or its desirability or legality. It is able to safeguard the affairs of its citizens and institutions by this, because certain legal consequences will flow in municipal law from the recognition.⁷¹

There are in reality few meaningful distinctions between a *de facto* and a *de jure* recognition, although only a government recognised *de jure* may enter a

claim to property located in the recognising state.⁷² Additionally, it is generally accepted that *de facto* recognition does not of itself include the exchange of diplomatic relations.

Premature Recognition⁷³

There is often a difficult and unclear dividing line between the acceptable recognition of a new state, particularly one that has emerged or is emerging as a result of secession, and intervention in the domestic affairs of another state by way of premature or precipitate recognition, such as, for example, the view taken by the Nigerian federal government with regard to the recognition of 'Biafra' by five states.⁷⁴ In each case, the state seeking to recognise will need to consider carefully the factual situation and the degree to which the criteria of statehood (or other relevant criteria with regard to other types of entity with regard to which recognition is sought) have been fulfilled. It is therefore a process founded upon a perception of fact. In the case of Croatia, it could be argued that the recognition of that state by the European Community and its member states (together with Austria and Switzerland) on 15 January 1992 was premature.⁷⁵ Croatia at that time, and for several years thereafter, did not effectively control some one-third of its territory. In addition, the Yugoslav Arbitration Commission had taken the view in Opinion No. 5 on 11 January 1992 that Croatia did not meet fully the conditions for recognition laid down in the European Community Guidelines of 16 December 1991,⁷⁶ since the Constitutional Act adopted by Croatia did not fully incorporate the required guarantees relating to human rights and minority rights.⁷⁷ It could also be argued that the recognition of Bosnia-Herzegovina on 6 April 1992 by the European Community and member

states and on 7 April 1992 by the United States was premature, particularly since the government of that state effectively controlled less than one-half of its territory, a situation that continued until the Dayton Peace Agreement of November 1995.⁷⁸ On the other hand, it could be argued that in the special circumstances of Former Yugoslavia, the international community (particularly by means of membership of the United Nations, which is restricted to states) was prepared to accept a loosening of the traditional criteria of statehood, so that essentially international recognition compensated for lack of effectivity. A clear example of premature recognition is that of the Georgian regions of South Ossetia and Abkhazia, which have established separate *de facto* governments with Russian support.⁷⁹ Russia and a very few states have recognised them as independent states, but in the light of effective Russian control, the maintenance and international acceptance of Georgia's sovereignty entitlement and the paucity of international recognition, any such recognition can only be regarded at best as premature.⁸⁰

Recognition may also be overdue, in the sense that it occurs long after it is clear as a matter of fact that the criteria of statehood have been satisfied, but in such cases, different considerations apply since recognition is not compulsory and remains a political decision by states.⁸¹

Implied Recognition⁸²

Recognition itself need not be express, that is in the form of an open, unambiguous and formal communication, but may be implied in certain circumstances.⁸³ This is due to the fact that recognition is founded upon the will and intent of the state that is extending the recognition. Accordingly,

there are conditions in which it might be possible to declare that in acting in a certain manner, one state has by implication recognised another state or government. Because this facility of indirect or implied recognition is available, states may make an express declaration to the effect that a particular action involving another party is by no means to be interpreted as comprehending any recognition. This attitude was maintained by Arab countries with regard to Israel, and in certain other cases.⁸⁴ It automatically excludes any possibility of implied recognition, but does suggest that without a definite and clear waiver, the result of some international actions may be recognition of a hitherto unrecognised entity in certain circumstances.

The point can best be explained by mentioning the kind of conditions which may give rise to the possibility of a recognition where no express or formal statement has been made. A message of congratulations to a new state upon attaining sovereignty will imply recognition of that state, as will the formal establishment of diplomatic relations,⁸⁵ but the maintenance of informal and unofficial contacts (such as those between the United States and communist China during the 1960s and early 1970s in Warsaw) will not.⁸⁶ The issuing of a consular *exequatur*, the accepted authorisation permitting the performance of consular functions, to a representative of an unrecognised state will usually amount to a recognition of that state, though not in all cases.⁸⁷ A British Consul has operated in Taiwan, but the United Kingdom does not recognise the Taiwanese government.⁸⁸ It is possible that the conclusion of a bilateral treaty between the recognising and unrecognised state, as distinct from a temporary agreement, might imply recognition, but the matter is open to doubt since there are a number of such agreements between parties not recognising each other. One would have to study the circumstances of the

particular case to clarify the issue.⁸⁹ The making of claims by a state against an entity will not necessarily imply recognition.⁹⁰

Recognition is not normally to be inferred from the fact that both states have taken part in negotiations and signed a multilateral treaty,⁹¹ for example the UN Charter. Practice shows that many of the member states or their governments are not recognised by other member states.⁹² Although Israel and many Arab countries are UN members, this did not affect Arab non-recognition of the Israeli state.⁹³ However, where the state concerned has voted in favour of membership in the United Nations of the entity in question, it is a natural inference that recognition has occurred. The United Kingdom, for example, regarded its vote in favour of UN membership for the former Yugoslav republic of Macedonia as amounting to recognition of that entity as a state.⁹⁴ Indeed, irrespective of recognition by individual states, there is no doubt that membership of the United Nations is powerful evidence of statehood since being a state is a necessary precondition to UN membership by virtue of article 4 of the UN Charter.⁹⁵

In the case of common participation in an international conference, similar considerations apply, although the element of doubt has often stimulated non-recognising states to declare expressly that their presence and joint signature on any agreement issuing forth from the meeting is in no way to be understood as implying recognition. Such has been the case particularly with the Arab states over the years with regard to Israel.

State practice has restricted the possible scope of operation of this concept of implied recognition to a few instances only and all the relevant surrounding

circumstances will have to be carefully evaluated before one can deduce from conduct the intention to extend recognition. States like to retain their control of such an important political instrument as recognition and are usually not keen to allow this to be inferred from the way they behave. They prefer recognition to be, in general, a formal act accorded after due thought.

Conditional Recognition

The political nature of recognition has been especially marked with reference to what has been termed conditional recognition. This refers to the practice of making the recognition subject to fulfilment of certain conditions, for example, the good treatment of religious minorities as occurred with regard to the independence of some Balkan countries in the late nineteenth century, or the granting of most-favoured-nation status to the recognised state. One well-known instance of this approach was the 1933 Litvinov Agreement, whereby the United States recognised the Soviet government upon the latter undertaking to avoid acts prejudicial to the internal security of the United States, and to come to a settlement of various financial claims.⁹⁶

However, breach of the particular condition does not invalidate the recognition. It may give rise to a breach of international law and political repercussions, but the law appears not to accept the notion of a conditional recognition as such. The status of any conditions will depend upon agreements specifically made by the particular parties.⁹⁷ It is, however, important to distinguish conditional recognition in this sense from the evolution of criteria for recognition generally, although the two categories may in practice overlap.⁹⁸

Collective Recognition⁹⁹

The expediency of collective recognition has often been noted. This would amount to recognition by means of an international decision, whether by an international organisation or not. It would, of course, signify the importance of the international community in its collective assertion of control over membership and because of this it has not been warmly welcomed, nor can one foresee its general application for some time to come. The idea has been discussed particularly since the foundation of the League of Nations and was re-emphasised with the establishment of the United Nations. However, it rapidly became clear that member states reserved the right to extend recognition to their own executive authorities and did not wish to delegate it to any international institution. The most that could be said is that membership of the United Nations constitutes powerful evidence of statehood. But that, of course, is not binding upon other member states who are free to refuse to recognise any other member state of the United Nations.¹⁰⁰

Withdrawal of Recognition¹⁰¹

Recognition once given may in certain circumstances be withdrawn. This is more easily achieved with regard to *de facto* recognition, as that is by its nature a cautious and temporary assessment of a particular situation. Where a *de facto* government loses the effective control it once exercised, the reason for recognition disappears and it may be revoked. It is in general a preliminary acceptance of political realities and may be withdrawn in

accordance with a change in political factors.¹⁰² *De jure* recognition, on the other hand, is intended to be more of a definitive step and is more difficult to withdraw.

Of course, where a government recognised *de jure* has been overthrown, a new situation arises and the question of a new government will have to be faced, but in such instances withdrawal of recognition of the previous administration is assumed and does not have to be expressly stated, providing always that the former government is not still in existence and carrying on the fight in some way. Withdrawal of recognition of one government without recognising a successor is a possibility and indeed was the approach adopted by the United Kingdom and France, for example, with regard to Cambodia in 1979.¹⁰³ However, with the adoption of the new British policy on recognition with regard to governments,¹⁰⁴ the position is now that the UK government will neither recognise nor withdraw recognition of regimes.¹⁰⁵

Withdrawal of recognition in other circumstances is not a very general occurrence, but in exceptional conditions it remains a possibility. The United Kingdom recognised the Italian conquest of Ethiopia *de facto* in 1936 and *de jure* two years later. However, it withdrew recognition in 1940, with the intensification of fighting and the dispatch of military aid.¹⁰⁶ Recognition of belligerency will naturally terminate with the defeat of either party, while the loss of one of the required criteria of statehood would affect recognition. It is to be noted that the 1979 recognition of the People's Republic of China as the sole legal government of China entailed the withdrawal of recognition or 'derecognition' of the Republic of China (Taiwan). This was explained to

mean that, ‘so far as the formal foreign relations of the United States are concerned, a government does *not* exist in Taiwan any longer’.¹⁰⁷

Nevertheless, this was not to affect the application of the laws of the United States with regard to Taiwan in the context of US domestic law.¹⁰⁸ To some extent, in this instance, the usual consequences of non-recognition have not flowed, but this has taken place upon the background of a formal and deliberate act of policy.¹⁰⁹ It does show how complex the topic of recognition has become.

The usual method of expressing disapproval with the actions of a particular government is to break diplomatic relations. This will adequately demonstrate aversion as did, for example, the rupture in diplomatic relations between the United Kingdom and the Soviet Union in 1927, and between some Arab countries and the United States in 1967, without entailing the legal consequences and problems that a withdrawal of recognition would initiate. But one must not confuse the ending of diplomatic relations with a withdrawal of recognition.

Since recognition is ultimately a political issue, no matter how circumscribed or conditioned by the law, it logically follows that, should a state perceive any particular situation as justifying a withdrawal of recognition, it will take such action as it regards as according with its political interests.

Non-Recognition¹¹⁰

There has been developing since the 1930s a doctrine of non-recognition where, under certain conditions, a factual situation will not be recognised because of strong reservations as to the morality or legality of the actions that have been adopted in order to bring about the factual situation. It is a doctrine that has also been reinforced by the principle that legal rights cannot derive from an illegal situation (*ex injuria jus non oritur*).¹¹¹

This approach was particularly stimulated by the Japanese invasion of Manchuria in 1931. The US Secretary of State declared in 1932 that the illegal invasion would not be recognised as it was contrary to the 1928 Pact of Paris (the Kellogg–Briand Pact) which had outlawed war as an instrument of national policy. The doctrine of not recognising any situation, treaty or agreement brought about by non-legal means was named the Stimson doctrine after the American Secretary of State who put it forward. It was reinforced not long afterwards by a resolution of the Assembly of the League of Nations stressing that League members should not recognise any situation, treaty or agreement brought about by means contrary to the League's Covenant or the Pact of Paris.¹¹²

However, state practice until the Second World War was not encouraging. The Italian conquest of the Empire of Ethiopia was recognised and the German takeover of Czechoslovakia accepted. The Soviet Union made a series of territorial acquisitions in 1940, ranging from areas of Finland to the Baltic States (of Lithuania, Estonia and Latvia) and Bessarabia. These were

recognised *de facto* over the years by Western powers (though not by the United States).¹¹³

The doctrine was examined anew after 1945. Article 2(4) of the UN Charter prohibits the threat or use of force *inter alia* against the territorial integrity of states, while the Draft Declaration on the Rights and Duties of States 1949 emphasised that territorial acquisitions by states were not to be recognised by other states where achieved by means of the threat or use of force or in any other manner inconsistent with international law and order. The 1970 Declaration on Principles of International Law also included a provision to the effect that no territorial acquisition resulting from the threat or use of force shall be recognised as legal,¹¹⁴ and Security Council resolution 242 (1967) on the solution to the Middle East conflict emphasised ‘the inadmissibility of the acquisition of territory by war’.¹¹⁵

Rhodesia unilaterally proclaimed its independence in November 1965 and in the years of its existence did not receive official recognition from any state at all, although it did maintain diplomatic relations with South Africa and Portugal prior to the revolution of 1974. The day following the Rhodesian declaration of independence, the Security Council passed a resolution calling upon all states not to accord it recognition and to refrain from assisting it.¹¹⁶ The Council imposed selective mandatory economic sanctions on Rhodesia and these were later made comprehensive.¹¹⁷ Similar action was also taken with regard to the Bantustans, territories of South Africa declared by that state to be independent.¹¹⁸ The Security Council also adopted resolution 541 in 1983, which deplored the purported secession of part of Cyprus occupied by Turkey in 1974 and termed the proposed Turkish Cypriot state ‘legally

invalid'.¹¹⁹ In 1990, the Security Council adopted resolution 662, which declared the Iraqi annexation of Kuwait 'null and void' and called on all states and institutions not to recognise the annexation.¹²⁰ The principle of non-recognition of title to territory acquired through aggression in violation of international law was also reaffirmed in the *Brcko Inter-Entity Boundary* award with regard to aggression in Bosnia.¹²¹

The role of non-recognition as an instrument of sanction as well as a means of pressure and a method of protecting the wronged inhabitants of a territory was discussed more fully in the Advisory Opinion of the International Court of Justice in *Legal Consequences for States of the Continued Presence of South Africa in Namibia*, 1971, dealing with South Africa's presence in that territory. The Court held that since the continued South African occupancy was illegal, member states of the United Nations were obliged to recognise that illegality and the invalidity of South Africa's acts concerning Namibia and were under a duty to refrain from any actions implying recognition of the legality of, or lending support or assistance to, the South African presence and administration.¹²²

The Legal Effects of Recognition

In this section, some of the legal results that flow from the recognition or non-recognition of an entity, both in the international sphere and within the municipal law of particular states, will be noted. Although recognition may legitimately be regarded as a political tool, it is one that nevertheless entails important consequences in the legal field.

Internationally

In the majority of cases, it can be accepted that recognition of a state or government is a legal acknowledgement of a factual state of affairs.

Nevertheless, it should not be assumed that non-recognition of, for example, a state will deprive that entity of rights and duties before international law, excepting, of course, those situations where it may be possible to say that recognition is constitutive of the legal entity.

In general, the political existence of a state is independent of recognition by other states, and thus an unrecognised state must be deemed subject to the rules of international law. It cannot consider itself free from restraints as to aggressive behaviour, nor can its territory be regarded as *terra nullius*. States which have signed international agreements are entitled to assume that states which they have not recognised but which have similarly signed the agreement are bound by that agreement. For example, the United Kingdom treated the German Democratic Republic as bound by its signature of the 1963 Nuclear Test Ban Treaty even when the state was not recognised by the United Kingdom.

Non-recognition, with its consequent absence of diplomatic relations, may affect the unrecognised state in asserting its rights or other states in asserting its duties under international law, but will not affect the existence of such rights and duties. The position is, however, different under municipal law.

Internally

Recognition is fundamentally a political act, so it is reserved to the executive branch of government. This means that the judiciary must as a general principle accept the discretion of the executive and give effect to its decisions. The courts cannot recognise a state or government. They can only accept and enforce the legal consequences which flow from the executive's political decision, although this situation has become more complex with the change in policy from express recognition of governments to acceptance of dealings with such entities.

To this extent, recognition is constitutive, because the act of recognition itself creates legal results within the domestic jurisdiction. In the United Kingdom and the United States particularly, the courts feel themselves obliged to accept the verdict of the executive branch of government as to whether a particular entity should be regarded as recognised or not. If the administration has recognised a state or government and so informs the judiciary by means of a certificate, the position of that state or government within the municipal structure is totally transformed.

It may sue in the domestic courts and be granted immunity from suit in certain instances. Its own legislative and executive acts will be given effect to in the courts of the recognising state and its own diplomatic representatives will be able to claim the various immunities accorded to the official envoys of a recognised state. In addition, it will be entitled to possession in the recognising state of property belonging to its predecessor. It is also important to draw a distinction between the actual grant of recognition by the executive and the discussion of the consequences in the domestic legal system by the domestic courts.

The United Kingdom¹²³

The fundamental principle is that once a state has been recognised by the United Kingdom, the state in question has legal personality as a matter of common law. Its position as a legal person in English law is *sui generis*, not to be assimilated with either individuals or corporations.¹²⁴ The capacity of foreign states to act within legal systems (as distinct from the international plane) is a matter for the relevant domestic law.¹²⁵

The English courts have adopted the attitude over many years that an entity unrecognised by the Foreign Office would be treated before the courts as if it did not exist and accordingly it would not be able to claim immunity before the courts.¹²⁶ This meant in one case that ships of the unrecognised 'Provisional Government of Northern Russia' would not be protected by the courts from claims affecting them.¹²⁷ Similarly, an unrecognised state or government is unable to appear before the courts as a plaintiff in an action. This particular principle prevented the revolutionary government of Berne in 1804 from taking action to restrain the Bank of England from dealing with funds belonging to the previous administration of the city.¹²⁸

The leading case in English law on the issue of effects of recognition of an entity within the domestic sphere is *Luther v. Sagor*.¹²⁹ This concerned the operations and produce of a timber factory in Russia owned by the plaintiffs, which had been nationalised in 1919 by the Soviet government. In 1920, the defendant company purchased a quantity of wood from the Soviet Union and this was claimed in England by the plaintiffs as their property since it had come from what had been their factory. It was argued by them that the 1919

Soviet decree should be ignored before the English courts since the United Kingdom had not recognised the Soviet government. The lower court agreed with this contention and the matter then came to the Court of Appeal.¹³⁰

In the meantime, the United Kingdom recognised the Soviet government *de facto* and the Foreign Office informed the Court of Appeal of this in writing. The result was that the higher court was bound to take note of the Soviet decree and accordingly the plaintiffs lost their case, since a court must give effect to the legislation of a recognised state or government. The Court also held that the fact that the Soviet government was recognised *de facto* and not *de jure* did not affect the issue. Another interesting point is that since the Foreign Office certificate included a statement that the former Provisional Government of Russia recognised by the United Kingdom had been dispersed during December 1917, the Court inferred the commencement of the Soviet government from that date.

The essence of the matter was that the Soviet government was now accepted as the sovereign government of the Soviet Union as from December 1917. And since recognition once given is retroactive and relates back to the date that the authority of the government was accepted as being established, and not the date on which recognition is granted, the Soviet decree of 1919 was deemed to be a legitimate act of a recognised government. This was so even though at that date the Soviet government was not recognised by the United Kingdom.

The purpose of the retroactivity provision¹³¹ is to avoid possible influence in the internal affairs of the entity recognised, since otherwise legislation made

prior to recognition might be rejected. However, this will depend always upon the terms of the executive certificate by which the state informs its courts of the recognition. Should the Foreign Office insist that the state or government in question is to be recognised as a sovereign state or government as of the date of the action, the courts would be bound by this.

As is the case with legislation, contracts made by an unrecognised government will not be enforced in English courts. Without the required action by the political authorities, an unrecognised entity does not exist as a legal person before the municipal courts. The case of *Luther v. Sagor* suggested that in general the legal consequences of a *de facto* recognition would be the same as a *de jure* one. This was emphasised in *Haile Selassie v. Cable and Wireless Ltd (No. 2)*,¹³² but regarded as restricted to acts in relation to persons or property in the territory which the *de facto* government has been recognised as effectively controlling.

In other words, a different situation would ensue with regard to persons or property situated outside the territory of the state or government. In the *Haile Selassie* case, the Emperor of Ethiopia was suing a British company for money owing to him under an agreement. The problem was that when the action was brought, the United Kingdom had recognised the Italian forces as the *de facto* authority in Ethiopia, while Haile Selassie was still recognised as the *de jure* sovereign. The Court held that since the case concerned a debt recoverable in England and not the validity of acts with regard to persons or property in Ethiopia, the *de jure* authority, Emperor Haile Selassie was entitled to the sum due from the company, and the *de facto* control of the Italians did not affect this.

However, before the defendant's appeal was heard, the United Kingdom extended *de jure* recognition to the Italian authorities in Ethiopia. The Court of Appeal accepted that this related back to, and was deemed to operate as from the date of, the *de facto* recognition. Since this had occurred prior to the case starting, it meant that the Italian government was now to be recognised as the *de jure* government of Ethiopia, before and during the time of the hearing of the action. Accordingly, Haile Selassie was divested of any right whatsoever to sue for the recovery of the money owing.

This problem of the relationship between a *de facto* government and a *de jure* government, as far as English courts were concerned, manifested itself again during the Spanish Civil War. The case of the *Arantzazu Mendi*¹³³ concerned a private steamship registered in Bilbao in the Basque province of Spain. In June 1937, following the capture of that region by the forces of General Franco, the opposing Republican government issued a decree requisitioning all ships registered in Bilbao. Nine months later, the Nationalist government of Franco also passed a decree taking control over all Bilbao vessels. In the meantime, the *Arantzazu Mendi* itself was in London when the Republican government issued a writ to obtain possession of the ship. The owners opposed this, while accepting the Nationalists' requisition order.

It was an accepted rule of international law that a recognised state cannot be sued or otherwise brought before the courts of another state. Accordingly, the Nationalists argued that since their authority had been recognised *de facto* by the UK government over the areas they actually controlled, their decree was valid and could not be challenged in the English courts. Therefore, the action by the Republican government must be dismissed.

The case came before the House of Lords, where it was decided that the Nationalist government, as the *de facto* authority of much of Spain including the region of Bilbao, was entitled to be regarded as a sovereign state and was able to benefit from the normal immunities which follow therefrom. Thus, the action by the Republican government failed. The House of Lords pointed out that it did not matter that the territory over which the *de facto* authority was exercising sovereign powers was from time to time increased or diminished.¹³⁴ This case marks the high-point in the attribution of characteristics to a *de facto* authority and can be criticised for its over-generous assessment of the status of such an entity.¹³⁵

The problems faced by the English court when the rights and obligations of a *de jure* government and a *de facto* government, claiming the same territory, appear to be in conflict have been briefly noted. Basically, the actions of a *de facto* authority with regard to people and property within this sphere of control will be recognised in an English court, but where property is situated and recoverable in England, the *de jure* sovereign will have precedence. A similarly complicated situation arises where the interests of two recognised *de jure* governments of the same state are involved, as one supersedes the other. Problems can arise concerning the issue of retroactivity, that is, how far the court will relate back actions of a *de jure* government, since recognition is normally retroactive to the moment of inception of the particular state or government.

The matter was discussed in the *Gdynia Ameryka Linie v. Boguslawski* case.¹³⁶ During the Second World War, the Polish government-in-exile stationed in London was recognised by the United Kingdom as the *de jure*

government of Poland. However, on 28 June 1945, the communist provisional government was established with effective control of the country and at midnight on 5 July the United Kingdom recognised that government as the *de jure* government of Poland. A couple of days prior to this recognition, the Polish government-in-exile made an offer to Polish seamen of compensation in the event of leaving the merchant navy service. The money was to be paid by the particular employers to seamen not wanting to work for the communist provisional government. In the *Boguslawski* case, the employers refused to pay the compensation to seamen requesting it, and argued that the UK recognition *de jure* of the provisional government was retroactive to 28 June, this being the date that the government effectively took control of the country. If this was the case, then acts of the government-in-exile after 28 June ceased to be of effect and thus the offers of compensation could not be enforced in the English courts.

The House of Lords emphasised the general proposition that recognition operates retroactively. However, they modified the statement by declaring that the courts had to give effect not only to acts done by the new government after recognition, but also to acts done before the recognition ‘in so far as those acts related to matters under its control at the time when the acts were done’.¹³⁷ It was stated that while the recognition of the new government had certain retroactive effects, the recognition of the old government remained effective down to the date when it was in fact withdrawn. Problems might have arisen had the old government, before withdrawal of recognition, attempted to take action with regard to issues under the control of the new government. However, that was not involved in this case.

In other words, and in the circumstances of the case, the principle of retroactivity of recognition was regarded as restricted to matters within the effective control of the new government. Where something outside the effective control of the new government is involved, it would appear that the recognition does not operate retroactively and that prior to the actual date of recognition one would have to accept and put into effect the acts of the previous *de jure* government.

This could lead to many complicated situations, especially where a court is faced with conflicting courses of action, something which is not hard to envisage when one *de jure* government has been superseded by another. It could permit abuses of government such as where a government, knowing itself to be about to lose recognition, awards its supporters financial or other awards in decrees that may be enforced in English courts. What would happen if the new government issued contrary orders in an attempt to nullify the effect of the old government's decrees is something that was not examined in the *Boguslawski* case.

Another case which came before the courts in the same year was *Civil Air Transport Inc. v. Central Air Transport Corporation*,¹³⁸ and it similarly failed to answer the question mentioned above. It involved the sale of aircraft belonging to the nationalist government of China, which had been flown to the British Crown Colony of Hong Kong. Such aircraft were sold to an American company after the communist government established effective control over the country, but before it had been recognised by the United Kingdom. The Court accepted that the nationalist government had been entitled to the aircraft and pointed out that:

retroactivity of recognition operates to validate acts of a *de facto* Government which has subsequently become the new *de jure* Government, and not to invalidate acts of the previous *de jure* Government.¹³⁹

It is to be noted that the communist government did not attempt to nullify the sale to the American company. Had it done so, a new situation would have been created, but it is as yet uncertain whether that would have materially altered the legal result.

The general doctrine adhered to by the United Kingdom with regard to recognition (and now diplomatic dealings) is that it will be accorded upon the evidence of effective control. It is used to acknowledge factual situations and not as a method of exhibiting approval or otherwise. However, this is not so in all cases and there are a number of governments in effective control of their countries and unrecognised by the United Kingdom. One major example was the former German Democratic Republic. Since the prime consequence of non-recognition is that the English courts will not give effect to any laws of an unrecognised entity, problems are thus likely to arise in ordinary international political and commercial life.

The issue came before the courts in the *Carl Zeiss Stiftung v. Rayner and Keeler Ltd (No. 2)* case.¹⁴⁰ It concerned the Carl Zeiss foundation which was run by a special board, reconstituted in 1952 as the Council of Gera. The problem was that it was situated in the German Democratic Republic (GDR) and the establishment of the Council of Gera as the governing body of the

Carl Zeiss foundation was effected by a reorganisation of local government in the GDR. When Carl Zeiss brought a claim before the English courts, the issue was at once raised as to whether, in view of the UK non-recognition of the GDR, the governing body of the foundation could be accepted by the courts. The Court of Appeal decided that since the Foreign Office certified that the United Kingdom recognised 'the State and Government of the Union of Soviet Socialist Republics as *de jure* entitled to exercise governing authority in respect of that zone'¹⁴¹ (i.e. the GDR, being the former Soviet zone of occupation), it was not possible to give effect to any rules or regulations laid down by the GDR. The House of Lords, however, extricated the English courts system from a rather difficult position by means of an elaborate fiction.

It stated that as a Foreign Office certificate is binding on the courts as to the facts it contains, it logically followed that the courts must recognise the Soviet Union as the *de jure* governing authority of East Germany, irrespective of the creation of the GDR. The courts were not entitled to enter into a political examination of the actual situation, but were obliged to accept and give effect to the facts set out in the Foreign Office certificate. Thus, the Soviet Union was the *de jure* sovereign and the GDR government must be accepted as a subordinate and dependent body.

Accordingly, the Court could recognise the existence of the Carl Zeiss Stiftung by virtue of the UK recognition of the *de jure* status of the Soviet Union, the GDR as an administrative body being relevant only as a legal creature of the Soviet Union.

The problem brought out in the *Carl Zeiss* case and sidestepped there was raised again in a series of cases concerning Rhodesia, following the unilateral declaration of independence by the Smith regime in 1965. Basically, if a government or state which exercises effective control over its own territory is unrecognised by the United Kingdom, a strict enforcement of the ‘no recognition, no existence’ rule could lead to much hardship and inconvenience. Accordingly, in *Adams v. Adams*,¹⁴² a Rhodesian divorce decree was not recognised in an English court. However, in *Hesperides Hotels Ltd v. Aegean Turkish Holidays*,¹⁴³ concerning an action in trespass with regard to hotels owned by Greek Cypriots but run by Turkish Cypriots following the Turkish invasion of 1974, Lord Denning stated *obiter* that he believed that the courts could recognise the laws and acts of an unrecognised body in effective control of territory, at least with regard to laws regulating the day-to-day affairs of the people.¹⁴⁴ It is certainly an attractive approach, provided it is carefully handled and strictly limited to determinations of a humanitarian and non-sovereign nature.¹⁴⁵ In *Caglar v. Billingham*, it was noted that while the existence of a foreign unrecognised government could be acknowledged in matters relating to commercial obligations or matters of private law between individuals or matters of routine administration such as registration of births, marriages and deaths, the courts would not acknowledge the existence of an unrecognised state if to do so would involve them in acting inconsistently with the foreign policy or diplomatic stance of the United Kingdom.¹⁴⁶ In *Emin v. Yeldag*, the Court held that private acts taking place within an unrecognised state could be regarded as valid within the English legal system provided that there was no statutory prohibition¹⁴⁷ and that such acceptance did not compromise the UK government in the conduct of foreign relations.¹⁴⁸ Indeed, where the issue concerns the lawful

acts of a person recognised as existing in English law, they will be justiciable before the English courts and will not be tainted by illegality because the unrecognised state can be associated with the actions.¹⁴⁹ In *R v. Reeves Taylor*,¹⁵⁰ the Supreme Court, being called upon to define the scope of a ‘public official’ or ‘person acting in an official capacity’ under the definition of torture under section 134 of the Criminal Justice Act 1988 (implementing in part the UN Convention against Torture 1984), agreed that the customary international law of human rights applied to states irrespective of recognition and that included a *de facto* entity not recognised as a state.

In many cases, however, the problems with regard to whether an entity is or is not a ‘state’ arise in connection with the interpretation of a particular statutory provision. The approach of the courts has been to focus upon the construction of the relevant instrument rather than upon the Foreign Office certificate or upon any definition in international law of statehood.¹⁵¹

Some of the consequential problems of non-recognition were addressed in the Foreign Corporations Act 1991. This provides that a corporation incorporated in a territory not recognised by the UK government as a state would be regarded as having legal personality within the United Kingdom where the laws of that territory were applied by a settled court system. In other words, the territory would be treated for this purpose as if it were a recognised state, thereby enabling its legislation to be applied in this circumstance on the normal conflict of rules basis. The point should, however, be stressed that the legislation was not intended at all to impact upon recognition issues as such.¹⁵²

Since the UK decision to abandon recognition of governments in 1980, the question arises as to the attitude of the courts on this matter. In particular, it appears that they may be called upon to examine the nature of the UK government's dealings with a new regime in order to determine its status for municipal law purposes.¹⁵³

In *Gur Corporation v. Trust Bank of Africa*,¹⁵⁴ the Court was in fact called upon to decide the status of Ciskei. This territory, part of South Africa, was one of the Bantustans granted 'independence' by South Africa. This was accomplished by virtue of the Status of Ciskei Act 1981. The preliminary issue that came before the Court in a commercial dispute was whether Ciskei had *locus standi* to sue or be sued in England. The Foreign and Commonwealth Office certified that Ciskei was not recognised as an independent sovereign state either *de facto* or *de jure* and that representations were made to South Africa in relation to matters occurring in Ciskei. The Court of Appeal held that it was able to take account of such declarations and legislation as were not in conflict with the certificates.

The effect of that, noted Lord Donaldson, was that the Status of Ciskei Act 1981 could be taken into account, except for those provisions declaring the territory independent and relinquishing South African sovereignty. This led to the conclusion that the Ciskei legislature was in fact exercising power by virtue of delegation from the South African authorities.¹⁵⁵ Accordingly, the government of Ciskei could sue or be sued in the English courts 'as being a subordinate body set up by the Republic of South Africa to act on its behalf'.¹⁵⁶ Clearly the Court felt that the situation was analogous to the *Carl Zeiss* case. Whether this was in fact so is an open question. It is certainly

open to doubt whether the terms of the certificates in the cases were on all fours. In the *Gur* case, the executive was far more cautious and non-committal. Indeed, one of the certificates actually stated that the UK government did not have a formal position regarding the exercise of governing authority over the territory of Ciskei,¹⁵⁷ whereas in *Carl Zeiss* the certificate noted expressly that the Soviet Union was recognised as *de jure* entitled to exercise governing authority in respect of the territory (the GDR).¹⁵⁸ The gap was bridged by construction and inference.

More widely, it is unclear to what extent the change in policy on recognition of governments has actually led to a change in attitude by the courts. There is no doubt that the attitude adopted by the government in certifying whether or not diplomatic dealings were in existence with regard to the entity in question is crucial. An assertion of such dealing would, it appears, be determinative.¹⁵⁹ The problem arises where the Foreign Office statement is more ambiguous than the mere assertion of dealings with the entity. The consequence is that a greater burden is imposed on the courts as an answer as to status is sought. On the one hand, the *Gur* case suggests that the courts are not willing to examine for themselves the realities of any given situation, but would seek to infer from the terms of any certificate what the answer ought to be.¹⁶⁰ On the other hand, Hobhouse J in the High Court in *Somalia v. Woodhouse Drake and Carey (Suisse) SA*¹⁶¹ took the wider view that in deciding whether a regime was the government of a state, the court would have to take into account the following factors: (a) whether it is the constitutional government of the state; (b) the degree, nature and stability of administrative control, if any, that it of itself exercises over the territory of the state; (c) whether the UK government has any dealings with it, and if so the nature of those

dealings; and (d) in marginal cases, the extent of international recognition that it has as the government of the state.¹⁶² Part of the answer as to why a different emphasis is evident is no doubt due to the fact that, in the latter case, there were competing bodies claiming to be the government of Somalia and the situation on the ground as a matter of fact was deeply confused. It should also be noted that in the *Somalia* case, the Court took the view that Foreign Office statements were no more than part of the evidence in the case, although likely to be the best evidence as to whether the government had dealings with the entity in question.¹⁶³ It is further to be noted that in this case, as in *Kuwait Airways Corporation v. Iraqi Airways Company (Nos. 4 and 5)*,¹⁶⁴ the Foreign Office had written to the relevant court, but not in the form of an actual certificate of recognition.¹⁶⁵

In examining the particular situation, the courts will take note of the constitutional principle that ‘the state cannot speak with two voices on such a matter, the judiciary saying one thing, the executive another’.¹⁶⁶ Where there has been a formal communication from the executive, but in the absence of a categorical assertion of recognition, the court will examine the communication in order to interpret it, but it would not be open to the court to set aside that communication and look at other material in an attempt to identify what the position of the government actually was.¹⁶⁷ However, in such circumstances, the court is not precluded from being able to take account of particular factors. In *Secretary of State for the Home Department v. CC and CF*,¹⁶⁸ the Court, in reaffirming the *Somalia* case, held that the fact that the government had dealings with the Somaliland authorities as a matter of evidence led to the conclusion that: ‘In the light of the evidence as to the nature of its administration of the territory under its control . . . the

Somaliland administration is the effective government of Somaliland and it is open to this court to take cognizance of its legislative, executive and judicial acts.’¹⁶⁹

In *Mohamed v. Breish*,¹⁷⁰ the Court of Appeal dealt with the situation where the executive had made relevant communications as to the status of the entity under review. The Court reaffirmed that the recognition of foreign states or a person or body as the government of a foreign state was an executive function and that ‘the Crown must speak with one voice in its executive and judicial functions in this aspect of international relations’. It concluded, in the light of two FCO communications, that the United Kingdom had recognised the Government of National Accord of Libya as the executive arm of government with sole oversight of executive functions. The Court of Appeal further held that such recognition said nothing about the *de jure* status or constitutional lawfulness of the government under local law. Recognition of a *de facto* government was a recognition of its sovereignty and not a commentary upon its internal legitimacy. Accordingly, what the one voice principle required of the Court was that it should give effect to that sovereignty, irrespective of, or notwithstanding any, constitutional unlawfulness of the government so recognised.¹⁷¹

The United States

The situation in the United States with regard to the recognition or non-recognition of foreign entities is similar to that pertaining in the United Kingdom, with some important differences. Only a recognised state or government can in principle sue in the US courts and benefit in principle

from sovereign immunity and the act of state doctrine when sued.¹⁷² This applies irrespective of the state of diplomatic relations, providing there is no war between the two.¹⁷³ However, an unrecognised state or government may in certain circumstances be permitted access before the American courts. This would appear to depend on the facts of each case and a practical appreciation of the entity in question.¹⁷⁴ For example, in *Transportes Aereos de Angola v. Ronair*,¹⁷⁵ it was held that in the particular circumstances where the US State Department had clearly stated that allowing the plaintiff (a corporation owned by the unrecognised government of Angola) access to the Court would be consistent with the foreign policy interests of the United States, the jurisdictional bar placed upon the Court would be deemed to have been lifted.

As in the United Kingdom, a declaration by the executive will be treated as binding the courts and, like the United Kingdom, the ‘one voice’ doctrine has been espoused to permit the executive to make the decision in recognition scenarios.¹⁷⁶ In *Zivotofsky v. Kerry*,¹⁷⁷ the US Supreme Court underlined that it was the President who had the exclusive power to grant formal recognition to a foreign sovereign, noting that the nation must ‘speak . . . with one voice’ regarding which governments were legitimate in the eyes of the United States and which were not, and the Supreme Court emphasised that such unilateral recognition power had long been recognised by that court.

In the absence of the ‘suggestion’ clarifying how far the process of non-recognition is to be applied, the courts have been more willing than their UK counterparts to give effect to particular acts of an unrecognised body, although as seen in the previous section the attitude of the English courts has become more flexible. In the *Carl Zeiss* case, Lords Reid and Wilberforce

referred in approving terms to the trend evident in decisions of US courts to give recognition to the ‘actual facts or realities found to exist in the territory in question’, in the interests of justice and common sense. Such recognition did not apply to every act, but, in Lord Wilberforce’s words, it did apply to ‘private rights, or acts of everyday occurrence, or perfunctory acts of administration’.¹⁷⁸ How far this extends, however, has never been precisely defined.

It was the difficulties engendered by the American Civil War that first stimulated a reappraisal of the ‘no recognition, no existence’ doctrine. It was not possible to ignore every act of the Confederate authorities and so the idea developed that such rules adopted by the Confederate states as were not hostile to the Union or the authority of the Central Government, or did not conflict with the terms of the US Constitution, would be treated as valid and enforceable in the courts system.¹⁷⁹ The doctrine was developed in a case before the New York Court of Appeals, when, discussing the status of the unrecognised Soviet government, Judge Cardozo noted that an unrecognised entity which had maintained control over its territory, ‘may gain for its acts and decrees a validity quasi-governmental, if violence to fundamental principles of justice or to our public policy might otherwise be done’.¹⁸⁰

This thesis progressed rapidly in the period immediately preceding the American recognition of the Soviet Union and led in *Salimoff v. Standard Oil Company of New York*¹⁸¹ to the enforcement of a Soviet oil nationalisation decree, with the comment that: ‘to refuse to recognise that Soviet Russia is a government regulating the internal affairs of the country, is to give to fictions an air of reality which they do not deserve’.

This decision, diametrically opposed to the *Luther v. Sagor* approach,¹⁸² constituted a step towards the abolition of differences between the judicial treatment of the acts of recognised and unrecognised governments.

However, the limits of this broad doctrine were more carefully defined in *The Maret*,¹⁸³ where the Court refused to give effect to the nationalisation of an Estonian ship by the government of the unrecognised Soviet Republic of Estonia. However, the ship in dispute was located in an American port at the date of the nationalisation order, and there appears to be a difference in treatment in some cases depending upon whether the property was situated inside or outside the country concerned.

One can mention, in contrast to *The Maret*, the case of *Upright v. Mercury Business Machines*,¹⁸⁴ in which the non-recognition of the GDR was discussed in relation to the assignment of a bill to the plaintiff by a state-controlled company of the GDR. The judge of the New York Supreme Court declared, in upholding the plaintiff's claim, that a foreign government, although unrecognised by the executive:

may nevertheless have *de facto* existence which is judicially cognisable. The acts of such a *de facto* government may affect private rights and obligations arising either as a result of activity in, or with persons or corporations within, the territory controlled by such *de facto* government.

However, the creation of judicial entities by unrecognised states will not be allowed to circumvent executive policy. In *Kunstsammlungen zu Weimar v. Elicofon*,¹⁸⁵ the KZW was an East German governmental agency until 1969, when it was transformed into a separate juristic person in order to avoid the problems relating to unrecognised states in the above litigation. This concerned the recovery of pictures stolen from a museum during the American occupation of Germany.

As a branch of an unrecognised state, the KZW could not of course be permitted to sue in an American court, but the change of status in 1969 was designed to circumvent this. The Court, however, refused to accept this and emphasised that to allow the KZW to intervene in the case ‘would render our government’s non-recognition of the German Democratic Republic a meaningless gesture’.¹⁸⁶ Further, in *Autocephalous Church of Cyprus v. Goldberg*, the Court of Appeals held that it would not give effect to confiscatory decrees adopted by the unrecognised ‘Turkish Federated State of Cyprus’, later called the ‘Turkish Republic of Northern Cyprus’.¹⁸⁷

In *Ministry of Defense of the Islamic Republic of Iran v. Gould*,¹⁸⁸ the Court was faced with an action in which the unrecognised Iranian government sought to enforce an award. However, the United States intervened and filed a statement of interest supporting Iran’s argument and this proved of significant influence. This general approach was reinforced in *National Petrochemical v. The M/T Stolt Sheaf*,¹⁸⁹ where the Court stressed that the executive must have the power to deal with unrecognised governments and that therefore the absence of formal recognition did not necessarily result in a foreign government being barred from access to US courts.¹⁹⁰ However,

where the executive has issued a non-recognition certificate and makes known its view that in the instant case the unrecognised party should not be permitted access to the courts, the courts appear very willing to comply.¹⁹¹

It is somewhat difficult to reconcile the various American cases or to determine the extent to which the acts of an unrecognised state or government may be enforced in the US courts system. But two factors should be particularly noted. First of all, the declaration of the executive is binding. If that intimates that no effect is to be given to acts of the unrecognised entity, the courts will be obliged to respect this. It may also be the case that the State Department 'suggestions' will include some kind of hint or indication which, while not clearly expressed, may lead the courts to feel that the executive is leaning more one way than another in the matter of the government's status, and this may influence the courts. For example, in the *Salimoff*¹⁹² case, the terms of the certificate tended to encourage the Court to regard the Soviet government as a recognised government, whereas in the case of *The Maret*,¹⁹³ the tone of the executive's statement on the Soviet Republic of Estonia was decidedly hostile to any notion of recognition or enforcement of its decrees.

The second point is the location of the property in question. There is a tendency to avoid the enforcement of acts and decrees affecting property situated outside the unrecognised state or government and in any event the location of the property often introduces additional complications as regards municipal law provision.¹⁹⁴

There is some uncertainty in the United States as to the operation of the retroactivity doctrine, particularly as it affects events occurring outside the country. There is a line of cases suggesting that only those acts of the unrecognised government performed in its own territory could be validated by the retroactive operation of recognition,¹⁹⁵ while, on the other hand, there are cases illustrating the opposite proposition decided by the Supreme Court.¹⁹⁶

²⁸ UKMIL, 62 *BYIL*, 1991, pp. 559–60. On 31 December 1991, the European Community issued a statement noting that Armenia, Azerbaijan, Belarus, Kazakhstan, Moldova, Turkmenistan, Ukraine and Uzbekistan had given assurances that the requirements in the Guidelines would be fulfilled. Accordingly, the member states of the Community declared that they were willing to proceed with the recognition of these states, *ibid.*, p. 561. On 15 January 1992, a statement was issued noting that Kyrgyzstan and Tadzhikistan had accepted the requirements in the Guidelines and that they too would be recognised, UKMIL, 63 *BYIL*, 1992, p. 637.

²⁹ UKMIL, 62 *BYIL*, 1991, pp. 560–1.

³⁰ See the announcement by President Bush on 25 December 1991, 2(4 & 5) *Foreign Policy Bulletin*, 1992, p. 12, as cited in Henkin *et al.*, *International Law*, pp. 252–3. See also, as to the importance of democratic considerations, S. D. Murphy, ‘Democratic Legitimacy and the Recognition of States and Governments’, **48** *ICLQ*, 1999, p. 545.

³¹ See above, [Chapter 5](#), p. 210.

³² See S/2007/168 and S/2007/168/Add.1.

³³ One month after the declaration of independence, twenty-eight states had recognised the independence of Kosovo, including sixteen of the twenty-seven EU member states and six of the UN Security Council’s fifteen members: see ‘Kosovo’s First Month’, International Crisis Group Europe Briefing No. 47, 18 March 2008, p. 3. As of the time of writing, Kosovo is recognised by 114 states; see www.mfa-ks.net/en/politika/483/njohjet-ndrkombtare-t-republiks-s-kosovs/483 and see above, [Chapter 5](#), p. 215.

³⁴ Note, however, the EU mediated normalisation agreements signed by Serbia and Kosovo particularly with regard to ethnic Serbs in Kosovo: see e.g. statements by EU High Representative/Vice-President Mogherini made on 25 August 2015 and 27 January 2016, www.euractiv.com/section/enlargement/news/belgrade-and-pristina-interpret-new-agreement-differently/ and https://eeas.europa.eu/delegations/kosovo/2966/statement-by-high-representativevice-president-federica-mogherini-following-the-meeting-of-the-eu-facilitated-dialogue_en.

³⁵ See e.g. Chen, *Recognition*, pp. 172 ff. See also the views of the Yugoslav Arbitration Commission as to the date of succession of the former Yugoslav republics, Opinion No. 11, 96 ILR, p. 719. Note that retroactivity of recognition is regarded by Oppenheim as a rule of convenience rather than of principle: see *Oppenheim’s International Law*, p. 161.

³⁶ See e.g. I. Brownlie, ‘Recognition in Theory and Practice’, **53** *BYIL*, 1982, p. 197; C. Warbrick, ‘The New British Policy on Recognition of Governments’, **30** *ICLQ*, 1981, p. 568; M. J. Peterson, ‘Recognition of Governments Should Not Be Abolished’, **77** *AJIL*, 1983, p. 31; M. J. Peterson, *Recognition of Governments: Legal Doctrine and State Practice*, London, 1997; N. Ando, ‘The Recognition of Governments Reconsidered’, **28** *Japanese Annual of International Law*, 1985, p. 29; C. Symmons, ‘United Kingdom Abolition of the Doctrine of Recognition: A Rose by Another Name’, *Public Law*, 1981, p.

⁵⁶ See 27 *Canadian YIL*, 1989, p. 387. See also *Re Chateau-Gai Wines Ltd and Attorney-General for Canada* [1970] Ex CR 366; 55 ILR, p. 38.

⁵⁷ See e.g. the Netherlands, 22 *Netherlands YIL*, 1991, p. 237; and New Zealand, *Attorney-General for Fiji v. Robt Jones House Ltd* [1989] 2 NZLR 69, 70–1; 80 ILR, p. 1. The EU has stated that ‘it does not recognise governments, and even less political personalities, but states, according to the most common international practice’, *Bulletin of the European Union*, 1999–7/8, p. 60 and UKMIL, 70 *BYIL*, 1999, p. 424.

⁵⁸ 408 HL Deb., cols. 1121–2, 28 April 1980. This has been reaffirmed on a number of occasions: see e.g. UKMIL, 69 *BYIL*, 1998, p. 477 and UKMIL, 72 *BYIL*, 2001, p. 577.

⁵⁹ See *Gur Corp. v. Trust Bank of Africa* [1987] 1 QB 599; 75 ILR, p. 675.

⁶⁰ See, as regards the different approaches adopted to the Cambodian and Ugandan experiences, Symmons, ‘UK Abolition’, p. 250; and UKMIL, 50 *BYIL*, 1979, p. 296. See, as to recognition of belligerency and insurgency, e.g. O’Connell, *International Law*, pp. 148–53; Lauterpacht, *Recognition*, p. 270; and *Oppenheim’s International Law*, pp. 161 ff.

⁶¹ UKMIL, 82 *BYIL*, 2011, p. 737–8. See also Security Council resolution 1962 (2010).

⁶² UKMIL, 82 *BYIL*, 2011, p. 742. This followed the meeting on 15 July 2011 of the Libya Contact Group underlining that the parties would deal only with the National Transitional Council as the ‘legitimate governing authority’ in Libya: www.mfa.gov.tr/fourth-meeting-of-the-libya-contact-group-chair-s-statement-15-july-2011-istanbul.en.mfa.

⁶³ [2011] EWHC 2274 (Comm), para. 23. See also *Mohamed v. Breish* [2020] EWCA Civ 637, para. 31, concluding, in referring to subsequent communications from the FCO, that the UK had recognised the Government of National Accord (which essentially succeeded the National Transitional Council) as the legitimate executive authority in Libya.

⁶⁴ 113 *AJIL*, 2019, p. 601.

⁶⁵ See www.euractiv.com/section/global-europe/news/eu-leaders-recognise-guaido-in-venezuela/. The Organization of American States and a number of other states took the same position, *ibid.*, and 113 *AJIL*, 2019, p. 604. See also for estimates of over fifty states, <https://share.america.gov/support-for-venezuelas-juan-guaido-grows-infographic/>.

⁶⁶ See www.gov.uk/government/news/uk-recognises-juan-guaido-as-interim-president-of-venezuela. See also *Deutsche Bank v. Bank of England* [2020] EWHC 1721, where the High Court in a case concerning which of the opposing leaders was entitled to the ownership of gold held in Venezuela's name in London, held that the UK recognition of Juan Guaidó as the interim President of Venezuela and thus as head of state was conclusive for the purpose of determining the issues in the proceedings. However, the Court of Appeal disagreed with the High Court in *Banco Central de Venezuela v. Deutsche Bank* [2020] EWCA Civ 1249, holding that the relevant statement by the UK Foreign Secretary was ambiguous in allowing for the possibility that the rival President (Maduro) exercised effective control in Venezuela and was recognised implicitly as *de facto* President, not least because of the UK government's unequivocal dealings with him as head of state, paras. 123–6.

⁶⁷ It is possible for one state or states to recognise the legitimacy or legality of other situations, beyond that of recognition of states and governments. Such recognition is often a significant political tool and one which in certain circumstances may stake out a claim in the legal field internationally, as well as having domestic consequences. For example, on 25 March 2019, the US issued a Presidential proclamation recognising Israel's sovereignty over the Golan Heights, an area of Syria captured in 1967 and occupied by Israel since then, **113 AJIL**, 2019, p. 613. While this recognition is internally operative within the US and significant politically, the international legal status of the area remains unchanged; see also the regret expressed by the majority of the members of the Security Council, www.un.org/press/en/2019/sc13753.doc.htm, 27 March 2019 and Security Council resolution 497 (1981). Of more complexity was the recognition by the US on 6 December 2017 of Jerusalem as Israel's capital, **112 AJIL**, 2018, p. 306. While West Jerusalem was recognised as part of Israel, East Jerusalem is regarded as occupied by Israel since 1967, despite the extension of Israel's laws to that area in 1967. It is to be noted that the US recognition did not specify the borders of Jerusalem and that the denomination of capitals is an attribute of sovereign independence. See further as to the complicated history of Jerusalem, the Application of Palestine instituting proceedings before the ICJ against the US for its relocation of the US embassy from Tel Aviv to Jerusalem, 28 September 2018 and *The Jerusalem Question and its Resolution: Selected Documents* (ed. R. Lapidoth and M. Hirsch), Leiden, 1994.

⁶⁸ See e.g. *Oppenheim's International Law*, p. 154. See also *Mohamed v. Breish* [2020] EWCA Civ 637, para. 45; and *Banco Central de Venezuela v. Deutsche Bank* [2020]

EWCA Civ 1249, paras. 77 ff.

⁶⁹ See e.g. O’Connell, *International Law*, p. 161. See also the Morrison statement, above, **note 39**.

⁷⁰ See below, pp. 397 and 403.

⁷¹ See below, p. 400.

⁷² See e.g. *Haile Selassie v. Cable and Wireless Ltd (No. 2)* [1939] 1 Ch 182; 9 AD, p. 94.

⁷³ See e.g. *Oppenheim’s International Law*, pp. 143 ff.

⁷⁴ See e.g. J. Stremlau, *The International Politics of the Nigerian Civil War, 1967–70*, Princeton, 1977, pp. 127–9; and D. Ijalaye, ‘Was “Biafra” at Any Time a State in International Law?’, **65 AJIL**, 1971, p. 51. See also Lauterpacht, *Recognition*, pp. 7–8.

⁷⁵ See e.g. R. Müllerson, *International Law, Rights and Politics*, London, 1994, p. 130; and R. Rich, ‘Recognition of States: The Collapse of Yugoslavia and the Soviet Union’, **4 EJIL**, 1993, p. 36.

⁷⁶ See above, p. 383.

⁷⁷ 92 ILR, pp. 179, 181. Note that the President of Croatia on 15 January 1992 announced that Croatia would abide by the necessary conditions and on 8 May 1992 its Constitution was amended. The amended Constitution was considered by the Arbitration Commission on 4 July 1992, which concluded that the requirements of general international law with regard to the protection of minorities had been satisfied, *ibid.*, p. 209. Note, however, the critical views of the UN Human Rights Committee with regard to the distinctions made in the Croatian Constitution between ethnic Croats and other citizens: see CCPR/C/79/Add.15, p. 3. Croatia became a member of the UN on 22 May 1992. See also M. Weller, ‘The International Response to the Dissolution of the Socialist Federal Republic of Yugoslavia’, **86 AJIL**, 1992, p. 569.

⁷⁸ See e.g. Weller, ‘International Response’. Cf. the views of the UK Minister of State at the Foreign Office, UKMIL, 63 BYIL, 1992, p. 645. Note that Bosnia became a member of the UN on 22 May 1992.

⁷⁹ See above, Chapter 5, p. 219.

⁸⁰ Similar comments would apply to the secession of Crimea and its subsequent annexation by Russia: see Chapter 9, p. 446. See also with regard to Palestine, above, Chapter 5, p. 215.

⁸¹ See e.g. with regard to the delays in recognising Macedonia, Henkin *et al.*, *International Law*, p. 253. Israel, of course, remained unrecognised by its Arab neighbours until long after its establishment in 1948. It was recognised in 1979 by Egypt and in 1995 by Jordan.

⁸² See e.g. *Oppenheim's International Law*, p. 169; Lauterpacht, *Recognition*, pp. 369–408; and Chen, *Recognition*, pp. 201–16. See also Talmon, 'Recognition', pp. 255 ff.; and M. Lachs, 'Recognition and Modern Methods of International Co-operation', 35 *BYIL*, 1959, p. 252.

⁸³ Note that article 7 of the Montevideo Convention on Rights and Duties of States 1933 provides that 'the recognition of a state may be express or tacit. The latter results from any act which implies the intention of recognising the new state.' See also R. Higgins, *The Development of International Law by the Political Organs of the United Nations*, Oxford, 1963, pp. 140 ff.

⁸⁴ See e.g. UK and North Vietnam, Cmd 9763, p. 3, note 1, and Israel and Arab countries, International Convention on the Elimination of all Forms of Racial Discrimination 1965: see *Human Rights International Instruments*, UN, ST/HR/4/rev.4, 1982. Note that Egypt withdrew its declarations regarding non-recognition of Israel with regard to this Convention on 18 January 1980, *ibid.*, p. 86.

⁸⁵ See O'Connell, *International Law*, pp. 154–5. Note that the UK stated that in the case of Namibia 'there was no formal recognition of statehood, but it was implicit in the establishment of diplomatic relations in March 1990', UKMIL, 63 *BYIL*, 1992, p. 642. Instructing an ambassador to make suitable, friendly contact with the new administration in question might also suffice: see UKMIL, 50 *BYIL*, 1979, p. 294.

⁸⁶ See e.g. *Pan American World Airways Inc. v. Aetna Casualty and Surety Co.* 13 ILM, 1974, pp. 1376, 1397.

⁸⁷ See *Oppenheim's International Law*, p. 171, note 9.

⁸⁸ Discussions with an unrecognised entity conducted by consular officers will not of itself imply recognition: see e.g. Smith, *Great Britain*, vol. I, p. 79; and *Civil Air Transport Inc. v. Central Air Transport Corp.* [1953] AC 70, 88–9. The establishment of an office in the UK, for example, of an unrecognised entity is not as such prohibited, nor does it constitute recognition: see e.g. with regard to the PLO, 483 HL Deb., cols. 1248–52, 27 January 1987 and UKMIL, 58 *BYIL*, 1987, p. 531. Note that under section 1 of the Diplomatic and Consular Premises Act 1987, the permission of the Foreign Secretary is required if the premises in question are to be regarded as diplomatic or consular.

⁸⁹ See e.g. *China v. Merchants' Fire Assurance Corp. of New York* 30 F.2d 278 (1929); 5 AD, p. 42; and *Clerget v. Banque Commerciale pour l'Europe du Nord* 52 ILR, p. 310. See, with regard to the special position as between the German Federal Republic and the German Democratic Republic, *Re Treaty on the Basis of Relations Between the Federal Republic of Germany and the German Democratic Republic* 78 ILR, p. 150. See also Whiteman, *Digest*, vol. II, pp. 567 ff.

⁹⁰ See e.g. with regard to Formosa/Taiwan, 6 ICLQ, 1957, p. 507 and with regard to Turkish-occupied northern Cyprus, 957 HC Deb., col. 247, Written Answer, 8 November 1978.

⁹¹ See e.g. UKMIL, 49 *BYIL*, 1978, p. 339; and Whiteman, *Digest*, vol. II, pp. 563 ff. See also *Civil Aeronautics Administration v. Singapore Airlines Ltd* [2004] 1 SLR 570; [2004] SGCA 3, para. 35; 133 ILR, pp. 371, 383.

⁹² See the Memorandum on the Legal Aspects of the Problem of Representation in the United Nations, S/1466, 1950 and 4 *International Organisation*, 1950, pp. 356, 359.

⁹³ See e.g. Q. Wright, 'Some Thoughts about Recognition', 44 *AJIL*, 1950, p. 548. See also, with regard to the Ukraine and Byelorussia, members of the UN prior to the demise of the Soviet Union of which they were constituent republics, UKMIL, 55 *BYIL*, 1978, p. 339.

⁹⁴ See 223 HC Deb., col. 241, Written Answer, 22 April 1993 and UKMIL, 64 *BYIL*, 1993, p. 601. Note that a similar view was taken with regard to the Democratic People's Republic of Korea, 62 *BYIL*, 1991, p. 559.

⁹⁵ See *Admissions (Conditions of Membership of the United Nations)*, ICJ Reports, 1948, pp. 57 ff.; 15 AD, p. 333.

⁹⁶ See e.g. *US v. Pink* 315 US 203, 229 (1942); Whiteman, *Digest*, vol. II, pp. 120 ff.; 10 AD, p. 48; and A. Kiss, *Répertoire de la Pratique Française en Matière de Droit International Public*, Paris, 1962–72, vol. III, pp. 40 ff.

⁹⁷ See e.g. Lauterpacht, *Recognition*, chapter 19. See also the Treaty of Berlin 1878 concerning Bulgaria, Montenegro, Serbia and Romania and the provisions dealing with freedom of religion, articles V, XXVII, XXXV and XLIII.

⁹⁸ See further above, p. 383, with regard to the approach of the European Community to the emergence of new states in Eastern Europe and out of the former Soviet Union and Yugoslavia. This constituted a coordinated stand with regard to criteria for recognition by the Community and its member states rather than collective recognition as such.

⁹⁹ See e.g. Higgins, *Development*; Dugard, *Recognition*; Lauterpacht, *Recognition*, p. 400; Chen, *Recognition*, p. 211; and *Oppenheim's International Law*, pp. 177 ff.

¹⁰⁰ See further above, p. 378.

¹⁰¹ See Lauterpacht, *Recognition*, p. 349.

¹⁰² Withdrawal of *de facto* recognition does not always entail withdrawal of *de jure* recognition: see, with regard to Latvia, *Re Feivel Pikelný's Estate*, 32 *BYIL*, 1955–56, p. 288.

¹⁰³ See 975 HC Deb., col. 723, 6 December 1979; and C. Warbrick, 'Kampuchea: Representation and Recognition', 30 *ICLQ*, 1981, p. 234. See also *AFDI*, 1980, p. 888.

¹⁰⁴ See above, p. 389.

¹⁰⁵ 424 HL Deb., col. 551, 15 October 1981.

¹⁰⁶ See *Azazh Kebbede v. Italian Government* 9 AD, p. 93.

¹⁰⁷ US reply brief in the Court of Appeals in *Goldwater v. Carter* 444 US 996 (1979), quoted in *DUSPIL*, 1979, pp. 143–4 (emphasis in the original).

¹⁰⁸ Taiwan Relations Act, Pub. L. 96–8 Stat. 22 USC 3301–3316, s. 4.

¹⁰⁹ Also of interest is the UK attitude to the ‘republic of Somaliland’. This territory is part of Somalia, but proclaimed independence in 1991. It is totally unrecognised by any state, but the UK maintains ‘continuing contacts’ with it and works ‘very closely’ with it: see 677 HL Deb., col. 418, 16 January 2006 and 683 HL Deb., col. 212, 14 June 2006. See also M. Schoiswohl, *Status and (Human Rights) Obligations of Non-Recognized De Facto Regimes in International Law: The Case of ‘Somaliland’*, Leiden, 2004. In 2012, a UK Foreign Office Minister noted that Somaliland was ‘quasi-independent’ and ‘autonomous’, but that any question of recognition was for the people of Somaliland and a matter on which the African Union would have to lead: HC 1318, 5 January 2012 and UKMIL, 83 *BYIL*, 2012, pp. 360–2.

¹¹⁰ See e.g. Lauterpacht, *Recognition*, pp. 416–20; and Oppenheim’s *International Law*, pp. 183 ff. See also R. Langer, *Seizure of Territory*, Princeton, 1947; Hackworth, *Digest*, vol. I, p. 334; I. Brownlie, *International Law and the Use of Force by States*, Oxford, 1963, chapter 25; Dugard, *Recognition*, pp. 24 ff., 81 ff.; and Crawford, *Creation of States*, pp. 120 ff. See also S. Talmon, *La Non Reconnaissance Collective des États Illégaux*, Paris, 2007; and M. M. Dahir, *Legal Implications on Non-Recognition of Somaliland: Possibilities and Barriers to Foreign Investment in Unrecognised De Facto State*, Lambert, 2015.

¹¹¹ See e.g. Oppenheim’s *International Law*, pp. 183–4; and *Legal Consequences for States of the Continued Presence of South Africa in Namibia*, ICJ Reports, 1971, pp. 16, 46–7; 49 ILR, pp. 2, 36–7.

¹¹² LNOJ, Sp. Supp. No. 101, p. 8. This principle was reiterated in a number of declarations subsequently: see e.g. 34 *AJIL*, 1940, Supp., p. 197. See also O’Connell, *International Law*, pp. 143–6.

¹¹³ O’Connell, *International Law*, pp. 143–6.

114 See also article 11 of the Montevideo Convention on the Rights and Duties of States 1933; article 17 of the OAS Charter 1948; and article 52 of the Vienna Convention on the Law of Treaties 1969. Note also article 5(3) of the Consensus Definition of Aggression 1974, adopted by the General Assembly in resolution 3314 (XXIX).

115 See also Security Council resolutions 476 (1980) and 478 (1980) declaring purported changes in the status of Jerusalem by Israel to be null and void, and resolution 491 (1981) stating that Israel's extension of its laws, jurisdiction and administration to the Golan Heights was without international legal effect.

116 Security Council resolution 216 (1965). See also Security Council resolutions 217 (1965), 277 (1970) and 288 (1970).

117 See e.g. Security Council resolutions 221 (1961), 232 (1966) and 253 (1968). See also M. N. Shaw, *Title to Territory in Africa*, Oxford, 1986, p. 160; R. Zacklin, *The United Nations and Rhodesia*, Oxford, 1974; and J. Nkala, *The United Nations, International Law and the Rhodesian Crisis*, Oxford, 1985.

Territory

The Concept of Territory in International Law

International law is based on the concept of the state. The state in its turn lies upon the foundation of sovereignty, which expresses internally the supremacy of the governmental institutions and externally the supremacy of the state as a legal person.¹

But sovereignty itself, with its retinue of legal rights and duties, is founded upon the fact of territory. Without territory a legal person cannot be a state.² It is undoubtedly the basic characteristic of a state and the one most widely accepted and understood. There are currently some 200 distinct territorial units, each one subject to a different territorial sovereignty and jurisdiction.

Since such fundamental legal concepts as sovereignty and jurisdiction can only be comprehended in relation to territory, it follows that the legal nature of territory becomes a vital part in any study of international law. Indeed, the principle whereby a state is deemed to exercise exclusive power over its territory can be regarded as a fundamental axiom of classical international law.³ The development of international law upon the basis of the exclusive authority of the state within an accepted territorial framework meant that

territory became ‘perhaps the fundamental concept of international law’.⁴ Most nations indeed developed through a close relationship with the land they inhabited.⁵

The central role of territory in the scheme of international law may be seen by noting the development of legal rules protecting its inviolability. The principle of respect for the territorial integrity of states is well founded as one of the linchpins of the international system, as is the norm prohibiting interference in the internal affairs of other states.⁶ A number of factors, however, have tended to reduce the territorial exclusivity of the state in international law. Technological and economic changes have had an impact as interdependence becomes more evident and the rise of such transnational concerns as human rights and self-determination have tended to impinge upon this exclusivity.⁷ The growth of international organisations is another relevant factor, as is the development of the ‘common heritage’ concept in the context of the law of the sea and air law.⁸ Nevertheless, one should not exaggerate the effects upon international law doctrine today of such trends.⁹ Territorial sovereignty remains as a key concept in international law.

Since the law reflects political conditions and evolves, in most cases, in harmony with reality, international law has had to develop a series of rules governing the transfer and control of territory. Such rules, by the very nature of international society, have often (although not always) had the effect of legitimising the results of the exercise of power. The lack of a strong, central authority in international law has emphasised, even more than municipal legal structures, the way that law must come to terms with power and force.

The rules laid down by municipal legislation and judicial decisions regarding the transfer and control of land within a particular state are usually highly detailed, for they deal with one of the basic resources and wealth-creating factors of the nation. Land law has often reflected the power balance within a society, with feudal arrangements being succeeded by free market contracts and latterly the introduction of comprehensive provisions elaborating the rights and duties of landlords and their tenants, and the development of more sophisticated conveyancing techniques. A number of legal interests are capable of existing over land and the possibility exists of dividing ownership into different segments.¹⁰ The treatment of territory in international law has not reached this sophisticated stage for a number of reasons, in particular the horizontal system of territorial sovereignty that subsists internationally as distinct from the vertical order of land law that persists in most municipal systems. There is thus a critical difference in the consequences that result from a change in the legal ownership of land in international law and in municipal law.

In international law a change in ownership of a particular territory involves also a change in sovereignty, in the legal authority governing the area. This means that the nationality of the inhabitants is altered, as is the legal system under which they live, work and conduct their relations, whereas in municipal law no such changes are involved in an alteration of legal ownership. Accordingly, international law must deal also with all the various effects of a change in territorial sovereignty and not confine its attentions to the mere mechanism of acquisition or loss of territory.¹¹

Territorial Sovereignty

Judge Huber noted in the *Island of Palmas* case¹² that:

sovereignty in relation to a portion of the surface of the globe is the legal condition necessary for the inclusion of such portion in the territory of any particular state.

Briefly defined territorial sovereignty in terms of the existence of rights over territory rather than the independence of the state itself or the relation of persons to persons. It was a way of contrasting ‘the fullest rights over territory known to the law’ with certain minor territorial rights, such as leases and servitudes.¹³ Territorial sovereignty has a positive and a negative aspect. The former relates to the exclusivity of the competence of the state regarding its own territory,¹⁴ while the latter refers to the obligation to protect the rights of other states.¹⁵

The international rules regarding territorial sovereignty are rooted in the Roman law provisions governing ownership and possession, and the classification of the different methods of acquiring territory is a direct descendant of the Roman rules dealing with property.¹⁶ This has resulted in some confusion. Law, being so attached to contemporary life, cannot be easily transposed into a different cultural milieu.¹⁷ And, as shall be noted, the Roman method of categorising the different methods of acquiring territory faces difficulties when applied in international law.

The essence of territorial sovereignty is contained in the notion of title. This term relates to both the factual and legal conditions under which territory is

deemed to belong to one particular authority or another. In other words, it refers to the existence of those facts required under international law to entail the legal consequences of a change in the juridical status of a particular territory.¹⁸ As the International Court noted in the *Burkina Faso/Mali* case,¹⁹ the word ‘title’ comprehends both any evidence which may establish the existence of a right and the actual source of that right.²⁰

One interesting characteristic that should be noted and which again points to the difference between the treatment of territory under international law and municipal law is that title to territory in international law is more often than not relative rather than absolute.²¹ Thus, a court, in deciding to which of the contending states a parcel of land legally belongs, will consider all the relevant arguments and will award the land to the state which relatively speaking puts forward the better (or best) legal case.²² Title to land in municipal law is much more often the case of deciding in uncertain or contentious circumstances which party complies with the legal requirements as to ownership and possession, and in that sense title is absolute. It is not normally a question of examining the facts to see which claimant can under the law put forward a better claim to title. Further, not all rights or links will amount to territorial sovereignty. Personal ties of allegiance may exist, but these may not necessarily lead to a finding of sovereignty.²³ The special characteristics of the territory need to be taken into account, as does the particular structure of the sovereignty in question.²⁴

Disputes as to territory in international law may be divided into different categories. The contention may be over the status of the country itself, that is, all the territory comprised in a particular state, as for example Arab claims

against Israel at one time and claims formerly pursued by Morocco against Mauritania.²⁵ Or the dispute may refer to a certain area on the borders of two or more states, as for example Somali claims against the north-east of Kenya and south-east of Ethiopia.²⁶ Similarly, claims to territory may be based on a number of different grounds, ranging from the traditional method of occupation or prescription to the newer concepts such as self-determination, with various political and legal factors, for example, geographical contiguity, historical demands and economic elements, possibly being relevant. These issues will be noted during the course of this chapter.

Apart from territory actually under the sovereignty of a state, international law also recognises territory over which there is no sovereign. Such territory is known as *terra nullius*. In addition, there is a category of territory called *res communis* which is (in contrast to *terra nullius*) generally not capable of being reduced to sovereign control. The prime instance of this is the high seas, which belong to no one and may be used by all. Another example would be outer space. The concept of common heritage of mankind has also been raised and will be examined in this chapter.

The Acquisition of Additional Territory²⁷

The classical technique of categorising the various modes of acquisition of territory is based on Roman law and is not adequate.²⁸ Many of the leading cases do not specify a particular category or mode, but tend to adopt an overall approach. Five modes of acquisition are usually detailed: occupation of *terra nullius*, prescription, cession, accretion and subjugation (or conquest); and these are further divided into original and derivative modes.²⁹

However, the fundamental principle applicable to the establishment of boundaries between sovereign states is consent.³⁰

Boundary Treaties and Boundary Awards

Boundary treaties, whereby either additional territory is acquired or lost or uncertain boundaries are clarified by agreement between the states concerned, constitute a root of title in themselves. They constitute a special kind of treaty in that they establish an objective territorial regime valid *erga omnes*.³¹ Such a regime will not only create rights binding also upon third states, but will exist outside the particular boundary treaty and thus will continue even if the treaty in question itself ceases to apply.³² The reason for this exceptional approach is to be found in the need for the stability of boundaries.³³ Further, the establishment or confirmation of a particular boundary line by way of referring in a treaty to an earlier document (which may or may not be binding of itself) laying down a line is also possible and as such invests the line in question with undoubted validity.³⁴ Indeed, this earlier document may also be a map upon which a line has been drawn.

Accordingly, many boundary disputes in fact revolve around the question of treaty interpretation. It is accepted that a treaty should be interpreted in the light of articles 31 and 32 of the Vienna Convention on the Law of Treaties 1969, ‘in good faith, in accordance with the ordinary meaning to be given to its terms in their context and in the light of its object and purpose’.³⁵ Essentially, the aim is to find the ‘common will’ of the parties, a concept which includes consideration of the subsequent conduct of the parties.³⁶ Since many of the boundary treaties that need to be interpreted long pre-date

the coming into force of the Vienna Convention,³⁷ the problem of the applicability of its provisions has arisen. Courts have taken the view that the Convention in this respect at least represents customary international law, thus apparently obviating the problem.³⁸

More generally, the difficulty in seeking to interpret both general concepts and geographical locations used in early treaties in the light of modern scientific knowledge has posed difficulties. In *Botswana v. Namibia*, the Court, faced with the problem of identifying the ‘main channel’ of the River Chobe in the light of an 1890 treaty, emphasised that ‘the present-day state of scientific knowledge’ could be used in order to illuminate terms of that treaty.³⁹ In the *Eritrea–Ethiopia* case, the Boundary Commission referred to the principle of contemporaneity, by which it meant that a treaty should be interpreted by reference to the circumstances prevailing when the treaty was concluded. In particular, the determination of a geographical name (whether of a place or of a river) depended upon the contemporary understanding of the location to which that name related at the time of the treaty. However, in seeking to understand what that was, reference to subsequent practice and to the objects of the treaty was often required.⁴⁰ In interpreting a boundary treaty, in particular in seeking to resolve ambiguities, the subsequent practice of the parties will be relevant. Even where such subsequent practice cannot in the circumstances constitute an authoritative interpretation of the treaty, it may be deemed to ‘be useful’ in the process of specifying the frontier in question.⁴¹ However, where the boundary line as specified in the pertinent instrument is clear, it cannot be changed by a court in the process of interpreting delimitation provisions.⁴²

Like boundary treaties, boundary awards may also constitute roots or sources of legal title to territory.⁴³ A decision by the International Court or arbitral tribunal allocating title to a particular territory or determining the boundary line as between two states will constitute establishment or confirmation of title that will be binding upon the parties themselves and for all practical purposes upon all states in the absence of maintained protest.⁴⁴ It is also possible that boundary allocation decisions that do not constitute international judicial or arbitral awards may be binding, providing that it can be shown that the parties consented to the initial decision.⁴⁵

Accretion⁴⁶

This describes the geographical process by which new land is formed and becomes attached to existing land, as for example the creation of islands in a river mouth or the change in direction of a boundary river leaving dry land where it had formerly flowed. Where new land comes into being within the territory of a state, it forms part of the territory of the state and there is no problem. When, for example, an island emerged in the Pacific after an under-sea volcano erupted in January 1986, the UK government noted that: ‘We understand the island emerged within the territorial sea of the Japanese island of Iwo Jima. We take it therefore to be Japanese territory.’⁴⁷

As regards a change in the course of a river forming a boundary, a different situation is created depending on whether it is imperceptible and slight or a violent shift (*avulsion*). In the latter case, the general rule is that the boundary stays at the same point along the original river bed.⁴⁸ However, where a gradual move has taken place the boundary may be shifted.⁴⁹ If the river is

navigable, the boundary will be the middle of the navigable channel, whatever slight alterations have occurred, while if the river is not navigable the boundary will continue to be the middle of the river itself. This aspect of acquiring territory is relatively unimportant in international law, but these rules have been applied in a number of cases involving disputes between particular states of the United States of America.⁵⁰

Cession⁵¹

This involves the peaceful transfer of territory from one sovereign to another (with the intention that sovereignty should pass) and has often taken place within the framework of a peace treaty following a war. Indeed, the orderly transference of sovereignty by agreement from a colonial or administering power to representatives of the indigenous population could be seen as a form of cession.

Cession has the effect of replacing one sovereign by another⁵² over a particular piece of territory, so the acquiring state cannot possess more rights over the land than its predecessor had. This is an important point, so that where a third state has certain rights, for example, of passage over the territory, the new sovereign must respect them. It is expressed in the land law phrase that the burden of obligations runs with the land, not the owner. In other words, the rights of the territorial sovereign are derived from a previous sovereign, who could not, therefore, dispose of more than he had.

This contrasts with, for example, accretion, which is treated as an original title, there having been no previous legal sovereign over the land.

The *Island of Palmas* case⁵³ emphasised this point. It concerned a dispute between the United States and the Netherlands. The claims of the United States were based on an 1898 treaty with Spain, which involved the cession of the island. It was emphasised by the arbitrator and accepted by the parties that Spain could not thereby convey to the Americans greater rights than it itself possessed.

The basis of cession lies in the intention of the relevant parties to transfer sovereignty over the territory in question.⁵⁴ Without this it cannot legally operate. Whether an actual delivery of the property is also required for a valid cession is less certain. It will depend on the circumstances of the case. For example, Austria ceded Venice to France in 1866, and that state within a few weeks ceded the territory to Italy. The cession to the Italian state through France was nonetheless valid.⁵⁵ In the *Iloilo* case,⁵⁶ it was held that the cession of the Philippines to the United States took place, on the facts of the case, upon the ratification of the Treaty of Paris of 1898, even though American troops had taken possession of the town of Iloilo two months prior to this.

Although instances of cession usually occur in an agreement following the conclusion of hostilities,⁵⁷ it can be accomplished in other circumstances, such as the purchase of Alaska by the United States in 1867 from Russia or the sale by Denmark of territories in the West Indies in 1916 to the United States. It may also appear in exchanges of territories or pure gifts of territory.⁵⁸

Conquest and the Use of Force

How far a title based on force can be regarded as a valid, legal right recognisable by other states and enforceable within the international system is a crucial question. Ethical considerations are relevant and the principle that an illegal act cannot give birth to a right in law is well established in municipal law and is an essential component of an orderly society.

However, international law sometimes has to modify its reactions to the consequences of successful violations of its rules to take into account the exigencies of reality. The international community has accepted the results of illegal aggression in many cases by virtue of recognition.

Conquest, the act of defeating an opponent and occupying all or part of its territory, does not of itself constitute a basis of title to the land.⁵⁹ It does give the victor certain rights under international law as regards the territory, the rights of belligerent occupation,⁶⁰ but the territory remains subject to the legal title of the ousted sovereign.⁶¹ Sovereignty as such does not merely pass by conquest to the occupying forces, although complex situations may arise where the legal status of the territory occupied is, in fact, in dispute prior to the conquest.⁶²

Conquest, of course, may result from a legal or an illegal use of force. By the 1928 Kellogg–Briand Pact, war was outlawed as an instrument of national policy, and by article 2(4) of the United Nations Charter all member states must refrain from the threat or use of force against the territorial integrity or political independence of any state. However, force will be legitimate when exercised in self-defence.⁶³ Whatever the circumstances, it is not the successful use of violence that in international law constituted the valid

method of acquiring territory. Under the classical rules, formal annexation of territory following upon an act of conquest would operate to pass title. It was a legal fiction employed to mask the conquest and transform it into a valid method of obtaining land under international law.⁶⁴ However, it is doubtful whether an annexation proclaimed while war is still in progress would have operated to pass a good title to territory. Only after a war is concluded could the juridical status of the disputed territory be finally determined. This follows from the rule that has developed to the effect that the control over the relevant territory by the state purporting to annex must be effective and that there must be no reasonable chance of the former sovereign regaining the land.

These points were emphasised by the Nuremberg War Crimes Tribunal after the Second World War, in discussing the various purported German annexations of 1939 and 1940. The Tribunal firmly declared that annexations taking place before the conclusion of a war were ineffective and invalid in international law.⁶⁵ Intention to annex was a crucial aspect of the equation so that, for example, the conquest of Germany by the Allies in 1945 did not give rise to an implied annexation by virtue of the legislative control actually exercised (as it could have done) because the Allies had specifically ruled out such a course in a joint declaration.⁶⁶ It is, however, clear today that the acquisition of territory by force alone is illegal under international law. This may be stated in view of article 2(4) of the UN Charter and other practice. Security Council resolution 242, for example, emphasised the ‘inadmissibility of the acquisition of territory by war’, while the 1970 Declaration of Principles of International Law adopted by the UN General Assembly provides that:

the territory of a state shall not be the object of acquisition by another state resulting from the threat or use of force. No territorial acquisition resulting from the threat or use of force shall be recognised as legal.⁶⁷

In Security Council resolution 662 (1990), adopted unanimously, the Council decided that the declared Iraqi annexation of Kuwait ‘under any form and whatever pretext has no legal validity and is considered null and void’. All states and institutions were called upon not to recognise the annexation and to refrain from actions which might be interpreted as indirect recognition.⁶⁸

Acquisition of territory following an armed conflict would require further action of an international nature in addition to domestic legislation to annex. Such further necessary action would be in the form either of a treaty of cession by the former sovereign or of international recognition.⁶⁹

The Exercise of Effective Control

It is customary in the literature to treat the modes of occupation and prescription as separate categories. However, there are several crucial factors that link the concepts, so that the acquisition of territory by virtue of these methods, based as they are upon the exercise of effective control, is best examined within the same broad framework. The traditional definition of these two modes will be noted first.

Occupation is a method of acquiring territory which belongs to no one (*terra nullius*) and which may be acquired by a state in certain situations. The occupation must be by a state and not by private individuals, it must be effective and it must be intended as a claim of sovereignty over the area. The high seas cannot be occupied in this manner for they are *res communis*, but vacant land may be subjected to the sovereignty of a claimant state. It relates primarily to uninhabited territories and islands, but may also apply to certain inhabited lands.

The issue was raised in the *Western Sahara* case before the International Court of Justice.⁷⁰ The question was asked as to whether the territory in question had been *terra nullius* at the time of colonisation. It was emphasised by the Court that the concept of *terra nullius* was a legal term of art used in connection with the mode of acquisition of territory known as ‘occupation’.⁷¹ The latter mode was defined legally as an original means of peaceably acquiring sovereignty over territory otherwise than by cession or succession.⁷² In an important statement, the Court unambiguously asserted that the state practice of the relevant period (i.e. the period of colonisation) indicated that territories inhabited by tribes or peoples having a social and political organisation were not regarded as *terrae nullius*.⁷³ Further, international case-law has recognised that sovereign title may be suspended for a period of time in circumstances that do not lead to the status of *terra nullius*. Such indeterminacy could be resolved by the relevant parties at a relevant time.⁷⁴

In fact, the majority of territories brought under European control were regarded as acquired by means of cessions, especially in Asia and Africa.⁷⁵

This raised the question of the status of the ceding parties for, with very few exceptions, these territories were not regarded in nineteenth-century international law as states.⁷⁶ However, practice demonstrates that the indigenous entities were regarded as having the capacity in international law to cede all or part of their territory by way of signed agreements with the colonial powers. This appears clearly from *Cameroon v. Nigeria*,⁷⁷ where the International Court of Justice declared that in sub-Saharan Africa in particular ‘treaties termed “treaties of protection” were entered into not with states, but rather with important indigenous rulers exercising local rule over identifiable areas of territory’ and reaffirmed the view expressed in the *Western Sahara* opinion that ‘agreements concluded with local rulers . . . were regarded as derivative roots of title’.⁷⁸ It should be noted that personality and title are two different concepts in international law. The fact that a tribe or people possessed sufficient personality to preclude acquisition of its territory by European powers by virtue of occupation of *terra nullius* and thus necessitated a process of cession (or, much more rarely, conquest) for such an end to be achieved is not the same as saying that such a tribe was sovereign or a state as that term was recognised under the international law of the time, just as the existence of links between groups and a ruler did not necessarily amount to ties of territorial sovereignty. Accordingly, international law, for a period, was prepared to accept an intermediate stage between statehood and a situation of *terra nullius*, this stage providing that a socially or politically organised entity could enter into an agreement which could form the basis of a derivative title to territorial sovereignty, such title being recognised forthwith through the application of intertemporal law, for, as the Court underlined in *Cameroon v. Nigeria*, ‘the principle of intertemporal law

requires that the legal consequences of the treaties concluded at that time . . . be given effect today'.⁷⁹

However, there were instances of asserted title by occupation, for example Australia,⁸⁰ and many sparsely inhabited islands.

Occupation, both in the normal sense of the word and in its legal meaning, was often preceded by discovery, that is the realisation of the existence of a particular piece of land.⁸¹ But mere realisation or sighting was never considered (except for periods in the fifteenth and sixteenth centuries and this is not undisputed) as sufficient to constitute title to territory. Something more was required and this took the form of a symbolic act of taking possession, whether it be by the raising of flags or by solemn proclamations or by more sophisticated ritual expressions. As time passed, the conditions changed and the arbitrator in the *Island of Palmas* case pointed to the modern effect of discovery as merely giving an inchoate title which had to be completed within a reasonable time by the effective occupation of the relevant region. Discovery only put other states on notice that the claimant state had a prior interest in the territory, which, to become legally meaningful, had to be supplemented by effective occupation within a certain period.⁸²

Prescription⁸³ is a mode of establishing title to territory which is not *terra nullius* and which has been obtained either unlawfully or in circumstances wherein the legality of the acquisition cannot be demonstrated. It is the legitimisation of a doubtful title by the passage of time and the presumed acquiescence of the former sovereign, and it reflects the need for stability felt within the international system by recognising that territory in the possession

of a state for a long period of time and uncontested cannot be taken away from that state without serious consequences for the international order. It is the legitimisation of a fact. If it were not for some such doctrine, the title of many states to their territory would be jeopardised.⁸⁴ The International Court in *Botswana v. Namibia*, while making no determination of its own, noted that the two parties were agreed that acquisitive prescription was recognised in international law and further agreed on the criteria to be satisfied for the establishment of such a title, viz. the possession must be *à titre de souverain*, peaceful and uninterrupted, public and endure for a certain length of time. The Court did not contradict this position.⁸⁵

Prescription differs from occupation in that it relates to territory which has previously been under the sovereignty of a state. In spite of this, both concepts are similar in that they may require evidence of sovereign acts by a state over a period of time. And although distinct in theory, in practice these concepts are often indistinct since sovereignty over an area may lapse and give rise to doubts whether an abandonment has taken place,⁸⁶ rendering the territory *terra nullius*.

In fact, most cases do not fall into such clear theoretical categories as occupation or prescription. Particular modes of acquisition that can be unambiguously related to the classic definitions tend not to be specified. Most cases involve contesting claims by states, where both (or possibly all) the parties have performed some sovereign acts. As in the instance of occupation, so prescription too requires that the possession forming the basis of the title must be by virtue of the authority of the state or *à titre de souverain*, and not a manifestation of purely individual effort unrelated to the

state's sovereign claims. And this possession must be public so that all interested states can be made aware of it.

This latter requirement also flows logically from the necessity for the possession to be peaceful and uninterrupted, and reflects the vital point that prescription rests upon the implied consent of the former sovereign to the new state of affairs. This means that protests by the dispossessed sovereign may completely block any prescriptive claim.⁸⁷

In the *Chamizal* arbitration⁸⁸ between the United States and Mexico, the Rio Grande River forming the border between the parties changed course and the United States claimed the ground between the old and the new river beds partly on the basis of peaceful and uninterrupted possession. This claim was dismissed in view of the constant protests by Mexico and in the light of a Convention signed by both parties that there existed a dispute as to the boundary which had to be resolved. The fact that Mexico did not go to war over the issue was not of itself sufficient to make the possession of the tract of land by the United States peaceful.

Thus, acquiescence in the case of prescription, whether express or implied from all the relevant circumstances, is essential, whereas in the case of occupation it is merely an evidential point reinforcing the existence of an effective occupation, but not constituting the essence of the legal claim.

Precisely what form the protest is to take is open to question, but resort to force is not acceptable in modern international law, especially since the 1928 Kellogg–Briand Pact and article 2(4) of the United Nations Charter.⁸⁹ The

bringing of a matter before the United Nations or the International Court of Justice will be conclusive as to the existence of the dispute and thus of the reality of the protests, but diplomatic protests will probably be sufficient. This, however, is not accepted by all academic writers, and it may well be that in serious disputes further steps should be taken such as severing diplomatic relations or proposing arbitration or judicial settlement.⁹⁰ What is clear is that anything less than sustained and credible protests may well risk the title of the dispossessed party.

The requirement of a 'reasonable period' of possession is similarly imprecise and it is not possible to point to any defined length of time.⁹¹ It will depend, as so much else, upon all the circumstances of the case, including the nature of the territory and the absence or presence of any competing claims.

In the *Minquiers and Ecrehos* case,⁹² concerning disputed sovereignty over a group of islets and rocks in the English Channel, claimed by both France and the United Kingdom, the International Court of Justice exhaustively examined the history of the region since 1066. However, its decision was based primarily on relatively recent acts relating to the exercise of jurisdiction and local administration, as well as the nature of legislative enactments referable to the territory in question. And upon these grounds, British sovereignty was upheld. The sovereign acts of the United Kingdom relating to the islets far outweighed any such activities by the French authorities and accordingly the claims of the latter were dismissed.

As in other cases, judgment was given not on the basis of clearly defined categories of occupation or prescription, but rather in the light of the balance

of competing state activities.

De Visscher has attempted to render the theoretical classifications more consonant with the practical realities by the introduction of the concept of historical consolidation.⁹³ This idea is founded on proven long use, which reflects a complex of interests and relations resulting in the acquisition of territory (including parts of the sea). Such a grouping of interests and relations is considered by the courts in reaching a decision as of more importance than the mere passage of time, and historical consolidation may apply to *terra nullius* as well as to territories previously occupied. Thus, it can be distinguished from prescription. It differs from occupation in that the concept has relevance to the acquisition of parts of the sea, as well as of land. And it may be brought into existence not only by acquiescence and consent, but also by the absence of protest over a reasonable period by relevant states.⁹⁴

However, de Visscher's discussion, based on the *Anglo-Norwegian Fisheries* case,⁹⁵ does fail to note the important distinction between the acquisition of territory in accordance with the rules of international law, and the acquisition of territory as a permitted exception to the generally accepted legal principles. The passage in the *Anglo-Norwegian Fisheries* case relied upon⁹⁶ is really concerned with general acquiescence with regard to a maritime area, while the criticism has been made⁹⁷ that de Visscher has over-emphasised the aspect of 'complex of interests and relations which *in themselves* have the effect of attaching a territory or an expanse of sea to a given state'.⁹⁸ Effectiveness, therefore, rather than consolidation would be the appropriate term. Both occupation and prescription rely primarily upon effective

possession and control. The element of time is here also relevant as it affects the effectiveness of control.

Intertemporal Law⁹⁹

One question that arises is the problem of changing conditions related to particular principles of international law, in other words the relevant time period at which to ascertain the legal rights and obligations in question. This can cause considerable difficulties since a territorial title may be valid under, for example, sixteenth-century legal doctrines, but ineffective under nineteenth-century developments. The general rule in such circumstances is that in a dispute the claim or situation in question (or relevant treaty, for example)¹⁰⁰ has to be examined according to the conditions and rules in existence at the time it was made and not at a later date. This meant, for example, that in the *Island of Palmas* case,¹⁰¹ the Spanish claim to title by discovery, which the United States declared it had inherited, had to be tested in the light of international legal principles in the sixteenth century when the discovery was made. This aspect of the principle is predicated upon a presumption of, and need for, stability.¹⁰²

But it was also noted in this case that while the creation of particular rights was dependent upon the international law of the time, the continued existence of such rights depended upon their according with the evolving conditions of a developing legal system, although this stringent test would not be utilised in the case of territories with an 'established order of things'.¹⁰³ This proviso has in practice been carefully and flexibly interpreted within the context of all the relevant rules relating to the acquisition of territory, including recognition

and acquiescence.¹⁰⁴ However, the Court in the *Aegean Sea Continental Shelf* case¹⁰⁵ declared that the phrase ‘disputes relating to the territorial status of Greece’ contained in a Greek reservation to the 1928 Kellogg–Briand Pact had to be interpreted ‘in accordance with the rules of international law as they exist today, and not as they existed in 1931’. The evolution of international law concerning the continental shelf, therefore, had to be considered, so that the territorial status of Greece was taken to include its continental shelf, although that concept was completely unknown in the 1920s. How far this aspect of the principle of international law may be extended is highly controversial. The better view is to see it as one element in the bundle of factors relevant to the determination of effective control, but one that must be applied with care.¹⁰⁶

Critical Date

In certain situations there may exist a determining moment at which it might be inferred that the rights of the parties have crystallised so that acts after that date cannot alter the legal position.¹⁰⁷ Such a moment might be the date of a particular treaty where its provisions are at issue¹⁰⁸ or the date of occupation of territory.¹⁰⁹ It is not correct that there will or should always be such a critical date in territorial disputes, but, where there is, acts undertaken after that date will not be taken into consideration, unless such acts are a normal continuation of prior acts and are not undertaken for the purpose of improving the legal position of the party relying on them.¹¹⁰

The concept of a critical date is of especial relevance with regard to the doctrine of *uti possidetis*, which posits that a new state has the boundaries of

the predecessor entity, so that the moment of independence itself is invariably the critical date.¹¹¹ This does not preclude the possibility that the relevant territorial situation or rights had crystallised at an earlier time, in the sense of having become established and not altered subsequently.¹¹² Where there is more than one state involved, then the date of later independence¹¹³ or possibly the dates of the independence of the respective states,¹¹⁴ may be taken depending on the circumstances.¹¹⁵ Further, it is possible for there to be different critical dates for different circumstances (for example, land and maritime disputes within the same case).¹¹⁶ However, the date of independence may simply mark the date of succession to boundaries which have been established with binding force by earlier instruments.¹¹⁷

The moment of independence may not be ‘critical’ for these purposes for several possible reasons. There may be a dispute between the parties as to whether the date of independence or the date of the last exercise of jurisdiction for administrative organisational purposes by the former sovereign is the more appropriate date¹¹⁸ or the *uti possidetis* line may in some circumstances only be determined upon a consideration of materials appearing later than the date of independence,¹¹⁹ or such a ‘critical date’ may have been moved to a later date than that of independence by a subsequent treaty¹²⁰ or by an adjudication award.¹²¹ The importance of the critical date concept, thus, is relative and depends entirely upon the circumstances of the case.¹²²

Sovereign Activities (*Effectivités*)

The exercise of effective authority, therefore, is the crucial element. As Huber argued, ‘the actual continuous and peaceful display of state functions is in case of dispute the sound and natural criterion of territorial sovereignty’.¹²³

However, control, although needing to be effective, does not necessarily have to amount to possession and settlement of all of the territory claimed.

Precisely what acts of sovereignty are necessary to found title will depend in each instance upon all the relevant circumstances of the case, including the nature of the territory involved, the amount of opposition (if any) that such acts on the part of the claimant state have aroused, and international reaction.

Indeed, in international law many titles will be deemed to exist not as absolute but as relative concepts. The state succeeding in its claim for sovereignty over *terra nullius* over the claims of other states will in most cases have proved not an absolute title, but one relatively better than that maintained by competing states and one that may take into account issues such as geography and international responses.¹²⁴ The Court noted in the *Eastern Greenland* case that: ‘It is impossible to read the records of the decisions in cases as to territorial sovereignty without observing that in many cases the tribunal has been satisfied with very little in the way of the actual exercise of sovereign rights, provided that the other state could not make out a superior claim. This is particularly true in the case of claims to sovereignty over areas in thinly populated or unsettled countries.’¹²⁵ However, the arbitral tribunal in *Eritrea–Yemen* emphasised that the issue did not turn solely upon relativity since ‘there must be some absolute minimum requirement’ for the acquisition of territorial sovereignty.¹²⁶

In the *Island of Palmas* arbitration,¹²⁷ the dispute concerned sovereignty over a particular island in the Pacific. The United States declared that, since by a treaty of 1898 Spain had ceded to it all Spanish rights possessed in that region and since that included the island discovered by Spain, the United States therefore had a good title. The Netherlands, on the other hand, claimed the territory on the basis of the exercise of various rights of sovereignty over it since the seventeenth century. The arbitrator, Max Huber, in a judgment which discussed the whole nature of territorial sovereignty, dismissed the American claims derived from the Spanish discovery as not effective to found title.¹²⁸ Huber declared that the Netherlands possessed sovereignty on the basis of ‘the actual continuous and peaceful display of state functions’ evidenced by various administrative acts performed over the centuries.¹²⁹ It was also emphasised that manifestations of territorial sovereignty may assume different forms, according to conditions of time and place. Indeed, ‘the intermittence and discontinuity compatible with the maintenance of the right necessarily differ according as inhabited or uninhabited regions are involved’. Additionally, geographical factors were relevant.¹³⁰

The *Clipperton Island* arbitration¹³¹ concerned a dispute between France and Mexico over an uninhabited island. The arbitrator emphasised that the actual, and not the nominal, taking of possession was a necessary condition of occupation, but noted that such taking of possession may be undertaken in different ways depending upon the nature of the territory concerned. In this case, a proclamation of sovereignty by a French naval officer later published in Honolulu was deemed sufficient to create a valid title. Relevant to this decision was the weakness of the Mexican claims to the guano-rich island, as well as the uninhabited and inhospitable nature of the territory.

These two cases, together with the *Eastern Greenland* case,¹³² reveal that the effectiveness of the occupation may indeed be relative and may in certain rare circumstances be little more than symbolic.¹³³ In the *Eastern Greenland* case before the Permanent Court of International Justice, both Norway and Denmark claimed sovereignty over Eastern Greenland. Denmark had colonies in other parts of Greenland and had granted concessions in the uninhabited Eastern sector. In addition, it proclaimed that all treaties and legislation regarding Greenland covered the territory as a whole, as for example its establishment of the width of the territorial sea, and it sought to have its title to all of the territory recognised by other states. The Court felt that these acts were sufficient upon which to base a good title and were superior to various Norwegian actions such as the wintering of expeditions and the erection of a wireless station in Eastern Greenland, against which Denmark had protested. It is also to be noted that it was not until 1931 that Norway actually claimed the territory.

Such activity in establishing a claim to territory must be performed by the state in the exercise of sovereign powers (*à titre de souverain*)¹³⁴ or by individuals whose actions are subsequently ratified by their state,¹³⁵ or by corporations or companies permitted by the state to engage in such operations and thus performed on behalf of the sovereign.¹³⁶ Otherwise, any acts undertaken are of no legal consequence.¹³⁷ Another relevant factor, although one of uncertain strength, is the requirement of the intention by the state in performing various activities to assert claim in its sovereign capacity. In other words, the facts are created pursuant to the will of the state to acquire sovereignty. This point was stressed in the *Eastern Greenland* case,¹³⁸ but appears not to have been considered as of first importance in the *Island of*

Palmas case¹³⁹ or in the *Minquiers and Ecrehos* case,¹⁴⁰ where concern centred upon the nature and extent of the actual actions carried out by the contending states. Whatever the precise role of this subjective element, some connection between the actions undertaken and the assertion of sovereignty is necessary.

Account will also be taken of the nature of the exercise of the sovereignty in question, so that in the *Rann of Kutch* case, it was noted that:

the rights and duties which by law and custom are inherent in and characteristic of sovereignty present considerable variations in different circumstances according to time and place, and in the context of various political systems.¹⁴¹

Similarly, the Court was willing to take into account the special characteristics of the Moroccan state at the relevant time in the *Western Sahara* case¹⁴² in the context of the display of sovereign authority, but it was the exercise of sovereignty which constituted the crucial factor. While international law does appear to accept a notion of geographical or natural unity of particular areas, whereby sovereignty exercised over a certain area will raise the presumption of title with regard to an outlying portion of the territory comprised within the claimed unity,¹⁴³ it is important not to overstate this. It operates to raise a presumption and no more and that within the wider concept of display of effective sovereignty which need not apply equally to all parts of the territory.¹⁴⁴ Neither geographical unity nor contiguity are as such sources of title with regard to all areas contained within

the area in question, nor is the proximity of islands to the mainland determinative as such of the question of legal title.¹⁴⁵ The Tribunal in the *Eritrea–Yemen* case felt able to consider separately the legal situation with regard to sub-groups existing within such natural unities,¹⁴⁶ as did the Boundary Commission in the *Eritrea–Ethiopia* case.¹⁴⁷ However, the significance in law of state activities or *effectivités* will depend upon the existence or not of a legal title to the territory. Where there is such a valid legal title, this will have pre-eminence and *effectivités* may play a confirmatory role. However, where the *effectivités* are in contradiction to the title, the latter will have pre-eminence. In the absence of any legal title, then *effectivités* must invariably be taken into consideration, while where the legal title is not capable of exactly defining the relevant territorial limits, *effectivités* then play an essential role in showing how the title is interpreted in practice.¹⁴⁸ Accordingly, examples of state practice may confirm or complete but not contradict legal title established, for example, by boundary treaties.¹⁴⁹ In the absence of any clear legal title to any area, state practice comes into its own as a law-establishing mechanism. But its importance is always contextual in that it relates to the nature of the territory and the nature of competing state claims.¹⁵⁰ Relative state practice would include legislative acts or acts of administrative control, acts relating to the application and enforcement of criminal or civil law, acts regulating immigration, acts regulating fishing and other economic activities, naval patrols, and search and rescue operations,¹⁵¹ as well as the conduct of inquiries.¹⁵² It is not, however, simply a question of adding together the numbers of such acts, but of examining each one in terms of what may exactly be inferred from it particularly with regard to the assertion of the public power of the state to the

exclusion of the public power of other states. It is quality and not quantity which is likely to determine title in such circumstances.¹⁵³

The Role of Subsequent Conduct: Recognition, Acquiescence and Estoppel

Subsequent conduct may be relevant in a number of ways: first, as a method of determining the true interpretation of the relevant boundary instrument in the sense of the intention of the parties;¹⁵⁴ secondly, as a method of resolving an uncertain disposition or situation, for example, whether a particular area did or did not fall within the colonial territory in question for purposes of determining the *uti possidetis* line;¹⁵⁵ or, thirdly, as a method of modifying such an instrument or pre-existing arrangement. The *Eritrea–Ethiopia* Boundary Commission explained the general principle that ‘the effect of subsequent conduct may be so clear in relation to matters that appear to be the subject of a given treaty that the application of an otherwise pertinent treaty provision may be varied, or may even cease to control the situation, regardless of its original meaning’.¹⁵⁶ The various manifestations of the subsequent conduct of relevant parties have a common foundation in that they all rest to a stronger or weaker extent upon the notion of consent.¹⁵⁷ They reflect expressly or impliedly the presumed will of a state, which in turn may in some situations prove of great importance in the acquisition of title to territory. However, there are significant theoretical differences between the three concepts (recognition, acquiescence and estoppel), even if in practice the dividing lines are often blurred. In any event, they flow to some extent from the fundamental principles of good faith and equity.

Recognition is a positive act by a state accepting a particular situation and, even though it may be implied from all the relevant circumstances, it is nevertheless an affirmation of the existence of a specific factual state of affairs,¹⁵⁸ even if that accepted situation is inconsistent with the term in a treaty.¹⁵⁹ Acquiescence, on the other hand, occurs in circumstances where a protest is called for and does not happen¹⁶⁰ or does not happen in time in the circumstances.¹⁶¹ In other words, a situation arises which would seem to require a response denoting disagreement and, since this does not transpire, the state making no objection is understood to have accepted the new situation.¹⁶² The idea of estoppel in general is that a party which has made or consented to a particular statement upon which another party relies in subsequent activity to its detriment or the other's benefit cannot thereupon change its position.¹⁶³ This rests also upon the notion of preclusion.¹⁶⁴

While, of course, the consent of a ceding state to the cession is essential, the attitude adopted by other states is purely peripheral and will not affect the legality of the transaction. Similarly, in cases of the acquisition of title over *terra nullius*, the acquiescence of other states is not strictly relevant although of useful evidential effect.¹⁶⁵ However, where two or more states have asserted competing claims, the role of consent by third parties is much enhanced. In the *Eastern Greenland* case,¹⁶⁶ the Court noted that Denmark was entitled to rely upon treaties made with other states (apart from Norway) in so far as these were evidence of recognition of Danish sovereignty over all of Greenland.

Recognition and acquiescence are also important in cases of acquisition of control contrary to the will of the former sovereign. Where the possession of

the territory is accompanied by emphatic protests on the part of the former sovereign, no title by prescription can arise, for such title is founded upon the acquiescence of the dispossessed state, and in such circumstances consent by third states is of little consequence. However, over a period of time recognition may ultimately validate a defective title, although much will depend upon the circumstances, including the attitude of the former sovereign. Where the territory involved is part of the high seas (i.e. *res communis*), acquiescence by the generality of states may affect the subjection of any part of it to another's sovereignty, particularly by raising an estoppel.¹⁶⁷

Acquiescence and recognition¹⁶⁸ are also relevant where the prescriptive title is based on what is called immemorial possession, that is, the origin of the particular situation is shrouded in doubt and may have been lawful or unlawful, but is deemed to be lawful in the light of general acquiescence by the international community or particular acquiescence by a relevant other state. Accordingly, acquiescence may constitute evidence reinforcing a title based upon effective possession and control, rendering it definitive.¹⁶⁹ In such cases, failure to protest would be particularly significant.¹⁷⁰

Estoppel is a legal technique whereby states deemed to have consented to a state of affairs cannot afterwards alter their position.¹⁷¹ It has been noted that a party relying on estoppel must show, among other things, that it has taken distinct actions in reliance upon the other party's statement.¹⁷² Although it cannot found title by itself, it is of evidential and often of practical importance. Estoppel may arise either by means of a prior recognition or acquiescence, but the nature of the consenting state's interest is vital. Where,

for example, two states put forward conflicting claims to territory, any acceptance by one of the other's position will serve as a bar to a renewal of contradictory assertions. This was illustrated in the *Eastern Greenland* case,¹⁷³ where the Court regarded the Norwegian acceptance of treaties with Denmark, which incorporated Danish claims to all of Greenland, as preventing Norway from contesting Danish sovereignty over the area.

The leading case on estoppel is the *Temple of Preah Vihear*,¹⁷⁴ which concerned a border dispute between Cambodia and Thailand. The frontier was the subject of a treaty in 1904 between Thailand and France (as sovereign over French Indo-China, which included Cambodia) that provided for a delimitation commission. The border was duly surveyed, but was ambiguous as to the siting of the Preah Vihear temple area. Thailand called for a map from the French authorities and this placed the area within Cambodia. The Thai government accepted the map and asked for further copies.¹⁷⁵ A number of other incidents took place, including a visit by a Thai prince to the temple area for an official reception with the French flag clearly flying there, which convinced the International Court that Thailand had tacitly accepted French sovereignty over the disputed area.¹⁷⁶ In other words, Thailand was estopped by its conduct from claiming that it contested the frontier in the temple area. However, it is to be noted that estoppel in that case was one element in a complexity of relevant principles which included prescription and treaty interpretation. The case also seemed to show that in situations of uncertainty and ambiguity, the doctrines of acquiescence and estoppel come into their own,¹⁷⁷ but it would not appear correct to refer to estoppel as a rule of substantive law.¹⁷⁸ The extent to which silence as such may create an estoppel is unclear and much will depend upon the surrounding

circumstances, in particular the notoriety of the situation, the length of silence maintained in the light of that notoriety and the type of conduct that would be seen as reasonable in the international community in order to safeguard a legal interest.¹⁷⁹ The existence of an estoppel should not, however, be lightly assumed.¹⁸⁰ The Arbitral Tribunal in the *Mauritius v. United Kingdom* arbitration case concerning the Chagos Marine Protected Area¹⁸¹ summarised current jurisprudence as follows:

estoppel may be invoked where (a) a State has made clear and consistent representations, by word, conduct, or silence; (b) such representations were made through an agent authorized to speak for the State with respect to the matter in question; (c) the State invoking estoppel was induced by such representations to act to its detriment, to suffer a prejudice, or to convey a benefit upon the representing State; and (d) such reliance was legitimate, as the representation was one on which that State was entitled to rely.

Subsequent conduct itself would in the material sense include the examples of the exercise of sovereign activity, various diplomatic and similar exchanges and records, and maps. So far as the status of maps is concerned, this will depend upon the facts of their production as an item of evidence. It was noted in the *Burkina Faso/Mali* case that ‘maps are only extrinsic evidence of varying reliability or unreliability which may be used, along with

other evidence of a circumstantial kind, to establish or reconstitute the real facts'.¹⁸² In such circumstances, courts have often exhibited a degree of caution, taking into account, for example, that some maps may be politically self-serving and that topographic knowledge at the time the map is made may be unreliable.¹⁸³ However, maps annexed to treaties illustrating the boundary so delimited will be accepted as authoritative.¹⁸⁴ Where there is a conflict between the text of an instrument and an annexed map, all the relevant circumstances will need to be considered in order to arrive at a correct understanding of the intentions of the authors of the relevant delimitation instrument.¹⁸⁵ Beyond this, it is possible that cartographic material, prepared in order to help draft a delimitation instrument, may itself be used as assistance in seeking to determine the intentions of the parties where the text itself is ambiguous, while more generally the effect of a map will in other circumstances vary according to a number of factors ranging from its provenance and cartographic quality to its consistency with other maps and the use made of it by the parties.¹⁸⁶

One argument has been that peaceful possession coupled with acts of administration may in the absence of protest found the basis of title by way of 'historical consolidation'.¹⁸⁷ However, the International Court has emphasised that this doctrine is 'highly controversial and cannot replace the established modes of acquisition of title under international law'. It was also noted that a period of such activity of some twenty years was 'far too short, even according to the theory relied on it'.¹⁸⁸

Conclusions

It will be clear from the above that apart from the modes of acquisition that rely purely on the consent of the state and the consequences of sovereignty (cession or accretion), the method of acquiring additional territory is by the sovereign exercise of effective control. Both occupation and prescription are primarily based upon effective possession and, although the time element is a factor in prescription, this in fact is really concerned with the effectiveness of control.

The principle of effective control applies in different ways to different situations, but its essence is that ‘the continuous and peaceful display of territorial sovereignty . . . is as good as title’.¹⁸⁹ Such control has to be deliberate sovereign action, but what will amount to effectiveness is relative and will depend upon, for example, the geographical nature of the region, the existence or not of competing claims and other relevant factors, such as international reaction.¹⁹⁰ It will not be necessary for such control to be equally effective throughout the region.¹⁹¹ The doctrine of effectiveness has displaced earlier doctrines relating to discovery and symbolic annexation as in themselves sufficient to generate title.¹⁹² Effectiveness has also a temporal as well as a spatial dimension as the doctrine of intertemporal law has emphasised, while clearly the public or open nature of the control is essential. The acquiescence of a party directly involved is also a very important factor in providing evidence of the effectiveness of control. Where a dispossessed sovereign disputes the control exercised by a new sovereign, title can hardly pass. Effectiveness is related to the international system as a whole, so that mere possession by force is not the sole determinant of title. This factor also emphasises and justifies the role played by recognition.

Bilateral recognition is important as evidence of effective control and should be regarded as part of that principle. International recognition, however, involves not only a means of creating rules of international law in terms of practice and consent of states, but may validate situations of dubious origin. A series of recognitions may possibly validate an unlawful acquisition of territory and could similarly prevent effective control from ever hardening into title.¹⁹³ The significance of UN recognition is self-evident, so that the UN Security Council itself could adopt a binding resolution ending a territorial dispute by determining the boundary in question.¹⁹⁴

Sovereign territory may not only be acquired; it may also be lost in ways that essentially mirror the modes of acquisition. Territory may be lost by express declaration or conduct such as a treaty of cession or acceptance of secession; by loss of territory by erosion or natural geographic activity or by acquiescence through prescription. Further, territory may be abandoned, but in order for this to operate both the physical act of abandonment and the intention to surrender title are required.¹⁹⁵

Territorial Integrity, Self-Determination and Sundry Claims

There are a number of other concepts which may be of some relevance in territorial situations ranging from self-determination to historical and geographical claims. These may not necessarily be legal principles as such, but rather purely political or moral expressions. Although they may be extremely persuasive within the international political order, they would not necessarily be juridically effective. One of the core principles of the

international system is the need for stability and finality in boundary questions and much flows from this.¹⁹⁶ Case-law has long maintained this principle.¹⁹⁷ Reflective of this concept is the principle of territorial integrity.

The principle of the territorial integrity of states is well established and constitutes a foundational principle of international law.¹⁹⁸ It is protected by a series of consequential rules prohibiting interference within the domestic jurisdiction of states as, for example, article 2(7) of the UN Charter, and forbidding the threat or use of force against the territorial integrity and political independence of states, particularly article 2(4) of the UN Charter. This principle has been particularly emphasised by Developing Countries and also by other regions.¹⁹⁹ The International Court recently noted: ‘Once a dispute regarding territorial sovereignty has been resolved and uncertainty removed, each party must fulfil in good faith the obligation which all states have to respect the territorial integrity of all other states.’²⁰⁰

However, it does not apply where the territorial dispute centres upon uncertain frontier demarcations. In addition, the principle appears to conflict on the face of it with another principle of international law, that of the self-determination of peoples.²⁰¹

This principle, noted in the UN Charter and emphasised in the 1960 Colonial Declaration, the 1966 International Covenants on Human Rights and the 1970 Declaration on Principles of International Law, can be regarded as a rule of international law in the light of, *inter alia*, the number and character of UN declarations and resolutions and actual state practice in the process of decolonisation. However, it has been interpreted as referring only to the

inhabitants of non-independent territories.²⁰² Practice has not supported its application as a principle conferring the right to secede upon identifiable groups within already independent states.²⁰³ The Canadian Supreme Court in *Re Secession of Quebec* declared that ‘international law expects that the right to self-determination will be exercised by peoples within the framework of existing sovereign states and consistently with the maintenance of the territorial integrity of those states’,²⁰⁴ and that the right to unilateral secession ‘arises only in the most extreme of cases and, even then, under carefully defined circumstances’.²⁰⁵ The only arguable exception to this rule that the right to external self-determination applies only to colonial situations (and arguably situations of occupation) might be where the group in question is subject to ‘extreme and unremitting persecution’ coupled with the ‘lack of any reasonable prospect for reasonable challenge’,²⁰⁶ but even this is controversial, not least in view of definitional difficulties.²⁰⁷ The situation of secession is probably best dealt with in international law within the framework of a process of claim, effective control and international recognition. The International Court made the point in the *Kosovo* Advisory Opinion that Security Council resolutions criticising declarations of independence in Rhodesia, Turkish North Cyprus and Republika Srpska were so acting not because of the unilateral nature of these declarations, but because they were or would have been associated with the unlawful use of force or some other egregious violations of the rules of international law. Accordingly, no general prohibition against unilateral declarations of independence could be inferred from the practice of the Security Council.²⁰⁸ Thus, there is no international law right of secession held by groups within independent states. Similarly, there is no international law duty upon such

groups not to secede. It is a matter for the relevant domestic law in the absence of egregious violations of international law.

Crimea's claimed secession from Ukraine in March 2014 has to be seen in the first place as contrary to the applicable domestic law, which does not permit regions to secede in the absence of an all-Ukrainian referendum (article 73 of the Ukrainian constitution). The secession was not contrary to international law as such. However, Russia's threat or use of force in the process of taking control of Crimea may be seen as, at the least, intervention in the internal affairs of another state and at most an act of aggression.²⁰⁹ The context of this situation also includes the violation of treaties to which Russia is a party which guarantee the sovereignty and territorial integrity of Ukraine.²¹⁰ The decision by Russia to annex Crimea on 18 March 2014²¹¹ was contrary to international law, being in violation of Ukraine's sovereignty and territorial integrity.²¹² These factors mitigate the disinterest of international law with regard to the actual declaration of secession and position it as an aggravating factor in violations of international law.

However, in certain situations there may be a pertinent Security Council decision which calls upon particular groups seeking to secede from a specific independent state to respect the national unity and territorial integrity of that state. In such a case, it may be argued there does exist an international legal duty not to secede.²¹³ This would be subject to any agreement to the contrary by the parties in question, for example, the agreed independence of South Sudan from Sudan in 2011.

Accordingly, the principle of self-determination as generally accepted fits in with the concept of territorial integrity,²¹⁴ as it cannot apply once a colony or trust territory attains sovereignty and independence, except, arguably, in extreme circumstances. Probably the most prominent exponent of the relevance of self-determination to post-independence situations has been Somalia with its claims to those parts of Ethiopia and Kenya populated by Somali tribes, but that country received very little support for its demands.²¹⁵

Self-determination cannot be used to further larger territorial claims in defiance of internationally accepted boundaries of sovereign states, but it may be of some use in resolving cases of disputed frontier lines on the basis of the wishes of the inhabitants. In addition, one may point to the need to take account of the interests of the local population where the determination of the boundary has resulted in a shift in the line, at least in the view of one of the parties.²¹⁶ Geographical claims have been raised throughout history.²¹⁷ France long maintained that its natural frontier in the east was the west bank of the Rhine, and the European powers in establishing their presence upon African coastal areas often claimed extensive hinterland territories. Much utilised also was the doctrine of contiguity, whereby areas were claimed on the basis of the occupation of territories of which they formed a geographical continuation. However, such claims, although relevant in discussing the effectivity and limits of occupation, are not able in themselves to found title, and whether or not such claims will be taken into account at all will depend upon the nature of the territory and the strength of competing claims.²¹⁸ A rather special case is that of islands close to the coast of the mainland. The Tribunal in *Eritrea–Yemen* stated that: ‘There is a strong presumption that

islands within the twelve-mile coastal belt will belong to the coastal state', to be rebutted only by evidence of a superior title.²¹⁹

Of some similarity are claims based upon historical grounds.²²⁰ This was one of the grounds upon which Iraq sought to justify its invasion and annexation of the neighbouring state of Kuwait in August 1990,²²¹ although the response of the United Nations demonstrated that such arguments were unacceptable to the world community as a whole.²²² Morocco too has made extensive claims to Mauritania, Western Sahara and parts of Algeria as territories historically belonging to the old Moroccan empire.²²³ But such arguments are essentially political and are of but little legal relevance. The International Court of Justice in the *Western Sahara* case²²⁴ of 1975 accepted the existence of historical legal ties between the tribes of that area and Morocco and Mauritania, but declared that they were not of such a nature as to override the right of the inhabitants of the colony to self-determination and independence.²²⁵

The Doctrine of *Uti Possidetis*²²⁶

The influence of the principle of territorial integrity may be seen in the Latin American idea of *uti possidetis*, whereby the administrative divisions of the Spanish empire in South America were deemed to constitute the boundaries for the newly independent successor states, thus theoretically excluding any gaps in sovereignty which might precipitate hostilities and encourage foreign intervention.²²⁷ It is more accurately reflected in the practice of African states, explicitly stated in a resolution of the Organisation of African Unity in 1964, which declared that colonial frontiers existing as at the date of independence constituted a tangible reality and that all member states pledged themselves to respect such borders.²²⁸

Practice in Africa has reinforced the approach of emphasising the territorial integrity of the colonially defined territory; witness the widespread disapproval of the attempted creation of secessionist states whether in the former Belgian Congo, Nigeria or Sudan. Efforts to prevent the partition of the South African controlled territory of Namibia into separate Bantustans as a possible prelude to a dissolution of the unity of the territory are a further manifestation of this.²²⁹

The question of *uti possidetis* was discussed by a Chamber of the International Court in the *Burkina Faso/Mali* case,²³⁰ where the *compromis* (or special agreement) by which the parties submitted the case to the Court specified that the settlement of the dispute should be based upon respect for the principle of the ‘intangibility of frontiers inherited from colonisation’.²³¹

It was noted, however, that the principle had in fact developed into a general concept of contemporary customary international law and was unaffected by the emergence of the right of peoples to self-determination.²³² In the African context particularly, the obvious purpose of the principle was ‘to prevent the independence and stability of new states being endangered by fratricidal struggles provoked by the challenging of frontiers following the withdrawal of the administering power’.²³³ The application of the principle has the effect of freezing the territorial title existing at the moment of independence to produce what the Chamber described as the ‘photograph of the territory’ at the critical date.²³⁴

the principle of respect for boundaries in the Cairo Resolution places the boundaries existing at the time of independence in a ‘holding pattern’, particularly to avoid armed conflict over territorial claims, until a satisfactory and peaceful solution is found by the Parties to a territorial dispute in conformity with international law, or until such time as closer integration and unity is achieved among African States in general, or between the neighbouring countries in particular, in keeping with the Pan-African vision. As such, it implies a prohibition of the use of force in the settlement of boundary disputes and an obligation to refrain from acts of seizure of a portion of the territory of another African State.

See, as to the notion of critical date, above, p. 432. The Chamber, however, went further than emphasising the application of the principle to Africa. It declared that the principle applied generally and was logically connected with the phenomenon of independence wherever it occurred in order to protect the independence and stability of new states.²³⁵ *Uti possidetis* was defined as follows:

The essence of the principle lies in its primary aim of securing respect for the territorial boundaries at the moment when independence is achieved. Such territorial boundaries might be no more than delimitations between different administrative divisions or colonies all subject to the same sovereign. In that case, the application of the principle of *uti possidetis* resulted in administrative boundaries being transformed into international frontiers in the full sense of the term.²³⁶

The term ‘jus’ in this principle refers not to international law as such, but rather to the constitutional or administrative law of the previous sovereign.²³⁷ The International Court has also emphasised that ‘the *uti possidetis juris* principle requires not only that reliance be placed on existing legal titles, but also that account be taken of the manner in which those titles were interpreted and applied by the competent public authorities of the colonial Power’.²³⁸ However, the doctrine of *uti possidetis* is dependent upon there being a clear boundary delimitation prior to independence. The doctrine cannot create a

boundary where there was none (or an ambiguous one) at the relevant time.²³⁹

The application of this principle beyond the purely colonial context was underlined particularly with regard to the former Soviet Union²⁴⁰ and the former Yugoslavia. In the latter case, the Yugoslav Arbitration Commission established by the European Community and accepted by the states of the former Yugoslavia made several relevant comments. In Opinion No. 2, the Arbitration Commission declared that ‘whatever the circumstances, the right to self-determination must not involve changes to existing frontiers at the time of independence (*uti possidetis juris*) except where the states concerned agree otherwise’.²⁴¹ In Opinion No. 3, the Arbitration Commission emphasised that, except where otherwise agreed, the former boundaries²⁴² became frontiers protected by international law. This conclusion, it was stated, derived from the principle of respect for the territorial status quo and from the principle of *uti possidetis*.²⁴³ It is thus arguable that, at the least, a presumption exists that, in the absence of evidence to the contrary, internally defined units within a pre-existing sovereign state will come to independence within the spatial framework of that territorially defined unit.²⁴⁴

Beyond *Uti Possidetis*

The principle of *uti possidetis* is not able to resolve all territorial or boundary problems.²⁴⁵ Where there is a relevant applicable treaty, then this will dispose of the matter completely.²⁴⁶ Indeed, once defined in a treaty, an international frontier achieves permanence so that even if the treaty itself were to cease to be in force, the continuance of the boundary would be unaffected and may

only be changed with the consent of the states directly concerned.²⁴⁷ On the other hand, where the line which is being transformed into an international boundary by virtue of the principle cannot be conclusively identified by recourse to authoritative material, then the principle of *uti possidetis* must allow for the application of other principles and rules. Essentially, these other principles focus upon the notion of *effectivités* or effective control.

The issue was extensively analysed by the International Court in the *Burkina Faso/Mali* case²⁴⁸ and later in the *El Salvador/Honduras* case.²⁴⁹ The Court noted the possible relevance of colonial *effectivités*, immediate post-colonial *effectivités* and more recent *effectivités*. Each of these might be relevant in the context of seeking to determine the *uti possidetis* pre-independence line. In the case of colonial *effectivités* (i.e. the conduct of the colonial administrators as proof of the effective exercise of territorial jurisdiction in the area during the colonial period), the Court in the former case distinguished between certain situations. Where the act concerned corresponded to the title comprised in the *uti possidetis juris*, then the *effectivités* simply confirmed the exercise of the right derived from a legal title. Where the act did not correspond with the law as described (i.e. the territory subject to the dispute was effectively administered by a state other than the one possessing the legal title), preference would be given to the holder of the title. In other words, where there was a clear *uti possidetis* line, this would prevail over inconsistent practice. Where, however, there was no clear legal title, then the *effectivités* ‘play an essential role in showing how the title is interpreted in practice’.²⁵⁰ It would then become a matter for evaluation by the Court with regard to each piece of practice adduced. This approach was reaffirmed in the *Land, Island and Maritime Frontier Dispute* case with regard to the grant of

particular lands to individuals or to Indian communities or records of such grants.²⁵¹ Where the colonial *effectivités* were insufficient to establish the position of the relevant administrative line, the principle of *uti possidetis* could not operate.²⁵² The Court also noted in the *Land, Island and Maritime Frontier Dispute* case that it could have regard in certain instances to documentary evidence of post-independence *effectivités* when it considered that they afforded indications with regard to the *uti possidetis* line, provided that there was a relationship between the *effectivités* concerned and the determination of the boundary in question.²⁵³ Such post-independence practice could be examined not only in relation to the identification of the *uti possidetis* line, but also in the context of seeking to establish whether any acquiescence could be demonstrated both as to where the line was and as to whether any changes in that line could be proved to have taken place.²⁵⁴ This post-independence practice could even be very recent practice and was not confined to immediate post-independence practice.

Where the *uti possidetis* line could be determined neither by authoritative decisions by the appropriate authorities at the relevant time nor by subsequent practice with regard to a particular area, recourse to equity²⁵⁵ might be necessary. What this might involve would depend upon the circumstances. In the *Burkina Faso/Mali* case, it meant that a particular frontier pool would be equally divided between the parties;²⁵⁶ in the *Land, Island and Maritime Frontier Dispute* case, it meant that resort could be had to an unratified delimitation of 1869.²⁵⁷ It was also noted that the suitability of topographical features in providing an identifiable and convenient boundary was a material aspect.²⁵⁸

International Boundary Rivers²⁵⁹

Special rules have evolved in international law with regard to boundary rivers. In general, where there is a navigable channel, the boundary will follow the middle line of that channel (the *thalweg* principle).²⁶⁰ Where there is no such channel or where the parties so choose, the boundary line will, in general, be the middle line of the river itself or of its principal arm.²⁶¹ These respective boundary lines would continue as median lines (and so would shift also) if the river itself changed course as a result of gradual accretion on one bank or degradation of the other bank. Where, however, the river changed course suddenly and left its original bed for a new channel, the international boundary would continue to be the middle of the deserted river bed.²⁶² It is possible for the boundary to follow one of the banks of the river, thus putting it entirely within the territory of one of the states concerned where this has been expressly agreed, but this is unusual.²⁶³

‘The Common Heritage of Mankind’

The proclamation of certain areas as the common heritage of mankind has raised the question as to whether a new form of territorial regime has been, or is, in process of being created.²⁶⁴ In 1970, the UN General Assembly adopted a Declaration of Principles Governing the Seabed and Ocean Floor in which it was noted that the area in question and its resources were the common heritage of mankind. This was reiterated in articles 136 and 137 of the 1982 Convention on the Law of the Sea, in which it was provided that no sovereign or other rights would be recognised with regard to the area (except in the case

of minerals recovered in accordance with the Convention) and that exploitation could only take place in accordance with the rules and structures established by the Convention.²⁶⁵ Article 11 of the 1979 Moon Treaty emphasises that the moon and its natural resources are the common heritage of mankind, and thus incapable of national appropriation and subject to a particular regime of exploitation.²⁶⁶ As is noted in the next section, attempts were being made to establish a common heritage regime over the Antarctic. There are certain common characteristics relating to the concept. Like *res communis*, the areas in question are incapable of national appropriation. Sovereignty is not an applicable principle and the areas in question would not be 'owned', nor would any jurisdictional rights exist outside the framework of the appropriate common heritage regime institutional arrangements. However, while a *res communis* regime permits freedom of access, exploration and exploitation, a common heritage regime as envisaged in the examples noted above would strictly regulate exploration and exploitation, would establish management mechanisms and would employ the criterion of equity in distributing the benefits of such activity.

It is too early to predict the success or failure of this concept. The 1982 Law of the Sea Convention entered into force in 1994, while the Moon Treaty has the bare minimum number of ratifications and its exploitation provisions are not yet operative. As a legal concept within the framework of the specific treaties concerned, it provides an interesting contrast to traditional *jus communis* rules, although the extent of the management structures required to operate the regime may pose considerable problems.²⁶⁷

The Polar Regions²⁶⁸

The Arctic region is of increasing strategic and commercial importance, constituting as it does a vast expanse of inhospitable territory between North America and Russia. It consists to a large extent of ice packs beneath which submarines may operate. However, with global warming transit is now becoming possible, while access to, and exploitation of, natural resources such as oil and gas are now viable.

Denmark possesses Greenland and its associated islands within the region,²⁶⁹ while Norway has asserted sovereign rights over Spitzbergen and other islands. The Norwegian title is based on occupation and long exploitation of mineral resources and its sovereignty was recognised by nine nations in 1920, although the Soviet Union had protested.²⁷⁰

More controversial are the respective claims made by Canada²⁷¹ and the former Soviet Union.²⁷² Use has been made of the concept of contiguity to assert claims over areas forming geographical units with those already occupied, in the form of the so-called sector principle. This is based on meridians of longitude as they converge at the North Pole and as they are placed on the coastlines of the particular nations, thus producing a series of triangular sectors with the coasts of the Arctic states as their baselines.

The other Arctic states of Norway, Finland, Denmark and the United States have abstained from such assertions.²⁷³ Accordingly, it is exceedingly doubtful whether the sector principle can be regarded as other than a political proposition.²⁷⁴ Part of the problem is that such a large part of this region consists of moving packs of ice. The former Soviet Union made some claims

to relatively immovable ice formations as being subject to its national sovereignty,²⁷⁵ but the overall opinion remains that these are to be treated as part of the high seas open to all.²⁷⁶ The United States and Canada both claim ‘pie-shaped’ sectors in the Beaufort Sea, Canada and Denmark (Greenland) have a dispute with regard to boundaries in the Lincoln Sea, and Norway and Russia disagree over the boundary between their continental shelves in the Barents Sea.²⁷⁷

Occupation of the land areas of the Arctic region may be effected by states by relatively little activity in view of the decision in the *Eastern Greenland* case²⁷⁸ and the nature of the territory involved. The fact that climate change is now melting Arctic ice on a permanent basis is leading to the possibility of Arctic navigation as well as the exploitation of natural resources there, destabilising the current situation. In the light of this, the five Arctic Ocean coastal states (Canada, Denmark on behalf of Greenland and the Faroe Islands, Norway, Russia and the United States) together with China, the European Union, Iceland, Japan and South Korea [signed](#) on 3 October 2018 the [Agreement to Prevent Unregulated High Seas Fisheries in the Central Arctic Ocean](#).²⁷⁹

Claims have been made by seven nations (Argentina, Australia, Chile, France, New Zealand, Norway and the United Kingdom) to the Antarctic region, which is an ice-covered landmass in the form of an island.²⁸⁰ Such claims have been based on a variety of grounds, ranging from mere discovery to the sector principle employed by the South American states, and most of these are of rather dubious quality. Significantly, the United States has refused to recognise any claims at all to Antarctica, and, although the

American Admiral Byrd discovered and claimed Marie Byrd Land for his country, the United States refrained from adopting the claim.²⁸¹ Several states have recognised the territorial aspirations of one another in the area, but one should note that the British, Chilean and Argentinian claims overlap.²⁸²

However, in 1959, the Antarctic Treaty was signed by all states concerned with territorial claims or scientific exploration in the region.²⁸³ Its major effect, apart from the demilitarisation of Antarctica, is to suspend, although not to eliminate, territorial claims during the life of the treaty. Article IV(2) declares that:

no acts or activities taking place while the present treaty is in force shall constitute a basis for asserting, supporting or denying a claim to territorial sovereignty in Antarctica or create any rights of sovereignty in Antarctica. No new claim or enlargement of an existing claim to territorial sovereignty in Antarctica shall be asserted while the present treaty is in force.

Since the treaty does not provide for termination, an ongoing regime has been created which, because of its inclusion of all interested parties, appears to have established an international regime binding on all.²⁸⁴ Subsequent meetings of the parties have resulted in a number of recommendations, including proposals for the protection of flora and fauna in the region, and other environmental preservation measures.²⁸⁵

Of the current parties to the treaty, twelve were original signatories, while a further forty-two have acceded to the treaty. Twenty-nine states have consultative status, while a further twenty-five have non-consultative status.²⁸⁶ Full participation in the work of the consultative meetings of the parties is reserved to the original parties to the treaty and those contracting parties which demonstrate substantial scientific research activity in the area. Antarctic Treaty consultative meetings take place annually.²⁸⁷

The issue of a mineral resources regime has been under discussion since 1979 by the consultative parties and a series of special meetings on the subject held.²⁸⁸ This resulted in the signing in June 1988 of the Convention on the Regulation of Antarctic Minerals Resource Activities.²⁸⁹ The Convention provided for three stages of mineral activity, being defined as prospecting, exploration and development. Four institutions were to be established, once the treaty came into force (following sixteen ratifications or accessions, including the United States, the former Soviet Union and claimant states). The Commission was to consist of the consultative parties, any other party to the Convention engaged in substantive and relevant research in the area and any other party sponsoring mineral resource activity. A Scientific, Technical and Environmental Advisory Committee consisting of all parties to the Convention was to be established, as were Regulatory Committees, in order to regulate exploration and development activity in a specific area. Such committees would consist of ten members of the Commission, including the relevant claimant and additional claimants up to a maximum of four, the United States, the former Soviet Union and representation of developing countries. A system for Special Meetings of Parties, consisting of all parties to the Convention, was also provided for. Several countries signed the

Convention.²⁹⁰ However, opposition to the Convention began to grow. The signing of the 1988 Convention on mineral resource activities stimulated opposition and in resolution 43/83, adopted by the General Assembly that year, ‘deep regret’ was expressed that such a convention should have been signed despite earlier resolutions calling for a moratorium on negotiations to create a minerals regime in the Antarctic. France and Australia proposed at the October 1989 meeting of the signatories of the Antarctic Treaty that all mining be banned in the area, which should be designated a global ‘wilderness reserve’.²⁹¹

At a meeting of the consultative parties to the Antarctic Treaty in April 1991, the Protocol on Environmental Protection to the Antarctic Treaty was adopted, article 7 of which prohibited any activity relating to mineral resources other than scientific research. This prohibition is to continue unless there is in force a binding legal regime on Antarctic mineral resource activities that includes an agreed means of determining whether and, if so, under which conditions any such activities would be acceptable. A review conference with regard to the operation of the Protocol may be held after it has been in force for fifty years if so requested.²⁹² In addition, a Committee for Environmental Protection was established.²⁹³ This effectively marked the end of the limited mining approach, which had led to the signing of the Convention on the Regulation of Antarctic Mineral Resource Activities in 1988. The Protocol came into force in 1998 and may be seen as establishing a comprehensive integrated environmental regime for the area.²⁹⁴

Leases and Servitudes²⁹⁵

Various legal rights exercisable by states over the territory of other states, which fall short of absolute sovereignty, may exist. Such rights are attached to the land and so may be enforced even though the ownership of the particular territory subject to the rights has passed to another sovereign. They are in legal terminology formulated as rights *in rem*. They constitute treaty-based regimes, dependent upon the terms of the particular treaty. Thus, for example, the applicable law would be specified in such treaty.²⁹⁶

Leases of land rose into prominence in the nineteenth century as a way of obtaining control of usually strategic points without the necessity of actually annexing the territory. Leases were used extensively in the Far East, as for example Britain's rights over the New Territories amalgamated with Hong Kong,²⁹⁷ and sovereignty was regarded as having passed to the lessee for the duration of the lease, upon which event it would revert to the original sovereign who made the grant. This form of words, however, disguised the reality that ultimate sovereignty lay with the lessor.

An exception to this usual construction of a lease in international law as limited to a defined period occurred with regard to the Panama Canal, with the strip of land through which it was constructed being leased to the United States in 1903 'in perpetuity'. However, by the 1977 Panama Canal Treaty, sovereignty over the Canal Zone was transferred to Panama. The United States had certain operating and defensive rights until the treaty ended in 1999.²⁹⁸ Another such example is Guantanamo Bay in Cuba, which has been leased to the United States by virtue of treaties signed in 1903 and in 1934. Under the latter treaty, the lease continues until either the United States abandons the base or both states otherwise agree.²⁹⁹ Russia has concluded a

number of lease arrangements with former Soviet republics, now independent states.³⁰⁰

A servitude exists where the territory of one state is under a particular restriction in the interests of the territory of another state. Such limitations are bound to the land as rights *in rem* and thus restrict the sovereignty of the state concerned, even if there is a change in control of the relevant territory, for instance upon merger with another state or upon decolonisation.³⁰¹

Examples of servitudes would include the right to use ports or rivers in, or a right of way across, the territory so bound, or alternatively an obligation not to fortify particular towns or areas in the territory.³⁰²

Servitudes may exist for the benefit of the international community or a large number of states. To give an example, in the *Aaland Islands* case in 1920, a Commission of Jurists appointed by the Council of the League of Nations declared that Finland since its independence in 1918 had succeeded to Russia's obligations under the 1856 treaty not to fortify the islands. And since Sweden was an interested state in that the islands are situated near Stockholm, it could enforce the obligation although not a party to the 1856 treaty. This was because the treaty provisions had established a special international regime with obligations enforceable by interested states and binding upon any state in possession of the islands.³⁰³ Further, the Tribunal in *Eritrea–Yemen* noted that the traditional open fishing regime in the southern Red Sea together with the common use of the islands in the area by the populations of both coasts was capable of creating historic rights accruing to the two states in dispute in the form of an international servitude.³⁰⁴ The

award in this case emphasised that the findings of sovereignty over various islands in the Red Sea entailed ‘the perpetuation of the traditional fishing regime in the region’.³⁰⁵

The situation of the creation of an international status by treaty, which is to be binding upon all and not merely upon the parties to the treaty, is a complex one and it is not always clear when it is to be presumed. However, rights attached to territory for the benefit of the world community were created with regard to the Suez and Panama Canals. Article 1 of the Constantinople Convention of 1888³⁰⁶ declared that ‘the Suez Maritime Canal shall always be free and open in time of war as in time of peace, to every vessel of commerce or of war without distinction of flag’ and this international status was in no way affected by the Egyptian nationalisation of the Canal Company in 1956. Egypt stressed in 1957 that it was willing to respect and implement the terms of the Convention, although in fact it consistently denied use of the canal to Israeli ships and vessels bound for its shores or carrying its goods.³⁰⁷ The canal was reopened in 1975 following the disengagement agreement with Israel, after a gap of eight years.³⁰⁸ Under article 5 of the 1979 Peace Treaty between Israel and Egypt, it was provided that ships of Israel and cargoes destined for or coming from Israel were to enjoy ‘the right of free passage through the Suez Canal . . . on the basis of the Constantinople Convention of 1888, applying to all nations’.

In the *SS Wimbledon* case,³⁰⁹ the Permanent Court of International Justice declared that the effect of article 380 of the Treaty of Versailles 1919 maintaining that the Kiel Canal was to be open to all the ships of all countries at peace with Germany was to convert the canal from an internal to an

international waterway ‘intended to provide under treaty guarantee easier access to the Baltic for the benefit of all nations of the world’.

Some of the problems relating to the existence of servitudes have arisen by virtue of the *North Atlantic Coast Fisheries* arbitration.³¹⁰ This followed a treaty signed in 1818 between the United Kingdom and the United States, awarding the inhabitants of the latter country ‘forever . . . the liberty to take fish of every kind’ from the southern coast of Newfoundland. The argument arose as to Britain’s capacity under the treaty to issue fishing regulations binding American nationals. The Arbitral Tribunal decided that the relevant provision of the treaty did not create a servitude, partly because such a concept was unknown by American and British statesmen at the relevant time (i.e. 1818). However, the terms of the award do leave open the possibility of the existence of servitudes, especially since the Tribunal did draw a distinction between economic rights (as in the case) and a grant of sovereign rights which could amount to a servitude in international law.³¹¹

A slightly different situation was faced by the Arbitral Tribunal in the *Mauritius v. United Kingdom* arbitration concerning the Chagos Marine Protected Area.³¹² The Tribunal noted that the United Kingdom had in the Lancaster House Agreement leading to the independence of Mauritius entered into a number of undertakings as a *quid pro quo* for the acceptance of the latter of the detachment of Chagos Archipelago from the territory.³¹³ As part of these undertakings, the United Kingdom agreed to grant Mauritius a ‘reversionary interest’ in the Archipelago and return it once it was no longer needed for defence purposes.³¹⁴ The Tribunal held that once Mauritius had become independent, the arrangement was transformed from one within the

domain of British constitutional law alone to an international agreement, binding in international law.³¹⁵ Mauritius' 'reversionary' sovereignty thus gave that state 'an interest in significant decisions that bear upon its [the Marine Protected Area] possible future use'.³¹⁶

The Law of Outer Space³¹⁷

There were a variety of theories prior to the First World War with regard to the status of the airspace above states and territorial waters,³¹⁸ but the outbreak of that conflict, with its recognition of the security implications of use of the air, changed this and the approach that then prevailed, with little dissension, was based upon the extension of state sovereignty upwards into airspace. This was acceptable both from the defence point of view and in the light of evolving state practice regulating flights over national territory.³¹⁹ It was reflected in the 1919 Paris Convention for the Regulation of Aerial Navigation, which recognised the full sovereignty of states over the airspace above their land and territorial sea.³²⁰ Accordingly, the international law rules protecting sovereignty of states apply to the airspace as they do to the land below. As the International Court noted in *Nicaragua v. United States*: ‘The principle of respect for territorial sovereignty is also directly infringed by the unauthorised overflight of a state’s territory by aircraft belonging to or under the control of the government of another state.’³²¹ The Court noted in *Benin v. Niger* that ‘a boundary represents the line of separation between areas of state sovereignty, not only on the earth’s surface but also in the subsoil and in the superjacent column of air’.³²²

There is no right of innocent passage through the airspace of a state.³²³ Aircraft may only traverse the airspace of states with the agreement of those states, and where that has not been obtained an illegal intrusion will be involved which will justify interception, though not (save in very exceptional cases) actual attack.³²⁴ However, the principle of the complete sovereignty of

the subjacent state is qualified not only by the various multilateral and bilateral conventions which permit airliners to cross and land in the territories of the contracting states under recognised conditions and in the light of the accepted regulations, but also by the development of the law of outer space.

Ever since the Soviet Union launched the first earth satellite in 1957, space exploration has developed at an ever-increasing rate.³²⁵ Satellites now control communications, navigation and observation networks, both civil and military, while landings have been made on the moon and information-seeking space probes dispatched to survey planets like Mars, Venus and Saturn. The research material gathered upon such diverse matters as earth resources, ionospheric activities, solar radiation, cosmic rays and the general structure of space and planet formations has stimulated further efforts to understand the nature of space and the cosmos.³²⁶ This immense increase in available information has also led to the development of the law of outer space, formulating generally accepted principles to regulate the interests of the various states involved as well as taking into account the concern of the international community as a whole.

The Definition and Delimitation of Outer Space

It soon became apparent that the *usque ad coelum* rule, providing for state sovereignty over territorial airspace to an unrestricted extent, was not viable where space exploration was concerned. To obtain the individual consents of countries to the passage of satellites and other vehicles orbiting more than 100 miles above their surface would prove cumbersome in the extreme and in practice states have acquiesced in such traversing. This means that the

sovereignty of states over their airspace is limited in height at most to the point where the airspace meets space itself. Precisely where this boundary lies is difficult to say and will depend upon technological and other factors, but figures between 50 and 100 miles have been put forward.³²⁷

As conventional aircraft are developed to attain greater heights, so states will wish to see their sovereignty extend to those heights and, as well as genuine uncertainty, this fear of surrendering what may prove to be in the future valuable sovereign rights has prevented any agreement on the delimitation of this particular frontier.³²⁸

The Legal Regime of Outer Space

Beyond the point separating air from space, states have agreed to apply the international law principles of *res communis*, so that no portion of outer space may be appropriated to the sovereignty of individual states. This was made clear in a number of General Assembly resolutions following the advent of the satellite era in the late 1950s. For instance, UN General Assembly resolution 1962 (XVII), adopted in 1963 and entitled the Declaration of Legal Principles Governing the Activities of States in the Exploration and Use of Outer Space, lays down a series of applicable legal principles which include the provisions that outer space and celestial bodies were free for exploration and use by all states on a basis of equality and in accordance with international law, and that outer space and celestial bodies were not subject to national appropriation by any means.³²⁹ In addition, the Declaration on International Co-operation in the Exploration and Use of Outer Space adopted in resolution 51/126, 1996, called for further international

cooperation, with particular attention being given to the benefit for and the interests of developing countries and countries with incipient space programmes stemming from such international cooperation conducted with countries with more advanced space capabilities.³³⁰ Such resolutions constituted in many cases and in the circumstances expressions of state practice and *opinio juris* and were thus part of customary law.³³¹

The legal regime of outer space was clarified by the signature in 1967 of the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies (the Outer Space Treaty) and currently has 110 parties.³³² This reiterates that outer space, including the moon and other celestial bodies, is not subject to national appropriation by any means (article II) and emphasises that the exploration and use of outer space must be carried out for the benefit and in the interests of all countries (article I). The Treaty does not establish as such a precise boundary between airspace and outer space, but it provides the framework for the international law of outer space.³³³

Military Uses of Outer Space

Article IV of the Outer Space Treaty provides that states parties to the Treaty agree:

not to place in orbit around the earth any
objects carrying nuclear weapons or any other
kinds of weapons of mass destruction, install
such weapons on celestial bodies, or station

such weapons in outer space in any other manner.

There are, however, disagreements as to the meaning of this provision.³³⁴

The article bans only nuclear weapons and weapons of mass destruction from outer space, the celestial bodies and from orbit around the earth, but article I does emphasise that the exploration and use of outer space ‘shall be carried out for the benefit and in the interests of all countries’ and it has been argued that this can be interpreted to mean that any military activity in space contravenes the Treaty.³³⁵

Under article IV, the moon and other celestial bodies must be used exclusively for peaceful purposes, although the use of military personnel for scientific and other peaceful purposes is not prohibited. On the other hand, the establishment of military bases, installations and fortifications, the testing of any type of weapons and the conduct of military manoeuvres on celestial bodies *is* forbidden. There are minimalist and maximalist interpretations as to how these provisions are to be understood. The former, for example, would argue that only aggressive military activity is banned, while the latter would prohibit all military behaviour.³³⁶ The 1963 Treaty Banning Nuclear Weapon Tests in the Atmosphere, in Outer Space and Under Water prohibited all test detonations of nuclear weapons except for those conducted underground. Originally signed by the Soviet Union, the United Kingdom and the United States, it now has 124 parties.³³⁷ Also relevant is the Treaty on the Non-Proliferation of Nuclear Weapons 1968, in which the nuclear weapons states parties undertake not to transfer to any recipient whatsoever nuclear weapons or other nuclear explosive devices or control over such weapons or explosive

devices directly, or indirectly; and not in any way to assist, encourage or induce any non-nuclear-weapon state to manufacture or otherwise acquire nuclear weapons or other nuclear explosive devices, or control over such weapons or explosive devices. Non-nuclear-weapon states parties undertake not to receive the transfer from any transferor whatsoever of nuclear weapons nor to manufacture or otherwise acquire nuclear weapons or other nuclear explosive devices and to accept safeguards as negotiated with the International Atomic Energy Agency.³³⁸ The Convention on the Prohibition of Military or any Other Hostile Use of Environmental Modification Techniques 1977 is also to be noted in this context, defining environmental modification techniques as changing, through the deliberate manipulation of natural processes, the dynamics, composition or structure of the earth, including its biota, lithosphere, hydro-sphere, and atmosphere, or of outer space. This would encompass changes in weather or climate patterns, in ocean currents, or in the state of the ozone layer or ionosphere, or an upset in the ecological balance of a region.

Article 3 of the Moon Treaty 1979 reaffirms article IV of the 1963 agreement, but the increasing capacity of states to send vehicles and equipment to the moon and the increasing competitiveness between such states has increased concern over its possible militarisation.³³⁹

Concern, however, currently revolves around the increasing number of satellites orbiting the earth, with functions including navigational and observational missions,³⁴⁰ and the evolution of small satellites in low orbits. Further, the development of anti-satellite weapons by the major powers is a major source of destabilisation. The United States, Russia, China and India

are all believed to have tested anti-satellite missiles,³⁴¹ while in July 2020, Russia was alleged to have launched an anti-satellite missile from a satellite already in space.³⁴² Specific legal regulation is lagging, although attacking the satellite of another state may well constitute an armed attack in the context of the law governing the use of force, discussed in Chapter 19, and more generally, activities in outer space are governed by the rules of international law, including the UN Charter and international humanitarian law.³⁴³

The Question of Responsibility

Article VI of the Outer Space Treaty provides for international responsibility for national activities in outer space, including the moon and other celestial bodies, whether such activities are carried on by governmental agencies or by non-governmental entities, and for assuring that national activities are carried out in conformity with the Treaty. The activities of non-governmental entities in outer space, including the moon and other celestial bodies, require authorisation and continuing supervision by the appropriate state party to the Treaty. When activities are carried on in outer space, including the moon and other celestial bodies, by an international organisation, responsibility for compliance with the Treaty is to be borne both by the international organisation and by the states parties to the Treaty participating in such organisation.³⁴⁴

Under article VIII, states retain jurisdiction and control over personnel and vehicles launched by them into space and under article VII they remain

responsible for any damage caused to other parties to the Treaty by their space objects.³⁴⁵

This aspect of space law was further developed by the Convention on International Liability for Damage Caused by Space Objects signed in 1972, article XII of which provides for the payment of compensation in accordance with international law and the principles of justice and equity for any damage caused by space objects. Article II provides for absolute liability to pay such compensation for damage caused by a space object on the surface of the earth or to aircraft in flight, whereas article III provides for fault liability for damage caused elsewhere or to persons or property on board a space object.³⁴⁶ This Convention was invoked by Canada in 1979 following the damage allegedly caused by Soviet Cosmos 954.³⁴⁷ In 2007, the UN General Assembly endorsed the Space Debris Mitigation Guidelines as guidelines for the mission, planning, design, manufacture and operational phases of spacecraft and launch vehicle orbital stages with the aim of limiting space debris.³⁴⁸

As a reinforcement to this evolving system of state responsibility, the Convention on the Registration of Objects Launched into Outer Space was opened for signature in 1975, coming into force in 1976. This laid down a series of stipulations for the registration of information regarding space objects, such as, for example, their purpose, location and parameters, with the UN Secretary-General.³⁴⁹ In 1992, the UN General Assembly adopted Principles Relevant to the Use of Nuclear Power Sources in Outer Space.³⁵⁰ Under these Principles, the launching state is, prior to the launch, to ensure that a thorough and comprehensive safety assessment is conducted and made

publicly available. Where a space object appears to malfunction with a risk of re-entry of radioactive materials to the earth, the launching state is to inform states concerned and the UN Secretary-General and respond promptly to requests for further information or consultations sought by other states. Principle 8 provides that states shall bear international responsibility for national activities involving the use of nuclear power sources in outer space, whether such activities are carried out by governmental agencies or by non-governmental agencies. Principle 9 provides that each state which launches or procures the launching of a space object and each state from whose territory or facility a space object is launched shall be internationally liable for damage caused by such space object or its component parts.

Assistance

The Agreement on the Rescue of Astronauts, the Return of Astronauts and the Return of Objects Launched into Outer Space was signed in 1968 and sets out the legal framework for the provision of emergency assistance to astronauts. It provides for immediate notification of the launching authority or, if that is not immediately possible, a public announcement regarding space personnel in distress as well as the immediate provision of assistance. It also covers search and rescue operations, as well as a guarantee of prompt return. The Convention also provides for recovery of space objects.³⁵¹

The Moon Treaty

In 1979, the Agreement Governing the Activities of States on the Moon and other Celestial Bodies was adopted.³⁵² As noted above, this provides for the

demilitarisation of the moon and other celestial bodies, and establishes the principle in article 3 that the exploration and the use of the moon shall be the province of all mankind and should be carried out for the benefit of all.

Article 11 emphasises that the moon and its natural resources are the common heritage of mankind and are not subject to national appropriation by any means. That important article emphasises that no private rights of ownership over the moon or any part of it or its natural resources in place may be created, although all states parties have the right to exploration and use of the moon. The states parties also agreed under article 11(5) and (7) to establish an international regime to govern the exploitation of the resources of the moon, when this becomes feasible.³⁵³ The main purposes of the international regime to be established are to include:

- a.** the orderly and safe development of the natural resources of the moon;
- b.** the rational management of those resources;
- c.** the expansion of opportunities in the use of those resources; and
- d.** an equitable sharing by all states parties in the benefits derived from those resources, whereby the interests and needs of the developing countries, as well as the efforts of those countries which have contributed either directly or indirectly to the exploration of the moon, shall be given special consideration.

Several points are worth noting. First, the proposed international regime is only to be established when exploitation becomes feasible. Secondly, it appears that until the regime is set up, there is a moratorium on exploitation, although not on ‘exploration and use’, as recognised by articles 11(4) and VI(2). This would permit the collection of samples and their removal from

the moon for scientific purposes. Thirdly, it is to be noted that private ownership rights of minerals or natural resources not in place are permissible under the Treaty.³⁵⁴

However, the Moon Treaty currently has only eighteen parties and these do not include the United States, the United Kingdom, Russia, China, India, Japan or France. Accordingly, its value is to that extent diminished.³⁵⁵ Further, it is difficult to see that this treaty can be taken as reflecting customary international law in view of the attitude adopted by the leading space powers.³⁵⁶ This has led to uncertainties in the relevant law at a time that the technology to explore and exploit has accelerated.

The Future

An issue of especial concern relates to plans for the increasing commercialisation of activities, including the mining of natural resources, on the moon and in outer space,³⁵⁷ which do not appear to be consistent with the Moon Treaty or with the concept of the Global Commons.³⁵⁸ At the least, there is confusion as to the legal position.³⁵⁹ Further, there is the question of the legal regulation of non-state private activities such as space tourism and the use of private corporations in the process of accessing and exploiting outer space.³⁶⁰ For example, NASA has opened the International Space Station to commercial opportunities and private astronauts,³⁶¹ while private corporations are now conducting an increasing number of launches into space.³⁶² The range of private or public-private space activities is rapidly expanding³⁶³ and such activities require consideration of the integration of

international and national space law, as well as clarification and development of the former.³⁶⁴

But cf. the Separate Opinion of Judge Oda, *ibid.*, p. 1118. See also D. W. Greig, *Intertemporality and the Law of Treaties*, London, 2001, pp. 108 ff.

³⁹ ICJ Reports, 1999, pp. 1045, 1060. But see here the Declaration of Judge Higgins noting that the task of the Court was to ‘decide what general idea the parties had in mind, and then make reality of that general idea through the use of contemporary knowledge’ rather than to decide *in abstracto* ‘by a mechanistic appreciation of relevant indicia’, *ibid.*, p. 1114. See also the *Argentina/Chile Award (Laguna del Desierto)* 113 ILR, pp. 1, 76. In *Cameroon v. Nigeria*, the Court, in seeking to determine the location of the mouth of the River Ebeji, emphasised that ‘the Court must seek to ascertain the intention of the parties at the time’, ICJ Reports, 2002, pp. 303, 346.

⁴⁰ Decision of 13 April 2002, 130 ILR, pp. 1, 34.

⁴¹ *Cameroon v. Nigeria*, ICJ Reports, 2002, pp. 303, 345.

⁴² *Ibid.*, p. 370.

⁴³ See e.g. Verzijl, *International Law*, pp. 378–81.

⁴⁴ See e.g. *El Salvador/Honduras (Land, Island and Maritime Frontier Dispute) (Nicaragua Intervening)*, ICJ Reports, 1992, pp. 351, 401; 97 ILR, p. 112.

⁴⁵ See e.g. *Dubai/Sharjah* 91 ILR, pp. 543, 577 (where the Court of Arbitration termed such procedures ‘administrative decisions’, *ibid.*) and *Qatar v. Bahrain*, ICJ Reports, 2001, pp. 40, 75 ff.

⁴⁶ See e.g. C. C. Hyde, *International Law*, 2nd ed., Boston, 1947, vol. I, pp. 355–6; O’Connell, *International Law*, pp. 428–30; and *Oppenheim’s International Law*, pp. 696–8.

⁴⁷ 478 HL Deb., col. 1005, Written Answer, 17 July 1986. See also A. J. Day, *Border and Territorial Disputes*, 2nd ed., London, 1987, p. 277, regarding a new island appearing after a cyclone in 1970 on a river boundary between India and Bangladesh. Title is disputed. See also *Georgia v. South Carolina* 111 L.Ed.2d 309; 91 ILR, p. 439.

⁴⁸ See e.g. *Georgia v. South Carolina* 111 L.Ed.2d 309, 334; 91 ILR, pp. 439, 458. See also *El Salvador/Honduras (Land, Island and Maritime Frontier Dispute) (Nicaragua Intervening)*, ICJ Reports, 1992, pp. 351, 546.

⁴⁹ ICJ Reports, 1992, pp. 351, 546.

⁵⁰ See e.g. *The Anna* 5 C.Rob. 373 (1805); *Arkansas v. Tennessee* 246 US 158 (1918); *Louisiana v. Mississippi* 282 US 458 (1940); *Georgia v. South Carolina* 111 L.Ed.2d 309; 91 ILR, p. 439; and the *Chamizal* arbitration, 5 *AJIL*, 1911, p. 782. See also E. Lauterpacht, ‘River Boundaries: Legal Aspects of the Shatt-Al-Arab Frontier’, 9 *ICLQ*, 1960, pp. 208, 216; L. J. Bouchez, ‘The Fixing of Boundaries in International Boundary Rivers’, 12 *ICLQ*, 1963, p. 789; S. McCaffrey, *The Law of International Watercourses*, 3rd ed., Oxford, 2019; J. Moussa, ‘Implications of the Indus Water *Kishenganga* Arbitration for the International Law of Watercourses and the Environment’, 64 *ICLQ*, 2015, p. 697; *Indus Water Kishenganga Arbitration (Pakistan v. India)* (Partial Award), Permanent Court of Arbitration, 2013; and *Botswana v. Namibia*, ICJ Reports, 1999, p. 1045.

⁵¹ See e.g. *Oppenheim’s International Law*, pp. 679–86; and O’Connell, *International Law*, pp. 436–40.

⁵² See *Christian v. The Queen* [2006] UKPC 47, para. 11; 130 ILR 696, 700, 711, where the Privy Council noted that cession ‘contemplates a transfer of sovereignty by one sovereign power to another’.

⁵³ 2 RIAA, p. 829 (1928); 4 AD, p. 103.

⁵⁴ Sovereignty over the territorial sea contiguous to and the airspace above the territory concerned would pass with the land territory: see *Grisbadarna*, 11 RIAA, p. 147 (1909); and *Beagle Channel*, HMSO, 1977; 52 ILR, p. 93. This suggests the corollary that a cession of the territorial sea or airspace would include the relevant land territory: see *Oppenheim’s International Law*, p. 680.

⁵⁵ See *Oppenheim’s International Law*, p. 681. Note also that in 1859 Austria ceded Lombardy to France, which then ceded it to Sardinia without having taken possession: see O’Connell, *International Law*, p. 438. Cf. *The Fama* 5 C Rob 106, 115 (1804).

⁵⁶ 4 RIAA, p. 158 (1925); 3 AD, p. 336.

⁵⁷ Note now that article 52 of the Vienna Convention on the Law of Treaties 1969 provides that a treaty is void if its conclusion has been procured by the threat or use of force in violation of the principles of international law embodied in the UN Charter. However, prior treaties of cession are subject to the rule of intertemporal law: see below, p. 428.

⁵⁸ See, for further examples, *Oppenheim’s International Law*, pp. 681–2.

⁵⁹ *Ibid.*, p. 699. See also S. Korman, *The Right of Conquest*, Oxford, 1996.

⁶⁰ See e.g. M. S. McDougal and F. P. Feliciano, *Law and Minimum World Public Order*, New Haven, 1961, pp. 733–6, 739–44; and J. Stone, *Legal Controls of International Conflict*, London, 1959, pp. 744–51. See also E. Benvenisti, *The International Law of Occupation*, 2nd ed., Oxford, 2012; and Y. Dinstein, *The International Law of Belligerent Occupation*, 2nd ed., Cambridge, 2019.

⁶¹ See generally *The Arab–Israeli Conflict* (ed. J. N. Moore), Princeton, 4 vols., 1974–89.

⁶² But cf. Y. Blum, ‘The Missing Reversioner’, in *ibid.*, vol. II, p. 287.

⁶³ See article 51 of the UN Charter and below, [Chapter 19](#).

⁶⁴ See e.g. *Oppenheim's International Law*, p. 699. See also O'Connell, *International Law*, pp. 431–6.

⁶⁵ O'Connell, *International Law*, p. 436. See also e.g. *Re Goering* 13 AD, p. 203 (1946).

⁶⁶ Cmd 6648 (1945). See also *Oppenheim's International Law*, pp. 699–700.

⁶⁷ See also article 5(3) of the Consensus Definition of Aggression adopted in 1974 by the UN General Assembly. Similarly, by article 52 of the Vienna Convention on the Law of Treaties 1969, a treaty providing for the transfer of territory may be void for duress.

⁶⁸ See *The Kuwait Crisis: Basic Documents* (ed. E. Lauterpacht, C. Greenwood, M. Weller and D. Bethlehem), Cambridge, 1991, p. 90.

⁶⁹ See e.g. Security Council resolution 497 (1981), condemning Israel's decision to extend its laws, jurisdiction and administration to the occupied Golan Heights. Note the US recognition of Israeli sovereignty over the Golan Heights, 25 March 2019, **113 AJIL**, 2019, p. 613. The UN has also condemned Israel's policy of establishing settlements in the occupied territories: see e.g. Security Council resolution 465 (1980). See further below, [Chapter 20](#), with regard to self-determination and the use of force.

⁷⁰ ICJ Reports, 1975, p. 12; 59 ILR, p. 14. See also M. N. Shaw, 'The Western Sahara Case', **49 BYIL**, 1978, pp. 119, 127–34.

¹⁵⁴ See article 31(3)(b) of the Vienna Convention on the Law of Treaties 1969. See also *Argentina/Chile* 38 ILR, pp. 10, 89.

¹⁵⁵ See *El Salvador/Honduras*, ICJ Reports, 1992, pp. 351, 401, 558 ff.

¹⁵⁶ 130 ILR, p. 35. See also Shaw, ‘Title, Control and Closure?’, pp. 776 ff.; and K. Parlett, ‘State Conduct in Territorial Disputes beyond *Effectivités*: Recognition, Acquiescence, Renunciation and Estoppel’ in Kohen and Hébié, *Territorial Disputes*, p. 169. See also J. Wass, ‘Jurisdiction by Estoppel and Acquiescence in International Courts and Tribunals’, 86 *BYIL*, 2015, p.155.

¹⁵⁷ Consent, of course, is the basis of cession: see *Croatia v. Slovenia*, Arbitral Award of 29 June 2017, para. 334; and above, p. 423.

¹⁵⁸ See e.g. *Eastern Greenland*, PCIJ, Series A/B, No. 53, 1933, pp. 46, 51–2; 6 AD, pp. 95, 100; and *Western Sahara*, ICJ Reports, 1975, pp. 12, 49–57; 59 ILR, pp. 14, 66. See also G. Schwarzenberger, ‘Title to Territory: Response to a Challenge’, 51 *AJIL*, 1957, p. 308.

¹⁵⁹ See e.g. *Taba* 80 ILR, pp. 224, 297–8, 306.

¹⁶⁰ See I. MacGibbon, ‘The Scope of Acquiescence in International Law’, **31 BYIL**, 1954, p. 143. See also *Malaysia/Singapore*, ICJ Reports, 2008, pp. 12, 50–1 and the joint dissenting opinion of Judges Simma and Abraham, *ibid.*, pp. 116 ff.; and *Bolivia v. Chile*, ICJ Reports, 2018, pp. 507, 556 ff., declaring that ‘acquiescence is equivalent to tacit recognition manifested by unilateral conduct which the other party may interpret as consent’, citing *The Gulf of Maine Maritime Boundary (Canada/US)*, ICJ Reports, 1984, pp. 246, 305.

¹⁶¹ See *El Salvador/Honduras*, ICJ Reports, 1992, pp. 351, 577; 97 ILR, pp. 266, 493; and *Eritrea–Yemen* 114 ILR, pp. 1, 84.

¹⁶² See e.g. *Libya/Chad Territorial Dispute*, ICJ Reports, 1994, pp. 6, 35; 100 ILR, pp. 1, 34, where the Court noted: ‘If a serious dispute had indeed existed regarding frontiers, eleven years after the conclusion of the 1955 Treaty, one would expect it to have been reflected in the 1966 Treaty.’ See also *Malaysia/Singapore*, ICJ Reports, 2008, pp. 12, 82 ff.; and *Nicaragua v. Colombia (Merits)*, ICJ Reports, 2012, pp. 624, 658–9.

¹⁶³ See *Temple of Preah Vihear*, ICJ Reports, 1962, pp. 6, 29 ff.; 33 ILR, p. 48; *Cameroon v. Nigeria (Preliminary Objections)*, ICJ Reports, 1998, pp. 275, 303; and *Eritrea/Ethiopia* 130 ILR, pp. 68 ff.

¹⁶⁴ See e.g. *Gulf of Maine*, ICJ Reports, 1984, p. 305; 71 ILR, p. 74. The Court in *Malaysia/Singapore*, ICJ Reports, 2008, pp. 12, 81–2, emphasised that a party relying on an estoppel must show, among other things, that ‘it has taken distinct acts in reliance on the other party’s statement’. See also *Bolivia v. Chile*, ICJ Reports, 2018, pp. 507, 557 ff. In *Bay of Bengal (Bangladesh v. Myanmar)*, ITLOS, Judgment of 14 March 2012, p. 142, the International Tribunal for the Law of the Sea noted that ‘in international law, a situation of estoppel exists when a state by its conduct, has created the appearance of a particular situation and another state, relying on such conduct in good faith, has acted or abstained from an action to its detriment. The effect of the notion of estoppel is that a state is precluded, by its conduct, from asserting that it did not agree to, or recognise, a certain situation.’ See also the *Delimitation of the Maritime Boundary (Ghana v. Côte D’Ivoire)*, ITLOS Reports, 2017, paras. 242 ff.

¹⁶⁵ Note that the Tribunal in *Eritrea–Yemen* emphasized: ‘Repute is also an important ingredient for the consolidation of title’, 114 ILR, pp. 1, 136.

¹⁶⁶ PCIJ, Series A/B, No. 53, 1933, pp. 46, 51–2; 6 AD, pp. 95, 100.

¹⁶⁷ See *Anglo-Norwegian Fisheries*, ICJ Reports, 1951, p. 116; 18 ILR, p. 86. The Court referred to the evidence of third parties which, while not amounting to clear recognition of claims, might afford a measure of support to such claims: *Nicaragua v. Colombia* (Merits), ICJ Reports, 2012, pp. 624, 660.

¹⁶⁸ Note also the role of recognition in the context of new states and territory, above, p. 420, note 27.

¹⁶⁹ See *El Salvador/Honduras*, ICJ Reports, 1992, pp. 351, 579; 97 ILR, pp. 266, 495. The Court e.g. in *Indonesia/Malaysia* felt that it ‘cannot disregard’ the failure of Indonesia or its predecessor, the Netherlands, to protest at the construction of lighthouses and other administrative activities on territory claimed to be Indonesian and noted that ‘such behaviour is unusual’: ICJ Reports, 2002, pp. 625, 685.

¹⁷⁰ *Navigational Rights (Costa Rica v. Nicaragua)*, ICJ Reports, 2009, pp. 213, 265–6.

Martin, *L’Estoppel en Droit International Public*, Paris, 1979; C. Dominicé, ‘A Propos du Principe de l’Estoppel en Droit des Gens’, in *Recueil d’ Études de Droit International en Hommage à Paul Guggenheim*, Geneva, 1968, p. 327; and I. Sinclair, ‘Estoppel and Acquiescence’, in *Fifty Years of the International Court of Justice* (ed. A. V. Lowe and M. Fitzmaurice), Cambridge, 1996, p. 104.

¹⁷² *Malaysia/Singapore*, ICJ Reports, 2008, pp. 12, 81.

¹⁷³ PCIJ, Series A/B, No. 53, 1933, pp. 46, 68; 6 AD, pp. 95, 102.

¹⁷⁴ ICJ Reports, 1962, p. 6; 33 ILR, p. 48. See D. H. Johnson, ‘The Case Concerning the Temple of Preah Vihear’, 11 *ICLQ*, 1962, p. 1183; and J. P. Cot, ‘Cour Internationale de Justice: Affaire du Temple de Préah Vihéar’, *AFDI*, 1962, p. 217.

¹⁷⁵ ICJ Reports, 1962, pp. 6, 23; 33 ILR, pp. 48, 62.

¹⁷⁶ ICJ Reports, 1962, pp. 30–2; 33 ILR, p. 68.

¹⁷⁷ See also *Award of the King of Spain*, ICJ Reports, 1960, p. 192; 30 ILR, p. 457.

¹⁷⁸ See e.g. Jennings, *Acquisition*, pp. 47–51.

¹⁷⁹ See e.g. *Anglo-Norwegian Fisheries*, ICJ Reports, 1951, pp. 116, 139; 18 ILR, pp. 86, 101; *North Sea Continental Shelf*, ICJ Reports, 1969, pp. 3, 26; *Gulf of Maine*, ICJ Reports, 1984, pp. 246, 308; 71 ILR, pp. 74, 135; and *ELSI*, ICJ Reports, 1989, pp. 15, 44; 84 ILR, pp. 311, 350. See also M. Koskeniemi, ‘L’Affaire du Passage par le Great Belt’, *AFDI*, 1992, p. 905.

¹⁸⁰ In *Cameroon v. Nigeria* (Preliminary Objections), the Court emphasized: ‘An estoppel would only arise if by its acts or declarations Cameroon had consistently made it fully clear that it had agreed to settle the boundary dispute submitted to the Court by bilateral avenues alone. It would further be necessary that, by relying on such an attitude, Nigeria had changed its position to its own detriment or had suffered some prejudice’, ICJ Reports, 1998, pp. 275, 303. See also *Malaysia/Singapore*, ICJ Reports, 2008, pp. 12, 81; and *Bolivia v. Chile*, ICJ Reports, 2018, para. 158. Note that in the latter case, Bolivia raised an argument based on legitimate expectations, a doctrine found in awards concerning disputes between a foreign investor and the host state, but the Court found that it did not follow that there existed a principle giving rise to an obligation on the basis of what could be considered to be a legitimate expectation in general international law, *ibid.*, para. 162.

¹⁸¹ Award of 18 March 2015, para. 438.

¹⁸² ICJ Reports, 1986, pp. 554, 582; 80 ILR, p. 440. Note that the Court in *Malaysia/Singapore*, ICJ Reports, 2008, pp. 12, 94–5 observed that a map may give a good indication of the official position of the party concerned, particularly where it is an admission against interest. See also *Nicaragua v. Colombia* (Merits), ICJ Reports, 2012, pp. 624, 661–2; and *Burkina Faso/Niger*, ICJ Reports, 2013, pp. 44, 76 ff.

¹⁸³ See *Eritrea/Ethiopia* 130 ILR, pp. 38 ff. See also *Eritrea–Yemen* 114 ILR, pp. 1, 94 ff.

184 114 ILR, pp. 1, 94 ff.; and *Eritrea/Ethiopia* 130 ILR, pp. 39, 45 ff. Note that a treaty provision may provide for an avowedly incorrect geographical feature on an annexed map as part of the boundary line: see *Cameroon v. Nigeria*, ICJ Reports, 2002, p. 372.

185 ICJ Reports, 2002, pp. 383–4. See also p. 385.

186 *Ibid.*, pp. 366 ff. See also *Eritrea/Ethiopia* 130 ILR, pp. 39 ff. Also relevant would be the size of the map and the amount of detail it showed as regards the disputed territory in question, *Costa Rica v. Nicaragua*, ICJ Reports, 2015, pp. 665, 702.

187 See e.g. *Anglo-Norwegian Fisheries*, ICJ Reports, 1951, pp. 116, 138; and De Visscher, *Theory and Reality*, p. 209.

188 *Cameroon v. Nigeria*, ICJ Reports, 2002, p. 352. But see the comments of the International Court on ‘convergent evolution’ of the parties regarding title, *Malaysia/Singapore*, ICJ Reports, 2008, pp. 12, 96 and note the reference to the presumption in favour of maintaining sovereignty in the hands of the initial holder in the joint dissenting opinion of Judges Simma and Abraham, pp. 12, 116, 119. See also above, p. 428.

189 Judge Huber, *Island of Palmas*, 2 RIAA, pp. 829, 839 (1928); 4 AD, p. 103.

190 See further above, p. 434.

191 See above, p. 435.

192 See in this context article 35 of the General Act of the Congress of Berlin 1885, in which the parties recognised the obligation to ‘ensure the establishment of authority in the regions occupied by them on the coast of the African continent’.

193 See e.g. Security Council resolution 216 (1965) concerning Rhodesia; General Assembly resolution 31/6A and Security Council Statements of 21 September 1979 and 15 December 1981 concerning the South African Bantustans; Security Council resolution 541 (1983) with regard to the ‘Turkish Republic of Northern Cyprus’; and Security Council resolution 662 (1990) concerning the Iraqi annexation of Kuwait.

194 See particularly Security Council resolution 687 (1991) in which the international boundary between Kuwait and Iraq was deemed to be that agreed by both parties in ‘Minutes’ agreed in 1963. This boundary was then formally guaranteed by the Council in Section A, para. 4 of this resolution. See e.g. M. H. Mendelson and S. C. Hulton, ‘The Iraq–Kuwait Boundary’, *64 BYIL*, 1993, p. 135. See also Security Council resolution 833 (1993) and S/26006.

195 See e.g. *Oppenheim’s International Law*, pp. 716–18; and G. Marston, ‘The British Acquisition of the Nicobar Islands, 1869’, *69 BYIL*, 1998, p. 245. See also e.g. *Eastern Greenland*, PCIJ, Series A/B, No. 53, 1933, p. 47; 6 AD, p. 95; and *Malaysia/Singapore*, ICJ Reports, 2008, pp. 12, 49, 74, 80, 82, 96.

196 See K. H. Kaikobad, ‘Some Observations on the Doctrine of the Continuity and Finality of Boundaries’, *54 BYIL*, 1983, p. 119; and Shaw, ‘Heritage of States’, pp. 75, 81. See also *Malaysia/Singapore*, ICJ Reports, 2008, pp. 12, 51.

Crawford, ‘State Practice and International Law in Relation to Secession’, 69 *BYIL*, 1998, p. 85; Daillier *et al.*, *Droit International Public*, p. 584; *Self-Determination in International Law: Quebec and Lessons Learned* (ed. A. Bayefsky), The Hague, 2000; K. Del Mar, ‘The Myth of Remedial Secession’, in *Statehood and Self-Determination: Reconciling Tradition and Modernity in International Law* (ed. D. French), Cambridge, 2013, p. 79; *Secession: International Law Perspectives* (ed. M. Kohen), Cambridge, 2006; *The Ashgate Research Companion to Secession* (ed. A. Pavković and P. Radan), Farnham, 2011; *Self-Determination and Secession in International Law* (ed. C. Walter, A. von Ungern-Sternberg and K. Abushov), Oxford, 2014; and J. Dugard, *The Secession of States and Their Recognition in the Wake of Kosovo*, The Hague, 2013. See also above, Chapter 5, p. 218. Self-determination does have a continuing application in terms of human rights situations within the territorial framework of independent states (i.e. internal self-determination), *ibid.*

²⁰⁴ (1998) 161 DLR (4th) 385, 436; 115 ILR, p. 536. See also *Prime Minister of Spain v. Parliament of Catalonia*, STC 114/2017, ILDC 2814 (ES 2017), Spanish Constitutional Court, Judgment of 17 October 2017.

²⁰⁵ (1998) 161 DLR (4th) 385, 438.

²⁰⁶ A. Cassese, *Self-Determination of Peoples*, Cambridge, 1995, p. 120. See also T. Musgrave, *Self-Determination and National Minorities*, Oxford, 1997, pp. 188 ff.; J. Castellino, *International Law and Self-Determination*, The Hague, 2000; and K. Knop, *Diversity and Self-Determination in International Law*, Cambridge, 2002, pp. 65 ff. See also Judge Wildhaber’s Concurring Opinion (joined by Judge Ryssdal) in *Loizidou v. Turkey*, Judgment of 18 December 1996, 108 ILR, pp. 443, 470–3. See also Kohen, *Secession*. See also e.g. the Written Statement of the Russian Federation in the Kosovo case, www.icj-cij.org/docket/index.php?p1=3&p2=4&k=21&case=141&code=kos&p3=1, pp. 39–40, underlining that, ‘outside the colonial context, international law allows for secession of a part of a state against the latter’s will only as a matter of self-determination of peoples, and only in extreme circumstances, when the people concerned is continuously subjected to most severe forms of oppression that endangers the very existence of the people’.

²⁰⁷ The Court in *Re Secession of Quebec*, citing Cassese, *Self-Determination*, suggested that the right to external self-determination (i.e. secession) might apply to cases of foreign

occupation and as a last resort where a people's right to internal self-determination (i.e. right to public participation, etc.) was blocked: (1998) 161 DLR (4th) 385, pp. 438 ff. See also J. Dugard, 'The Secession of States and Their Recognition in the Wake of Kosovo', 357 HR, 2013, p. 9.

²⁰⁸ ICJ Reports, 2010, pp. 403, 437–8.

²⁰⁹ See www.bbc.co.uk/news/world-middle-east-26248275. See also T. D. Grant, *Aggression against Ukraine: Territory, Responsibility and International Law*, New York, 2015; but note V. Tolstykh, 'Reunification of Crimea with Russia: A Russian Perspective', 13 *Chinese Journal of International Law*, 2014, p. 879; and A. Pronin, 'Republic of Crimea: A Two-Day State', 3 *Russian Law Journal*, 2015, p. 133. The International Court stated in the *Kosovo* Advisory Opinion, ICJ Reports, 2010, pp. 403, 437, that unilateral and non-consensual declarations of independence, while not as such illegal, may be contrary to international law where 'connected with the unlawful use of force or other egregious violations of norms of general international law, in particular those of a peremptory character (*jus cogens*)'.

²¹⁰ See the Budapest Memorandum 1994, A/49/765: S/1994/1399, and the 1997 Partition Treaty on the Status and Conditions of the Black Sea Fleet with Ukraine, terminated by Russia on 1 April 2014, www.loc.gov/law/foreign-news/article/russia-ukraine-legislature-adopts-law-on-dissolution-of-black-sea-fleet-treaties/. See also the UN Charter and the OSCE Helsinki Final Act 1976, www.bbc.co.uk/news/world-europe-26630062.

²¹¹ See also the Russian war with Georgia in 2008 following the latter's attack upon secessionist enclaves of Abkhazia and South Ossetia (in the territory of Georgia) backed by Russia and Russia's support of the self-proclaimed independence of the entities; see the EU commission Independent Fact-Finding Mission on the Conflict in Georgia 2009.

²¹² See e.g. Security Council resolutions 1766 (2007), 1801 (2008) and 1853 (2008) with regard to Somalia; and resolutions 1756 (2007), 1794 (2007) and 1804 (2008) with regard to the Democratic Republic of Congo.

²¹³ See e.g. Security Council resolutions 1766 (2007), 1801 (2008) and 1853 (2008) with regard to Somalia; and resolutions 1756 (2007), 1794 (2007) and 1804 (2008) with regard to the Democratic Republic of Congo.

²¹⁴ This analysis is supported by *Burkina Faso/Mali*, ICJ Reports, 1986, p. 554; 80 ILR, p. 459. See also the *Chagos* Advisory Opinion, ICJ Reports, 2019, para. 160: ‘Both state practice and *opinio juris* at the relevant time confirm the customary law character of the right to territorial integrity of a non-self-governing territory as a corollary of the right to self-determination’; and R. Mc Corquodale, J. Robinson and N. Peart, ‘Territorial Integrity and Consent in the Chagos Advisory Opinion’, 69 *ICLQ*, 2020, p. 221.

²¹⁵ Shaw, *Title to Territory*, chapter 5. See also the Moroccan approach, *ibid.*

²¹⁶ See, with regard to the preservation of acquired rights, *El Salvador/Honduras*, ICJ Reports, 1992, pp. 351, 400; 97 ILR, p. 112. See also *Cameroon v. Nigeria*, ICJ Reports, 2002, pp. 370, 373–4. In particular, the Court stated in relation to the Bakassi peninsula and Lake Chad regions which contain Nigerian populations that ‘the implementation of the present judgment will afford the parties a beneficial opportunity to co-operate in the interests of the population concerned, in order notably to enable it to continue to have access to educational and health services comparable to those it currently enjoys’, *ibid.*, p. 452. The Court also referred to the commitment of the Cameroon Agent made during the Oral Pleadings to protect Nigerians living in the areas recognised as belonging to Cameroon, *ibid.*, p. 452 and para. V(C) of the Dispositif.

²¹⁷ Shaw, *Title to Territory*, p. 195; Jennings, *Acquisition*, p. 74; and Hill, *Claims to Territory*, pp. 77–80.

²¹⁸ See *Eastern Greenland*, PCIJ, Series A/B, No. 53, 1933, p. 46; 6 AD, p. 95; and *Western Sahara*, ICJ Reports, 1975, pp. 12, 42–3; 59 ILR, pp. 14, 59. See generally B. Feinsein, ‘Boundaries and Security in International Law and Practice’, 3 *Finnish YIL*, 1992, p. 135. Note that in *Croatia v. Slovenia*, Arbitral Award of 29 June 2017, para. 482, the Tribunal noted that it ‘does not consider that the contention that natural features generally determine the course of the boundary to be of any probative value’.

²¹⁹ 114 ILR, pp. 1, 124, 125. But see *Territorial and Maritime Dispute (Nicaragua v. Honduras)* (Merits), ICJ Reports, 2007, para. 161, where the Court noted that ‘proximity [of islands to the mainland] as such is not necessarily determinative of legal title’.

²²⁰ See e.g. Shaw, *Title to Territory*, pp. 193–4; Jennings, *Acquisition*, pp. 76–8; and Hill, *Claims to Territory*, pp. 81–91.

²²¹ See *Keesing's Record of World Events*, p. 37635 (1990). Note that Iraq made a similar claim to Kuwait in the early 1960s, although not then taking military action: see Jennings, *Acquisition*, p. 77, note 2.

²²² See e.g. Security Council resolution 662 (1990); Lauterpacht *et al.*, *Kuwait Crisis*, p. 90.

²²³ Shaw, *Title to Territory*, pp. 193–4. Note also the claims advanced by Indonesia to West Irian, *ibid.*, p. 22.

²²⁴ ICJ Reports, 1975, p. 12; 59 ILR, p. 14.

²²⁵ See also *Eritrea–Yemen* 114 ILR, pp. 1, 37 ff. The Tribunal also discounted the notion of reversion of title, *ibid.*, pp. 40, 115.

O. Corten), Brussels, 1999; A. Peters, 'The Principle of Uti Possidetis Juris: How Relevant is it for Issues of Secession?', in Walter *et al.*, *Self-*

Determination, p. 95; and G. Nesi, 'Boundaries' in Kohen and Hébié, *Territorial Disputes*, pp. 193, 206 ff.

²²⁷ See the *Colombia–Venezuela* Arbitral Award, 1 RIAA, pp. 223, 228 (1922); 1 AD, p. 84; *Beagle Channel*, HMSO, 1977; 52 ILR, p. 93; and *El Salvador/Honduras (Land, Island and Maritime Frontier Dispute) (Nicaragua Intervening)*, ICJ Reports, 1992, pp. 351, 544; 97 ILR, pp. 266, 299–300.

²²⁸ AHG/Res.16(1). See Security Council resolution 1234 (1999) which refers directly to OAU resolution 16(1) and see also article 4(i) of the Protocol Relating to the Establishment of the Peace and Security Council of the African Union 2002, and the preamble to the Protocol on Politics, Defence and Security Cooperation adopted by the Southern African Development Community in 2001: see further below, [Chapter 17](#), p. 893. See Shaw, *Title to Territory*, pp. 185–7. See also the Separate Opinion by Judge Ajibola in *Libya/Chad Territorial Dispute*, ICJ Reports, 1994, pp. 6, 83 ff.; 100 ILR, pp. 1, 81 ff.

²²⁹ Shaw, *Title to Territory*, chapter 5. The principle has also been noted in Asian practice: see e.g. *Temple of Preah Vihear*, ICJ Reports, 1962, p. 6; 33 ILR, p. 48; and *Rann of Kutch* 7 ILM, 1968, p. 633; 50 ILR, p. 2.

²³⁰ ICJ Reports, 1986, p. 554; 80 ILR, p. 459.

²³¹ ICJ Reports, 1986, p. 557; 80 ILR, p. 462.

²³² ICJ Reports, 1986, p. 565; 80 ILR, p. 469.

²³³ *Ibid.*

²³⁴ ICJ Reports, 1986, p. 568; 80 ILR, p. 473. Judge Yusuf in his Separate Opinion in *Burkina Faso/Niger*, ICJ Reports, 2013, pp. 44, 134, 138–9, put it as follows:

the principle of respect for boundaries in the
Cairo Resolution places the boundaries existing
at the time of independence in a 'holding
pattern', particularly to avoid armed conflict

over territorial claims, until a satisfactory and peaceful solution is found by the Parties to a territorial dispute in conformity with international law, or until such time as closer integration and unity is achieved among African States in general, or between the neighbouring countries in particular, in keeping with the Pan-African vision. As such, it implies a prohibition of the use of force in the settlement of boundary disputes and an obligation to refrain from acts of seizure of a portion of the territory of another African State.

See, as to the notion of critical date, above, p. 432.

²³⁵ ICJ Reports, 1986, p. 565; 80 ILR, p. 470.

²³⁶ ICJ Reports, 1986, p. 566; 80 ILR, p. 459. This was reaffirmed by the Court in *El Salvador/Honduras (Land, Island and Maritime Frontier Dispute) (Nicaragua Intervening)*, ICJ Reports, 1992, pp. 351, 386–7; 97 ILR, pp. 266, 299–300. The Court in the latter case went on to note that ‘*uti possidetis juris* is essentially a retrospective principle, investing as international boundaries administrative limits intended originally for quite other purposes’, *ibid.*, p. 388; 79 ILR, p. 301. See M. N. Shaw, ‘Case Concerning the Land, Island and Maritime Frontier Dispute’, 42 *ICLQ*, 1993, p. 929. See also *Territorial and Maritime Dispute (Nicaragua v. Honduras)* (Merits), ICJ Reports, 2007, pp. 659, 706 ff.; and *Croatia v. Slovenia*, Arbitral Award of 29 June 2017, paras. 256 ff.

²³⁷ *El Salvador/Honduras*, ICJ Reports, 1992, pp. 351, 559. See also *Nicaragua v. Colombia* (Merits), ICJ Reports, 2012, pp. 624, 651.

²³⁸ *Benin v. Niger*, ICJ Reports, 2005, pp. 90, 148; and *Burkina Faso/Niger*, ICJ Reports, 2013, pp. 44, 75.

²³⁹ See e.g. *Nicaragua v. Colombia* (Merits), ICJ Reports, 2012, pp. 624, 651.

²⁴⁰ See e.g. R. Yakemtchouk, 'Les Conflits de Territoires and de Frontières dans les États de l'Ex-URSS', *AFDI*, 1993, p. 401. See also, with regard to the application of *uti possidetis* to the dissolution of the Czech and Slovak Federal Republic, J. Malenovsky, 'Problèmes Juridiques Liés à la Partition de la Tchécoslovaquie', *AFDI*, 1993, p. 328.

²⁴¹ 92 ILR, p. 168. See also A. Pellet, 'Note sur la Commission d'Arbitrage de la Conférence Européenne pour la Paix en Yougoslavie', *AFDI*, 1991, p. 329; and A. Pellet, 'Activité de la Commission d'Arbitrage de la Conférence Européenne pour la Paix en Yougoslavie', *AFDI*, 1992, p. 220.

²⁴² The Arbitration Commission was here dealing specifically with the internal boundaries between Serbia and Croatia and Serbia and Bosnia-Herzegovina.

²⁴³ 92 ILR, p. 171. The Arbitration Commission specifically cited here the views of the International Court in *Burkina Faso/Mali*: see above, p. 449. Note also that the Under-Secretary of State of the Foreign and Commonwealth Office stated in January 1992 that 'the borders of Croatia will become the frontiers of independent Croatia, so there is no doubt about that particular issue. That has been agreed amongst the Twelve, that will be our attitude towards those borders. They will just be changed from being republican borders to international frontiers', UKMIL, 63 *BYIL*, 1992, p. 719.

²⁴⁴ See e.g. M. N. Shaw, 'Peoples, Territorialism and Boundaries', 3 *EJIL*, 1997, pp. 477, 504; but cf. S. Ratner, 'Drawing a Better Line: *Uti Possidetis* and the Borders of New States', 90 *AJIL*, 1996, pp. 590, 613 ff.; and M. Craven, 'The European Community Arbitration Commission on Yugoslavia', 65 *BYIL*, 1995, pp. 333, 385 ff.

²⁴⁵ See generally Kaikobad, *Interpretation and Revision*; M. Kohen, 'La Relation Titres/Effectivités dans le Contentieux Territorial à la Lumière de la Jurisprudence Récente', 108 *RGDIP*, 2004, p. 561; M. Mendelson, 'The Cameroon–Nigeria Case in the International Court of Justice: Some Territorial Sovereignty and Boundary Delimitation Issues', 75 *BYIL*, 2004, p. 223; B. H. Oxman, 'The Territorial Temptation: A Siren Song at Sea', 100 *AJIL*, 2006, p. 830; and S. R. Ratner, 'Land Feuds and Their Solutions: Finding International Law Beyond the Tribunal Chamber', 100 *AJIL*, 2006, p. 808. Note that the International Court has emphasised that the principle of *uti possidetis* applies to territorial as well as boundary problems: see *El Salvador/Honduras*, ICJ Reports, 1992, pp. 351, 387; 97 ILR, pp. 266, 300; and to maritime disputes, see *Territorial and Maritime Dispute*

(*Nicaragua v. Honduras*) (Merits), ICJ Reports, 2007, pp. 659, 707, 729. See further here M. N. Shaw, 'International Law: A System of Relationships', 3 *Collected Courses of the Xiamen Academy*, 2010, pp. 239, 299 ff.; M. Kohen, 'L'uti possidetis et les delimitations maritimes', in *Liber Amicorum Jean-Pierre Cot*, Brussels, 2009, p. 155; S. Lalonde, 'The Role of the *Uti Possidetis* Principle in the Resolution of Maritime Boundary Disputes', in *Sovereignty, Statehood and State Responsibility* (ed. C. Chinkin and F. Baetens), Cambridge, 2015, p. 248; and Y. Tanaka, 'Reflections on Maritime Delimitation in the Nicaragua/Honduras Case', 68 *Zeitschrift für ausländisches öffentliches Recht und Völkerrecht*, 2008, pp. 903, 907–9.

²⁴⁶ See *Libya/Chad Territorial Dispute*, ICJ Reports, 1994, pp. 6, 38–40; 100 ILR, pp. 1, 37–9. See also *Oppenheim's International Law*, p. 663. Note that by virtue of article 11 of the Convention on Succession of States in Respect of Treaties 1978, a succession of states does not as such affect a boundary established by a treaty or obligations or rights established by a treaty and relating to the regime of a boundary. Article 62 of the Vienna Convention on the Law of Treaties 1969 provides that the doctrine of *rebus sic stantibus* does not apply to boundary treaties: see below, [Chapter 15](#), p. 829.

²⁴⁷ ICJ Reports, 1994, p. 37; 100 ILR, p. 36.

²⁴⁸ ICJ Reports, 1986, p. 554; 80 ILR, p. 440.

²⁴⁹ ICJ Reports, 1992, p. 351; 97 ILR, p. 266. See also Shaw, 'Land, Island and Maritime Frontier Dispute'.

²⁵¹ ICJ Reports, 1992, pp. 351, 389; 97 ILR, pp. 266, 302.

²⁵² See e.g. *Territorial and Maritime Dispute (Nicaragua v. Honduras)* (Merits), ICJ Reports, 2007, pp. 659, 710–11.

²⁵³ ICJ Reports, 1992, p. 399; 97 ILR, p. 266.

²⁵⁴ See e.g. ICJ Reports, 1992, pp. 408, 485, 514, 525, 563, 565; 97 ILR, pp. 321, 401, 430, 441, 479, 481. See also *Territorial and Maritime Dispute (Nicaragua v. Honduras)* (Merits), ICJ Reports, 2007, pp. 659, 711 ff. Such post-colonial *effectivités* could show

whether either of the contending states had displayed sufficient evidence of sovereign authority in order to establish legal title, *ibid.*

²⁵⁵ I.e. equity *infra legem* or within the context of existing legal principles.

²⁵⁶ ICJ Reports, 1986, pp. 554, 633; 80 ILR, pp. 440, 535.

²⁵⁷ ICJ Reports, 1992, pp. 351, 514–15; 97 ILR, pp. 266, 430–1.

²⁵⁸ ICJ Reports, 1992, p. 396; 97 ILR, p. 309.

²⁵⁹ See e.g. *Oppenheim's International Law*, pp. 664–6; S. W. Boggs, *International Boundaries*, New York, 1940; Prescott and Triggs, *International Frontiers*, chapter 7; Bouchez, 'International Boundary Rivers', p. 789; A. Patry, 'Le Régime des Cours d'Eau Internationaux', 1 *Canadian YIL*, 1963, p. 172; R. Baxter, *The Law of International Waterways*, Harvard, 1964; Verzijl, *International Law*, vol. III, pp. 537 ff.; H. Dipla, 'Les Règles de Droit International en Matière de Délimitation Fluviale: Remise en Question?', 89 *RGDIP*, 1985, p. 589; H. Ruiz Fabri, 'Règles Coutumières Générales et Droit International Fluvial', *AFDI*, 1990, p. 818; F. Schroeter, 'Les Systèmes de Délimitation dans les Fleuves Internationaux', *AFDI*, 1992, p. 948; and L. Caflisch, 'Règles Générales du Droit des Cours d'Eaux Internationaux', 219 *HR*, 1989, p. 75. See also I. E. Kornfeld, *Transboundary Water Disputes*, Cambridge, 2019.

²⁶⁰ See e.g. the *Botswana v. Namibia*, ICJ Reports, 1999, pp. 1062, 1060–1, where the Court stated that “the thalweg” has variously been taken to mean “the most suitable channel for navigation” on the river, the line “determined by the line of deepest soundings”, or “the median line of the main channel followed by boatmen travelling downstream”. Treaties or conventions which define boundaries in watercourses nowadays usually refer to the thalweg as the boundary when the watercourse is navigable and to the median line between the two banks when it is not, although it cannot be said that practice has been fully consistent’; and *Benin v. Niger*, ICJ Reports, 2005, pp. 90, 126, 149. See also *New Jersey v. Delaware* 291 US 361 (1934); and the *Argentina/Chile Award (Laguna del Desierto)* 113 ILR, pp. 1, 209. See, as to the use of the thalweg principle with regard to wadis (dried river beds), Mendelson and Hulton, 'Iraq–Kuwait Boundary', pp. 160 ff. See also the discussion as to the international boundaries in various rivers, *Croatia v. Slovenia*, Arbitral Award of 27 June 2017.

²⁶¹ See e.g. *Argentina/Chile Frontier Award (La Palena)* 38 ILR, pp. 10, 93. See also article 2A(1) of Annex I(a) of the Israel–Jordan Treaty of Peace 1994.

²⁶² See e.g. *Chamizal*, 11 RIAA, p. 320.

²⁶³ See e.g. the Iran–Iraq agreements of 1937 and 1975. Note e.g. that the Costa Rica–Nicaragua Treaty of Limits fixed the San Juan river boundary at one point along the right bank of that river: see *Navigational Rights (Costa Rica v. Nicaragua)*, ICJ Reports, 2009, pp. 213, 229; ICJ Reports, 2015, paras. 59, 71. See Lauterpacht, ‘River Boundaries’, p. 208; K. H. Kaikobad, *The Shatt-al-Arab Boundary Question*, Oxford, 1980; and K. H. Kaikobad, ‘The Shatt-al-Arab River Boundary: A Legal Reappraisal’, 56 *BYIL*, 1985, p. 49. See, as to the question of equitable sharing of international watercourses, McCaffrey, *Law of International Watercourses*; *Gabčíkovo–Nagymaros*, ICJ Reports, 1997, pp. 7, 54; 116 ILR, p. 1; the Convention on the Law of the Non-Navigational Uses of International Watercourses 1997; and the Separate Opinion of Judge Kooijmans, *Botswana v. Namibia*, ICJ Reports, 1999, pp. 1045, 1148 ff. See also P. Wouters, ‘The Legal Response to International Water Conflicts: The UN Watercourses Convention and Beyond’, 42 *German YIL*, 1999, p. 293. Note that in March 2003, the establishment of a Water Cooperation Facility to mediate in disputes between countries sharing a single river basin was announced: see <http://news.bbc.co.uk/1/hi/sci/tech/2872427.stm>.

²⁶⁴ See e.g. K. Baslar, *The Concept of the Common Heritage of Mankind in International Law*, The Hague, 1998; A. Cassese, *International Law*, 2nd ed., Oxford, 2005, pp. 92 ff.; B. Larschan and B. C. Brennan, ‘The Common Heritage of Mankind Principle in International Law’, 21 *Columbia Journal of International Law*, 1983, p. 305; R. Wolfrum, ‘The Principle of the Common Heritage of Mankind’, 43 *ZaöRV*, 1983, p. 312; S. Gorove, ‘The Concept of “Common Heritage of Mankind”’, 9 *San Diego Law Review*, 1972, p. 390; and C. Joyner, ‘Legal Implications of the Common Heritage of Mankind’, 35 *ICLQ*, 1986, p. 190. See also R. Wolfrum, ‘Common Heritage of Mankind’, *Max Planck Encyclopedia of Public International Law*, 2009; M. C. W. Pinto, ‘The Common Heritage of Mankind: Then and Now’, 361 *HR*, 2013, p. 9.

²⁶⁵ See further below, [Chapter 10](#), p. 540.

²⁶⁶ See further below, p. 469.

²⁶⁷ Questions have arisen as to whether the global climate could be regarded as part of the common heritage of mankind. However, international environmental treaties have not used such terminology, but have rather used the phrase ‘common concern of mankind’, which is weaker and more ambiguous: see e.g. the Convention on Biological Diversity 1992. See A. Boyle, ‘International Law and the Protection of the Global Atmosphere’, in *International Law and Global Climate Change* (ed. D. Freestone and R. Churchill), London, 1991, chapter 1; and P. Birnie, A. Boyle and C. Redgwell, *International Law and the Environment*, 3rd ed., Oxford, 2009, p. 197. See also below, [Chapter 14](#).

²⁶⁸ See e.g. D. R. Rothwell, *The Polar Regions and the Development of International Law*, Cambridge, 1996; *International Polar Law* (ed. D. R. Rothwell and A. D. Hemmings), Cheltenham, 2018; T. W. Balch, ‘The Arctic and Antarctic Regions and the Law of Nations’, 4 *AJIL*, 1910, p. 265; *The Arctic in International Law and Policy* (ed. K. Schönfeldt), Oxford, 2017; *International Law and Politics of the Arctic Ocean* (ed. S. Lalonde and T. L. McDorman), Leiden, 2015; M. Byers, *International Law and the Arctic*, Cambridge, 2013; D. Pharand, *Canada’s Arctic Waters in International Law*, Cambridge, 1988; G. Triggs, *International Law and Australian Sovereignty in Antarctica*, Sydney, 1986; *The Antarctic Treaty Regime* (ed. G. Triggs), Cambridge, 1987; and M. Whiteman, *Digest of International Law*, Washington, DC, 1962, vol. II, pp. 1051–61. See also W. Lakhtine, ‘Rights Over the Arctic’, 24 *AJIL*, 1930, p. 703; M. W. Mouton, ‘The International Regime of the Polar Regions’, 101 *HR*, 1960, p. 169; F. Auburn, *Antarctic Law and Politics*, Bloomington, 1982; *International Law for Antarctica* (ed. F. Francioni and T. Scovazzi), 2nd ed., The Hague, 1997; A. D. Watts, *International Law and the Antarctic Treaty System*, Cambridge, 1992; E. J. Sahurie, *The International Law of Antarctica*, Dordrecht, 1992; C. Joyner, *Antarctica and the Law of the Sea*, The Hague, 1992; *The Antarctic Legal Regime* (ed. C. Joyner and S. Chopra), Dordrecht, 1988; *The Antarctic Environment and International Law* (ed. P. Sands, J. Verhoeven and M. Bruce), London, 1992; and E. Franckx, *Maritime Claims in the Arctic*, The Hague, 1993. 318 See e.g. *Oppenheim’s International Law*, pp. 650–1; and N. Matte, *Treatise on Air–Aeronautical Law*, Montreal, 1981, chapters 4 and 5.

319 Matte, *Treatise*, pp. 91–6.

320 Article 1. Each party also undertook to accord in peacetime freedom of innocent passage to the private aircraft of other parties so long as they complied with the rules made by or under the authority of the Convention. Articles 5–10 provided that the nationality of aircraft would be based upon registration and that registration would take place in the state of which their owners were nationals. An International Commission for Air Navigation was established. See also the 1928 American Convention on Commercial Aviation.

321 ICJ Reports, 1986, pp. 14, 128; 76 ILR, p. 1.

322 ICJ Reports, 2005, p. 142.

323 See e.g. *Oppenheim's International Law*, p. 652. It should, however, be noted that articles 38 and 39 of the Convention on the Law of the Sea 1982 provide for a right of transit passage through straits used for international navigation between one part of the high seas or an exclusive economic zone and another part of the high seas or an exclusive economic zone for aircraft as well as ships. Note also that under article 53 of this Convention, aircraft have a right of overflight with regard to designated air routes above archipelagic waters.

324 See also *Pan Am Airways v. The Queen* (1981) 2 SCR 565; 90 ILR, p. 213, with regard to the exercise of sovereignty over the airspace above the high seas.

325 Note the role played by the UN Committee on the Peaceful Uses of Outer Space established in 1958 and consisting currently of sixty-nine states. The Committee has a Legal Sub-Committee and a Scientific and Technical Sub-Committee: see, in particular, Christol, *Modern International Law*, pp. 13–20; and www.unoosa.org/oosa/en/aboutus/index.html.

326 See e.g. Fawcett, *Outer Space*, chapter 7.

327 The UK has noted e.g. that, ‘for practical purposes the limit [between airspace and outer space] is considered to be as high as any aircraft can fly’, 70 *BYIL*, 1999, p. 520.

328 See generally Christol, *Modern International Law*, chapter 10; and see also e.g. UKMIL, 64 *BYIL*, 1993, p. 689. A variety of suggestions have been put forward regarding the method of delimitation, ranging from the properties of the atmosphere to the lowest

possible orbit of satellites. They appear to fall within either a spatial or a functional category: see *ibid.*, and UN Doc. A/AC.105/C.2/7/Add.1, 21 January 1977. Some states have argued for a 110-km boundary: see e.g. Soviet Union, 21(4) *UN Chronicle*, 1984, p. 37; others feel it is premature to establish such a fixed delimitation: e.g. US and UK, *ibid.* See also 216 HL Deb., col. 975, 1958–9; and D. Goedhuis, ‘The Problems of the Frontiers of Outer Space and Airspace’, 174 *HR*, 1982, p. 367. The *Oslo Manual* notes that outer space ‘begins at the lowest possible point of the orbital perigee of artificial satellites’, *Oslo Manual on Select Topics of the Law of Armed Conflict* (ed. Y. Dinstein and A. W. Dahl), Switzerland, 2020, p. 1 (Rule 1). See also the discussions in the Legal Subcommittee of the UN Committee on the Peaceful Uses of Outer Space, A/AC.105/1203, paras. 83 ff. (2019).

329 See also General Assembly resolutions 1721 (XVI) and 1884 (XVIII).

330 See also ‘The Space Millennium: The Vienna Declaration on Space and Human Development’ adopted by the Third UN Conference on the Exploration and Peaceful Uses of Outer Space (UNISPACE III), Vienna, 1999.

331 See above, [Chapter 3](#); and B. Cheng, ‘United Nations Resolutions on Outer Space: “Instant” International Customary Law?’, 5 *IJIL*, 1965, p. 23.

332 See http://disarmament.un.org/treaties/t/outer_space.

333 See e.g. Christol, *Modern International Law*, chapter 2. See also *Oppenheim’s International Law*, p. 828.

334 The issue became particularly controversial in the light of the US Strategic Defence Initiative (‘Star Wars’), which aimed to develop a range of anti-satellite and anti-missile weapons based in space. The UN Committee on the Peaceful Uses of Outer Space considered the issue, although without the participation of the US, which objected to the matter being considered: see e.g. 21(6) *UN Chronicle*, 1984, p. 18.

335 See e.g. Marcoff, *Traité*, pp. 361 ff.

336 See e.g. Christol, *Modern International Law*, pp. 25–6. See also D. Goedhuis, ‘Legal Issues Involved in the Potential Military Uses of Space Stations’, in *Liber Amicorum for Rt Hon. Richard Wilberforce* (ed. M. Bos and I. Brownlie), Oxford, 1987, p. 23; and Gorove, *Developments*, part VI.

³³⁷ See <https://treaties.un.org/pages/showDetails.aspx?objid=08000002801313d9>.

³³⁸ See also the international Hague Code of Conduct against Ballistic Missile Proliferation 2002, which seeks to reduce ballistic missile proliferation. The Code is an agreement between states on how they should conduct trade; it does not call for the destruction of missiles as such, but there are no legal obligations or inspection systems, www.hcoc.at/. The Code supplements the Missile Technology Control Regime which is an export control regime, operating as an informal political understanding among thirty-five member states formed by the G-7 industrialised countries in 1987, seeking to limit the proliferation of missiles and missile technology, see <https://mtcr.info/>. Note also the Anti-Ballistic Missile Treaty 1972, from which the US withdrew in 2002 and the Strategic Arms Limitation Agreement 2010; see F. Tronchetti, 'Legal Aspects of the Military Uses of Outer Space', in *Handbook of Space Law*, pp. 331, 347–9, 360–3. See also www.armscontrol.org/factsheets/USRussiaNuclearAgreements.

³³⁹ See e.g. Tronchetti, 'Legal Aspects of the Military Uses of Outer Space', in *Handbook of Space Law*, p. 331. Countries that have sent space vehicles to the moon include primarily the US, Russia and China; see www.weforum.org/agenda/2019/09/which-countries-moon/.

³⁴⁰ See e.g. www.ucsusa.org/resources/satellite-database, giving a number of 2,666, of which half are from the US and the others from a wide range of countries and international organisations; see www.n2yo.com/satellites/?c=&t=country.

³⁴¹ See e.g. www.thespacereview.com/article/3927/1; www.space.com/russia-anti-satellite-missile-test-2020.html; https://swfound.org/media/9550/chinese_asat_fact_sheet_updated_2012.pdf; and <https://carnegieendowment.org/2019/04/15/india-s-asat-test-incomplete-success-pub-78884>, respectively. Note also the creation of US Space Force as a branch of the Armed Forces in the Department of the Air Force on 20 December 2019 with responsibilities to develop 'military space professionals, acquiring military space systems, maturing the military doctrine for space power, and organising space forces to present to our Combatant Commands'; see www.spaceforce.mil/About-Us/About-Space-Force.

³⁴² See <https://spaceflightnow.com/2020/07/23/u-s-officials-say-russia-tested-a-new-anti-satellite-weapon/>.

³⁴³ See e.g. US Department of Defense, *Law of War Manual*, Washington, DC, 2016, para. 14.10.2.2; and *Oslo Manual* p. 3 (Rule 3). See also D. Stephens and C. Steer, ‘Conflicts in Space: International Humanitarian Law and Its Application to Space Warfare’, *XL McGill Annals of Air and Space Law*, 2015, p. 1, RUMLAE Research Paper No. 16-18, available at SSRN: <https://ssrn.com/abstract=2722315>.

³⁴⁴ See e.g. B. Cheng, ‘Article VI of the 1967 Treaty Revisited’, *1 Journal of Space Law*, 1998, p. 7. This is particularly important now in view of the rapidly increasing role played in outer space by non-governmental private bodies, see e.g. F. von der Dunk, ‘Legal Aspects of Private Manned Spaceflight’, in *Handbook of Space Law*, chapter 12.

³⁴⁵ See further Cheng, *Studies in Space Law*, chapters 17 and 18.

³⁴⁶ See e.g. the Exchange of Notes between the UK and Chinese governments with regard to liability for damages arising during the launch phase of the Asiasat Satellite in 1990 in accordance with, *inter alia*, the 1967 and 1972 Conventions: UKMIL, 64 *BYIL*, 1993, p. 689.

³⁴⁷ The claim was for \$6,401,174.70. See 18 ILM, 1979, pp. 899 ff. See also Christol, *Modern International Law*, pp. 59 ff.; and C. Q. Christol, ‘International Liability for Damage Caused by Space Objects’, *74 AJIL*, 1980, p. 346. B. Cheng has drawn attention to difficulties concerning the notion of damage here as including environmental damage: see International Law Association, Report of the Sixty-ninth Conference, London, 2000, p. 581. Note also that under article III of the 1967 Outer Space Treaty, all states parties to the Treaty agree to carry on activities ‘in accordance with international law’, which clearly includes rules relating to state responsibility. See also Gorove, *Developments*, part V; B. Hurwitz, *State Liability for Outer Space Activities in Accordance with the 1972 Convention on International Liability for Damage Caused by Space Objects*, Dordrecht, 1992; and J. A. Dennerley, ‘State Liability for Space Object Collisions: The Proper Interpretation of “Fault” for the Purposes of International Space Law’, *29 EJIL*, 2018, p. 281.

³⁴⁸ GA resolution 62/217. The Guidelines were produced by the UN Committee on the Peaceful Uses of Outer Space, A/62/20, A/AC.105/890, para. 99 and A/AC.105/848, annex II.

349 The International Law Association adopted in 1994 the Buenos Aires International Instrument on the Protection of the Environment from Damage Caused by Space Debris. This provides that each state or international organisation party to the Instrument that launches or procures the launching of a space object is internationally liable for damage arising therefrom to another state, persons or objects, or international organisation party to the Instrument as a consequence of space debris produced by any such object: see Report of the Sixty-sixth Conference at Buenos Aires, London, 1994, p. 7.

350 Resolution 47/68.

351 The UK Outer Space Act 1986 e.g. provides a framework for private sector space enterprises by creating a licensing system for outer space activities and by establishing a system for indemnification for damage suffered by third parties or elsewhere. The Act also establishes a statutory register of the launch of space objects. Note also that the US has signed a number of agreements with other states providing for assistance abroad in the event of an emergency landing of the space shuttle. These agreements also provide for US liability to compensate for damage and loss caused as a result of an emergency landing, in accordance with the 1972 Treaty: see *Cumulative DUSPIL* 1981–88, vol. II, p. 2269. In 1988, an Agreement on Space Stations was signed between the US, the governments of the member states of the European Space Agency, Japan and Canada. This provides, *inter alia*, for registration of flight elements as space objects under the Registration of Objects Convention of 1975, each state retaining jurisdiction over the elements it so registers and personnel in or on the space station who are its nationals. There is also an interesting provision (article 22) permitting the US to exercise criminal jurisdiction over misconduct committed by a non-US national in or on a non-US element of the manned base or attached to the manned base, which endangers the safety of the manned base or the crew members thereon. Before proceeding to trial with such a prosecution, the US shall consult with the partner state whose nationality the alleged perpetrator holds, and shall either have received the agreement of that partner to the prosecution or failed to have received an assurance that the partner state intends to prosecute.

352 This came into force in July 1984: see C. Q. Christol, ‘The Moon Treaty Enters into Force’, **79 AJIL**, 1985, p. 163.

353 See e.g. Cheng, ‘Moon Treaty’, pp. 231–2; and Christol, *Modern International Law*, chapters 7 and 8. See also R. Lee, *Law and Regulation of Commercial Mining of Minerals*

in Outer Space, Heidelberg, 2012.

³⁵⁴ See below, [Chapter 10](#), p. 540, regarding the ‘common heritage’ regime envisaged for the deep seabed under the 1982 Convention on the Law of the Sea.

³⁵⁵ See https://treaties.un.org/Pages/ViewDetails.aspx?src=IND&mtdsg_no=XXIV-2&chapter=24&clang=en.

³⁵⁶ The US has taken this position, see e.g. *DUSPIL*, 2017, p. 536.

³⁵⁷ See e.g. the US Commercial Space Launch Competitiveness Act 2015, the Luxembourg Loi sur l’exploration et l’utilisation des ressources de l’espace, No. 674 du 28 juillet 2017 and the UAE Federal Law No. 12 of 2019 on the Regulation of the Space Sector. Note also the US Presidential Executive Order on Encouraging International Support for the Recovery and Use of Space Resources, 6 April 2020, www.whitehouse.gov/presidential-actions/executive-order-encouraging-international-support-recovery-use-space-resources/. This has been followed by the publication of the ‘Artemis Accords’, www.nasa.gov/specials/artemis-accords/index.html, regarding which the US seeks international support for the exploitation and use of space resources. The European Space Agency is also formulating plans, reportedly, for the mining of natural resources on the moon, <https://edition.cnn.com/2019/01/22/europe/mining-on-moon-trnd/index.html>, as are other countries; see e.g. K. Vazhapully, ‘Space Law at the Crossroads: Contextualizing the Artemis Accords and the Space Resources Executive Order’, *Opinio Juris*, 22 July 2020. See also the Vancouver Recommendations on Space Mining, produced by the Outer Space Institute, 20 April 2020, [www.outerspaceinstitute.ca/docs/Vancouver Recommendations on Space Mining.pdf](http://www.outerspaceinstitute.ca/docs/Vancouver_Recommendations_on_Space_Mining.pdf).

10

The Law of the Sea

The seas have historically performed two important functions: first, as a medium of communication; and, secondly, as a vast reservoir of resources, both living and non-living. Both of these functions have stimulated the development of legal rules.¹ The fundamental principle governing the law of the sea is that ‘the land dominates the sea’ so that the land territorial situation constitutes the starting point for the determination of the maritime rights of a coastal state.²
